View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

CSCI505 Advanced Algorithms and Data Structures (3 semester hours)

This course explains the design, analysis, and implementation of data structures and algorithms essential for solving computational problems in computer science. Building upon foundational knowledge, students explore and implement advanced data structures and advanced algorithms, including binary search trees, linked lists, graphs, and hash tables. The course also addresses data storage methods, external storage techniques, sorting strategies, and a range of algorithmic design paradigms such as dynamic programming. Emphasis is placed on applying theory through programming languages like Python and other high-level tools to support software development and systems development. By working with these concepts, students strengthen their skills in analysis, implementation, and optimization, aligning with program outcomes in the broader subject of computer science. (Prerequisite: **CSCI500**)

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

CSCI510 Applied Machine Learning and Artificial Intelligence (3 semester hours)

This course offers a rigorous exploration of machine learning and artificial intelligence, focusing on both theoretical concepts and practical applications. Students study the mathematical and statistical foundations of machine learning models, including supervised learning, unsupervised learning, semi-supervised learning, and reinforcement learning. The course emphasizes an advanced understanding of neural networks, artificial neural networks, and deep learning architectures, along with optimization techniques and their use in domains such as natural language processing, computer vision, robotics, and healthcare. Through hands-on development, students gain skills in implementing these models using modern tools and frameworks while engaging in projects that address real-world applications of AI. The course also examines ethical issues and the societal impact of AI technologies, reinforcing critical knowledge within the broader computer science program and aligning with graduate-level outcomes in the subject area. (Prerequisite: **CSCI500**)

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

CSCI520 Big Data Analytics & Data Mining (3 semester hours)

This course provides an in-depth study of big data mining and analytics, emphasizing advanced techniques and practical applications across multiple domains. Students examine methods for data analysis, data processing, and data management with both structured and unstructured data, including large datasets, data warehouses, and data lakes. The curriculum covers statistical analysis, machine learning algorithms, feature engineering, and pattern recognition to support informed decision making in areas such as business, healthcare, and science. Through hands-on projects, students develop skills in using modern software, programming languages, and distributed computing frameworks to address real-world information challenges. This course strengthens knowledge within the computer science discipline, preparing learners to explore and apply analytics in diverse professional contexts while aligning with graduate-level program outcomes. (Prerequisite: **CSCI500**)

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

CSCI530 Advanced Cybersecurity & Network Defense (3 semester hours)

This advanced cybersecurity course examines strategies, tools, and techniques used in cybersecurity and network defense. Students learn to identify, analyze, and respond to cyber threats through applied training that includes intrusion detection, penetration testing, threat detection, and continuous monitoring. The course explores security controls, information security practices, and policies to mitigate attacks and manage risk across digital systems and enterprise environments. Emphasis is placed on both technical knowledge and practical skills, with hands-on experiences using real-world scenarios. Additional topics include cryptography, malware analysis, and the role of machine learning in advancing cyber defense. By integrating applied methods with broader information and security architecture, the course strengthens expertise for students and professionals pursuing careers in the program of computer science and related fields. (Prerequisite: **CSCI510**)

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

CSCI550 Advanced Software Engineering and DevSecOps (3 semester hours)

This advanced software engineering course provides a rigorous exploration of modern software engineering principles, practices, and emerging trends. Emphasis is placed on agile development, DevSecOps, and devops methodologies, highlighting their integration throughout the software development life cycle. Students study both theoretical foundations and applied techniques in software architecture, application development, system architecture, and requirements analysis, while also addressing software security, security testing, and related security best practices. Topics include continuous integration, continuous deployment, and CI CD pipelines, along with cloud computing, cloud services, and modern development environments. Through hands-on projects using industry-standard tools, students gain skills and knowledge essential to contemporary software development and information technology within the broader computer science discipline. (Prerequisite: **CSCI505** or **CSCI510**)

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

CSCI560 Human-Computer Interaction and User Experience (3 semester hours)

This human computer interaction course explores methodologies, tools, and techniques for designing effective and intuitive interactive systems. The course covers human computer interaction principles, user centered design, user interface design, interaction design, and human centered design, emphasizing both theoretical concepts and practical application. Students study usability testing, visual design, design thinking, and UX research to better understand user needs and how people interact with computer technology. Through hands on projects and case studies, students gain skills and knowledge in user experience design, building a solid foundation in applying UX design principles to interactive systems. The course situates human factors and interaction within the broader computer science discipline while preparing learners to apply best practices to diverse design processes and professional career pathways. (Prerequisite: **CSCI510**)

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

CSCI570 Advanced Cloud Computing (3 semester hours)

This advanced cloud computing course provides a comprehensive study of cloud computing, addressing both foundational concepts and advanced topics in cloud technologies. The course examines cloud architecture, cloud infrastructure, cloud applications, and cloud solutions, as well as deployment models that support modern enterprise business processes. Students gain knowledge of serverless computing, distributed systems, virtual machines, and data management, while also exploring emerging cloud technologies. Emphasis is placed on cloud security, compliance, and best practices for deploying and managing cloud computing services. Through hands-on projects, students apply skills and techniques using modern software tools to explore the benefits and challenges of cloud service environments. The course situates cloud computing within the broader computer science discipline, reinforcing understanding of critical practices and applications for academic and professional contexts at the university level. (Prerequisite: **CSCI530**)

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

CSCI580 Advanced Computer Architecture (3 semester hours)

This advanced computer architecture course provides a rigorous study of computer architecture and the design, analysis, and functionality of modern computer systems. The course emphasizes both theoretical concepts and practical techniques, covering advanced computer architecture topics such as instruction set design, instruction level parallelism, parallel architectures, and processor design, including out of order processors, branch prediction, and speculative execution. Students examine memory systems, including cache structures, cache coherence, memory hierarchies, and virtual memory, as well as interconnection networks and system-level design approaches. Additional areas of focus include optimization, performance, and efficiency in hardware and software solutions, reinforcing connections to algorithms, engineering, and computer science. Through applied analysis of principles and operation, students gain advanced knowledge needed to explore and develop effective designs for contemporary and emerging computer systems. (Prerequisite: **CSCI520**)

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

CSCI590 Advanced Operating Systems (3 semester hours)

This advanced operating systems course provides a comprehensive understanding of modern operating systems principles and operating system design strategies. It prepares students to address real-world challenges through modern techniques and the latest developments in the field. The course will cover various topics: process management, memory management, advanced file systems, distributed systems, optimization techniques, I/O systems, and security. A comprehensive survey of various operating systems, including Unix, Linux, MacOS, Android, real-time and embedded systems, and Windows, will provide a robust foundation for comparative analysis and performance optimization. In addition, the course material emphasizes key concepts in system-level communication, research, and applied problem solving, ensuring that students gain both theoretical knowledge and practical skills relevant to graduate-level program outcomes in computer science and artificial intelligence. (Prerequisite: **CSCI550**)

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

CSCI601 Capstone Project Phase I (3 semester hours)

This capstone course is designed to integrate knowledge and skills from the cutting-edge technologies and future trends shaping the field of computer science. Students will engage with the latest research and advancements, applying their comprehensive knowledge from previous coursework to real-world problems and case studies. The course offers direct access to industry challenges and opportunities, exposing innovative ideas. This course represents the initial phase of the Capstone project pathway. Within this course, students will engage in the selection of their project topic and the development of preliminary proposals, all under the guidance of their faculty members. (Prerequisites: **CSCI505**, **CSCI510**, and **CSCI520**)

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

CSCI602 Capstone Project Phase II (3 semester hours)

CSCI602 is the final stage of the graduate capstone project pathway, where students will implement their proposals developed in **CSCI601**. This capstone course represents the concluding stage of the capstone project pathway. This course emphasizes the practical application of research methodologies, data collection, or program development, and the integration of findings into a comprehensive written paper. Additionally, they will begin preparing for their final presentations, which will be based on their written work, and ultimately deliver these presentations as the culmination of their efforts. This course aims to develop students' ability to conduct independent research, synthesize information, and communicate their findings effectively. (Prerequisite: **CSCI601**)

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Criminal Justice (CMRJ)

CMRJ500 Criminal Justice Ethics (3 semester hours)

This course is an examination of issues of professional and ethical behavior within the criminal justice system. Key issues examined include professional behavior of the individual and the agency. Current topics such as law enforcement ethics, research ethics, and are examined.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

CMRJ501 Criminology (3 semester hours)

This course will examine the various theories and their application to criminal justice. Additionally this course will examine the implications of criminal acts in relation to behavior, discipline and causation. Analysis of criminal and non-criminal behavior is also addressed regarding certain causes, controls, and legal aspects of criminal behavior. Crime is analyzed from an interdisciplinary study of social problems and social responsibility perspectives.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

CMRJ512 Police Administration (3 semester hours)

The student will evaluate policies and procedures that are utilized in all phases of police administration. These include judicial decisions, which impact the legal status of the operation of police agencies. Additionally, administrative issues inherent in both large and small police organizations are assessed including: the history and context of police administration, police organizational tasks, leadership in the police organization, the role of the police manager, and the role of citizen oversight. Oversight committees addressing police accountability for community enforcement services are analyzed.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

CMRJ515 Sexual Exploitation/Children (3 semester hours)

This course will examine the social and legal problems involved with the sexual exploitation of children. Major issues that will be examined in this course will be child pornography, prostitution, sex trafficking, pedophilia, and international child abuse issues. This course will also explore options utilized for enforcement of the current laws designed to protect children from these crimes.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

CMRJ518 Deviant Behavior (3 semester hours)

This course examines deviant behavior and the common definitions associated with it. The course further identifies what social deviance is and what is considered to be deviant in today’s society. The sociological and psychological issues are also reviewed as they pertain to the methods of sentencing and the criminal justice system's approach to deviance. In addition, the theories associated with deviance are also explored.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

CMRJ522 Forensics (3 semester hours)

Students will explore the role of forensic science in the investigation of crime by introducing the non-scientific student to the field. The course will examine the different forensic science disciplines to include pattern evidence, fingerprints, body fluids, firearms, arson, and drug analysis. Scientific methodology as it applies to each forensic discipline will be discussed as well as technological advances making an impact in the field of forensics. The course will include development of case scenarios in order for students to apply critical thinking skills to learning concepts.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

CMRJ524 Organized Crime (3 semester hours)

This course examines the historical roots of organized crime and its current role within the American criminal justice system. Structural models are compared for understanding emerging groups. Special attention is paid to dependencies and cooperation among ethnic groups as well. Additionally, there will be a review of the activities associated with organized strategic aspects (i.e. profit-oriented ventures such as extortion, credit card fraud, counterfeiting, prostitution, drug trafficking, smuggling) and tactical issues (i.e. activities that support the criminal organization such as money laundering, violence, corruption, and recruitment).

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

CMRJ525 Negotiations: Crisis and Hostage (3 semester hours)

An examination of how to effectively manage critical incidents and hostage situations in law enforcement and corrections. Combining principles and applications from criminal justice, psychology, sociology, communications, business and other disciplines, this course presents an effective conceptual framework students can apply in high-pressure situations.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

CMRJ526 Drug Cartels and the Narcotics Threat (3 semester hours)

This course covers the development of the drug cartels and their organization, production, and distribution networks. This course will focus on the regions known as the Golden Triangle and Golden Crescent, and the drugs that are typically manufactured and transported from these areas. This course also provides an overview of U.S. counter-drug efforts and basic information on illicit drugs. Additionally this course provides an historical overview of drug trafficking including a focus on the opium wars in China.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

CMRJ527 Crime and Mental Disorders (3 semester hours)

In the last 30 years, the link between criminal behavior and mental disorders has become more evident. Because of the apparent link between mental health disorders and criminal behavior there has been an increasing need to understand how mental health diagnoses influences behavior. This class will analyze mental disorders such as schizophrenia, personality disorders, brain damage and mental retardation and their role in criminal behavior. This graduate level class will focus on rehabilitation methods and its effectiveness for addressing the problem of mental health in the criminal justice system.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

CMRJ531 Criminal Profiling (3 semester hours)

This course will examine in detail crimes such as murder, serial killing, rape, and related crimes of violence from a socio-psychological profiling perspective. Topics covered will include the foundations of criminal profiling, the elements and goals of criminal profiling, multidisciplinary theory, victimology, geographic profiling, the scientific method as applied to behavioral theories, and ethical considerations. Modus Operandi and signature behaviors will be analyzed and inductive and deductive profiling methods will be assessed.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

CMRJ601 Cases in Executive Decision Making (3 semester hours)

This course is a study in the major decisions made by law enforcement executives from a variety of levels and locales. These decisions include issues in crisis management as well as inter-relationships among community leaders with police executives. Management styles are addressed to determine the most effective methods of implementing solutions to macro social community problems. Additionally, strategic decision-making processes are assessed to evaluate fairness and the aspects of voluntary cooperation and attitudes of all parties. The intent of the course is to provide a thorough analysis of executive decision making from which the student can appreciate the strengths and weaknesses of executive decisions while reflecting on the student's own style and approach to decision making.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

CMRJ696 Capstone - Theory to Practice (3 semester hours)

This course enables the student to demonstrate the understanding of current criminal justice theory by applying theories to practice in the criminal justice system. Students are to address two criminal justice theories from two of the three pillars of the criminal justice system, law enforcement, courts, and corrections. During Week 4, the student will submit a paper with a 20-30 page body on one current criminal justice theory impacting one of the three criminal justice pillar. During Week 8, the student will submit a paper with a 20-30 page body on one current criminal justice theory impacting one of the other two criminal justice pillars. Thus the student will complete two papers. For example the Week 4 paper will have a law enforcement focus while the Week 8 paper will have a corrections focus. The intent of the course is to demonstrate understanding of how criminal justice theories apply in two components of the criminal justice system.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

CMRJ698 Comprehensive Examination in Criminal Justice (0 semester hours)

Comprehensive final examination for students in the Master of Arts in Criminal Justice program. The "Comprehensive Final Exam" is tailored specifically to each program and must be taken after students have completed 36 hours of study (i.e. during the semester following the final course) and successfully completed before the award of a degree.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Cybersecurity (ISSC)

ISSC621 Computer Forensics (3 semester hours)

This course examines information concealment techniques, technologies, hardware, software, and relevant legislation for cyber forensics to reveal and track legal and illegal activity. The course examines the process for investigation and introduces the tools and procedures required to legally seize and forensically evaluate a suspect machine. Also covered are the rules of evidence, chain of custody, standard operating procedures, and the manipulation of technology to conceal illegal activities, and revealing concealed information using cyber forensics.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ISSC630 Advanced Cybercrime Analysis (3 semester hours)

The global reach of the Internet, the low cost of online activity, and the relative anonymity of users has led to an increase in computer related crimes. This course focuses on cybercrime investigation and prevention; it appraises the legal issues related to on-line criminal conduct, the collection of electronic evidence, and the onslaught of new technology. This course also analyzes the phases, processes, and challenges of cybercrime investigations, and it examines technical, legal, and social issues relating to the search and seizure of digital evidence and computer forensics. Students will encounter the challenges of the latency between technology and the law.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ISSC631 Cyber Ethics: Privacy and Intellectual Property (3 semester hours)

This course is an advanced study of information ethics, cyber privacy, and intellectual property. It examines the ethical, economic, and societal issues that face today's information-entrenched society; this includes intellectual property rights, privacy, accessibility and censorship. The explosive growth of information technology, the increased competition in the global marketplace, and the surge in the use of information to protect society from terrorism has led to the unintended erosion of fundamental rights and values. This course appraises the current state of information ethics, the dangers and opportunities presented by information technology, and the potential solutions to the inherent risks in today's information-bound society.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ISSC640 Computer Networks and Data Systems (3 semester hours)

This course is a study of computer networks and the evolution of modern communication systems. It examines the various layers of the basic reference models such as the five-layer IP model or the seven-layer OSI model, by scale, connection method, network architecture, or topology. This course also includes an in-depth analysis of transmission protocols, communications systems, and networks. Prior knowledge of networks and networking is recommended.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ISSC641 Telecommunications and Network Security (3 semester hours)

Telecommunications networks are a critical component of the global economic and social infrastructures. Securing critical infrastructure is an established priority within Information Security Management. This course examines the field of secure telecommunications networks, including emerging threats, system vulnerability, network evolution, and network defense mechanisms.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ISSC642 Intrusion Detection and Incident Handling (3 semester hours)

This course examines the tenets of Intrusion Detection, Intrusion Prevention, and Incident Handling. Intrusion Detection focuses on the methods to detect attempts (attacks or intrusions) to compromise the confidentiality, integrity or availability of an information system. Also included is an analysis of the principles and practices of intrusion detection, intrusion prevention, and incident handling; network-based, host-based, and hybrid intrusion detection; identifying attack patterns; deployment of resources and responses to handle the incident, surveillance, damage assessment, risk assessment, data forensics, data mining, attack tracing, system recovery, and continuity of operation.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ISSC650 Advanced Digital Forensics (3 semester hours)

This course is an advanced study of the models of investigative methods for finding evidence in a wide scope of disparate digital devices such as computers, laptops, netbooks, networks, mobile devices – phones, notepads, PDAs, digital audio and video players, and any device or appliance that carries an electronic circuit board which could potentially store data or information. It also examines the science, the evidence, and the law related to digital forensics, the validation of findings, and determination of acceptable and irrefutable evidence in a court of law. It also evaluates various digital forensics models for data identification, preservation, collection, examination, analysis, preparation, and presentation. (Prerequisite: **ISSC621**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ISSC651 Advanced eDiscovery (3 semester hours)

This course is an advanced study of the principles and methodologies of the e-discovery process and the increasing importance of digital evidence in litigation. Topics include contemporary investigative methods, legal issues, cost containment, collecting and prioritizing data sets, preservation of digital evidence, document review, metadata and spoliation considerations, comparative assessments, and forensic investigations. (Prerequisite: **ISSC621**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ISSC660 Information Assurance (3 semester hours)

The course analyzes computer and systems security measures by examining a model for information assurance; it also examines the components of a comprehensive Information Assurance plan. Topics included are: asset identification, human factors, compliance with regulations, personnel security, risk assessment and ethical considerations, IA policy, as well as computer and network security tools.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ISSC661 Information Assurance: Assessment and Evaluation (3 semester hours)

This course is an advanced study of the principles, practices, procedures, and methodologies to assure the protection and availability of vital digital information systems assets. It examines information assurance, incident management and response, and security standards; and it appraises the convergence between information security, information systems security, and information warfare. This course appraises organizational, legal, technical, and ethical issues related to securing vital digital assets. Topics include: the role of the corporate security officer, corporate cybercrime, electronic commerce, cryptography, and international standards, policies, and security acts. (Prerequisite: **ISSC660**)

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ISSC662 Information Assurance: Capability Maturity and Appraisals (3 semester hours)

This course examines the phases, processes, standards, the levels, and the process areas of the INFOSEC Assessment Capability Maturity Model (IA-CMM). The IA-CMM minimizes false indications of quality and maturity by relating the IA-CMM process areas to the INFOSEC Assessment Methodology (IAM). This course appraises the principles and methodologies of the IA-CMM; and applies it to develop an organizational ratings profile to provide a measure of maturity. The ratings profile is used to develop strategies to mature the organizational processes. (Prerequisite: **ISSC660**)

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ISSC680 Information Security Management (3 semester hours)

This course explores the management of information security in modern organizations, focusing on strategic, technical, and human factors that ensure the confidentiality integrity and availability of digital assets. Students will learn to identify, evaluate, and respond to contemporary threats (including cloud, AI/ML, IoT, and supply chain risks) by applying risk management frameworks, security controls, security architecture models, and information security management practices. Drawing from topics such as access control, physical controls, network security, computer security, information systems security, and risk assessment—all foundational elements emphasized in the course curriculum—they will analyze how organizations protect data and manage information security risks across information systems and other information assets.
Through case studies and discussions, students will develop critical skills in incident response, business continuity, governance, and cultivating a resilient cybersecurity culture. The course also strengthens student capabilities in evaluating security measures, conducting risk analysis, modeling security threats, and supporting effective security management within critical business environments.
Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ISSC698 Cybersecurity Studies: Capstone Practical (3 semester hours)

This Cybersecurity Studies: Capstone Practical course integrates the knowledge, skills, and posture acquired in the program courses. This course is the capstone course of studies completed toward the graduate degree in Cybersecurity Studies. This course will only be offered in 16-week sessions. Students will complete an applied project design that demonstrates mastery and application of advanced research and analytic skills related to the learning outcomes of this degree program. This course may not be taken until all other courses are COMPLETED and student has a 3.0 GPA.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ISSC699 Cybersecurity Studies Capstone (3 semester hours)

This Master's degree capstone course in Cybersecurity Studies is an integrative, multi-disciplinary course that applies the knowledge, skills, and attitudes obtained in the core courses.
NOTE: This course may not be taken until all other courses are COMPLETED and student has a 3.0 GPA.
THIS COURSE IS 16 WEEKS.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Doctorate (DOCT)

DOCT700 Qualitative Methods (3 semester hours)

This course provides an overview of methods used in qualitative research and its theoretical concepts. Elements of qualitative research design such as ethics, developing research questions, sampling techniques, and data collection methods such as observation, interviews, documentary evidence, and audio-visual materials are addressed and applied. (Prerequisites: **SSGS700** and **GLBS710** or **INTL710**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

DOCT701 Quantitative Methods (3 semester hours)

This course provides a foundation in theoretical concepts and practical considerations relating to quantitative research design and methodology. Students will gain the knowledge and skills to do primary research in both the academic setting and the practical world. Theoretical and conceptual elements of quantitative research design are examined and applied, including the scientific method; causal inference and hypothesis construction; variables, measurement, and operationalization; threats to validity and reliability; and types of error and bias. In addition, the course exposes students to both causal and non-causal types of quantitative research design, including experimental, quasi-experimental, correlational/associational, comparative, and descriptive designs. This course, in combination with **DOCT700** and **DOCT702**, is intended to provide a framework and skills that doctoral students can draw upon in planning and carrying out primary data collection and analysis for dissertation research. (Prerequisites: **SSGS700** and **GLBS710** or **INTL710**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

DOCT702 Statistics (3 semester hours)

This doctoral seminar provides an overview of introductory statistical procedures used in quantitative research and their application. Its focus is to enable students to develop a foundation of basic statistical literacy. Students will assess the role of statistics in quantitative research and develop the competency to conduct statistical tests and procedures. Both descriptive and inferential statistics are addressed. Statistical concepts involving sampling, variables, describing data, hypotheses and models, analysis of variance, probability theory, inference, and the foundations of bivariate and multivariate regression will also be covered in this course. Students will gain competence in a statistical software program. Students will analyze data and research situations to interpret the meaning underlying the data and how statistics can be used to address important research questions. (Prerequisites: **DOCT701**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

DOCT704 Professional Practice II (1 semester hours)

During the course, students gain familiarity with the professional academic conference circuit and presentation expectations. Students will develop or refine their CV and begin to create concept maps related to their dissertation interests. (Prerequisites: **SSGS700** and **GLBS710** or **INTL710**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

DOCT705 Professional Practice III (1 semester hours)

During this seminar, students will gain experience developing abstracts for conference proposals. Students will continue to work on writing and communication skills. During this course, students will schedule and complete their formal check-in to assess their overall progress in their doctoral program of study. (Prerequisite: **DOCT704**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

DOCT706 Professional Practice IV (1 semester hours)

In this course, students begin pre-work on their dissertation proposal. Students will gain additional insight into strategies for building their dissertation committees and will review Year Two and Three program milestones. Students will also receive additional training on the Institutional Review Board and research grant writing. (Prerequisite: **DOCT705**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

DOCT707 Professional Practice V (1 semester hours)

The focus of this course is preparing for the e-portfolio defense, the practicum, and the dissertation proposal. Students will take a deeper look into emotional intelligence to include the different EQ-I elements and levels. (Prerequisite: **DOCT706**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

DOCT708 Professional Practice VI (1 semester hours)

Students will continue the study of emotional intelligence. They will complete a reflection paper to help shape the portfolio and place the artifacts within the current body of knowledge. In preparation for the dissertation proposal defense, students will give a 3 Minute Thesis-style presentation to articulate the academic and professional practice significance of their doctoral work. (Prerequisite: **DOCT707**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

DOCT715 Seminar in Strategic Leadership (3 semester hours)

This seminar examines classic and contemporary literature on best practices in leadership relevant to developing personal leadership skills and on the role of strategic leadership in developing a vision and strategy for an organization. (Prerequisites: **SSGS700** and **GLBS710** or **INTL710**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

DOCT716 Seminar in Business and Financial Management (3 semester hours)

Students will perform practical research in business and financial management. The emphasis will be on developing an integrated framework for understanding issues in financial management. The course will examine the fundamentals of financial management, models in corporate finance, and contemporary topics in financial research. Topics include the theory of the firm's choice, financial statement analysis, financial instruments, capital markets, project and corporate valuation, global finance operations, and ethics in finance. (Prerequisites: **SSGS700** and **GLBS710** or **INTL710**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

DOCT721 Residency: Preparing for the Practicum and Dissertation (2 semester hours)

This course fosters interaction amongst students, program administrators, faculty, and support staff. A detailed overview of faculty research areas, collaborative research opportunities, and the dissertation proposal and dissertation requirements are provided. Students will discuss the practicum experiential learning requirement. Key skillsets will be reinforced, which will set the students up for success as they move into the dissertation phase of their program of study. (Prerequisite: **DOCT722** or **DOCT723**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

DOCT722 Residency: Scholar/Practitioner Presentation (2 semester hours)

This residency involves presenting to the academic and/or practitioner community original research that advances academic and professional practice in the discipline. (Prerequisites: **DOCT705**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

DOCT723 Residency: Foreign Experience (2 semester hours)

Students create an individual residency plan with the approval of the Department Chair. The residency may include travel outside of the United States for research, field-related volunteer work, or a conference presentation at an international academic conference. Also, students may present at an academic conference in the United States focusing on global issues. (Prerequisites: **DOCT705**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

DOCT894 Dissertation Proposal Defense (3 semester hours)

In this course, students will develop their skill set surrounding the different components of the dissertation proposal. The skill set can include analyzing and producing deliverables centered on a comprehensive description of the problem/research question(s), a literature review, and detailed research design. (Prerequisite: All coursework with the exception of **DOCT897**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

DOCT897 Practicum (3 semester hours)

The Practicum course provides a hands-on experience in a professional environment. This course involves a supervised opportunity where academic skills and knowledge are applied to a professional environment. Refer to the Practicum guidelines in the Doctoral Manual. (Prerequisite: **DOCT721**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

DOCT899 Dissertation (1 semester hours)

The dissertation is a comprehensive document that is an original contribution and one that advances theory, research, and practice in the global security discipline. It is written under the direction of the dissertation committee and students must be enrolled in the dissertation course to proceed to this stage. All program requirements and the proposal defense must be successfully completed before beginning the dissertation. This course is a 16-week course. Students must continuously enroll in the course until successful completion of the oral dissertation proposal defense and full dissertation and corresponding oral defense. Refer to the dissertation guidelines in the Dissertation Manual. (Prerequisite: **DOCT894**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Education (ADHE)

ADHE601 Introduction to Higher Education Administration (3 semester hours)

This course provides a starting place to introduce the primary areas of responsibility for higher education administration with the various contexts in which higher education is situated, whether public or private, for-profit or non-profit, or onground or online. Students learn about the essentials of institutional mission, organizational structure, institutional evaluation and assessment, human resources, governance, financial and budgeting oversight, resource management, decision-making, internal and external constituencies, culture, student services, student outcome assessment, program evaluation, and organizational change associated with university leadership. The course will present and connect organizational theories for higher education administrative practice and delivery that relate to university student persistence, retention, and success.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ADHE605 Enrollment Management, Admissions, and Finance in Higher Education (3 semester hours)

This foundational course presents an array of enrollment management processes and strategies that contribute to recruitment, retention, admission, and enrollment of students at institutions of higher education, both undergraduate and graduate. Particular attention will be given to the role of various stakeholders in relation to various factors influencing enrollment and admissions: financial aid, scholarships, educational readiness, diversity considerations, academic standards, learning formats, and institutional goals. Students will be exposed to recruitment and enrollment strategies based on current research, enrollment prediction and selection practices, marketing, applicable advisement practices, ethical guidelines, and institutional standards pertaining to student success.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ADHE611 Technology, Curriculum, and Instruction for the Online Campus (3 semester hours)

Recognizing the constantly-morphing role that technology and innovative online campus platforms play in the landscape of education requires higher education administrators to stay in tune with current trends and emerging modalities. This course explores emerging trends with regard to classroom management systems and best practices in curriculum and instruction for the online institution of higher education. Students will discuss topics involving innovative online and classroom technologies, course management tools, cyber-ethics, instructional practices, curriculum development, classroom support services, and integration of various adjunct platform applications that support student learning in an online campus.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ADHE613 Communication Strategies for Online Higher Education Administration (3 semester hours)

This course examines the essential approaches and policies related to effective communication in the online administration of higher education involving both internal and external stakeholders. Key topics include communication theory and best practices in a virtual campus environment; identifying differences in onground and online administration; developing, maintaining, and coordinating a remotely working team and support staff; establishing and implementing faculty online teaching practices and accountability; working with disciplinary issues involving online students and faculty; communication issues for human resource development in an online institution; working with staff and faculty expectations across time zones and cultural variances; and, campus/student life in an online environment.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ADHE621 Online Campus Compliance Issues and Accreditation (3 semester hours)

The unique and emerging issues surrounding government, military, and industry-related compliance in an online context are compounded by the challenge of identifying, implementing, and verifying accreditation standards in a virtual campus. This course prepares students to develop and administer a plan to fulfill current and prevailing standards in higher education. With unique differences in performance expectations across sectors and accrediting bodies, students will examine the development of a process and teams in order to address the array of associated issues of compliance and accreditation in an online context.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ADHE631 Higher Education Strategic Planning, Innovation, and Institutional Advancement (3 semester hours)

This course introduces students to the practices and methodologies of developing strategic plans that result in the conceptual and practical processes associated with innovation and institutional advancement within higher education. Essential discussion topics include mission, vision, and values alignment, managing and implementing organizational change, marketing/communications/promotion, alumni relations, financial resource development, program evaluation and review, innovative teaching and learning modalities for effective higher education, and strategic planning execution. Students will examine case studies and real-world scenarios, as well as consider the ethics of professional practice and strategic planning in both for-profit and non-profit settings. There will be an examination of resource development strategies and their relationship to university strategic priorities and objectives.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ADHE639 Community College Administration (3 semester hours)

The community college setting provides unique challenges requiring conceptually relevant and expertise appropriate application of higher education administration. This course examines the history, philosophy, management functionality, and financial resourcing associated with community college administration and the effective navigation skills pertaining to the associated leadership responsibilities. Attention will be given to the preparedness of incoming high school students for college through the forging of relationships with secondary education providers, including dual-enrollment credit programs, and by consideration of graduation and retention rates at the community college level. The course will explore special issues related to the relationship of the community college to the local region and workforce, the role of community college online course instruction with regard to four-year for-profit and non-profit institutions, issues regarding student transfers to four-year institutions, consideration of potential administrative redesign for the future, and initiatives geared toward increasing student outcomes.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ADHE644 Crisis Management in Higher Education (3 semester hours)

This course prepares college and university administrators to take effective action during crises, as well as to develop protocols and actions steps that diminish the likelihood for future occurrences. Students examine emergency preparedness that extends confidence in the long-term safety, security, and success of their institutions. Key topics also include threat assessment, hazard mitigation, outcome prediction, and organizational resilience and survival amid natural and human-authored emergencies and disasters. Students will draw upon case studies based on actual events, and will discuss risk analysis/assessment and formulation of a comprehensive plan and organizational strategy to alleviate crises and work with support public safety and emergency services agencies during a variety of scenarios, including mass casualty incidents. Risk factors associated with mental health concerns, substance abuse, aggressive behavior, bullying, and violence will also be examined.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ADHE649 Critical Issues in Higher Education (3 semester hours)

This course examines acute current and future issues and trends that face higher education in America and abroad in a variety of college and university contexts, both onground and online. Students will examine the changing scene of higher education in terms of for-profit and non-profit settings amid the marketing and financial realities that challenge the future realities of public and private universities and colleges. Special focus will be given to current events and controversies. Topics include, but are not limited to the following: the changing demographics of the college and university scene; campus politics, clubs, and campus culture; the impact of technologies and online learning strategies on access to education; the increasing competition and related ethics discussions concerning public/private, for-profit/non-profit, and onground/online universities; and, the prospective direction of higher education within a global and virtual student body. What are the higher educational needs of the student of the future, and what will universities need to consider in order to meet those needs?

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ADHE695 Capstone (3 semester hours)

The Capstone is the culminating required course for the student who already works in a higher education administration-related role and desires to advance their career. The course exhibits the capability of the student within higher education administration through the demonstration of their synthesis of the related theory and practice. Students work with a faculty advisor to develop a research prospectus that addresses a current issue facing higher education, preferably within the student's context of higher education. The Capstone culminates with an E-Portfolio and Oral Presentation. (Prerequisites: **EDUC640** Research Methods; Completion of a concentration related to the program of study.)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ADHE698 Practicum (3 semester hours)

The Practicum is the culminating required course for the student who is preparing to enter a higher education administration-related role. Students will take theory to practice during practicum and gain supervised professional experience in their concentration. Students will complete 150 hours at an approved practicum site. This course includes a practicum seminar during which students will reflect on their practicum experiences and connect these to the virtual classroom learning they have had in their graduate program. Approval of practicum site and position are required before students can begin their compulsory 150 hours. The Practicum culminates with an E-Portfolio and/or Oral Presentation. (Prerequisite: Completion of all core courses plus at least half of a concentration of courses related to the program of study)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Education (EDUC)

EDUC501 Human Growth and Development (3 semester hours)

This course examines theories of child, adolescent, and young adult development and learning. It introduces a comprehensive view of human development across the lifespan, drawing on the application of major theoretical positions - both historical and current. Developmental themes are discussed in terms of their application to typical and atypical human development in children, adolescents, and young adults. Concepts related to the significant role that transitions play in development throughout the lifespan will be integrated throughout the course. Application of theory to the school setting in the areas of learner development, learner styles/differences, the nature of the learner, and learner motivation are discussed.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC503 The Professional Educator (3 semester hours)

This course is intended to provide individuals with the knowledge and skills needed to succeed in the Master of Education program. Students will explore what it means to develop as a professional educator and how this impacts teaching and learning. The course examines the significance of various educational theories, historical developments, philosophies, pedagogical approaches, basic research designs, and educational paradigms. Students will discover how different social, emotional, physical, and ethical issues impact various aspects of K-12 classrooms, and other instructional settings. Effective use of technology as a tool in educational situations will be emphasized, as well as how educational research can alter classroom practice.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC504 Curriculum, Instruction, and Assessment (3 semester hours)

This course examines curriculum, instruction, and assessment in the context of various standards and accountability and their relationships to improvement in student learning, based on sound pedagogical approaches. The importance of alignment to learning outcomes and the necessity for valid assessments are discussed. Methods for collecting various assessment data; analyzing assessment data; creating campus curriculum and instruction goals; and implementation issues related to accountability, planning, and collaboration are addressed. The use of technology to assist with accurate assessments is presented.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC511 Foundations of Higher Education (3 semester hours)

Foundations of Higher Education is a comparative and historical survey of colleges and universities in the United States. The historical, social, and philosophical influences and assumptions that have shaped the growth and purpose of higher education will be studied from Colonial era to "virtual" public and private universities. Major areas of focus include the evaluation of higher education, contemporary issues, and policies and practices that characterize the operational environments of higher education institutions in the 21st century.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC516 Financial Management in Higher Education (3 semester hours)

This course will examine and analyze the factors, challenges, and complexities of financing higher education institutions. Students will develop perspectives of how campuses are funded through a variety of revenue streams while also gaining practical experience to understand financial concepts, processes, institutional considerations, and budgetary tools. (Prerequisites: **EDUC511** and either **SAHE510** or **ADHE601**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC517 Ethics, Law, and Policies in Higher Education (3 semester hours)

This course will examine ethical and legal issues relevant to higher education institutions and the campus policies commonly in place to address them. Key legal cases, statutes, and constitutional laws will be reviewed and students will use case studies to explore how campus leaders have upheld these decisions and, in some cases, responded to crises. (Prerequisites: **EDUC511** and either **SAHE510** or **ADHE601**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC519 The Professional School Leader (3 semester hours)

This course serves as an introduction to the skills one needs to become an effective school leader. Course activities involve having the potential leader examine the qualities of effective leadership, exploring definitions of leadership, and the creation of a personal model for leadership practices. This course provides students with opportunities to reflect on personal and professional goals while gaining an understanding of the role of building administrator.

Note: This is required as the first course in the M.Ed. in Educational Leadership program.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC521 Different Perspectives on Teaching and Communicating (3 semester hours)

This course, designed for educators, examines issues related to promoting learning opportunities in the classroom for all students, including effective approaches to encourage collaboration among different colleagues, staff, parents, and students. Interpersonal communication skills – to include speaking, listening, reading, and writing - and their effect on individuals, organizations, and communities will be discussed. Topics examined include ethnic, cultural, gender, class, religious, and linguistic differences.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC522 Supervision of Instruction (3 semester hours)

This course focuses on the ways in which teachers and educational professionals incorporate instructional leadership into their organizational behavior and create instructional practices that raise levels of teaching and learning. The course focuses on teachers as leaders, the importance of teacher leadership to improve outcomes in educational settings, and Professional Learning Communities (PLCs). (Prerequisite: **EDUC503**).

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC523 Supervision of Instruction (3 semester hours)

This course will study the evaluation process and candidates will learn how to use aspects of effective teaching strategies when working with teachers during the observation/walk-through process. Strategies for coaching and mentoring teachers for improved student achievement will be presented. Candidates will focus on the process of gathering data for the formal evaluation process and on providing professional development to meet teacher needs. Attention will also be given to analyzing and interpreting assessment results and other instructional data and how to deliver effective professional development to improve teaching and learning.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC527 Classroom Management for the 21st Century (3 semester hours)

This course is designed for the practicing K-12 education professional and focuses on positive classroom management approaches and strategies. This course reviews models of classroom management as well as the fundamentals of behavior change. Program candidates will explore systematic approaches including Response to Intervention (RTI) and Positive Behavioral Interventions and Supports (PBIS) and topics such as cultural considerations, data tools, assessment and analysis of behaviors, and fostering community and collaboration in classrooms. In this course, candidates will focus on implementing strategies for class-wide, small group, and individual intervention as well as methods for monitoring student progress. Equivalent to **EDUC524**. (Prerequisite: **EDUC503**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC528 Classroom Management for the Digital Educator (3 semester hours)

This course is designed for the practicing K-12 education professional or leader who teaches in a virtual or hybrid classroom setting. The focus is on proactive and reactive positive classroom management approaches and strategies that are unique to a digital learning environment. Program candidates will explore systematic approaches including Response to Intervention (RTI) and Positive Behavioral Interventions and Supports (PBIS) and topics such as cultural considerations, data tools, assessment and analysis of behaviors, and fostering community and collaboration in online classrooms. In this course, candidates will focus on implementing strategies for class-wide, small group, and individual intervention as well as methods for monitoring student progress.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC531 Maximizing Student Achievement Through Effective Assessment (3 semester hours)

Educators learn the appropriate methods for selection, administration, and interpretation of assessments in K-12 education and related instructional settings. Research and statistical concepts such as reliability, validity, and standard error of measurement are reviewed. Educators will become familiar with the most frequently used personality, educational, intelligence, formative, and summative assessments. Additional topics include historical perspectives, testing ethics, and assessment accommodations for different populations.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC536 Foundations of Coaching (3 semester hours)

Foundations of Coaching is an eight-week course designed to introduce the models and basic skills used in executive coaching and/or life coaching practices. This course introduces the vital skills, methods, and strategies required of an effective coach including developing coaching relationships, setting goals and planning, developing awareness, asking powerful questions, communication and language, action and accountability and facilitating learning and results. Participants will examine various coaching models and gain knowledge of the ethical considerations associated with coaching relationships. This training prepares participants to coach individuals, groups, and teams for performance, development, skills and personal/professional growth. Participants will engage in coaching conversations, apply best practices, and practice creating empowering coaching experiences.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC549 Elementary School Arts Across the Curriculum (3 semester hours)

The course addresses visual and performing arts standards and their integration across core elementary curriculum. The course is designed to introduce elementary teacher candidates to the application of visual and performing arts content across the areas of mathematics, science, language/literature, and history/social sciences, including current events and humane topics. The course focuses on learning about, with, and through the arts.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC561 Issues and Ideas in Special Education (3 semester hours)

This course provides educators with an opportunity to critically examine major contemporary issues related to field of special education to include legal, curricular, and instructional procedures appropriate for students at the elementary, middle, and secondary school levels, or in other instructional settings. (Prerequisite: **EDUC503**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC570 Personnel and Human Resource Management (3 semester hours)

This course will focus on the skills necessary for principals to effectively work with faculty and staff. Current theories and practices relating to recruitment, development, and appraisal of personnel will be covered. The course will examine specific personnel functions such as recruitment, selection, retention, and evaluation. Additional topics include conflict resolution, effective communication skills, and creating and maintaining a positive school environment.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC590 Differentiation for Learners in Mixed Ability Classrooms (3 semester hours)

This course is designed to give regular education teachers strategies to use in academically and culturally different classrooms. Using case studies as a launching point, course participants will examine the complexities of balancing the needs of gifted education, general education, special education, and culturally different students in a standards-driven climate. Use of tiered assignments, alternative assessments targeting different intelligences, and other modifications will be evaluated, implemented, and refined. Course participants will collaborate to address beliefs, best practices, challenges, current research, and ways to apply them to their own teaching practice.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC596 Literacy Instruction for Struggling and Challenging Students (3 semester hours)

This course explores a variety of issues and strategies related to literacy and literacy assessment in the early and middle grades. Cases focus upon the problems and opportunities related to literacy instruction for at-risk student populations.

This course explores a variety of issues and strategies related to literacy and literacy assessment in the early and middle grades. Content and activities focus on phonemic awareness, phonics, comprehension, vocabulary, and fluency and related strategies through differentiated instruction, technology integration, and family partnerships. The focus of the course is on struggling student populations and developing effective instructional and different assessment skills needed for teaching emergent, beginning, and instructional-level readers. (Prerequisite: **EDUC503**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC599 Issues in TESOL Education (3 semester hours)

This course provides an examination of cultural groups, including aspects of communication, belief systems, and value orientations, as well as patterns of thinking and behaving with implications for instruction. Basics of second language acquisition theories and practices and fostering home/school relationships for K-12 learners are explored.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC601 Methods and Materials in TESOL Education (3 semester hours)

This course focuses on evaluating, developing, and applying instructional strategies for supporting English Language Learners (ELLs) in content area learning. Participants will reflect upon using evidence-based assessment and instructional practices to enhance learning in different classroom environments. Beliefs, best practices, challenges, current research, and applications to one's own teaching practice will be explored with an emphasis on ELL lesson planning, assessment, and technology integration.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC603 Applied Linguistics in TESOL Education (3 semester hours)

Through this course, participants will become knowledgeable about the nature and structure of language and how first and second languages develop. Participants will explore language teaching strategies consistent with the current understanding of the nature, structure and development of language. By developing a repertoire of effective strategies, participants will become more proficient at supporting students' second language development. Educators will investigate best practices and current research and consider how to adapt and integrate these principles into their own educational practice.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC604 Leadership in Higher Education (3 semester hours)

In Leadership in Higher Education, students thoroughly examine various leadership theories and develop the ability to draw upon multiple paradigms and perspectives to improve their practices as leaders. Students will analyze current challenges in Student Affairs and discuss the leadership skills needed from all administrators involved. Throughout the course, students will reflect on how their values and philosophical perspectives influence their day-to-day leadership decisions and practices and how they respond to crises. (Prerequisites: **EDUC511** and either **SAHE510** or **ADHE601**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC611 Identifying and Diagnosing Reading Difficulties (3 semester hours)

This course is designed for classroom teachers to effectively assess classroom reading. Participants will learn how to administer formal and informal measures of reading assessment, including screening, diagnostic, and progress monitoring measures. The assessment-to-instruction connection is emphasized with a focus on emergent literacy, word recognition, fluency, spelling, comprehension, and affective factors. Educators will use a variety of assessment tools, practices, and adaptations to plan and evaluate effective reading instruction.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC612 Issues and Models of Language Arts Education (3 semester hours)

This course is designed to assist educators in the teaching of reading and language arts. The focus will be on reading, writing, listening, and speaking. The emphasis will be on creating environments conducive to developing all students' skills in the four language arts using research-based instructional strategies. The course also focuses on differentiating instruction for students of varying literacy levels.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC613 Teaching Reading and Writing across the Content Areas (3 semester hours)

This course concentrates on interdisciplinary teaching and learning in elementary, middle, and high schools. Witnessing and discussing a range of cross-curricular activities, participants will develop an understanding of the benefits, challenges, and essential components of effective integrated instruction.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC614 Living and Learning with Exceptional Students (3 semester hours)

Course participants will develop skills required for teaching students with special learning needs, as well as students who are at-risk for academic or social failure. The concepts of educator collaboration, least restrictive environment, accommodations and modifications, confidentiality, behavior management, identification, categories of disabilities, and giftedness will be reviewed. Educators will analyze beliefs, evidenced-based practices, challenges, and applications to their own teaching practice. (Prerequisite: **EDUC503**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC616 Foundations in Special Education and the Individuals with Disabilities Education (3 semester hours)

This course addresses legal trends and issues related to the Individuals with Disabilities Education Act (IDEA), including the identification process that schools must follow: child study, assessment, eligibility, IEP development, and placement. Educators will analyze the legal requirements as defined in IDEA, specifically the requirements for Free and Appropriate Education (FAPE), the Least Restrictive Environment (LRE), and the development of Individualized Education Plans (IEPs). Course participants will analyze historical aspects, beliefs, evidence-based practices, challenges, and applications to their own teaching practice.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC618 Classroom Accommodations and Modifications for Special Needs Learners (3 semester hours)

This course explores accommodations and modifications for special learners within the Least Restrictive Environment (LRE) and enhances regular and special educators' understanding of how best to address the individual needs of special learners. Topics focus on the creation of appropriate accommodations, the integration of accommodations into a general education classroom, the legal requirement for accommodations, and the roles of the general and special education educators within the LRE. Course participants will also study technologies, assessment, beliefs, challenges, current research, and strategies for specific categories of disabilities.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC621 Online Learning for the Adult and the K-16 Learner (3 semester hours)

This course examines the similarities and differences of the learning needs and abilities of adult and younger learners. The course emphasizes differentiated instruction and course development as applicable to adult and K-12 learners in traditional, virtual, and hybrid contexts. Topics include a historical perspective, andragogy versus pedagogy in the online classroom, trends and issues with technology education and online education, LMS elements, and basics of grant writing/technology grant writing.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC622 Ethics and Legal Issues in Online Learning (3 semester hours)

This course will focus on the issue of ownership of certain types of intellectual property on the internet, which has become a critical issue with different technological platforms, digital tools, and apps becoming so prevalent in our schools and culture. In this course, online, face-to-face, and hybrid educators will learn about the different types of potential copyright infringement, fair use, and privacy aspects for students, exploring the implication for course development and instruction.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC623 Online Learning and Student Achievement (3 semester hours)

In this course, educators will develop an understanding of the structure of the different types of digital tools and their effect on raising student achievement. Evidence-based practices that address student achievement gains via technology will be examined. The course guides course participants in evaluating and applying technology across disciplines (e.g., math, science, language arts, social studies, music, art, P.E., and health) and to support students with special needs or who need remediation.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC624 Assessment of Online Learning (3 semester hours)

In this course, educators will examine various approaches to the assessment of online learning. Topics include types of assessment, technology-enhanced assessment, assessment challenges, and using assessment data to inform instruction. Additionally, course participants will analyze assessment accommodations and explore program evaluation.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC625 Instructional Design in Online Learning (3 semester hours)

In this course, participants will explore and evaluate the different types of online learning platforms, as well as study the different components of asynchronous and synchronous instructional delivery from the perspective of an educator. Educators will evaluate basic course design principles, activities that foster student engagement, authentic assessment, and integration of media enhancements.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC629 Personalized and Individualized Online Learning (3 semester hours)

This advanced graduate course will examine the evidence-based practices for individual and collective student personalization in K-16+ classrooms and similar settings. Personalization is closely related to two additionally important approaches: individualization and differentiation. All three require a shift from a teacher-centered approach to an authentic student-centered approach. An effective student-centered focus requires tailoring of lessons to the abilities, interests, preferences, future life dreams, socio-emotional attributes, and other individual and collective needs of different students. The course examines motivation, assessment, and technological tools and how they pertain to personalization in online, face-to-face and hybrid contexts.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC630 Introduction to Students with Autism Spectrum Disorder (ASD) (3 semester hours)

This course provides candidates with an examination of characteristics of students with Autism Spectrum Disorder (ASD) across the lifespan. Defining characteristics as outlined in the current Diagnostic and Statistical Manual of the American Psychiatric Association and multidisciplinary peer-reviewed research are examined. Prevalence rates, etiology, and co-morbid conditions are studied relative to historical progression. Ethical implications and obligations related to ASD evaluation, eligibility determination, and implications for educational programming are analyzed with attention to legislative rights and protections under the Individuals with Disabilities Act (IDEA), Americans with Disabilities Act (ADA), and Section 504 of the Rehabilitation Act of 1973 (Section 504).(Prerequisite: **EDUC503**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC631 Evidence-Based Practice for Students with Autism Spectrum Disorder (ASD) (3 semester hours)

This course provides candidates with examination of the components of and process for evidence-based practice (EBP) in educational programming for students with ASD to include integration of research-validated intervention strategies with other critical factors (i.e., professional judgment and data-based decision making, family values and preferences, and capacity). Intervention strategies with the highest level of empirical support will be examined with attention to qualifying evidence, effective proven outcomes, and ages of individuals. Medication commonly prescribed to students with ASD will be explored related to target behavior and potential side effects. Laws, legislation, and litigation related to EBP for students with ASD will be examined.(Prerequisite: **EDUC630**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC632 Educational Programming for Students with Autism Spectrum Disorder (ASD) (3 semester hours)

This course provides candidates with examination of the components of and process for ASD program development and progress monitoring to include the leadership role. Assessment instruments and procedures specific to the development of effective programs for students with ASD will be studied to include Functional Behavior Assessment and subsequent Behavior Intervention Plans. The process for defining and detailing target skill and behavior goals will be examined in relation to the development of Individualized Education Program and Section 504 Plans. Strategies for facilitating the least restrictive environment in the general education classroom will be explored. Laws, legislation, and litigation related to educational programming for students with ASD will be analyzed. (Prerequisite: **EDUC631**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC633 Emotional Intelligence and Coaching Assessments (3 semester hours)

Building on the foundational coaching skills gained in **EDUC536** - Emotional Intelligence and Coaching Assessments provides participants with an understanding of emotional intelligence and when and how to use assessments in the coaching experience. Participants learn about Emotional Intelligence (EI) and its role in coaching. Participants examine several coaching assessments to gain familiarity and an understanding of when each assessment is appropriate for coaching. Specifically, participants will consider tools such as the Wheel of Life, Personality Type, DISC, EI, TPI, Strengths, and other assessments designed for various settings. Participants will also examine the ethical considerations associated with using assessments in the coaching relationship. (Prerequisite: **EDUC536**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC634 Co-Teaching and Collaboration for All Learners (3 semester hours)

This course examines the role of the educators working collaboratively in various models, including co-teaching. This approach to effective instruction will focus on the classroom factors relating to the nature of the student and the essential meaning of the curriculum. Particular emphasis will be placed on classroom elements that educators can differentiate – or modify – to increase the likelihood that each student will learn as much as possible, as efficiently as possible. This would include the areas of content, process, products, affect and learning environment. The idea of differentiating instruction to accommodate the different ways that students learn often involves working with others to reach this goal.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC635 Coaching Groups and Teams (3 semester hours)

Coaching Groups and Teams extends participants' thinking about coaching from coaching individuals to coaching groups and teams. Participants compare strategies for team and group coaching alongside those for coaching individuals. This course offers participants an opportunity to examine coaching groups and teams within an organizational system. As with the other trainings in this series, participants will explore and expand the application of coaching competencies and focus on ethical considerations associated with coaching groups and teams vs. coaching individuals. (Prerequisite: **EDUC633**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC639 Online Teaching Technology Integration (3 semester hours)

This course examines various digital tools, apps, and emerging technologies appropriate for online, face-to-face, and hybrid learning environments, with a focus on online learning integration. Course participants learn about the potential for using social networking sites as vehicles for effective communication that can promote as well as inform. Educators will be exposed to cloud computing, WebQuests, and collaboration tools to be better prepared to integrate technology into K-16 instruction in ways that promote learners connecting, engaging, interacting, creating, problem-solving, and experiencing immersive learning.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC640 Research Methods in Education (3 semester hours)

This course provides an overview of approaches to research, rationales for methodological choices, integrity of research processes, and tools and techniques for data collection and analysis. Additional topics include reliability and validity, sampling, and evaluating quantitative, qualitative, and mixed methods research designs. There is an emphasis on adhering to ethical principles. Course participation and activities provide experiences designed to equip practitioners with the knowledge and skills necessary to select, evaluate, and apply findings from extant research and conceptualize research studies related to issues at the K-12 and/or higher education level. (Prerequisites: Either **ADHE601**, **EDUC503**, **EDUC509**, **EDUC511**, or **EDUC621**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC645 Career Counseling and Development (3 semester hours)

Career Counseling and Development explores career development theories and the career decision making process. Students learn how to encourage motivation by connecting personal values and interests with academics. Topics include multicultural considerations, the relationship between one's career development and other life roles, and assessment instruments relevant to career planning. The process of career development will be covered as well as the implications for students with disabilities.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC651 Technology Leadership in Education (3 semester hours)

The course is designed to help school administrators develop an understanding of how to create and support technological change through a systems approach. Topics include sources of resistance to change, tools for planning, decision-making and change, creating and supporting a culture for learning and change, and managing and institutionalizing change systems. Administrators will evaluate the essential 21st century skills for success in today's world, such as critical thinking, problem solving, communication, creativity and collaboration, as well as skills and strategies for leading their school or district into the ongoing process of technology integration. (Prerequisite: **EDUC519** or **EDUC561**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC652 Powerful Technology Applications for the Active Learning Environments (3 semester hours)

This course explores how technology may be used as a tool to facilitate changes in the ways teachers teach and students learn, and ultimately to examine how teachers can use technology more efficiently and effectively to improve student achievement. The course examines how educators may use technology for communication and collaboration among colleagues, staff, parents, students, and the larger community. Additional topics include multicultural considerations, ethics, and copyright. This course aligns with the National Educational Technology Standards for Teachers (NETS•T), developed by the International Society for Technology in Education (ISTE).

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC665 Emerging Issues and Trends in Education Leadership (3 semester hours)

This course examines a framework to address the emerging issues and trends in and supervision and instructional leadership that have the potential to influence the future direction of education. The course focuses on the teacher leader/instructional leader and ways to address evolving challenges in the field in both collaborative and leadership roles within schools. Research, study, discussion, and multifaceted assignments enable candidates in this course to analyze various issues and trends such as safety, technology integration, social justice, advocacy, school improvement, community resources, ethical leadership, and more. (Prerequisite: **EDUC503**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC669 Education, Law, Ethics, and Politics (3 semester hours)

This course explores legal, ethical and politics issues governing K-12 education in America and the legal responsibilities and powers of state and local governing bodies and individuals that arise in elementary and secondary schools. This course focuses on understanding federal codes, case law, policies, and significant precedent and will emphasize analysis of key legal concepts and application of law to specific situations. The ethics of decision making and the process through which school leaders can advocate for political reform will be examined. Major areas of analysis include personnel, risk management, curriculum, student services, parent and student rights, teacher rights and torts.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC670 Education Law, Ethics, and Politics (3 semester hours)

This course explores legal, ethical, and political issues related to PreK-12 U.S. education. Topics include NCLB/ESSA, district liability, rights of students and teachers, and issues related to employment and technology. Emphasis is given to federal and state statutes and case law affecting due process, liability, equal protection, and the rights of teachers and students in order to better understand risks and possible strategies to reduce those risks. Ethical and political contextual aspects are explored in relation to public education decision and policy making at the classroom and school levels. (Prerequisite: **EDUC503**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC671 Integrated Elementary Mathematics and Sciences (3 semester hours)

This course emphasizes the objectives, methods, instruction, and integration of elementary school mathematics and science through a STEAM (STEM + the Arts) lens. Educators will examine research related to elementary school mathematics and science instruction with an emphasis on innovative programs and approaches. Activities include analyzing and evaluating educational trends, curricular materials, and techniques related to teaching mathematics and science to elementary school children. Additional topics include brain-based learning, technology integration, thematic/integrated instruction, and quality children's literature as enhancements to facilitate children's understanding of math and science/STEAM concepts and skills. (Prerequisite: **EDUC503**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC672 Integrated Elementary Language Arts and Social Studies (3 semester hours)

This course explores the keys to successful integration of language arts into the elementary social studies curriculum. Social studies is integrative by nature (National Council for the Social Studies, 2017). Powerful and purposeful social studies incorporates language arts skills to help young learners use context clues to suggest meaning, decipher maps and charts, and interpret primary and secondary source documents. A high quality integrative social studies and language arts curriculum brings forth carefully chosen Big Ideas and Essential Understandings with authentic action to promote social understanding and civic efficacy. This course will delineate the integrative nature of elementary social studies and explore the ways in which literature and language arts skills (e.g., listening, speaking, reading, writing, viewing, and representing) add depth and breadth. (Prerequisite: **EDUC503**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC694 Capstone: Field-Based Research Project (3 semester hours)

In this capstone course, candidates will apply program theories, content, and skills to address a real-world, field-based issue in an adult education, digital learning, or other pertinent context relative to the academic program of study. This course requires candidates to conceptualize and present an original scholarly research study to include research questions based upon an issue in a face-to-face/online/or hybrid educational setting, a literature review, research methods, data and analysis, discussion, and references. The capstone project requires written, oral, and audiovisual/multimedia components proposed by the candidate and approved by the course instructor. Capstone course work must follow the style requirements established by the Teaching department. All grades for any capstone attempts will appear on the transcript and will be calculated in the GPA. Candidates may choose an 8-week or 16-week course format. This is intended to be the final course in the degree program and all other course work should be completed.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC695 Capstone Seminar K-12 Learning Organization (3 semester hours)

Since the early days of K-12 education in the United States, public schools have been the primary option for the education of K-12 students. With trends toward non-traditional K-12 learning organizations becoming more popular, students are gaining access to a variety of non-traditional learning models. This course will focus on the unique structures of non-traditional K-12 learning organizations, including the various types of charter schools, private schools, and a look at online learning for the K-12 student. (Prerequisites: **EDUC509** or **EDUC519** and 30 of 36 program hours completed)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDUC698 Capstone: Action Research (3 semester hours)

Accomplished teachers have a rich understanding of the subject(s) they teach and associated content area pedagogical practices. In this course, candidates will assess their teaching practice in the context of previous coursework, observational experiences, and teaching. They will apply content area knowledge to contemporary theory through the development of artifacts and reflective pieces related to praxis. Candidates will also engage in discourse related to emerging social and philosophical issues in teaching to prepare them to be informed practitioners. This course will focus on action research in a classroom situation. Its purpose is to inform candidates with respect to ongoing pedagogical practices. All grades for any capstone attempts will appear on transcript and will be calculated in GPA

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Education (SAHE)

SAHE501 Student Development Theory (3 semester hours)

Student Development Theory is a course focused on the principles and key concepts of working with traditional and nontraditional students in college settings. This course will examine the developmental processes that impact college students, student development theories, and development of effective programs to meet their various learning, personal, career, and identity development needs. (Prerequisites: **EDUC511** and either **SAHE510** or **ADHE601**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SAHE502 Student Learning and Assessment (3 semester hours)

This course will explore learning theories and provide an overview of implementation strategies for enhancing student academic performance and assisting them with goal achievement. Research on learning and development will be reviewed. Ways to assess the quality of these efforts will be discussed as a means of determining the effectiveness of academic advising initiatives and their impact on student learning and success. (Prerequisites: **SAHE510**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SAHE506 Strategic Planning and Program Evaluation (3 semester hours)

This course will introduce students to the process of developing strategic plans by guiding them through the cyclical process of planning, evaluation, and program review. Students will explore the theories relevant to the steps of this cyclical process and delve into the factors and circumstances that contribute to continuous improvement. Students will learn the necessary skills to evaluate programs by analyzing case studies and offering justifications for programmatic change. (Prerequisites: **EDUC604** and **SAHE510**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SAHE508 Organizations, Culture, and Change (3 semester hours)

This course will provide an overview on how organizations work and behave. The culture of organizations will be explored, how cultural values are developed and sustained, and how to bring about change. Students will review organizational theories in higher education and explore concepts related to management, performance, governance, and leadership. (Prerequisites: **EDUC511** and either **SAHE510** or **ADHE601**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SAHE510 Introduction to Student Affairs (3 semester hours)

Introduction to Student Affairs is an introductory course providing a comprehensive overview of the historical and philosophical foundation of student affairs in higher education. Organizational, management, and leadership theories relevant to college settings, the roles and functions associated with careers in student affairs and college counseling, and contemporary trends and challenges will be examined. Students analyze higher education policies and procedures, programs, and services that meet the needs of all students in various institutional settings, including community colleges, four-year universities, and those that offer programs via distance education (Prerequisite: **EDUC511**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SAHE515 The U.S. College Student (3 semester hours)

The U.S. College Student is a study of the characteristics, needs, and goals of college students as they vary across the nation according to student demographics and institution types. The course will involve a consideration of campus environments, curriculum, sociocultural factors, and financial and political issues, and other influences on the student experience. Implications for Student Affairs practice, educational attainment, and student development will be discussed. (Prerequisites: **SAHE510**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SAHE520 Introduction to Academic Advising (3 semester hours)

This course will introduce students to the history and purpose of academic advising in higher education and the critical role it plays in promoting student success, retention, and learning. Students will learn foundational academic advising principles and values, academic advising models, and how academic advising delivery systems and programs have evolved to meet students' changing needs. Essential competencies and skills will be discussed and standards for practice will be closely reviewed. (Prerequisites: **SAHE510**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SAHE533 Academic Advising Theory and Practice (3 semester hours)

In this course students will develop a deeper understanding of various academic advising theories and how they can be put into practice on a day-to-day basis with individuals and groups. Students will also examine their own philosophical perspectives and academic advising styles to identify and become more self-aware of their own personal approaches. Students will develop their personal advising philosophy during this course. Prerequisites: **SAHE510** and **SAHE520**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SAHE695 Capstone Seminar for Student Affairs in Higher Education (3 semester hours)

This capstone course is the culminating required course for students who already work in a higher education student affairs role and desire additional professional development. The course exhibits the capability of the student within student affairs through the demonstration of their synthesis of the related theory and practice.

Students will work with a faculty advisor to develop a research project that addresses a current issue facing higher education, preferably within the student's professional context. This course will culminate with an e-portfolio and/or oral presentation. (Prerequisite: Completion of either a 12-unit concentration that includes **EDUC640** Research Methods or completion of the 12-unit Executive Coaching concentration)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SAHE698 Practicum (3 semester hours)

The Practicum is the culminating required course for the student who is preparing to enter a higher education student affairs-related role. Students will take theory to practice during practicum and gain supervised professional experience in their concentration. Students will complete 150 hours at an approved practicum site. This course includes a practicum seminar during which students will reflect on their practicum experiences and connect these to the virtual classroom learning they have had in their graduate program. Practicum sites and positions must be approved before students can begin their required 150 hours. [Prerequisites: Completion of all core courses plus at least half of the concentration-specific courses from one of the following concentrations: Academic Advising Concentration, Campus Leadership Concentration, or Career Coaching and Services Concentration]

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Emergency Management (EDMG)

EDMG501 Emergency Management and Public Law (3 semester hours)

This course identifies the public law, regulation, and associated policy that facilitates and in some cases restricts emergency management planning, recovery, and relief. Topics include national, state, and local issues and examples of public law. The course also covers issues associated with intergovernmental (fire, police, EMS, emergency management, military, etc.) action in emergencies as such action relates to regulation or public law.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDMG502 Emergency and Disaster Theory (3 semester hours)

This course establishes the theoretical foundation that enables the study and understanding of what constitutes ‘disaster’ as a part of the human condition and experience. Students are given a basic understanding of scientific concepts such as fact, theory, and hypothesis. These are then illustrated by analysis and case studies provided by renowned thinkers and writers in the field of emergency and disaster management. Students leave the class with a quality theoretical foundation from which to conduct all of their future master’s-level work.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDMG503 Emergency and Disaster Planning and Management (3 semester hours)

This is a survey course that is designed to introduce students to the concepts of emergency management. Topics covered include the history of the field, hazard analysis, mitigation, planning, communication, response, recovery, and terrorism. Students conduct interview research with an emergency manager and conduct a site visit of an emergency operations center. Students can use this course to springboard into advanced topics within the field as offered by other courses, and is a great place for students to begin their emergency management degree programs.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDMG509 Interagency Disaster Management (3 semester hours)

This course deals with the interaction, coordination, and facilitation between federal, state, and local agencies during preparation, response, and recovery operations. The history of emergency response organizational development is explored, along with the current structural and operational design provided by the National Response Framework (NRF) and the National Incident Management System (NIMS). Finally, the potential for public-private partnerships in disaster response is examined. Students will achieve an understanding of how all of the various agencies work together to achieve emergency management and disaster response goals and objectives.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDMG515 Hazard Mitigation and Resilient Communities (3 semester hours)

This course provides an overview of what is known about natural hazards, disasters, recovery, and mitigation, how research findings have been translated into policies and programs, and a sustainable hazard mitigation research agenda. The course also provides an examination of past disaster losses and hazards management over the past 50 years, including factors--demographic, climate, social--that influence loss.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDMG530 Economics of Disaster (3 semester hours)

This course is a study of the economics associated with international, national, state, or local level disaster. Students will study, analyze, and conduct research on the direct and indirect economic losses associated with disaster. The course will cover the economics associated with both public and private institutions.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDMG541 Mass Casualty Incident Management (3 semester hours)

This course deals with the casualty consequences of large scale emergency, disaster, and/or destruction. Public health, emergency casualty services, mortuary, and other issues are addressed using case examples, theory, and principles that have been researched, studied, and documented in international, national, and local settings. The course covers the background and philosophy, parameters, clinical issues, special circumstances (CBRN/WMD), clinical and non-clinical issues, and recovery strategies in Mass Casualty Incident Management. In conjunction with the outlined topics, the course examines a number of Mass Casualty Incident Management Case Studies (New York City, Jerusalem, Toronto, New Orleans, Tokyo and Madrid).

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDMG560 Crisis Action Planning (3 semester hours)

This course examines the role of crisis action planning in emergency management and disaster response. This course begins by examining the art and science of future studies – that is, being able to accurately predict an outcome from a given set of inputs and understand the ramifications. Impacts of global warming are presented. Crisis leadership and management theories and methodologies are examined. Taking these three components into account, and adding in other threats that students envision in forum discussions, students then develop a crisis action plan for an organization of their choice, with the purpose being to provide a plan for organizational survival against the challenges depicted above. Students also select an optional topic from an approved bibliography to present and discuss, on such topics as future climate, weather, social justice, energy, economics, environment, resource depletion, and potential strategies for the survival of civilization. Students will achieve a new and more holistic appreciation of the disaster planning process. The crisis action plans that students develop for this course are consistently implemented in the real world, and are in place in organizations across the globe.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDMG564 Wildland Fire Mitigation and Management (3 semester hours)

A new normal is now present with respect to wildland fire occurrence. Mega-drought, depleted water resources, climate change-enabled forest insect infestations, reduced snowpack, and related impacts have resulted in earlier, more prolonged, and more deadly fire seasons in America's natural wilderness regions. Mitigation of and adaptation to this new normal are important features of protecting the public that students, practitioners, and public officials must be aware of in order to effectively discharge their respective duties. This course will make current and future public officials aware of the challenge, the urgency of action, the opportunities available, and the leadership & management skills needed to guide society during this increasingly critical threat situation.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDMG565 Consequence Management: Terrorism Preparation & Response (3 semester hours)

This course addresses the potential results from nuclear, biological, and chemical incidents or uses. Topics include public health consequences of such incidents, emergency planning and response measures in place among U.S. agencies, and emerging detection and management technologies. Existing vulnerabilities to these types of incidents and attacks will also be discussed.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDMG600 Emergency Management Perspectives on Cybersecurity (3 semester hours)

A healthy cyberinfrastructure is the foundation of emergency and disaster management. It provides emergency and disaster management agencies the ability to effectively address and respond to natural disasters, terrorist attacks, and law enforcement issues. Technology has leveled the global playing field, and the impact on the cyberinfrastructure must be assessed among all relevant communities. This means implementing cybersecurity awareness into all levels of emergency and disaster management through: knowledge management, task behavior, dissemination of information, cyberinfrastructure impact awareness, communication, and deterrence. Students will be exposed to planning, management, response, and recovery factors related to cyberinfrastructure, as well as analyze economic, social, and technical aspects of cybersecurity associated with public emergencies and disasters.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDMG611 Case Analysis: Crisis and Disaster (3 semester hours)

This course offers students the opportunity to study a historical disaster of their choosing in depth. The theory of case study analysis is covered in detail—problem formulation, research methodology, data collection, and analytical techniques are examined. Concurrently, students develop a topic statement and concept of analysis for their chosen disaster. The final product of the course is a case analysis that includes a telling of the story of the disaster; a depiction of the methodology that will be utilized to understand the disaster in academic terms; an analysis of what happened and why; and the lessons that can be drawn from the study that would improve the field of emergency and disaster management. Students will learn a valuable research skill that can be used repeatedly throughout their careers.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDMG612 Risk Communications (3 semester hours)

This course examines necessary communication that must be provided by public officials before and during emergencies and disasters in order to protect the public and achieve understanding and cooperation. Specific theories of emergency and disaster communication are examined. The communication surrounding several recent disaster events is analyzed, and students write a press briefing or press release for one of these cases. Finally, students engage in a forum discussion of a disaster of their choice, appropriately titled: 'the good, the bad, and the totally clueless.' Students achieve an enhanced ability to deal with the media and the public before and during crisis situations, which is an extremely valuable skill to have.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDMG650 Social Justice Issues in Emergency Management (3 semester hours)

Emergencies and disasters do or can impact all people, anywhere, at any time. The emergency and disaster management field was developed in recognition of this, and seeks to prepare practitioners and public officials for the challenges that they will face. Evidence indicates that the impact of disasters is not distributed evenly—that in fact, the poor, minorities, and women are disproportionately impacted by disasters. This is something that students, practitioners, and public officials must be aware of in order to effectively and ethically discharge their respective duties. This course will make current and future officials aware of the impacts of race, poverty, gender, and similar social justice issues that they will need to consider in their careers in emergency management and public service.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDMG665 Climate Change Adaptation (3 semester hours)

Climate change and global warming are real, and science has coalesced around the fact that mankind's activities are causing or contributing to the rapid global warming that is currently in progress. Mankind's input into the equation is the burning of carbon fuels, which releases unprecedented levels of carbon dioxide, a highly potent greenhouse gas, into the atmosphere. The field of emergency management typically divides activities into four components: planning, mitigation, response, and recovery. It is now time to add a fifth component: adaptation.

Mankind's activities have programmed into the future climate somewhere between one and six degrees Celsius of warming, and a significant but as yet incalculable amount of sea level rise. We do not have the option of stopping or reversing these events, so we must adapt if our civilization is to survive. The student will begin by examining the science itself, courtesy of the Climate Reality Project. The student will examine how the US government has evaluated the situation in the National Climate Assessment. The student will look at both the pessimistic and optimistic possibilities that our future could hold. Students will select a book from a supplemental reading list and report on their topic of choice in the forums. To conclude, students will create a personal Climate Change Adaptation Plan for themselves, their families, and/or their organizations.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDMG692 Comprehensive Examination in Emergency and Disaster Management (3 semester hours)

Comprehensive final examination for students in the Master of Arts in the Emergency & Disaster Management program. The Comprehensive Final Exam is tailored specifically to each program and must be taken after students have completed 33 hours of study (i.e., during the semester following the final course) and successfully completed before the award of a degree.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EDMG699 Emergency and Disaster Management Capstone (3 semester hours)

This course serves as the final program requirement for students achieving the emergency and disaster management master's degree. This course will involve a major research paper or thesis project that demonstrates understanding of and ability to implement the program objectives. The research paper and thesis option will demonstrate understanding of social science research methodology as it applies to the program of study. Students will follow the requirements of the APUS Capstone Manual and the appropriate presentation style guide. NOTE: This course may not be taken until all other courses are completed and the student has a minimum 3.0 GPA. Capstone courses are 16 weeks long and cannot be taken along with any other course.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Emergency Management (EMHS)

EMHS699 Emergency and Disaster Management & Homeland Security Capstone (3 semester hours)

Preparation for the Emergency & Disaster Management and Homeland Security Master's Thesis Capstone Seminar begins on day one of a student's graduate program of study. The theories, research methods and analytical skills, and substantive knowledge obtained through their master's curriculum provide the basis for the master's thesis. Students will support the thesis effort, including gathering bibliographic and reference materials on the thesis topic including developing individual course research papers that may become sections of the final master's thesis. Students will address the requirements as described in the syllabus and classroom assignments. The master's thesis proposal shall be prepared in accordance with the standards of the academic discipline. The master's thesis proposal must provide a clear and lucid description of a topic and a proposed method of analyzing the problem. Students must have completed all other course work before taking the master's thesis seminar. Capstone courses are 16 weeks long and cannot be taken along with any other course.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Environmental Science (EVSP)

EVSP501 Environmental Management (3 semester hours)

This course focuses on the analysis and resolution of complex environmental management issues. Environmental Management investigates the use of management tools and strategies to resolve complex environmental problems and controversies, including application of adaptive management, structured decision-making, and negotiation principles, and incorporating stakeholders, economic drivers, and the human element. Environmental leadership, collaboration, and conflict resolution will be emphasized, with due consideration to the use of sound scientific data in environmental decision making. Students will be expected to use critical thought, innovation, and creativity to formulate an adaptive management plan for a highly controversial environmental issue or policy as their course final project.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EVSP502 Environmental Economics (3 semester hours)

This course is a qualitative and quantitative study of the public and private economic costs and effects of environmental programs, industrialization, regulation, and international and national environmental policies, among other issues.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EVSP503 Environmental Policy, Regulation, and Law (3 semester hours)

This course is a study of the major legal, regulatory, and policy framework that encompasses environmental programs and projects in the United States and with international political, commercial, and non-governmental institutions. The primary learning approach used in this course will be case studies.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EVSP504 Fisheries Management (3 semester hours)

This course examines the principles and theory of fisheries management with major emphasis on the human dimension in fisheries management, fishery assessment, population dynamics, and common management practices.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EVSP505 Wildlife Management (3 semester hours)

This course examines the principles of managing wildlife resources with emphasis on the history of wildlife resources in the United States, population ecology, wildlife values, and the administration of wildlife resources and resources agencies.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EVSP506 Restoration Ecology (3 semester hours)

This course will examine the concept of restoration ecology, which employs science, applied techniques, and environmental design principles to restore ecological processes and biological communities on disturbed, degraded, or altered landscapes. Students will conduct scientific study and explore techniques used in restoring endangered species, native prairie, rare plants, riparian areas, streams, rivers, lakes, wetlands, watersheds, woodlands, and wildlife habitat.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EVSP507 Conservation Biology (3 semester hours)

This course examines the development of major areas in conservation-oriented research that include patterns of biological variation, extinction, conservation genetics, conservation of populations, communities and landscapes, and ecological sustainability.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EVSP508 Environmental Ethics (3 semester hours)

This course is an advanced study of environmental issues from a moral and philosophical approach. Issues raised in the course and through student research and writing will include: the moral obligation or lack thereof, to preserve and protect the environment; the ethical presumptions that underlie environmental policy; the traditional theories of moral philosophy applicable to contemporary environmental problems; and the potential for a new concept of the relationship between humanity and nature.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EVSP509 The National Environmental Policy Act (3 semester hours)

This course consists of an in-depth review of the National Environmental Policy Act (NEPA), its legislative background and history, significant case law, and Council of Environmental Quality (CEQ) Guidelines. Students will review examples of agency Categorical Exclusions, Environmental Assessments, and Environmental Impact Statements to become familiar with the documents as a building block for **EVSP629** Environmental Impact Analysis. Students will evaluate whether specific documents "meet the intent or spirit" of NEPA, compare state vs. federal NEPA regulations, and review at least one federal agency's NEPA procedures. (Prerequisite: **EVSP503**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EVSP558 Watershed Management (3 semester hours)

In recent years, water resource management in the United States has begun a shift away from top-down, government agency-directed decision processes toward a collaborative approach of negotiation and problem solving. Rather than focusing on specific pollution sources or specific areas within a watershed, this course will present this new process, considering the watershed as a whole, and seeking solutions to an interrelated set of social, economic, and environmental problems. Through readings, discussions, and current and historical case studies, students will explore a wide range of threats to the productivity and health of watersheds and explore new, collaborative approaches to watershed management.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EVSP561 Elements of Sustainable Design (3 semester hours)

This course is an introduction to the philosophical and practical principles of green and sustainable design through the exploration of environmental issues, sustainable materials and methods, and public policy and decision making. Sustainability principles, policies, and programs that encourage and guide current initiatives are analyzed. Innovative strategies for implementing sustainable projects, programs, and practices are investigated through the review of case studies and completion of a final course project.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EVSP594 Environmental Toxicology (3 semester hours)

This course presents an introduction to the dynamics of ecosystems and the effects of toxic substances on its living and nonliving components, and incorporating human health issues and concerns. Students will examine the regulatory framework for environmental contaminants issues and detail the federal regulations, policies, and guidelines under which current environmental remediation is done. A key aspect of the course will be the application of risk assessment principles through case studies to gain an understanding of how to develop remediation plans and restoration alternatives that meet or exceed established regulatory guidelines.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EVSP601 Capstone Proposal (3 semester hours)

This course prepares the student to understand materials and issues associated with but not limited to the scientific method, research design, and qualitative and statistical analysis of data. This course is intended to guide the student through selection of a suitable topic for the capstone project or thesis. Once an approved topic is selected, the student will prepare a formal proposal to be used in the capstone course.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EVSP605 Energy Policy and Sustainability (3 semester hours)

This course is an introduction to energy policy and decision making, primarily in the United States. Students will examine the nature and scope of environmental, energy, and resource problems, analyze the goals and strategies of the renewable energy movement, investigate ideological, political, and institutional forces that shape policymaking and implementation, and conduct in-depth analyses of the various approaches to U.S. energy needs. An exploration of renewable energy technology, feasibility, and implementation is incorporated through the analysis of case studies and current events.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EVSP627 Landscape Ecology and Planning (3 semester hours)

Landscape planning and ecology is a rapidly developing area of study that explicitly examines the effects of spatial pattern and scale on ecological processes that unfold over areas of several square miles or larger. Thus, landscape ecology and planning provides many concepts, tools, and approaches that will enhance the effectiveness of endeavors such as watershed management, ecosystem management, design of conservation reserves and green infrastructure, and smart growth. The goal of this course is to give students a firm grasp of the concepts of landscape ecology and planning and how they can be applied to enhance the effectiveness of environmental policy, management, regulation, and assessment.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EVSP628 Global Environmental Change (3 semester hours)

The study and consideration of global environmental and climate change are of increasing significance to society. In this course, students will examine the evidence for and causes of global environmental change and will analyze potential impacts on environmental policy and society. Emphasis will be on the implications of environmental change for environmental managers, including management decision-making, the adequacy of the current regulatory framework in addressing these problems, and the effect on future policy and legislation.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EVSP695 Capstone Portfolio (3 semester hours)

This course steps students through the construction of a professional portfolio that highlights major skills gained through their academic course work. The professional digital portfolio will be built using portfolio software and will include both scholarly work and writing geared towards the general audience. The final course output may include the digital portfolio, discipline relevant blog articles, and an oral defense of the portfolio presented to an audience of faculty and peers. NOTE: This is intended to be the final course in the degree program. Students must have a 3.0 GPA to enroll. This course is 8 weeks in length.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

EVSP699 Environmental Policy and Management Capstone (3 semester hours)

Designed specifically for students with an interest in scholarly research or continuing their academic career in doctoral studies, this course requires students to present original scholarly research. The capstone thesis must have a substantial research component, which will include research questions and presentation of an original argument using proper academic writing conventions. Students writing a capstone thesis will collect and analyze data from carefully documented primary and/or secondary sources, and will develop a rigorous research paper in the style of a traditional scientific paper (i.e., abstract, introduction, methods, results, discussion, references). The capstone thesis must represent an original contribution to the body of knowledge within the broad field of environmental policy and management. The theories, research methods, analytical skills, and substantive knowledge obtained through the Environmental Policy and Management curriculum provide the basis for the thesis project. NOTE: This is intended to be the final course in the degree program. This course is 16 weeks in length. (Prerequisite: **EVSP601**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Finance (FINC)

FINC600 Corporate Finance (3 semester hours)

This course is a study of the major corporate finance and financial management theory, strategy, processes, functions, and other issues. Topics include the finance function, concepts of sources and uses of funds, analysis and estimation of need for funds (short- and long-term), short-term sources, working capital management policy, long-term sources, capital structure policy and implementation, capital budgeting and the cost of capital. Students must have access to Microsoft Word and Microsoft Excel software. Please refer to the Course Materials section for additional details on materials and pricing or contact booklist@apus.edu.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

FINC605 Financial Accounting (3 semester hours)

This course examines the nature of accounting theory and practice, procedures, and preparation and interpretation of financial statements. The various uses of accounting information in decision-making, accounting issues concerning income and cash flows, economic resources and capital will be discussed. Students must have access to Microsoft Word and Microsoft Excel software. This course requires the student to purchase additional materials. Please refer to the Course Materials section for additional details on materials and pricing or contact booklist@apus.edu.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

FINC610 Financial Institutions (3 semester hours)

This course provides students with an overview of the basic contributions in the modern theory of corporate finance and financial institutions. The course utilizes a methodology approach, requiring students to master the necessary technical tools for each topic.

Topics covered in the course may include capital structure, distribution policy, financial intermediation, incomplete financial contracting, initial and seasoned public offerings, market for corporate control, and product market corporate finance interactions. Other topics offered in this course are corporate reorganization and bankruptcy, financing in imperfect markets, and security design under adverse selection and moral hazards.

Students will also conduct an in-depth analysis of the financial system in which banks, other intermediaries, and non-financial organizations function.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

FINC615 Investment Management (3 semester hours)

For this course, students will study financial markets – principally equity markets – from an investment decision-making perspective. The course utilizes a set of conceptual frameworks and analytical tools, applying them to particular investments and investment strategies chosen from a fairly broad array of companies, securities, and institutional contexts.

The focus will be on adding value across the spectrum of decisions ranging from position-taking in particular securities to portfolio risk management, as well as the delegation to and oversight of professional investment managers. Also, the course explores the competitive dynamics among investment organizations, products, and markets.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

FINC620 International Finance (3 semester hours)

This course provides an understanding of current academic research in international finance and international macroeconomics. Students will learn the tools for conducting field research and will have a comprehensive overview of currency, equity, and international bond markets around the world.
Institutional, theoretical issues, and current trends will also be analyzed. A strong emphasis will be placed on the hedging techniques and tools used to reduce the risks associated with those financial markets.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

FINC625 Entrepreneurship Finance (3 semester hours)

This course is designed to provide students with the ability to analyze the various processes and sources of seed and venture capital for funding a new enterprise – debt and equity. Planning for the funding aspect of a new financial venture is critical, and this course addresses alternative sources of funds for carrying out a venture's mission.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

FINC626 Mergers and Acquisitions (3 semester hours)

This course will give an in-depth understanding of the mergers and acquisitions (M&A) process. The M&A process involves several stages, from initial planning to post-merger integration. Students will learn about strategic planning, due diligence, valuation and negotiation of target companies, deal structuring, regulatory approval and post-merge integration. Each of these stages will be examined in detail so that the student can understand the entire process and how each stage will build to the next.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

FINC627 Structuring and Leading Merger and Acquisition Deals (3 semester hours)

This graduate-level course is designed for professionals seeking to understand and execute mergers and acquisitions across industries. Students explore deal structuring in mergers and acquisitions, focusing on deal structure, transaction structure, and the financial implications, tax implications, and legal implications of each acquisition deal. Emphasis is placed on corporate finance, due diligence, and evaluating whether a stock purchase, asset sale, or other legal structures create the best deal structure for both the buyer and sellers in complex transactions.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

FINC628 Post-Merger Integration (3 semester hours)

This course is designed to benefit students aspiring to careers in corporate development, M&A consulting, and strategic planning. This graduate-level course, Post Merger Integration, focuses on the crucial planning and effective management required to integrate organizations following mergers and acquisitions (M&A) successfully. Emphasizing that preparation should begin well before finalizing the M&A deal, the course draws on research studies and real-world cases to analyze and discuss the structural, cultural, and social implications of merging organizations.
Students will gain a comprehensive understanding of the complexities involved in merging different organizational cultures and structures. The course involves developing an effective post-merger integration model aimed at maximizing the synergistic value potential of merger opportunities. Practical tools for managing cultural integration, a critical aspect of successful integration, are also provided.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

FINC630 Debt Instruments and Markets (3 semester hours)

The graduate course, Debt Instruments and Markets, provides a detailed examination of debt securities and their trading markets. The course begins with an overview of various types of securities, emphasizing their unique cash flow patterns and risk profiles.
A central focus of the course is the study of the term structure of interest rates, covering spot, coupon, and forward yield curves. These concepts are explored in the context of traditional bond yield calculations and the relationship between price and yield.
This course also addresses risk management strategies for different notes, including floating and fixed-rate notes. This course will explain the use of Libor-based derivatives such as interest rate swaps and Eurodollar futures.
Another significant aspect of the course is the analysis of default risk and its impact on bond valuation, including examining credit derivatives for managing default risk.
Furthermore, students will comprehensively understand Treasury futures and options, exploring their complexities and applications in financial markets.
The course concludes with a study of managing interest rates and currency exposure in international debt markets, providing practical insights relevant to global finance.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

FINC699 Finance Capstone (3 semester hours)

This advanced graduate-level course in Finance explores the strategic rationale and execution of corporate mergers and acquisitions. Students will understand why and how firms engage in these activities and their impact on key business metrics such as stock prices, capital structure, and market power.
The course covers various aspects of Finance, such as mergers and acquisitions, including strategic alignment of merging entities, target company valuation, negotiation processes, and post-merger integration. Additionally, it examines legal, ethical, and regulatory considerations, encompassing the legal framework, ethical implications, and the role of regulatory bodies in ensuring market competition and fairness. The capstone will offer specific requirements depending upon the concentration selected for the Finance Master's degree.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Foundations (COLL)

COLL501 Analytical Writing for Graduate Students (3 semester hours)

The intent of this course is to encourage and foster the graduate student's analytical thinking and written communication skills. Students will learn advanced analytical techniques and communication strategies that professors at the graduate level across all academic areas expect them to know. Exposed to challenging ideas and potentially new strategies in examining a variety of topics, students will be expected to focus upon critical thinking principles and theories within those topics and then respond to assignments that require them to produce critical essays and a course project. Students will hone their reasoning skills through engagement in the forums and sharpen their writing skills through multiple drafts of papers with substantial feedback from their peers and their instructor. The culmination of the course will be a project that demonstrates the student's growth as a thinker and as a writer.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Global Security Studies (GLBS)

GLBS710 Seminar in Global Governance (3 semester hours)

This doctoral seminar examines how global governance works. The various ways in which states have created order and organization to their conduct in international affairs are examined, as are the increasingly diverse range of actors involved in global governance. The first part of the course provides theoretical and conceptual foundations for understanding the key actors, major developments, and current challenges in global governance today. The second part of the course focuses on exploring global governance architectures across a range of key policy and issue areas. Overall, students will gain both theoretical and substantive knowledge covering a wide range of global governance arrangements, actors, and issues. (This first course and corequisite **SSGS700** must both be successfully passed before moving on to other courses.)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

GLBS711 Seminar in Global Security Issues (3 semester hours)

This seminar provides an overview of significant issues facing actors in the global community, identifies how these challenges impact global security, and provides students with the opportunity to evaluate potential policy responses. (Prerequisites: **SSGS700** and **GLBS710**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

GLBS712 Seminar in Emerging Global Security Issues (3 semester hours)

This seminar provides an overview of emerging global security issues and their impact on national and human security. Students will focus on the development of international, state, and non-state responses to these issues. (Prerequisites: **SSGS700** and **GLBS710**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

GLBS740 Technology and Global Security (3 semester hours)

This seminar focuses on advances related to science, technology, and innovation in the global environment. It also examines the impact that advances in science, technology, and innovation have on domestic and international security, and international, bilateral, and state strategies for addressing them. (Prerequisites: **SSGS700** and **GLBS710**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

GLBS741 Health and Global Security (3 semester hours)

This seminar examines the role that global actors play in the formulation and implementation of policy, norms, practice, and domestic and international consequences with regard to current and emerging priorities in global health to address the prevention of disease and the promotion of health. It also examines the impact that global health issues have on domestic and international security, and international, bilateral, and state strategies for addressing them. (Prerequisites: **SSGS700** and **GLBS710**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

GLBS742 Democracy, Governance, and Human Rights (3 semester hours)

This seminar addresses the role that global actors play in the formulation of policy, norms, and practice with regard to democracy, governance, and human rights. It also focuses on the impact that these have on domestic and international security, and the international, bilateral, and U.S. strategies for addressing them. (Prerequisites: **SSGS700** and **GLBS710**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

GLBS744 Conflict Resolution (3 semester hours)

This seminar examines different theories and approaches related to conflict. It also addresses the impact conflict has on domestic and international security. International, bilateral, and state strategies for addressing these challenges are also addressed. (Prerequisites: **SSGS700** and **GLBS710**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

GLBS745 Defense Security Cooperation (3 semester hours)

This seminar examines defense and security cooperation such as training and education, foreign aid and military sales, alliances, and multinational cooperation in the global environment, and how these factors impact global security, and in particular, U.S. national security. (Prerequisites: **SSGS700** and **GLBS710**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

GLBS790 Independent Study (3 semester hours)

This course is an opportunity to pursue an independent research project on a global security topic under the mentorship and direction of a faculty member. A research proposal and timeline must be submitted in advance of enrollment to the faculty member and approved by the faculty member and Doctorate of Global Security Program Chair. (Prerequisites: **SSGS700** and **GLBS710**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Government Contracting and Acquisition (DEFM)

DEFM531 Advanced Business Solutions for Mission Support (3 semester hours)

This course is a study in realistic scenario-based learning, where students work in teams to practice developing sound business solutions. Student course work is designed to contribute solutions to senior leadership and local supervisors and to provide resources for the contracting career field via a course community-of-practice.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

DEFM540 Program and Acquisition Management (3 semester hours)

This course is a detailed and practical examination of DOD acquisition regulations and procedures. Duties and responsibilities of the Program Manager at each point in the systems acquisition process continuum will be stressed.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

DEFM550 Program Manager's Skills (3 semester hours)

This course develops a foundation of concepts and solutions that supports the planning, scheduling, controlling, resource allocation, and performance measurement activities required for successful completion of a project. Tools and concepts such as project charter, scope statement, work breakdown structure, project estimating, and scheduling methodologies are studied. No prerequisite.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

DEFM551 Executive Program Manager's Decision Making Skills (3 semester hours)

This course is designed to meet the learning and performance needs of newly selected PEO's, DPEO's, and ACAT I and II Program Managers and Deputy Program Managers. Skills and behaviors are developed through a concentrated study of cases, role playing and scenario analysis.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Health Information Management (HIMA)

HIMA501 Technology Applications in Health Information Management (3 semester hours)

This is the first course required for students enrolled in the MS in Health Information Management degree program. This course addresses the theoretical and practical applications that information technology (IT) plays in the administration of health information. Students will study how the management and synthesis of healthcare data across a variety of levels within the healthcare system plays an integral role in strategic and tactical decision making. The course provides students with an overview of systems planning, grant and contract development, as well as e-health and electronic medical records. Students will gain a foundational knowledge of IT deployment, adoption, data security and interoperability, privacy, confidentiality, and information management planning. In addition, students will examine the legal and ethical aspects of health information management.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIMA503 Healthcare Vocabulary and Clinical Terminologies (3 semester hours)

This course addresses the nomenclature of healthcare vocabulary and medical terminology for administrators in the health information management (HIM) field. Vocabulary used in the healthcare field provides a common language for practitioners, positively addressing global, as well as safety issues. Students will examine the issues of competing standards, and the different goals and criterions in which terminology and codes were created to address. The course will provide an advanced overview of medical terminology and anatomy used in classification systems in health information management (HIM). Students will study the structures and organization of bodily systems as they relate to the appropriate terminology.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIMA505 Research Methods in Health Information Management (3 semester hours)

This course focuses on the research methods, tools, instruments, and devices used in health information management. It concentrates on the logic of the scientific method, research design, and qualitative and quantitative analysis. This course evaluates methods to collect, classify, categorize, evaluate, assess, and report research data, to formulate valid research questions, and to derive logical conclusions. In addition, the course emphasizes the proficient development of research and writing skills necessary in academic and professional settings. Lastly, students will utilize all of these methods to demonstrate competence in data collection and analysis, as well as strategic and tactical decision making. The principles, practices, tools, and methodologies presented in this course are applicable throughout the program of graduate studies.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIMA550 Clinical Workflow and Process Redesign (3 semester hours)

This course addresses processes in the administration of health information management as they relate to performance, bottlenecks, delays, duplication of effort, and other issues in order to identify areas of improvement. Students will study process mapping and examine how auditing the information content can increase productivity via information technology and automation. Issues related to computerized provider order entries (CPOE) and electronic health records (EHR) will be analyzed associated with safety and quality. Students will examine the symbiotic nature of clinical workflow and process redesign.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIMA600 Financial Management for Health Professionals (3 semester hours)

This course provides students with a foundation in financial management skills and principles applicable to the health care field. Students will examine the difference between accounting and financial management, different reimbursement methodologies, accounting and financial statements, revenue cycle management, and avenues for financing major capital investments. They will learn areas related to managing cash, billings, and collections, alternative forms of ownership, as well as using cost information in decision-making. Additionally, students will be exposed to the laws and regulations that affect health care financial reporting and performance such as the Patient Protection and Affordable Care Act of 2010 and the expansion of health care services into new fields.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIMA605 Legal Issues in Health Information Management (3 semester hours)

This course will provide students with an overview of the legal issues that influence the management of health information. Students will examine areas related to the impact of electronic health records, ethical standards, bioethics, confidentiality, informed consent, and access to health related information. In addition, students will study legal issues related to risk, quality, and utilization management, as well as health care fraud and abuse, through various federal legislation such as the Health Insurance Portability and Accountability Act (HIPAA), the Genetic Information Nondiscrimination Act, and the American Recovery and Reinvestment Act (ARRA).

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIMA610 Healthcare Data Analytics with Lab (4 semester hours)

This course will prepare the students to collect, analyze and present the data through the understanding of basic concepts, principles, and techniques/methods of statistics as applied to knowledge management in health care. Major topics will include data collection, sharing, and analysis. Students will study the terminology, concepts, models, processes and tools associated with decision support and knowledge management systems. The lab portion of the course will focus on data, statistical and qualitative analysis, explanatory, and predictive modeling where students will evaluate how to leverage data into information and knowledge to enhance systems, quality, cost effectiveness and strategic decision making. (Prerequisite: **HIMA600**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIMA620 Corporate Compliance in the Healthcare Industry (3 semester hours)

This course will prepare students to navigate the area of corporate compliance within the health care industry by identifying risks and avoiding possible liability by examining a myriad of laws, regulations, policy guidance, enforcement initiatives, and certifications (e.g. HIPAA, Stark laws). The course will provide students with a foundation in the core elements of corporate compliance. Students will evaluate various tools and strategies necessary for an effective corporate compliance program to protect a health care organization and avoid penalties as a result of non-compliance.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIMA699 Capstone in Health Information Management (3 semester hours)

Students will examine organizational performance measures and outcomes, strategic management and planning, and the leadership and management competencies associated with success in a healthcare environment. The final project will encompass program competency model and requires students to demonstrate an understanding and application of healthcare management and administration communication skills, critical thinking, and problem solving.(Prerequisite: Students may only take this course after the completion of all CORE courses)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Healthcare Administration (HCAD)

HCAD500 Healthcare and Healthcare Systems (3 semester hours)

This course examines an overview of the origins, components, organization, demographics, and trends in the United States Healthcare System. It is intended to serve as an introduction to the complexity of the United States Healthcare System, including how our healthcare system has evolved, settings where healthcare is delivered, how healthcare is financed, healthcare workforce challenges and future trends.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HCAD501 Technology Applications in Healthcare Organizations (3 semester hours)

This course addresses the role that information technology plays in the health delivery systems in the United States. Students will evaluate how the current and future trends in health information technology impact the quality, safety, and finances of the health care delivery system. The course provides students with a history of the Health Information Technology (HIT) evolution, an overview of current trends and challenges, the impact of HIT on the patient centered delivery system and the continuum of care, as well as the future trajectory of HIT. Students will gain a foundational knowledge of Health Information Technology and its connection with health care delivery systems and health administration. (Prerequisite: **HCAD500**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HCAD510 Leadership and Management in Healthcare Organizations (3 semester hours)

This course examines contemporary leadership and management theories, models, and principles as they relate to healthcare organizations. Further, the course explores the ethics of leadership and the role of a healthcare leader in creating the culture and processes that support a high reliability organization. Students will develop a personal philosophy of ethical, effective leadership. (Prerequisite: **HCAD501**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HCAD520 Legal and Ethical Aspects of Healthcare Administration (3 semester hours)

This course explores legal and ethical dimensions of health care in the context of patients' rights and responsibilities, employee rights and responsibilities, and business practices. The course examines ethical values and principles in healthcare, the Patient Bill of Rights, legal regulations in healthcare, malpractice and risk management, and basics of employment law and labor relations. Students will apply ethical and legal principles to analyze the health administrator's role in case examples involving ethical and legal dilemmas.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HCAD530 Operational Management in Healthcare (3 semester hours)

This course examines the key elements of operational management, strategic planning processes, project management, and marketing strategies in health care organizations. Interpersonal and communication skills are discussed in the context of change management and development of written business plans. (Prerequisite: **HCAD510**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HCAD605 Human Resource Management in Healthcare (3 semester hours)

This course serves as an advanced course in human resource management with an emphasis on the health care workforce. Students will explore the intricacies associated with recruiting, hiring, and managing healthcare workers. Organizational culture as it pertains to human resources will be examined, and strategic planning will be highlighted. (Prerequisite: **HCAD500**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HCAD650 The Business of Healthcare (3 semester hours)

This course is designed to introduce students to the business side of healthcare. Topics include the regulatory environment, employment law, managing and marketing healthcare services. The course also looks at organized delivery systems including the labs, pharmacies, materials maintenance, and physician practice administration.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HCAD651 Healthcare Finance (3 semester hours)

This course is designed to give healthcare administration students a foundation in economic principles of health insurance. Topics will include managed care, employer-sponsored health insurance, the functioning of Medicare and Medicaid, the history of health insurance in the United States, and special topics in health insurance. (Prerequisite: **HCAD650**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HCAD652 Operational Quality in Healthcare (3 semester hours)

This course is designed to develop the skills that will allow students to create safe and efficient quality healthcare systems through an understanding of the quality management cycle, goal-setting, and goal obtainment metrics. Topics include creating satisfied patients, high quality service, efficient processes, and examining tools used within the field. (Prerequisite: **HCAD650** and **HCAD651**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HCAD698 Situational Experiences for Healthcare Administrators (4 semester hours)

This advanced course offers students the chance to participate in simulations of experiences they will face as a health administrator. Students will utilize course software to make decisions regarding health care delivery systems, ethical situations, financial obstacles faced in healthcare organizations and build leadership skills. This course will provide an opportunity to apply the skills learned in previous classes in a simulation setting. (Prerequisite: **HCAD500** and **HCAD652**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HCAD699 Healthcare Administration Capstone (3 semester hours)

This course focuses on applying theoretical knowledge of strategic management, continuous quality improvement, and compliance in a health care organization. Students will examine organizational performance measures and outcomes, accreditation readiness practices, and quality management programs. Students will explore the roles of organizational leaders involved in ensuring quality, safety, and compliance. Students will be expected to create a professional development plan, based on self- reflection and assessment of the program's competency model and personal leadership and managerial knowledge and skills. (Prerequisite: **HCAD698**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

History (HIST)

HIST500 Historical Research Methods (3 semester hours)

The course addresses the development of core research skills for advanced historical study. Through case studies analyses, the evaluation of different types of historical evidence, and the consideration of how valid research questions are formulated and applied, it is designed to refine the critical thinking, research, and writing skills that are fundamental to valid historical scholarship.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST501 Historiography (3 semester hours)

This course is the study of historical thought from its emergence in the classical world to the present. Students concentrate on how history has been interpreted, rather the facts of history themselves as well as contemplate the fundamental questions about the nature of history, and investigate the relationships between theory and evidence in historical writing. Emphasis is on the narratives historians have used to reconstruct the past, and the major historiographical schools of thought that have developed over time.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST510 Graduate Seminar in World History (3 semester hours)

This course is a comprehensive seminar in world history designed to provide a foundation in historical theory, trends, and concepts for further study of topical history at the graduate level. Students examine the broad sweep of world history, major interpretive questions in world historiography, and major periods of interaction between civilizations. This course is not designed as a refresher of undergraduate history survey courses; rather, it is a concentrated study of world history for serious history students and professionals.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST520 Graduate Seminar in U.S. History (3 semester hours)

This course is a comprehensive seminar in U.S. history designed to provide a foundation in U.S. historical theory, trends, and concepts for the further study of specialized and topical history at the graduate level. Students should be expected to read and write intensely on both broadly and narrowly addressed topics of history. This course is not designed as a refresher of undergraduate history survey courses; rather, it is a concentrated study of U.S. history for serious history students and professionals.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST521 Seminar in Public History (3 semester hours)

The Seminar in Public History examines the varied and interdisciplinary "field" of Public History--such as community/local history, historic preservation, archives, historical archaeology, museum studies, business and policy history, documentary editing and publishing, and documentary films--through readings, class discussions, occasional guest speakers, and occasional field trips. The central theme explores some of the many ways people create and convey history, some of the major themes in community and social history, and the problems and possibilities of working as historians in public settings.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST522 Archives and Manuscript Management (3 semester hours)

This course examines the theory and practice of managing archival documents, such as personal papers, institutional records, photographs, electronic records, and other unpublished materials. Topics include: manuscript and records acquisition and appraisal, arrangement and description, conservation and preservation, reference, and access. The course provides in-depth study of current issues and practices in archives, addressing fundamental problems, theoretical principles, techniques, and practical administration of archives and manuscripts; the importance of records in the modern information age; discussion of the types and varieties of archival repositories and the value of historical records beyond traditional research use.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST523 Theory and Practice of Oral History (3 semester hours)

This course explores oral history as a research methodology and studies the current “historiography of oral history.” The topics examine how oral history projects are initiated, how projects are administered, how interviews are conducted, and how oral history interviews are preserved and made available to researchers. Special emphasis is on the use of technology in making oral histories available to researchers on the Web. Students will gain practical experience in oral history interviewing and related aspects of oral history, such as transcribing, editing, and publishing oral histories.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST525 West Virginia History and Culture (3 semester hours)

This course is an historical survey of West Virginia and the Central Appalachian’s development from prehistoric times to the present time. Areas stressed include Native American settlements, colonial migrations, revolutionary activities, Civil War and statehood, industrialization, and the region’s assimilation into the national economy.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST531 The Greek Civilization (3 semester hours)

This course is a study of Greek civilization from its beginnings to the collapse of the independent city-states in the 4th century BC. Emphasis is on ancient Greece’s constitutional, political, economic, social, diplomatic, military, artistic, philosophical and intellectual dynamics. Key topics include the Greek way of land and naval warfare, maritime trade and the economy, Peloponnesian and Persian Wars, the "Age of Pericles" and the Classical Age of Athens, the rise and fall of Spartan power, the rise of Athenian democracy, and the impact of Ancient Greece on the evolving Western Civilization.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST532 The Roman Republic and Empire (3 semester hours)

This course is a study of Roman civilization from its beginnings to the collapse of the Western Roman Empire in the 5th century AD. The course emphasizes ancient Rome's constitutional, political, economic, social, diplomatic, military, naval, maritime, artistic, architectural, engineering, legal, philosophical and intellectual dynamics. Key topics include the Roman way of land and naval warfare, maritime trade and the economy, Punic and Gallic Wars, imperial expansion, transition from Republic to Empire, the Imperial system, Republic and Imperial constitutions, and the impact of Ancient Rome on the evolving Western Civilization.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST533 Late Antiquity and Byzantium (3 semester hours)

This course covers the period from the eighth century B.C. colonization of the Mediterranean and the founding of the Byzantium seaport in 667 B.C. through the First and Second Golden Ages, to the fall of Constantinople in 1453 to the Ottoman Turks. The roles of great Byzantium leaders such as Constantine the Great, the spread of Christianity throughout the Roman Empire, the recapture of Constantinople from the crusaders, and the impact of Byzantium culture on Western intellect are studied.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST534 Medieval Europe (3 semester hours)

This course is a study of European social, political, economic and religious institutions and cultural and intellectual phenomena in the light of the changing historical environment from the end of the Ancient World to the Renaissance. Students examine major milestones from roughly 300 to 1500 AD. Special emphasis includes the importance of the Crusades, development of the Mediterranean as an important venue for the exchange of goods and ideas, and changes in medieval military organization, strategy and technology.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST535 Renaissance and Reformation (3 semester hours)

This course examines the history of the Renaissance as a European wide movement emanating from the Italian peninsula; the crisis of the church medieval and the rise of the Renaissance papacy; Humanism, with special emphasis on the great painters, architects, and sculptors; the Renaissance city-states, Machiavelli, and the Renaissance monarchies of France, England, Spain, and the Holy Roman Empire; the continuing crisis of the church medieval and the religious upheavals of Protestantism; the work of Luther, Calvin, Zwingli, and the Anabaptists; the Catholic Reformation; the age of civil and religious wars.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST536 History of the Enlightenment (3 semester hours)

This course is a study of the major social, political and cultural changes in Europe from the death of Louis XIV to the fall of Napoleon. Topics include the intellectual history of the Enlightenment, the causes of the Revolution, the development of radical ideologies, social and political instability, the French impact on Europe, and the achievements of Napoleon as civil administrator, military strategist, and commander.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST543 18th and 19th Century Europe (3 semester hours)

This course investigates the intellectual, social, and economic history of Europe from the Glorious Revolution of 1688 to the onset of the Great War in 1914. The major focus is on the Enlightenment, the Industrial Revolution, the Age of Ideologies, and the new imperialism prior to the World War I. While emphasizing the intellectual history of Europe, the course also investigates the social and economic structure of 18th and 19th century Europe.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST551 The American Revolution in Context (3 semester hours)

This course is a comparative study to demonstrate the importance of the historical context of any great military event. Context includes all aspects of a society or culture and in this case, 18th century British and colonial American political and constitutional philosophies, social norms and societal structure, economics, religious concepts, and foreign and diplomatic policy. Students examine issues such as the many historiographical opinions on the degree of American constitutional conservatism versus political and social radicalism, and the nature of the soldiery of the continental Army.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST552 The Civil War: Seminal Event in American History (3 semester hours)

This course is a study of the political, economic, cultural, and social aspects of the Civil War as a seminal event in our nation's history. Students explore the causes of the war, how a nation coped with the struggle across multiple dimensions, and how we dealt with the conflict's aftermath. Special emphasis is on the continuing debate that the impact of the Civil War had on both the North and the South.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST553 History of Colonial America (3 semester hours)

This course will examine the political and social history of the thirteen colonies, including their European background, settlement and expansion, beginnings of culture, and the imperial context. Additionally, students will study the social consequences of colonization, migration, and war in America from 1500-1775, including the interaction of British colonists with competing European cultures (French, Dutch, Portuguese, and Spanish), with Native Americans, and with African and Afro-American slaves. The course will also include consideration of the pan-Atlantic context of Early America, cross-cultural contacts, family and gender, labor systems, religious observations, crime, and other themes explored in recent social and cultural theory. (Recommended Prerequisites: **HIST500** and **HIST501**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST554 History of the American West (3 semester hours)

This course will explore the history of the trans-Mississippi West from the 16th century to the present. Included will be the numerous historical issues associated with the region, including cultural contact and conflict, economic development, visions and meanings of the West, human interaction with nature and the environment, relationship between western states and the federal government, tourism, the growth of the sunbelt cities, and the shifting nature of race, class, gender, and power in the region. (Recommended Prerequisites: **HIST500** and **HIST501**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST555 The United States in the 20th Century (3 semester hours)

This course examines the changes in American society at the end of the 19th century as it confronted the issues of industrialization, immigration, and urbanization. It explores the open conflict between the advocates of isolationism and collective security and studies the impact of World War I. It also studies the changing values of the 1920s, the stock market crash of 1929, the Great Depression, and the cultural, social, political, military, and economic growth of the United States from World War II to the present.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST556 U.S. Constitutional History (3 semester hours)

This course examines the origins, content, and judicial interpretations of the U.S. Constitution. The course involves study of the Supreme Court's evolving decisions on such issues as States' rights, civil rights, the Commerce Clause, Due Process in criminal and other proceedings, and protected freedoms (speech, religion, assembly, etc.) under the Constitution.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST557 History and Popular Culture (3 semester hours)

This course explores the history of expressive and material cultures around the world, with emphasis on industrialized nations. Topics include aesthetics, social identification, and production, consumption, and reception of cultural forms. Using literature, films, pictures, and music, students study theories of popular culture and aesthetic hierarchy; explicate historical contexts of artistic movements; discuss cultural imperialism; address problems of cultural appropriation, creativity, and identity; and examine cultural expressions of social difference and deviance. Topics also include the social history of culture in the age of mass society, including popular arts and the culture of consumption.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST558 The Great War (3 semester hours)

This course examines the origins of World War I; the combatants, strategy and tactics, technological innovation vs. conservatism; the war in France; the war at sea; America's role; the peace settlement; and the occupation. While military aspects of the conflict are studied, the primary focus places the Great War in the context of European and World history, and specific areas include political and diplomatic developments, new developments in weapons technology, economic aspects of the war, and the impact of the war on the culture and social order of the nations involved in the struggle.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST560 World War II in Context (3 semester hours)

This course is a global history of the Second World War. Emphasis is on the theaters of war and related events in Europe, Africa, the Middle East, Southeast and Southwest Asia, the Pacific, and Latin America in relation to their impact on the national and military objectives. In this context, students compare and contrast the economies, industry, society, and culture of the United States, Great Britain, Japan, and Germany as major participants during the war. The role of diplomacy and strategy, the impact of war upon society, and the fighting on land, at sea, and in the air are also examined in terms of modern warfare.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST570 Modern European History (3 semester hours)

This course analyzes modern European history emphasizing its political, intellectual, social, and cultural history from the end on the nineteenth century to the near present day. Key concepts that may be covered are nation-building, empire-building, state-building, the development of ideologies, industrialization, urbanization, ethnic nationalism, and globalization.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST571 History of Africa (3 semester hours)

This course will analyze various aspects of African Civilizations including the conflicts and historical development of various pre-colonial African kingdoms to the rise the Slave Trade. In addition, emphasis will focus on the development of the plantation economy in the West, changes in the conduct of the slave trade and its impact on African economic, social, and political history. (Recommended Prerequisites: **HIST500** and **HIST501**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST573 History of the Middle East (3 semester hours)

This course will explore the Middle East by examining its history, politics, and culture while keeping an eye on the wide variety of individual experience of those living in the Middle East. Included in this process, students will focus on how Middle Eastern peoples have adapted to their physical environment as nomads, city dwellers, empire builders, and developed agriculture. In addition, this course will examine the rise of Islam, the Arabic conquests, early empires and their continuities with the Pre-Islamic past. (Recommended Prerequisites: **HIST500** and **HIST501**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST581 The Great Revolutions (3 semester hours)

This course compares and contrasts revolutions recognized as monumental in scope and/or consequences they are labeled "great"; specifically, the American, French, Mexican, Russian, Chinese, Cuban, Vietnamese, and Iranian. Students examine their causes and consequences, to include the transformation of economic, social, and political systems of social stratification. Of particular interest is the relationship among the structural and intentional elements, the impact of revolutionary crisis in a society, and various insurgent challenges to the ancient regime.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST586 History of Science (3 semester hours)

This seminar explores past and recent historiographical approaches within the history of science. Students examine a wide variety of topics primarily from the 17th through the 21st centuries, to include the fields of physical sciences, natural history, and medicine. Emphasis is placed on deciphering various theoretical approaches; the pros and cons of different research questions, subjects, and sources of evidence; and what makes the history of science valuable to our understanding of global change.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST588 History of Religion (3 semester hours)

This course explores the historical development and central beliefs and practices of each of the major world religions. Students employ a multi-disciplinary approach to religious study (e.g., the use of literary criticism, anthropology, psychology, phenomenology and other tools) to examine the importance of religious thought and expression within each religion. The scope of the course is international, and each religious movement is approached from both a chronological and geographical perspective.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST597 Graduate Seminar in European History (3 semester hours)

This course is a comprehensive seminar in European history designed to provide a foundation in historical theory, trends, and concepts for further study of topical history at the graduate level. Students examine the broad sweep of European history, major interpretive questions in world historiography, and major periods of interaction between civilizations and empires. This course is not designed as a refresher of undergraduate history survey courses; rather, it is a concentrated study of European history for serious history students and professionals.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST611 Ancient Warfare (3 semester hours)

This course is a study of warfare in the ancient world with emphasis on the great empires of the Near East and the Mediterranean, particularly the Greeks and Romans. Student examine the origins of warfare in the Neolithic period to the decline and fall of the Western Roman Empire in the fifth century. Special emphasis will be placed on the military history of Mesopotamia and the Near East (Sumerian, Akkadian, Babylonian, Hittite, Assyrian and Persian), Egypt (Old, Middle and New Kingdom), Greece (Mycenaean, Archaic, Hellenic and Hellenistic) and Rome(Republican and Imperial). The phalanx, the legion, Greek Fire and the importance of roads are discussed in detail.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST634 History, Theories, and Contemporary Issues in Historic Preservation (3 semester hours)

This course examines the history, theory, and current issues of preservation practices in the United States and beyond. The themes center on the historical roots of preservation, rather narrowly focused on repairing old buildings, and the modern, broad field of preservation in terms of individuals, societies, and cultures and their relationships to the built environment and cultural landscape. Special emphasis is on the multidisciplinary nature of the preservation field and the public nature of its practice.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST635 Museum and Exhibition Culture (3 semester hours)

This course is a study of objects, buildings, and landscapes and how to evaluate their contexts of display through three-dimensional stories over the course of two centuries, drawing mainly on examples in the United States. Students examine issues such as the relationship of collections and landscapes to identity; the intersection of commerce and culture; and the influence of museums on intellectual culture. Key themes focus on the role of museums and exhibitions in preserving a view of the past and developing an image of progress; and how they change in response to the various contexts in which and for which they exist.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST636 History and Digital Preservation (3 semester hours)

This advanced course explores the nature of the Web for historical research. Students will be exposed to techniques for evaluating and discovering “trusted” resources, as well as participation in related scholarly communities. In addition, the class provides theoretical underpinnings for the digitization of analog materials and controls for “born-digital” resources as part of a preservation program. Topics to be explored include: selection for preservation, copyright issues, digital longevity, formats and strategies for preservation, metadata to support digital preservation, maintaining the integrity and authenticity of digital materials, management of digitization and digital preservation programs, risk management, and disaster recovery

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST642 Nazi Germany and the Holocaust (3 semester hours)

This course offers a study of the origins and history of the Holocaust within National Socialist Germany and throughout Eastern Europe. Students examine the organizations involved at the grass roots level as well as the escalation of events from open murder to the implementation of concentration and death camps. Topics include the birth of National Socialism through the final days of the Holocaust, including the political, social, economic and scientific contributions during the Third Reich.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST643 The Ottoman Empire (3 semester hours)

This course investigates the roots of the Ottoman people, the development of their empire, the spread of their culture and their impact on early modern Europe. Students examine the reasons why the Ottoman Empire was one of the most successful empires in the history of the world. Starting in a corner of Anatolia with Byzantine and Seljuk lands in the 13th century, the emphasis is on how the Ottomans managed to expand their authority until they controlled territory on three continents: Asia, Europe and Africa until its demise after World War I.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST645 Russia and the Soviet Union (3 semester hours)

This course investigates the political, economic, diplomatic, and cultural history of Russia and the Soviet Union, including the decline of Imperial Russia, the Revolution of 1917, and the collapse of the Soviet Union up to the present. Special attention is given to the characteristics of Imperial Russia at the beginning of the twentieth century, the causes and course of the Russian Revolution, the Soviet system under Stalin; the Great Patriotic War, the post-Stalinist liberalization, the Cold War, the collapse of the USSR, the emergence of the post-Soviet republics, and developments in contemporary Russia.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST651 America's Indian Wars (3 semester hours)

This course is an in-depth study of the westward expansion of Europeans and the United States from colonial times to the 1890s as it resulted in military conflict with the Native American Indian tribes living between the Atlantic and the Pacific oceans. Students focus on the military strategy and tactics, leaders and groups, economic conditions, diplomatic efforts, and cultural conflicts.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST652 African-American History (3 semester hours)

This course is a study in the history of African-Americans in the United States, with emphasis on the social forces underlying transitions from West Africa to the New World, from slavery to freedom, and from rural to urban life. Topics include the Atlantic slave trade, American slave societies, maroon communities, free blacks in the antebellum United States, Reconstruction and free labor, colonization, emigration, and urban migrations.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST653 History of American Women (3 semester hours)

This course is a study of the historical experience of women in America from the colonial period through modern times. Topics include the evolution of women's work, education, legal and political status, religious experience and sex roles as well as age, class, race, sexual preference and region as significant variables in women's experience.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST657 Antebellum America: Prelude to the Civil War (3 semester hours)

This course is an analysis of the conditions existing in the United States in the first half of the 19th century. The course focuses on the political, cultural/social, economic, security, leadership, and other issues that played roles in starting and shaping the Civil War. Students will analyze the issues in the context of war and peace to determine whether or not such conflicts as civil wars can be avoided prior to their inception.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST658 Reconstruction and Post-Civil War America (3 semester hours)

This course is designed to examine the interrelationship between the Presidents Abraham Lincoln and Andrew Johnson and the U.S. Congress, compare/contrast the Reconstruction plans developed by both, and determine why the Reconstruction Period played out in the manner that it did.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST670 History and Culture of Latin America (3 semester hours)

This course examines the heritage of Latin America from pre-Columbian civilizations (Aztec, Maya, and Inca) and Iberian colonial patterns, through the independence movements of the early 19th century, and the global relationships that oriented the region toward Europe and the United States. Purpose is to distinguish early Latin American history, from the arrival of the first peoples on the American continents through the 19th century, and Latin American culture, economics, and politics.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST680 Special Topic: History (3 semester hours)

HIST680: This course, when offered, is a one-time offering on an area of special interest that will vary each term. These are open to graduate students as an elective, or to fulfill concentration requirements.

September 2026: **HIST680** Jewish and Christian Egypt through Papyri
This course explores the world of Jewish and Christian communities in ancient Egypt as seen through the papyrological texts they have left behind. Starting from the Persian Period and continuing through to Late Antiquity, we will read, analyze, and assess translated documentary, sub-literary, and literary papyri, and compare and contrast papyrological evidence with other source types. The class also explores the various ways in which papyri may be analyzed including data analysis (with AI assistance), comparison to literary records, and the many implications of studying papyri as artifacts.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST690 Independent Study: History (3 semester hours)

This course is an opportunity for History students to pursue an independent research project or examine a specific area of history under the mentorship of a single professor. Students must complete 24 credits of study before taking this course. The course will typically involve a major research paper; there will be no examination. Students will submit a proposal prior to the start of the project, and a rough draft of the paper, both of which will count toward the final grade. Prerequisite: University approval and Upper Level standing. Prior to registering, students should first contact the professor with whom they wish to mentor their independent study, coordinate an agreement on the grading requirements, and then NOTIFY their academic advisor with the name of their professor.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST691 Writing a Thesis Proposal (3 semester hours)

Preparation for the Master of Arts in History Capstone (Thesis) seminar begins on day one of a student's graduate program of study. The theories, research methods and analytical skills, and substantive knowledge obtained through their master's curriculum provide the basis for the thesis project. Students are required to develop primary and secondary source materials on their research topic and address the writing requirements as described in the syllabus and classroom assignments. The thesis proposal must provide a clear description of a question or problem and a proposed method of answering the question or solving the problem. Guidance on the format of the research proposal and a sample proposal are contained in the APUS Thesis Manual. This course should be the LAST course in your program prior to **HIST699** and should not be taken earlier in your program.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST696 Practicum in Applied History (3 semester hours)

The experiential or practical component of the course aims to apply learning in an aspect of interest related to the degree and concentration in Public History. It is understood to be a supervised practicum that requires approval by APUS before entering into the relationship with the organization. The selection of an organization or site for the practicum must relate to the content of the student's course work and/or concentration. Goals of the applied practicum and integration seminar will be submitted by the student for approval using an application for approval to the Faculty member, Program Director and Dean of the School, Arts and Humanities. The organization will serve as an opportunity to experience the practice of an area of management related to the focus of the student's degree. Practicum courses are NOT included in the university retake policy. All grades for any attempts will appear on transcript and will be calculated in GPA

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST698 Comprehensive Exam in History (0 semester hours)

THIS COURSE WILL REQUIRE A TEST PROCTOR. This course prepares graduate students for the Comprehensive Examination in the Master of Arts in History program. The purpose of this course is to provide a structured weekly review of key concepts, theories, and knowledge skill sets in their degree and particular concentration. Students are required to submit responses to a number of assignments over the course period prior to taking the exam. Students apply historical methodology in preparation for the exam and consult texts, journal articles, print & media reports, and documentaries, as well as collaborate with other students enrolled in the course to help them prepare for the exam. Assignments serve as a means of final preparation for the student and calibration with the course instructor, who will grade the exam. IMPORTANT: You must have COMPLETED all other courses in the program and have a GPA of 3.0 in order to register for this course. As a History student, you must pass this comprehensive exam in order to have your degree conferred. The comprehensive exam must be taken by the course end date or a failing grade will be posted. If you fail your first course attempt to pass the comprehensive exam, you will need to get approval to register for a second attempt of the course and BOTH final course grades will show in your transcript.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HIST699 Master of Arts in History - Thesis (3 semester hours)

Preparation for the Master of Arts in History Capstone (Thesis) seminar begins on day one of a student's graduate program of study. The theories, research methods and analytical skills, and substantive knowledge obtained through their master's curriculum provide the basis for the thesis project. Students are required to develop primary and secondary source materials on their research topic and address the writing requirements as described in the syllabus and classroom assignments. The thesis proposal must provide a clear description of a question or problem and a proposed method of answering the question or solving the problem. Guidance on the format of the research proposal and a sample proposal are contained in the APUS Thesis Manual. This course may not be taken until all other courses are COMPLETED and student has a 3.0 GPA. Capstone courses are 16 weeks long and cannot be taken along with any other course. (Prerequisite: **HIST691**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

History (MILH)

MILH532 British Perspective of the American Revolution (3 semester hours)

This course details the British view of the Revolution and the long hidden perspective of the American Revolution. Topics include British colonial politics, diplomacy, political and military leadership, factors of influence in Great Britain during the Revolution, and post-war views of America.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH551 World War II in Europe (3 semester hours)

This course examines the Allied victory in Europe in World War II. Students assess how the American Army, trained for speed and mobility, performed during campaigns in Italy, France and Germany. The focus is on Eisenhower's generals and their decisions concerning amphibious invasions (e.g., Sicily, Salerno, Anzio and Omaha Beach), airdrops (e.g., Italy and Holland), the race across France and slogging through Italy (e.g., the Gothic siege line and the Huertgen Forest), as well as counter strokes such as Monte Cassino and the Ardennes Bulge.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH552 World War II in the Pacific (3 semester hours)

This course is a comprehensive analysis of the fighting during World War II in the China-Burma-India Theater, New Guinea, the Solomon Islands, the Aleutians, and the Philippines. Students assess the amphibious campaigns in the central Pacific theatre and evaluate the impact of one of the most massive movements of men and arms in history. Primary focus is on land warfare, its strategies, tactics, leaders and lessons learned.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH565 History of Peacekeeping: 1988 - Present (3 semester hours)

This course is a comprehensive survey of the overall evolution and functioning of United Nations peacekeeping operations from the end of the Cold War to the present. The focus of this course is the detailed analysis and comparative assessment of each peacekeeping operation as a tool of conflict management within the unique parameters in which it was established and conducted, and future trends for similar types of intervention and conflict resolution.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH621 The Cold War Era and Aftermath (3 semester hours)

This course is a seminar on the US-USSR Cold War period, which dominated geopolitics and military affairs from the end of World War II to the fall of the Berlin Wall, as well as the first decade of the post-Cold War era culminating with the events of 9/11. Students assess military conflicts and confrontations between the United States, Soviet Union, and their respective allies in the years since 1945. Focus is on the proxy wars of the US and USSR to include wars of national liberation in Africa, Asia, and Latin America; the Arab-Israeli conflict; the Indo-Pakistani conflict; and post-Cold War conflicts in Africa, Asia, and Latin America.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH622 Great Power Military Interventions (3 semester hours)

This course is an in-depth seminar on the military interventions of the United States and Soviet Union/Russia since the end of World War II. Students examine the military interventions of the United States and Soviet Union/Russia. Special emphasis includes the analysis of military interventions in Greece, Korea, Suez, Vietnam, Afghanistan, Somalia, Chechnya, and Iraq.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH637 The Seven Years War (3 semester hours)

This course is a comprehensive study of the “first global war” as events unfolded in Europe, North America, the Indian sub-continent, and on the seas during the 18th century. Students discern, as a prelude to the American Revolution, how the practice of warfare among the eighteenth century nations was firmly established among European nations. In the distrust and distaste among the French, British, and Americans, the Seven Years War set a pattern that has remained central to the American way of understanding our colonial history.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH667 The Balkans: Conflict and Peace (3 semester hours)

This course examines the military history of the region known as the Balkans and explores the turbulence behind long standing political, religious, and economic issues. Students assess the post-World War II era from 1945 to the present, by focusing on past and present conflicts and confrontations, UN and NATO interventions, transitions in government, and the pursuit of stability within the European community. Special emphasis is on further research into the rise and fall of Yugoslavia and emerging new states.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH668 The War in Vietnam (3 semester hours)

This seminar examines the origins, evolution and impact of the Vietnam War. In addition to reviewing the history of U.S. involvement in Vietnam, students explore the political, cultural and social forces and military developments that shaped the behavior of the various Vietnamese and American parties. Purpose is to develop a coherent perspective on what became one of the costliest and most divisive wars in American history.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Homeland Security (CMRJ)

CMRJ620 Policing and Corrections in Homeland Security (3 semester hours)

This course explores the evolving role of police and corrections in the homeland security enterprise. Historical, social, legal, and operational aspects are considered. Threats and strategies specific to police and correctional facilities and best practices in the field are critically assessed. Furthermore, negotiating relationships with other agencies continues to be a challenge for information sharing and dissemination between different law enforcement and correction agencies. This course examines the role the police should play in the task of preventing and responding to terror and the aftermath of terror. Special emphasis is placed on the relationships between the police and their community and how those relationships can be leveraged post 9/11.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Homeland Security (HLSS)

HLSS500 Research Methods in Homeland Security (3 semester hours)

This course is highly recommended as a second class for homeland security graduate students. This course provides basic research methods skills to assist homeland security graduate students in addressing problems and issues in the discipline. Students taking this course will become well-versed in research planning, secondary data collection, and qualitative data analysis methods, as well as how these methods relate to the larger field of social science research.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HLSS502 Homeland Security and Defense (3 semester hours)

This course is highly recommended as a first course in homeland security. It provides a comprehensive overview of key elements of the United States homeland security enterprise. Students will examine, discuss, and analyze homeland security operational and policy concerns that have continued to evolve in the wake of the 9/11 terrorist attacks and the creation of the Department of Homeland Security.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HLSS505 Security Risk Management (3 semester hours)

This course introduces students to risk management components including plans and strategies to mitigate risk. Students in this course will examine the role of risk management at the strategic and enterprise levels in the prevention of loss and mitigation of consequences through risk identification and control. This course will allow students to develop and apply risk management techniques to include selection of risk management measures and implementation of those measures.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HLSS508 Privacy & Civil Liberties in Homeland Security (3 semester hours)

This course offers an examination of the challenges associated with balancing civil liberties and securing the homeland. Students will examine critical infrastructure protection, the use of technology, and the need to carry out intelligence gathering in secrecy around the context of civil liberties and civil rights. Recommendations to improve existing homeland security programs and their overall effectiveness to meet emergent future challenges while balancing civil liberties will be discussed.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HLSS522 Weapons of Mass Destruction and the New Terrorism (3 semester hours)

This course explores the threat of weapons of mass destruction (WMD) as a unique phenomenon within the homeland security landscape. Specifically, this course provides students with a historical perspective on the development and use of WMD from both an international and a domestic perspective. The course also explores the efforts to prevent, prepare, and respond to the use of WMDs.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HLSS523 Domestic Terrorism and Extremist Groups (3 semester hours)

This course traces the history, emergence, and growth of domestic terrorist and extremist groups within the United States. Students will assess various groups' intentions, capabilities, and activities within contexts of and ramifications on political, national security, and legal paradigms.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HLSS603 Resilience and Homeland Security (3 semester hours)

With an ever-changing threat vector, the need for a more resilient nation has never been more important. This course will explore different aspects of resilience and its connection to national homeland security. The course further explores resilience and its relationship to critical infrastructure nodes to methods of analysis and risk impact.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HLSS645 Port Security (3 semester hours)

This course will survey the critical importance of ports to trade, their vulnerability to disruption and attack, and defensive measures to mitigate risk focusing on international cooperation and legislation. Special emphasis will be placed on defensive measures to protect ports from disruption or asymmetric attack, international cooperation, and national legislation.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HLSS697 Creative Project Capstone Option in Homeland Security (3 semester hours)

The Creative Project Capstone Option in Homeland Security is a 16-week capstone course for the master’s degree in Homeland Security. Creative projects as program capstones may be derived from a wide variety of organizationally defined formats, including legislative proposals (local, state, or federal), briefs, and standard operating procedures. Other formats that may also be utilized are training program manuals, procedure manuals, organizational change proposals, communication plans, and recruitment plans. Students are required to follow the requirements of the APUS Capstone Manual and the appropriate presentation style guide. NOTE: This course may not be taken until all other courses are COMPLETED and the student has a 3.0 GPA.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HLSS699 Homeland Security Capstone (3 semester hours)

The Homeland Security Capstone is a 16-week capstone course for the master’s degree in homeland security. This course will involve a major research paper or thesis project that demonstrates the student’s understanding of and ability to implement the homeland security program objectives.
The research paper should demonstrate the student’s understanding of social science research methodology as it applies to homeland security. Students must follow the requirements of the APUS Capstone Manual and the appropriate presentation style guide. NOTE: This course may not be taken until all other courses are COMPLETED and the student has a 3.0 GPA.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Hospitality Management (HOSP)

HOSP610 Event Coordination and Management (3 semester hours)

The ability to coordinate and manage various types of events requires excellent attention to detail in achieving the events' components. In this course, you will explore different types and scopes of events coordination in various settings. You will apply multiple management styles in leading diverse work teams. Also, as part of this course, you will learn first-hand how to select an event site location, conduct a needs assessment, and develop practical proposals and agreements for a specific event project. You will analyze the challenges event planners face when coordinating and managing events, working with vendors and sponsors, and create solutions to mitigate these challenges. Finally, you will evaluate the various marketing strategies used by event professionals to market their event projects.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HOSP620 Financial Planning and Management for Events (3 semester hours)

This course is designed to give you a fundamental understanding of the financial statements that event managers must consider when preparing their events. You will develop event budgets and goals for an event project. You will examine the factors that impact an event's profitability and identify negotiation strategies that contribute to an increase in Return-On-Investment (ROI). As part of this course, you will apply practical methods when making complex financial decision-making in producing various components of an event project. Finally, you will evaluate measures that can improve revenue optimization in an organization.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HOSP630 Event Risk Management and Safety (3 semester hours)

This course provides an overview of the risk management and safety procedures required in event planning and execution. Emphasis is placed on exploring safety regulations and health security, crisis management, and the liability issues and duty of care to event management. You will examine various methods to identify and mitigate risks in event execution. You will assess ways to implement practices that abide by the American with Disabilities (ADA) Act during site selection, event registration, and admission. Finally, you will evaluate the challenges event managers face with overcrowding and when switching from face-to-face to virtual events during an emergency.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HOSP640 Leadership in Meeting and Event Planning (3 semester hours)

This course will examine the fundamental understanding of leadership theories and systems approaches to leadership as they apply to planning and executing events. Students will analyze the broad spectrum of sustainability and identify ways to implement best practices into event planning and design in the present and potentially the future. Students will apply the best strategies in recruiting staff and volunteers, evaluate staff performance, and create event policies. Students will further examine the challenges leaders face in today’s organizations and create a proposal to facilitate meeting and event planning in various settings.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Humanities (HUMN)

HUMN500 Humanities: Research, Study and Use (3 semester hours)

This is the first course in the graduate humanities program. It is designed to introduce the student to the theory, concept, and general approach to a program of study centered on civilization's great works, authors, and ideas. Course topics include how to approach study of the great works, authors, and ideas; a philosophy grounded in the classical/liberal tradition; and the university and curricular concepts centered on the great ideas. Students are expected to use this course to orient themselves for the remainder of the graduate humanities curriculum, prepare for a life of focused and purposeful study based on fundamental concepts and a particular modus of thought and reflection, and apply themselves within a general framework of knowledge acquisition and application. Readings for this course include Adler and Van Doren's How to Read a Book: The Classic Guide to Intelligent Reading.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HUMN510 The Ancient World (3 semester hours)

This course acquaints students with the Hebrew Scriptures and the world of the ancient Greeks. The Egyptians, Babylonians, Assyrians, and other peoples to whom the Hebrews and Greeks are indebted are also considered. Among the topics to which the course attends are the human experience of the divine, man's struggle with human and natural forces, warfare and the meaning of justice, the development of logos as human reason or cognition, and the emergence of science, technology, and artistic experience. Readings for this course include The Epic of Gilgamesh; The Bible; Homer's Odyssey; Thucydides' The Peloponnesian War; Aeschylus' The Oresteia; and Plato's The Republic.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HUMN520 Antiquity and Medieval World (3 semester hours)

This course addresses the possibility of the existence of a proper way or path through life. Texts are chosen based on their ability to clarify moral values in the middle ages and antiquity, and are loosely grouped around themes of devotion, consolation, and the otherworld. Primary texts will be read in conjunction with historical background information. Readings will include selections of the Dead Sea Scrolls, Anchorene Wisse, the letters of Abelard and Heloise, Boethius' Consolation of Philosophy, Old English stoic literature, Chaucer's "Book of the Duchess," and examples of journeys to the otherworld including Aeneus' journey to Hades in Virgil's Aeneid, selections of Dante's Divine Comedy, Beowulf's decent into Grendel's mere, faerie ballads, and The Pearl.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HUMN530 The Renaissance (3 semester hours)

HUMN530 provides an overview of major works of the Renaissance, and offers a detailed study of its primary thinkers. Issues include the birth of rationalism, individualism, skepticism, and emergent secularism. Questions address the inherent tensions between intellectual tradition and change, and the increasing dominance of the sphere of science. Readings for this course include: Petrarch's Selections from the Canzoniere and Other Works; Elizabeth I's Poems; John Donne's Selected Poems; Machiavelli's The Prince; Francois Rabelais' Gargantua and Pantagruel; Michael de Montaigne's Essays; Miguel de Cervantes Saavedra's Don Quixote; Christopher Marlowe's Doctor Faustus; Shakespeare's Sonnets and The Tempest; Edmund Spenser's "Letter to Raleigh" and The Mutabilitie Cantos.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HUMN541 Enlightenment and the Modern World (3 semester hours)

HUMN541 provides an overview of major works of the Enlightenment, and offers a detailed study of its primary thinkers. Issues include the birth of rationalism, skepticism, individual liberation and emergent secularism. Questions address the inherent tensions between intellectual tradition and change, and the increasing dominance of the sphere of science. Readings for this course include: Jane Austen's Pride and Prejudice; Mary Wollstonecraft's A Vindication of the Rights of Women; Meriwether Lewis and William Clark's Journals of the Lewis and Clark Expedition; Rousseau's Confessions; Thomas Paine's Common Sense and other Political Writings; and Ekaterina Dashkova's Memoirs.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HUMN550 Evolution of Earth and Universe (3 semester hours)

This course provides study of the logic and methods of science in relation to the development of the universe. It addresses the path by which scientific description of the universe has been made possible. It covers the origin of the universe, the nature of reality, and the relationship between observer and nature. Course topics include cosmology and the future of the human race. Readings for this course include Stephen Hawking's A Brief History of Time and other emerging relevant contemporary documents.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HUMN551 Evolution of Life and Intelligence (3 semester hours)

This course is a study of issues related to genetics, the human nervous system, and artificial intelligence. Course topics include computers, computation, and its limitations; natural and machine intelligence; and the ethical responsibility of the scientist, the politician, the philosopher, and the artist as they relate to emerging issues. Philosophical, ethical, and scientific points of view will be discussed. Readings for this course include selected works of Mary Shelley, Charles Darwin, Richard Dawkins, Paul Churchland, and Edwin O. Wilson, among others.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HUMN555 The 19th Century: Romantic and Industrial Revolutions (3 semester hours)

In this course, students will explore various representations of nineteenth century literature. Students will seek to critically identify and analyze literary meanings from interdisciplinary perspectives. They will question how the works discussed reflect and impact a range of cultural issues in the nineteenth century-- a time of radical social change. Through the lens of literature students will look at social upheaval in terms of national identities, urbanization, science, music, class, popular culture, gender, industry and, in the U.S, slavery.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HUMN561 Society, Class and Wealth (3 semester hours)

This course builds upon the study of distinctive perspectives of the social sciences. Course topics include the development of modern political and social understanding as it relates to the impact of economic issues on societies. Readings for this course include: Jean-Jacques Rousseau, Discourse on the Origin of Inequality; Max Weber, The Protestant Work Ethic and the Spirit of Capitalism; Adam Smith, Wealth of Nations; Karl Marx and Friedrich Engels, Selected Works.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HUMN571 Individuals, Societies, and the Spirit (3 semester hours)

This course continues the study of the development of the individual in modern society. Readings for this course include: William James, Varieties of Religious Experience; Emile Durkheim, Elementary Forms of Religious Life; Ernest Gellner, Nations and Nationalism; Sigmund Freud, Civilization and Its Discontents; Erik Erikson, Childhood and Society; Thomas Kuhn, The Structure of Scientific Revolutions.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HUMN697 Humanities Capstone Portfolio Seminar (3 semester hours)

This course provides the framework for students to assemble a culminating portfolio including representative work developed throughout the Humanities MA degree program and will guide students to develop additional assets that demonstrate mastery of institutional and program objectives through degree completion. NOTE: This course may not be taken until all other courses are COMPLETED and student has a 3.0 GPA.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Information Technology (INFO)

INFO531 Management Information Systems (3 semester hours)

This course addresses information systems, to include their nature and role as key management resources. This course covers the information systems infrastructure, to include databases, knowledge management systems, enterprise information portals, telecommunications, the Internet, and wireless technology. It examines the topics of e-commerce, information systems in the global economy, managing global systems, securing information systems, and ethical and social issues in information systems.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INFO620 Enterprise Database Systems (3 semester hours)

This course examines the principles, practices, and methodologies of enterprise database systems from conceptual design to implementation; this includes architectures, models, design, management, implementation, and security. Included is a total life-cycle database design and implementation project that entails conceptual design, data modeling, normalization, optimization, and implementation. This course appraises object-relational and relational databases, examines Entity-Relationship (ER), Extended Entity-Relationship (EER), and Unified Modeling Language (UML) data models, and investigates relational procedures, dependencies, keys, relationships, cardinality, and referential integrity. It also evaluates query processing, performance tuning, transaction processing, concurrency, data integrity, database recovery, data security, data warehousing, data mining, and emerging technologies. Prior knowledge in a procedural database language such as PL/SQL or T/SQL using Oracle or MSSQL respectively is highly recommended.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Information Technology (ITCC)

ITCC500 Research Methods in Information Systems and Technology (3 semester hours)

This course focuses on the research methods, tools, instruments, and devices used in Information Sciences and Information Technology; it appraises the logic of the scientific method, research design, qualitative and quantitative analysis of data for the purpose of conducting and reporting basic research in a scholarly and academic setting. Through concentration-based case studies, it investigates current trends, legal and ethical issues, global and societal impact, policies, and applications in the fields of information technology, information security, cyberlaw, digital forensics, and media management. This course evaluates methods to collect, classify, categorize, evaluate, assess, and report research data, to formulate valid research questions, and to derive logical conclusions. The principles, practices, tools, and methodologies presented in this course are applicable throughout the program of graduate studies.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ITCC697 Creative Project Capstone (3 semester hours)

The Information Technology Creative Project Capstone course gives students the opportunity to address real-world issues relevant to their profession, plan and execute a project, contribute to their discipline while developing mastery of selected skills. Creative projects may originate from a wide variety of options such as standard operating procedures, training program manual, organizational change proposals, software and hardware design or development, or other information technology solutions. NOTE: This course may not be taken until all other courses are COMPLETED and student has a 3.0 GPA. THIS COURSE IS 16 WEEKS.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ITCC698 Information Technology Capstone (3 semester hours)

Capstone course of studies completed toward the graduate degree in Information Technology. The student will complete a research thesis that demonstrates mastery and application of advanced research and analytic skills related to the learning outcomes of this degree program. NOTE: This course may not be taken until all other courses are COMPLETED and student has a 3.0 GPA.THIS COURSE IS 16 WEEKS.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Information Technology (ITMG)

ITMG624 Information Technology Project Management (3 semester hours)

This course explores successful project management for information technology projects. The System Development Life Cycle (SDLC) models are defined including the waterfall, spiral, incremental release, and prototyping models. Students will differentiate between these models and apply corresponding project management methods to identify critical checkpoints and reviews. Risk management, as applied to technology projects, is examined. Key project indicators are discussed, and students will explore defining measurement criteria for determining critical success factors on a project. The course defines the application of knowledge, skills, tools, and techniques to project activities and includes a tutorial for Microsoft Project. Emphasis is placed on the three dimensions of the information technology project constraints: scope, time, and cost. Students are recommended to have access to Microsoft Project. Course software requirements with the appropriate versions are listed under the course materials site.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ITMG625 IT Project Management: Integration, Scope and Time (3 semester hours)

The course is an advanced study of project management; it takes a systems approach to project management and examines project integration, project management knowledge areas (domains), project life cycle, software development life cycles, phases, and process groups, such as project initiation, planning, executing, controlling, and closing. This course also appraises the challenges and the techniques for managing scope on IT projects. This course also assesses methods, tools, and techniques to perform time management. Students are recommended but not required to have access to Microsoft Project®. Course software requirements with the appropriate versions are listed under the course materials site. (Prerequisite: **ITMG624**)

Microsoft Project® is a registered trademark of Microsoft Corporation.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ITMG630 Project Management for e-Business (3 semester hours)

E-Business projects have become even more commonplace than the neighborhood bowling alley; e-Business development time lines have shrunk dramatically while costs have increased significantly. While traditional IT project managers have filled the gap, it should be recognized that e-Business introduces challenges over and above that of traditional IT project management. This course is a study of the project management framework related to e-Business, it includes: strategic planning, risk management, web content management, customer relationship management, security and privacy management, web usability, agile application development, application deployment, search engine optimization (SEO), internet marketing, and vendor management.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ITMG636 IT Project Management: Developing Project Schedule (3 semester hours)

This course is an advanced study of the methods and practices associated with developing a project schedule with assigned resources. The course begins with the initiating process group and continues through scope, schedule, and resource planning. Students must have access to Microsoft Project®. Course software requirements, including the appropriate versions, are listed under the course materials site. (Prerequisite: **ITMG624**)

Microsoft Project® is a registered trademark of Microsoft Corporation.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ITMG637 IT Project Management: The Integrated Project Plan (3 semester hours)

This course is an advanced study of information technology project management with a focus on the integrated project plan. This course will be taught from a mixture of analytical and practical methods. Topics include communication management, human resource management, project quality management, project risk management, procurement management, project stakeholder management, and project closure and lessons learned. It assesses various theories and applies these theories to help students develop effective project plans. This course also addresses the inherent risk in various kinds of plans and examines the principles of effective integrated project plans. Students are recommended to have access to Microsoft Project software. (Prerequisite: **ITMG624**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

ITMG638 IT Project Management: Execution, Monitoring and Control (3 semester hours)

This course is an advanced study of executing, monitoring, and controlling IT projects. Quality projects do not happen; they must be planned, promoted, and practiced intentionally and deliberately. This course examines the various models and methods for directing and managing project work and risk. This course demonstrates how to apply appropriate execution, monitoring, control, and risk responses to minimize project failure. Students must have access to project management software and tools. (Prerequisite: **ITMG624**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Intelligence Studies (INTL)

INTL501 Strategic Intelligence (3 semester hours)

RECOMMENDED AS THE FIRST COURSE IN THE PROGRAM. This course examines the current structure, function, capabilities, and contributions of individual U.S. national intelligence community members. Students appraise the intelligence cycle by an overview of the intelligence planning, collection, exploitation, analysis, production, and dissemination phases. The course also evaluates the intelligence oversight system, the restrictions on national intelligence community activities prescribed by federal law, executive and agency directives.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL502 Collection (3 semester hours)

This course is a study of intelligence collection and information gathering. It focuses on a variety of aspects related to how both the United States and foreign nations gather and process intelligence. The student will develop a comprehensive understanding of the role collection plays in the intelligence community, how various policies affect collection, and how different intelligence agencies monitor and collect intelligence.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL507 Intelligence Operations (3 semester hours)

This course provides an introduction to the theory and practice of intelligence operations. The course will focus on the intelligence resources necessary to carry out the full range of intelligence operations using the tools, techniques, and resources available to intelligence agencies.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL508 Intelligence Analysis (3 semester hours)

This course focuses on intelligence analysis including the analysis of international threats to security. The course will provide students with a foundation of human cognition in an effort to help understand why we think the way we do, how we come to formulate biases, and the many analytical, perceptional, and cognitive errors we frequently make in conducting analyses. Students will be provided with a foundation from which to understand and conduct critical analysis. This course affords an opportunity to look at a variety of case studies related to both US and foreign threat analysis and action, including the evolution of responses to threats, perspectives on threat action, principles of threat analysis and response, and assessments of successes and failures of such actions. Students will develop a comprehensive knowledge of intelligence analysis, how intelligence agencies assess and counter international threats in order to guard global security interests, and how various threats affect national security policy and decision-making. (Prerequisite: **SSGS500**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL509 Intelligence Collection (3 semester hours)

This course is a study of intelligence collection and information gathering, emphasizing how the United States and foreign nations gather and process intelligence. Students will develop a comprehensive understanding of the role that intelligence collection plays in the broader intelligence community, how policies influence collection activities, and how different intelligence agencies monitor and collect information. The course explores major collection disciplines used across the national intelligence cycle, including human intelligence, signals intelligence, imagery intelligence, and open source intelligence, helping students understand how these capabilities support analysis and inform national decision-making.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL604 Interagency Operations (3 semester hours)

This course provides insight on how to improve interagency relationships among security, defense, and intelligence agencies. This course introduces the student to theoretical and practical material for understanding the behavior of individual organizations and what can be done to make organizations work more closely together at the federal, state, and local levels. Emphasis is placed on explaining why organizations act the way they do and how to improve interagency coordination.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL607 Open Source Intelligence (OSINT) (3 semester hours)

This course provides an intensive introduction to open source intelligence and its related disciplines. Students will examine the definition, nature, and development of open source intelligence (OSINT), including its policy considerations, management practices, and current trends within the intelligence community. Emphasis is placed on understanding how publicly available data and data collection methods contribute to producing actionable intelligence that supports national security objectives. The course also surveys OSINT-focused organizations, challenges, reform efforts, and future prospects, preparing students to evaluate information collected from diverse sources and apply foundational OSINT techniques in professional intelligence environments.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL610 Counterintelligence (3 semester hours)

The course focuses on both U.S. and foreign aspects of counterintelligence, including the history and evolution of counterintelligence, the differences between passive and active CI measures, principles and processes of counterintelligence and its relationship to covert action, the ethics of counterintelligence, and the evaluation of CI successes and an estimate of the damage caused by failures. The student will develop a comprehensive knowledge of the use and practices of counterintelligence, especially in protecting homeland security and national security interests against foreign adversaries. Additionally, the collection process and the changes for the future in the infusion of CI technology will be discussed.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL613 Intelligence and Homeland Security (3 semester hours)

This course examines Intelligence Community responses to threats to the homeland U.S. from transnational and domestic actors. Students will examine intelligence roles and responsibilities, collaboration, information sharing, and limitations.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL616 Ethical Challenges in the Intelligence Community (3 semester hours)

This course examines issues of ethics, morality, and legal principles in the context of Intelligence through an in-depth critical analysis of the primary ethical philosophies and legal doctrines as they apply to contemporary U.S. Intelligence. Students will research the moral, psychological, and legal issues pertaining to a variety of topics. The course concludes with an evaluation of an issue within the intelligence community related ethical-moral and legal choices.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL621 Signals Intelligence (SIGINT) (3 semester hours)

This course examines Signals Intelligence focusing on the underlying technology of SIGINT and its application to various military and civilian intelligence questions. This course will also address contemporary issues related to the Cyber-SIGINT nexus as well as the lesser-known disciplines of MASINT, FISINT, etc. Collection platforms will be studied in relation to their inherent capabilities and application against various intelligence targets. The course is held at the unclassified, open-source level.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL622 OSINT (3 semester hours)

This course constitutes an intensive introduction to OSINT and its related disciplines and will focus on the following areas: definition and nature of OSINT, OSINT policy and management, history and development of OSINT, current OSINT trends, OSINT-focused organizations, challenges, reform, and future prospects. The course constitutes an intensive introduction to OSINT and its related disciplines. (Prerequisite: **SSGS500**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL623 Human Intelligence (HUMINT) (3 semester hours)

This course provides an overview of HUMINT operations include mission-target analysis, operational planning, execution and evaluation, cover, security and communications, collection and reporting, and financial management. Students will be expected to demonstrate the ability to assess, articulate and defend the soundness of operational concepts, plans and budgets.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL627 Advanced Geospatial Intelligence (3 semester hours)

This course will focus on advanced geospatial analytic techniques and how these techniques aid in decision making in various operational environments. This course will include study of geospatial collections and teach the application of theory and practical utilization of analytical tools, techniques and procedures. Students will be exposed to and are expected to develop an understanding of emerging technology, trends and intelligence applications within the discipline of geospatial intelligence. The course will focus on geospatial concepts, techniques, and maximize focus in geospatial in support of emergencies, national and human disasters, and national security environments. (Prerequisite: **SSGS500**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL628 Intelligence for Multi-Domain Operations (3 semester hours)

This course introduces students to the new military doctrine for the next 20 years. The military began implementing MDO in 2018, and is the focus of concepts, exercises, and capability development. There are five phases in MDO; compete, penetrate, dis-integrate, exploit, and re-compete. Inherent in MDO is a larger effort to collect and analyze data. Intelligence plays an essential role in the collection and analysis of data. This class looks at how intelligence will support MDO for the foreseeable future.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL629 Social Media Intelligence: Its Foundations and Applications (3 semester hours)

The last ten years saw the rise of a new type of intelligence – Social Media Intelligence (SOCINT) – representing fertile ground for public and private organizations interested in collecting information regarding potential adversaries and competitors. As a result, SOCINT no longer stands as a subset of Open-Source Intelligence (OSINT) but embodies a discipline of its own requiring specialized knowledge, tools, and techniques. More and more, social media permeates every facet of our lives, asking individuals to give up more of their personal information and privacy, making it imperative to understand how these companies acquire our data and ultimately use/share/sell that information. Couple this with the need to understand the legal, ethical, and privacy issues of its use by organizations acquiring this type of intelligence makes SOCINT an equally important component of the overall intelligence continuum. As different nation-states begin to weaponize social media, it will be necessary for intelligence collectors to detect and deter these attempts at influence. All these issues point to an immediate need to educate individuals charged with collecting and utilizing this dynamic form of intelligence.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL631 Criminal Intelligence Analysis (3 semester hours)

This course provides the student with an introduction to the methods and techniques of criminal intelligence analysis and strategic organized crime. The rapid increase in multinational analysis and transnational organized crime, corporate drug trafficking organizations, and the impact of crime on national and international policy has created a critical need for law enforcement intelligence experts in the relatively new field of criminal intelligence. The course shows how to use criminal intelligence analysis to predict trends, weaknesses, capabilities, intentions, changes, and warnings needed to dismantle criminal organizations. This course provides knowledge needed by law enforcement professionals at the federal, state, and local level, by criminal intelligence analysts working in private industry, and by military intelligence personnel making a transition from a military to a law enforcement career. The course provides a background of the use of intelligence to dismantle criminal organizations and businesses. This course emphasizes criminal/law enforcement intelligence, as opposed to criminal investigation.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL635 Indications and Warnings (3 semester hours)

The purpose of this course is to teach the student how the current I&W system is organized, how it is supposed to work in theory, and how it has actually worked in practice. In addition, students will examine the traditional and alternative approaches to the I&W process. Students will learn about the various types of intelligence indicators and how they fit into the process of intelligence prediction, which is an implied function of I&W. Students will also examine various historical case studies to learn about the four basic "sources of error" in I&W.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL637 Intelligence Profiling (3 semester hours)

This course provides an overview of the analysis of political leaders. It explores various political psychological approaches to studying leaders to include biographies, psychoanalysis, traits, characteristics and motivations. Examples of specific political leaders are discussed throughout the course to offer the student a broad knowledge of world leaders. The course also provides students with a solid foundation from which to conduct their independent analysis of political leaders.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL639 Predicting Public Health Threats: The Role of Medical Intelligence (3 semester hours)

The COVID-19 global pandemic has resulted in an awareness of the value of operational measures of specialized intelligence regarding public health and associated potential impacts on national defense, global security, diplomacy, and public policy. This class examines the role and function of medical intelligence (MI), as directed by U.S. functions of intelligence, public health, and safety. This class focuses on mechanisms to deliver decision advantages in support of American military operations, including the investigation and rapid implementation of control measures, and the collection and analysis of medically based evidence to promulgate preventive actions. Topics include evaluating the efficacy of strategic countermeasures for chemical, biological, radiological, and nuclear weapons; analyzing the application of MI for emerging biotechnology; pandemic potential of existing diseases; biosafety and biosecurity issues; and the appraisal of the effectiveness of collaboration and information dissemination between the American intelligence and public communities, the community of American allies, and other global entities.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL644 Cyber and the Intelligence Cycle (3 semester hours)

This course looks at cyber and the intelligence cycle from two perspectives. The first is the application of the classic intelligence cycle against cyber targets. The second, parallel track is the use of cyber tools to optimize intelligence operations and the intelligence cycle in particular. This course will discuss the unique role of the cyber domain in the intelligence cycle. Intelligence in cyber is comprised of different characteristics than that of space, air, land and sea. Because cyber information is transmitted instantaneously, it may affect components of the intelligence cycle (collection, analysis, dissemination, etc.) simultaneously rather than sequentially, as is the case with other intelligence collections methods. Students will discuss commercial and defense concepts associated with the intelligence cycle and enterprise information technology infrastructure. Students will also address the challenges that are created due to rapid advancing technologies and existence of multiple actors. (Recommended Prerequisite: **SSGS500**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL646 Transnational Crime and Narcotics (3 semester hours)

This course will provide an overview of transnational crime and narcotics and its effects on national security, political, social, and economic development of countries around the world. The focus of this class will be the proliferation and expanding influence of organized crime groups, the increasing links among crime groups, corruption, and links to terrorism from transnational crime and narcotics. This class will examine the diverse dimensions of transnational crime and narcotics in the context of increasing globalization and the exponential impact of technology advances

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL647 Cyber Intelligence (3 semester hours)

This course provides a comprehensive introduction to the cyber intelligence field and is intended to equip students with the essential knowledge and skills often needed to navigate the complex world of cyber threats, vulnerabilities, and risks. Students will explore the full range of cyber capabilities from exploitation to defense, including several case studies that demonstrate the challenges and benefits of cyber intelligence operations. Through discussion forums and a research project, students will gain a deeper understanding of the role cyber intelligence plays in national security and the protection of critical infrastructures.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL649 Case Studies in Foreign Cyber Threats (3 semester hours)

This course will examine various case studies in Foreign Cyber Threats and explore the challenges posed by these threats. Through the review of case studies, students will become familiar with the fact that cyber threats are difficult to assess and mitigate given the existence of malicious actors, multiple motives, different but commonly used attack vectors, the internet as a shared and integrated domain, difficulty in predicting potential attacks and the damaging nature of worst-case scenarios. (Prerequisite: **SSGS500**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL650 Counterterrorism (3 semester hours)

This course will examine the evolution of intelligence and counterterrorism while analyzing a framework for combating terrorism. This course will focus on terrorism variables that present a problem to international and U.S. national security, suggest solutions, and provide alternatives to current counterterrorism policies. In this course, your studies will focus on a variety of aspects related to terrorism, counterterrorism, to include historical perspectives, analysis of terrorist organizations, and patterns of terrorism. You will be required to study a range of topics related to terrorism. You will read an arrangement of books and articles that will develop a comprehensive understanding of how counterterrorism impacts national security.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL652 Terrorism: Assessing the Past to Forecast the Future (3 semester hours)

This course will expose the students to a variety of counter-terrorism intelligence methodologies and analytic tools, and extensive academic, government, policy literature on the challenges, opportunities, and assumptions related to forecasting terrorism. The course will provide students with the analytic capability to understand the types of terrorist threats that are most likely to confront the U.S. and its allies, in addition to challenging students to evaluate the efficacy and impact of prediction-based efforts in counter-terrorism intelligence.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL653 Deception, Propaganda and Disinformation (3 semester hours)

This course provides an overview of deceptive techniques –how they work and how they can be defeated. It begins by building an understanding of fundamental psychological principles and practices and then taking a look at key information practices. From there, it will look at how some of these practices developed from WWI to the present. Throughout the course, students will be exposed to and will analyze the use of deception and other persuasion techniques in various contexts. These deceptive techniques are illustrated with a series of historical and current case studies, scenarios, and interactive simulations.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL699 Intelligence Studies Capstone (3 semester hours)

The Master's Capstone in Intelligence Studies is capstone course for graduate programs in Intelligence Studies.
NOTE: This course may not be taken until all other courses are COMPLETED and student has a 3.0 GPA.
THIS COURSE IS 16 WEEKS.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL710 Seminar in Intelligence Integration (3 semester hours)

This seminar explores the organizational and integration issues facing the U.S. Intelligence Community by first evaluating underlying organizational design and theory of communities and organizations. Using organizational design as a point of reference, the seminar examines the nature of the community and its relationship to its operating environment by delving into the present-day issues facing the Intelligence Community in relation to the ever-changing global threat and the wide array of intelligence customers requiring more timely and tailored intelligence services. Lastly, given an understanding of the present-day operating environment, the seminar concludes by identifying and evaluating the vertical and integration issues facing the community while examining some potential transformation models to better posture the Intelligence Community for the future. This course is one of two required beginning courses. (Corequisite: **SSGS700**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL711 Comparative Intelligence Institutions (3 semester hours)

This course examines in comparative perspective the intelligence communities of various states around the globe, to include both allies and adversaries of the United States. Course content covers how various intelligence agencies are structured, how they formulate their respective national interests, and how they address transnational problems and cultivate potential for cross-national cooperation. Students will evaluate these issues within the perspective of strategic culture, while also learning about fundamental aspects of intelligence gathering, including core problems and criticisms, and considering the differences between global approaches to intelligence. (Prerequisite: **SSGS700** and **INTL710**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL712 US Intelligence Law and Ethics (3 semester hours)

This seminar examines ethics in U.S. government intelligence-related decision-making, the conduct of intelligence activities, and oversight, regarding hackers and intelligence leaks. It also examines the role that the law plays in the basic U.S. intelligence authorities in oversight and decision-making, and the ways in which these authorities and decision-making influence the development of new legal frameworks. (Prerequisite: **SSGS711**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL740 Intelligence Cooperation and Sharing (3 semester hours)

This seminar examines the relationship within and amongst the various U.S. domestic intelligence organizations, other domestic organizations, and foreign intelligence and law enforcement organizations. It also addresses some of the challenges face regarding cooperation and sharing information. Several case studies are provided to illustrate areas of cooperation and sharing. (Prerequisites: **SSGS711**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL741 Intelligence and Policy-Making (3 semester hours)

This seminar explores the dynamics of one of the most fundamental relationships that drives the Intelligence Community—that of the Intelligence Community and the policy-maker. The seminar first explores the theoretical principles on the relationship between the intelligence professional and the policy-maker and then examines the underlying formal and informal structures that are utilized to facilitate these relationships. The seminar endeavors to illustrate the inherent friction and perspectives between the Intelligence Community and the policy-maker while exploring some of the potential “best practices” and principles to optimize the relationship. The seminar concludes with an examination of how the intelligence professional and the policy-maker can prioritize and function within a rapidly changing global environment. (Prerequisites: **SSGS711**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL743 Intelligence and Technology (3 semester hours)

The seminar focuses on the role and influence of technology. Specifically, it examines the advances in technology and the impact they have on U.S. intelligence and security. Strategies for addressing the impact are also addressed. (Prerequisites: **SSGS711**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

INTL790 Independent Study (3 semester hours)

This course is an opportunity to pursue an independent research project under the mentorship and direction of a faculty member. A research proposal and timeline must be submitted and approved by the faculty member and Doctoral Director in advance of enrollment. (Prerequisites: **SSGS711**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Intelligence Studies (SSGS)

SSGS500 Research Design and Methods (3 semester hours)

This course provides basic research methods skills for addressing problems and issues specific to the programs within the School of Security and Global Studies (SSGS). The course covers four basic approaches to social research including experimentation, survey research, field research, and the use of available data. Students will gain foundational knowledge in research planning, design, methodology, data collection, and analysis. This course prepares students for advanced research methods. Students in SSGS graduate studies are expected to be completely familiar with Turabian and APA writing styles. If you do not possess copies of these manuals, here is a link to the library, https://www.apus.edu/apus-library/resources-services/Writing/writing-center.html, specific to writing basics, that has quick style guides in use within SSGS. Purchase of the most recent writing guide in use in your program is highly recommended. If you are unsure what writing style is in use in your program, consult with your academic advisor.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SSGS595 Internship Program (3 semester hours)

Within this course, students have the opportunity to receive credit for completing an approved internship. Participating in an internship provides students with a valuable educational and professional opportunity. During the internship students explore and gain hands on experience in a field they have an interest in working within. Within the School of Security and Global Studies the primary responsibility for finding an internship belongs to the student, however there are a number of resources in place to help you in your search and application process. Students interested in completing an internship for credit may reach out to their Program Director, Academic Advising, or Career Services for additional information. In addition to completing formal internship hours, students will be required to keep a journal of their internship experiences and will complete a final paper.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SSGS696 Master's Project Capstone Seminar (3 semester hours)

The School of Security and Global Studies Masters Project Capstone course gives students the opportunity to address issues of public importance that are directly or closely related to their own career, occupation, profession or current position. Creative projects as program capstones may derive from a wide variety of organizationally defined formats such as legislative proposals (local, state or federal), amicus briefs, standard operating procedures, training program manual, procedure manuals, organizational change proposals, communication plans, or recruitment plans to name but a few. The format will be proposed by the student and approved by the instructor. The creative project must demonstrate originality and will follow the style requirements set by the student's academic discipline. For example, a criminal justice student would present work in accordance with the current American Psychological Association (APA) Publication Manual. NOTE: It is mandatory for students to contact their Academic Advising team when they are 2 or 3 courses out from the capstone. Guidance on the format of the research study proposal and a sample proposal are contained in the APUS Research Study Manual. NOTE: This course may not be taken until all other courses are COMPLETED. THIS COURSE IS 16 WEEKS.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SSGS700 Professional Practice I and Doctoral Program Foundations (3 semester hours)

This seminar lays the foundation for the program, introducing students to their peers and faculty members. Students will become acquainted with doctoral milestones and learn about emotional intelligence and resilience. In addition, students will be introduced to the principles of the research process, collaboration, research ethics, and academic integrity. (This course is one of two required first courses. Corequisite: **GLBS710** or **INTL710**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SSGS711 Psychology of Actors in the Global Environment (3 semester hours)

This seminar examines the role of theory and applies some of the major psychological theories and approaches regarding individuals and groups in the global environment. These groups inform the understanding, communication, and decision-making of global actors. (Prerequisite: **INTL710** or **GLBS710**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SSGS712 Nationalism and Identity (3 semester hours)

This seminar analyzes contemporary theories of nationalism and identity. Students will examine the complexities of building a nation-state: how diaspora groups challenge national identity, how subnational groups threaten national cohesion, and how gender relations reevaluate social hierarchies. By utilizing modern case studies across Europe and the Middle East, participants will utilize multidisciplinary approaches to analyze the rise of contemporary nationalism. (Prerequisites: **SSGS711**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SSGS741 Big Data and Social Media Analysis (3 semester hours)

This seminar analyzes contemporary theories of nationalism and identity. Students will examine the complexities of building a nation-state: how diaspora groups challenge national identity, how subnational groups threaten national cohesion, and how gender relations reevaluate social hierarchies. By utilizing modern case studies across Europe and the Middle East, participants will utilize multidisciplinary approaches to analyze the rise of contemporary nationalism. (Prerequisites: **SSGS711**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SSGS742 National Security Decision Making (3 semester hours)

This seminar examines different perspectives on the decision-making processes of U.S. decision-makers and other actors in the global environment. In particular, it examines and applies various disciplinary concepts, theories, and approaches to decision making related to individuals and groups, case study examples of how these are applied, and also the challenges encountered in the decision-making process. (Prerequisite: **SSGS711**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SSGS750 Cyber, Policy, and Conflict (3 semester hours)

This course will immerse students in the world of global conflicts and the role that cybersecurity plays in these conflicts. The course will focus less on the technical aspects and more on the diplomatic, political, and security aspects of the role cyber plays not only in the real world but also in the virtual world. Also, the class covers the use of artificial intelligence (AI), drones, and facial recognition as well as other emerging cyber issues. (Prerequisites: **SSGS711**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SSGS770 From Academics to the Profession: Publishing in the Social Sciences (3 semester hours)

This professional writing seminar is an introduction to the complex world of academic writing and publication. It is designed to give students in the social sciences an opportunity to overcome anxiety about professional level writing and the publishing process. Students in this course will gain practical experience in revising their work so that it may be submitted to a peer-reviewed journal for possible publication. Using Wendy Laura Belcher's best-selling Writing Your Journal Article in Twelve Weeks: A Guide to Academic Publishing Success, the course explains the publication process to students and shares strategies for achieving success in the academic writing arena, including setting up a work schedule, identifying appropriate journals for submission, working with editors, writing query letters, clarifying arguments, and organizing material. In a supportive environment, participants revise a previously completed classroom paper, conference paper, thesis, or other work into a peer-reviewed article and submit it for publication. The goal of this workshop is to aid participants in taking their papers from classroom quality to conference, and ultimately, journal quality. (Prerequisites: **SSGS711**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SSGS792 Special Topics (3 semester hours)

This is a special topics course that is designed to afford students the opportunity to examine topics not covered by the existing curriculum. View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates. The subject matter of each special topics courses may vary; special topics courses may not be offered every term. (Prerequisites: **SSGS711**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

International Relations (IRLS)

IRLS500 International Relations Theory (3 semester hours)

This course provides an analysis of the three important theoretical debates of international relations: Idealism vs. Realism, Traditionalism vs. Behavioralism, and Realism vs. Neo-realism. The course also addresses the level of analysis problem, as well as the central assumptions and key concepts of various theories of international relations, with special emphasis on the basic concepts, propositions, and current critique of realism and neo-realism.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

IRLS501 Comparative Political Systems (3 semester hours)

This course examines a broad range of governments utilizing the comparative method of analysis. Students will study democracies, monarchies, dictatorships and authoritarian forms of government. Students will participate in various class projects emphasizing contemporary problems of the various forms of governments of nation states today. This will take into consideration cultural differences and similarities, human nature, and the approaches of individual governments different from that of the American norm in carrying out their basic responsibility to maintain and strengthen society by equal justice for all of its citizens.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

IRLS502 International Political Systems (3 semester hours)

This course examines how the international political system---the patterns of interaction among world political actors---has changed and how some of its fundamental characteristics have resisted change. Students will investigate how the global system works and how the process of globalization is remaking the political and economic world.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

IRLS503 International Organizations (3 semester hours)

This course introduces issues surrounding the two major categories of international institutions: intergovernmental organizations (IGOs) such as the United Nations, and nongovernmental organizations (NGOs) such as the International Committee of the Red Cross. The course studies the theories, origins, principles, organization, activities, legal authority and performance of major international organizations as world actors in areas of economic development, international security, trade, and humanitarian assistance. IGOs serve as forums for communications, as regulators, as distributors, as organs of military security, and as peacekeepers.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

IRLS504 International Political Economy (3 semester hours)

This seminar allows the student to research some of the primary theoretical perspectives and analytical approaches for studying international political economy. The course includes a survey of contemporary literature, with special emphasis on theory, the phenomenon of globalization, an exploration of trade relations, international finance, transnational corporations, economic development, North vs. South conflict, and global inequality. We will also examine how to critically evaluate research and set up a research project.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

IRLS600 Strategic Geography and Geopolitics (3 semester hours)

This course of study examines the history of political, tactical and strategic developments and concepts regarding geopolitical concerns regarding political and military planning and execution from the mid-20th Century through the modern era. The comparative analysis of these concepts from the applicable secondary literature will provide a stepping stone to understanding the nature of modern combined arms and joint forces warfare.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

IRLS602 Introduction to Global Security (3 semester hours)

Introduction to Global Security addresses the complex global security environment. Focus is placed on the role that actors in the global environment play in the formulation and implementation of international, bilateral, and state policy, norms, and practice related to security issues of global scope and concern. The course also addresses the impact of these security related concerns in the global environment on domestic and international security.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

IRLS603 Politics and War (3 semester hours)

This course examines the relationship between military affairs and statecraft, ranging from how war is a logical consequence of political behavior. Case studies in the great powers' use of force and military issues clarify the connection between politics and the use of force, including war in its international context, attitudes toward war and its causes, the notion of "vital interests," WHY humans fight, and aspects of past areas of conflict that appear relevant to the future.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

IRLS608 Global Security, Logistics, and Space (3 semester hours)

This course provides a comprehensive look at global security, logistics, and space. These three related concepts have become increasingly important as the world has begun to focus on outer space as a source of economic opportunity, communications, and international competition. This course will examine issues of conflict, governance, and sustainability, as well as theories related to national and global security and the peaceful use of outer space.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

IRLS611 Conflict Analysis and Resolution: Theory and Practice (3 semester hours)

The course will consider the rationalist approach to conflict analysis, along with other theoretical approaches to international relations theory. It will examine the generic nature of conflict, whether between individuals or nations. It also directly addresses international conflict, its origins, discernible patterns, routine components, range of outcomes, and modes of conflict prevention or amelioration. Conflict resolution theory will be applied to various cases of contemporary conflict among nations. Students will develop a thorough awareness of the origins of conflict, various approaches to conflict analysis and resolution, as well as strategies for conflict prevention.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

IRLS613 International Negotiation (3 semester hours)

This course is a study of the theory and literature on the history and practice of international negotiations for purposes of peace; mediation between opposing factions, groups, or states; settlement of hostilities; preemption; among other issues. The course includes contending approaches to international negotiations, their basic assumptions and methodologies, and their application to current conflict situations. The role of culture and cross-cultural communication in international negotiation is explored. Also included in the course is discussion and study of skills development in international negotiation.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

IRLS615 Peacekeeping: Structure and Process (3 semester hours)

An examination of the strategic, operational, and tactical elements required for conducting both UN and non-UN sponsored peace operations. Special emphasis is placed on understanding the reasons for success or failure of previous and ongoing peacekeeping missions.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

IRLS631 Government and Security in Korea (3 semester hours)

An examination of the governments and the militaries of the two Koreas. This course will closely examine the reasons behind the Korean peninsula playing such a pivotal role in overall Northeast Asian security. The course will examine domestic political, economic and social problems and prospects of North Korea and South Korea; the prospects for reunification; the military balance and the changing strategic environment; and the relations of Pyongyang and Seoul with their key allies. Includes an examination of U.S. relations with Korea.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

IRLS655 Latin American Security Issues (3 semester hours)

Latin America continues as one of the most important areas to the United States -- even as it remains one of the least understood. In particular, the internal dimension of security has not yet been resolved in many Latin American nations to the extent that domestic stability can be taken for granted, a reality which could have profound consequences for the United States.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

IRLS660 Seminar in Middle East Politics and Security (3 semester hours)

This course examines the evolution of modern Middle Eastern politics. The scope includes political, social, and cultural interactions both within and among the countries located in the Middle East and North Africa. The course involves investigations of the political attitudes and behaviors of prominent players in these regions and a look into the diverse aspirations of specific political, cultural, or demographic groups. In the first weeks of the course, an introduction to the history of the Middle East sets the stage for historic developments that brought about structural dilemmas of today. Evaluating the involvement of outside powers in the politics of region comprises another topic, along with an investigation of how non-state actors affect the future of the region. Discussions concern debates about the prospects of democracy and the future key nations after the Arab Spring

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

IRLS662 Middle Eastern Culture (3 semester hours)

This course covers the geography, culture, society, economy, and religions of the major ethnic and linguistic groups in the Middle East. The course will introduce students to important events and developments, such as the changing dynamics among ethnic and culture groups, the evolving sociological bases of states and societies in the Middle East, the impact of Europe and the West on the Middle East, and more recent events such as the Arab popular uprisings. Because no event or movement occurs without a context, the course examines the cultural and social frameworks.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

IRLS664 Politics and Culture in Central Asia (3 semester hours)

The region of Central Asia—located between Russia, China, India, and Europe—has emerged from obscurity in recent decades to become a key front in the war against international terrorism and radical Islam. This course explores the political and cultural history of Central Asia, as well as religious and social issues that impact the region's governmental structures, foreign relations, and security. Students will explore the impact of Russian conquest and Soviet domination of Kazakhstan, Uzbekistan, Turkmenistan, Kyrgyzstan, and Tajikistan, as well as the Soviet- Afghan War (1979-1989), before moving on to an analysis of contemporary issues in government and politics in the region. Emphasis will be on the rise of Islamism, great power politics, U.S. involvement in the region after 9/11, "managed democracy," corruption and economic development, and petropolitics.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

IRLS699 International Relations Capstone (3 semester hours)

The Master's Capstone in International Relations is the capstone course for graduate programs in International Relations.
NOTE: This course may not be taken until all other courses are COMPLETED and student has a 3.0 GPA.
THIS COURSE IS 16 WEEKS.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Legal Studies (LSTD)

LSTD502 Criminal Law (3 semester hours)

This course is an advanced theory and practice of criminal law in the United States. The history, scope, and nature of criminal law will be discussed. This course will analyze the general nature of crime, constitutional limits on crime, and general principals of criminal liability. Topics include: legal language and machinery, parties to crime, classification of offenses, act and intent, capacity to commit crime, and various defenses. Primary emphasis will be the common law and modern statutory criminal codes. Students are provided knowledge of the building blocks of criminal law to include elements of crimes and defenses to criminal charges. The role of the police, criminal courts, and attorneys in the administration of the criminal justice system will be discussed in detail. The course will teach the student how to analyze and brief criminal cases, and identify and discuss criminal issues. An overview of the criminal process and rules of evidence will be provided. This course focuses on the fundamental principles, concepts, and development of criminal law and the constitutional provisions which govern it. The course further discusses the relationship of the individual to the state and includes an examination of the general framework of criminal law as a means of social control.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

LSTD503 Criminal Justice Process (3 semester hours)

This course addresses the specific constitutional rights, including the fourth, fifth and sixth amendments as those that have a direct impact on the defendant and prosecution in the judicial process. The course will review issues of the pre-arrest stage to post conviction remedies, as well as the procedural laws in the criminal justice process and their limits. The parameters of these limits will be analyzed by studying various court decisions.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

LSTD504 Methods of Legal Research and Writing I (3 semester hours)

Part one of this graduate level two-part intensive legal writing program is designed to develop students' research and writing skills. Students will learn and practice the skills necessary for identifying, locating, and using legal resources, including primary sources of administrative, statutory, and case law; secondary authority; and research reference tools, to include computer research tools, commonly used in the practice of law. Students will also explore the process of legal analysis, incorporating the results of their legal research into correspondence, case briefs, legal memoranda, and motions.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

LSTD505 Methods of Legal Research and Writing II (3 semester hours)

Part two of a two-part graduate level intensive legal writing program is designed to develop students' research and writing skills. Students will further develop their research, legal analytical, and writing, with emphasis on logical reasoning and clear, concise, and convincing writing. Students will complete several legal writing assignments, which will synthesize research, analytical, and technical writing skills. (Prerequisite: **LSTD504** Methods of Legal Research and Writing I)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

LSTD506 Property Law (3 semester hours)

This graduate course is an introduction to real property concepts. The course surveys present and future estates in land, ownership, and concurrent ownership. Leasehold interests, gifts and bequests, covenants and servitudes, conveyancing, various land use restrictions, and eminent domain are also considered.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

LSTD507 International Law (3 semester hours)

The course is designed to introduce students to the concepts and sources of international law that evaluate the various components, processes, and functions of the international legal process and consider how international law impacts the laws within the United States. Additionally, the current state of the international legal order is reviewed with legal opinions regarding major philosophies, components and current practices and problems of the field of international law.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

LSTD508 Contract Law (3 semester hours)

This graduate course is designed to introduce students to the concepts and sources of contract law. This course evaluates the various components of a legally binding agreement or promise and surveys the major issues affecting such enforceable agreements. Students will examine what constitutes breach of contract and the remedies available. The role of contracts in the commercial arena and in society will also be analyzed.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

LSTD509 Tort Law (3 semester hours)

This graduate course will focus on the fundamental principles, concepts, and development of tort and personal injury law, while combining theoretical and practical applications of such principles and concepts. The course presents an overview of the substantive law governing compensation for injuries to property and to the person. Specific areas of study include negligence and defenses to negligence; products liability and strict liability; negligent infliction of emotional distress; injury to property; tort immunities and tort investigations. Students will examine the analytical process used both to understand court opinions and hypothetical problems in this area of the law. The course highlights the public policy objectives and social forces behind the development of tort and personal injury legislation.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

LSTD510 Constitutional Law (3 semester hours)

This course provides the student with a theoretical foundation in Constitutional law. The Constitution divides power. In particular, it apportions authority along three main dimensions: between the state and federal governments; among the branches of the federal government; and between, on the one hand, all levels of government and, on the other hand, individuals. The vast majority of live constitutional questions concern a conflict along one or more of these axes. Students will study issues of policy, principle, philosophy, and constitutional implications by focusing on construction and application. This graduate course will explore advanced principles, doctrines and controversies regarding the structure of and division of powers in American government. Specific topics include judicial review, jurisdiction, standing to sue, federalism, federal and state powers and immunities, the separation of powers among the branches of the federal government, the First Amendment, and the Equal Protection Clause.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

LSTD512 Immigration Law (3 semester hours)

This graduate course focuses on the procedural and substantive law surrounding immigration. Emphasis is given to legal changes enacted in the field since September 11, 2001, as well as current events. It provides students with the background, processes, and tools necessary for a working knowledge of immigration issues. Important topics such as immigrant status, citizenship, refugees, and asylum seekers will be explored. Students will analyze immigration law and policy.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

LSTD516 Homeland Security and the Law (3 semester hours)

This course is provides an understanding of the structure of homeland security law and policy. This course will familiarize students with the extensive and complex legal codes that come under the heading of Homeland Security. The course will cover statutes, policy papers, presidential directives, and other documents related to homeland security allowing for an in-depth examination of the foundations of homeland security. The course will provide the student with important legal guidance allowing the student to accurately interpret, understand, and apply homeland security law and policy. The course provides a detailed overview of the subject of homeland security and includes definitions of homeland security, terrorism, the related law, and its development. The course discusses homeland security in other countries as well i.e. Europe, China, Japan.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

LSTD517 Law, Ethics and Cybersecurity (3 semester hours)

This course focuses on the ways that law, ethics and cybersecurity overlap and intersect. Besides laws related to cybersecurity, the course examines laws related to intellectual property, civil litigation, criminal prosecutions, and privacy. This examination will provide the means to identify and analyze the policies reflected in those laws. Those policies could guide the creation of policies on a business-level, using qualitative risk assessment and planning. An exploration of ethics and cybersecurity, as well as of workplace ethics, will involve the use of an ethical framework.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

LSTD690 Independent Study: Legal Studies (3 semester hours)

This Independent Study is an opportunity for Legal Studies graduate students to pursue an independent research project under the mentorship and discretion of a faculty member. The course requires a major research paper; there will be no examination. Students will submit a request to take the independent study to the Registrar and will include the name of a faculty with whom they have coordinated. Prior to registering, students should first contact the professor with whom they wish to mentor their independent study, coordinate an agreement on the grading requirements, and then NOTIFY their academic advisor with the name of their professor. The final approval to take the independent study will be made by the Program Director.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

LSTD699 Legal Studies Capstone (3 semester hours)

This capstone legal analytical project (CLAP) is the final and ultimate experience for the Master of Legal Studies Program. It is intended to permit students to demonstrate their capacity to deeply research a narrow topic concerning a legal challenge to a segment of American society, as well as thoroughly analyze and succinctly yet thoroughly write about it. The students' chief goal is to validate that they have mastered the three fundamental legal skills of research, analysis and writing. Prerequisite: All other courses must be completed before registering for this course.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Management (HRMT)

HRMT600 Human Resource Management (3 semester hours)

This advanced course in Human Resource Management adopts a strategic perspective on various functions and tasks within the field. It is designed for students pursuing careers in human resources as well as individuals aiming to enhance their managerial and leadership skills through a deeper understanding of HR practices. The course examines the philosophical foundations of human resource management and evaluates contemporary practices that support organizational employees. Students will examine current and future HR challenges and explore the importance of fostering partnerships between managers and HR professionals. This course will equip students with the skills to critically analyze, evaluate, and develop strategic HR practices that enhance organizational effectiveness and foster strong partnerships between managers and HR professionals.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HRMT601 Compensation and Benefits (3 semester hours)

This course serves as an advanced course in compensation and benefits with particular emphasis on global compensation and benefit issues. Students will explore strategic, operational and tactical approaches to global compensation and benefits as they relate to an overall corporate multinational strategy. There will be an examination of expatriate and local staff compensation and benefit practices as students prepare effective compensation and benefits strategies through case studies, class discussions and other assignments.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HRMT602 Employment Law and Labor Relations (3 semester hours)

This course analyzes the legal framework and principles of employment law from a managerial perspective. Students will develop decision-making skills through scenarios involving various workplace situations. Topics include the agency-employment relationship, discrimination laws, bona fide occupational qualifications, employer negligence in hiring, background checks, employment tests, vicarious liability, sexual harassment, workplace violence, labor relations, working standards, and the Family and Medical Leave Act.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HRMT603 Human Resource Policy (3 semester hours)

This course is a comprehensive analysis of how human resource policies are formulated by evaluating the interdependence of human resource and operating functions. Students will have the opportunity to assess policies geared toward high profile HR areas such as talent management, Occupational Health and Safety Administration (OSHA) regulations, employee development and compensation. Emphasis will be placed on policies and strategies as they relate to managing an intergenerational workforce. Additional special topics include network security, workplace violence, and bullying.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HRMT605 Strategic Human Resource Management Practices (3 semester hours)

The course examines the techniques, policies, processes, strategies, and practices used by companies and managers to leverage effectively and efficiently their human capital. Students will evaluate how HR practices are aligned with organizational objectives. Additional special topics include workforce planning and succession planning.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

HRMT610 Workforce Planning (3 semester hours)

Students in this class will master the basic concepts, theories, and skills of workforce planning. Workforce planning is a critical human resource function and practice about winning the “war for talent” in today’s workplace. This course will address issues of attracting, staffing, and retaining a high valued and productive workforce. Succession planning is a key concept to be examined as well. Other topics to be addressed in this course include aligning business and staffing needs; retirement and turnover; and developing competency models and the use of these models for staff development. The course will focus on case studies, scenarios, problem resolution, readings, and research.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Management (MGMT)

MGMT600 Organizational Management (3 semester hours)

This course evaluates techniques for structuring and resolving managerial problems in organizations. The main managerial/educational tool used in the course is the business model canvas, which is a contemporary approach to identifying and creating a functional business/management plan in an organizational context. Topics include an examination of organizational theories, organizational framing, metaphorical analysis, systems theory, and organizational diagnosis.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MGMT601 Organizational Behavior (3 semester hours)

Required first course in the Management program. This course will provide a framework for assessing individual and group behaviors in organizational settings. The primary emphasis will be on developing practical administrative/managerial skills in improving employee performance.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MGMT603 Organizational Development (3 semester hours)

This course consists of a collection of classic and contemporary readings in Organizational Development covering a broad range of topics including change management, organizational culture, team development, and organizational development diagnostic models. Included are experiential exercises that give students an opportunity to practice their skills and cases that allow students to draw on their experiences to apply the concepts and theories in managerial situations.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MGMT604 Organizational Crisis Management (3 semester hours)

This course examines the variables involved in crisis planning, communication, and management. To do so, we must consider the organization's vulnerabilities, the environment in which it thrives, the stakeholders who can influence its operation and the strategies best suited to maintaining or enhancing its reputation. The media plays a crucial role in crisis management, and we will discuss this factor throughout the course. We will consider how the media acts as a catalyst as well as an intermediary in this process. Some of the questions that will arise will be: Is the relationship inherently antagonistic? Should it be? By the conclusion of the course, participants should have developed a deeper understanding of the range of crises facing organizations, an enhanced appreciation of communication tactics that can be brought to bear in such situations and a greater familiarity with the historical antecedents of current crises.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MGMT605 Leadership (3 semester hours)

This course covers the elements of contemporary leadership and delineates the principles that are important in the development of a leader for the 21st century. Discussion of the role and function of leadership will include an in-depth analysis and study of needs impacting individuals, organizations and society. The course provides students with a set of leadership skills and competencies on which to build a unique model for effective leadership that can be tested over time.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MGMT608 Independent Study: Management Department (3 semester hours)

Independent study enables a student to pursue an academic topic in a field of special interest on a previously approved topic under the supervision of a faculty member and resulting in an academic, practical and/or artistic product. Students are required to prepare a draft proposal of project, and submit to the Program Director, Management for approval prior to registering for the course. Once approval has been obtained, advising department is notified so that student can register for course.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MGMT610 Cross-Cultural Management (3 semester hours)

This course is an examination of individual dimensions of global executive leadership, organizational behavior, inter-group relations, and strategies for internal corporate communication. Course topics include management and global trade, individual aspects of operating successfully in the global environment, the executive's role in solving conflicts and creating corporations in the world marketplace, cultural aspects of international operations management and international ethical corporate strategies.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MGMT615 Strategic Planning (3 semester hours)

Being a strategic or visionary leader has been identified as one of the top five skills needed to be successful in the global economy. This course outlines successful Strategic Management and Planning techniques, and it addresses the fundamentals of the strategic alignment of people, resources and processes to the business vision, mission, and purpose of the organization.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MGMT617 Leading Teams (3 semester hours)

This course utilizes an experiential format to focus on a variety of concepts and practices associated with developing and managing an effective team. As such, students will engage with classmates in virtual groups for much of the classwork. Students will have the opportunity to evaluate the different approaches to management, motivation, and performance, along with some barriers to effective team efforts.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MGMT618 Ethics in Leadership (3 semester hours)

Given the corporate scandals of the past, why do we continue to have unethical behavior in organizations? This course addresses the ethical dimensions of leadership with a particular focus on the processes used to raise and resolve ethical dilemmas and conflicts in organizational settings. Students will have the opportunity to explore (1) why some employees may see "gray" versus "black and white" when making a business decision and (2) evaluate internal and external factors which influence and produce deviant behavior in the work environment. Policies, cultures, values and codes of conduct established by various organizations and industry groups will be critically examined.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MGMT619 Leading Organizational Change (3 semester hours)

Today’s global business environment is complex and ever-changing. Change is now a constant and driving change can be a difficult leadership task. This course is designed to help leaders proactively lead change. Students in this course will learn strategies to effectively assess potential drivers of change, facilitate the implementation of change, and become a change agent in an organization by propelling momentum toward positive results. Students will practice skills to move ideas toward results, combat organizational and employee complacency, and overcome resistance to change.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MGMT621 Leadership in a Time of Crisis (3 semester hours)

This course will examine leadership’s role in a time of crisis. The student will learn effective decision-making strategies and reaction strategies leaders should employ during crisis situations. The student will differentiate the types of leadership models to engage in an emergency environment. This course delivers examples on how to adapt to unique situations as well as prioritize procedures during these situations. The areas of contingency planning and disaster preparedness are also covered.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MGMT622 Risk Management for Leaders (3 semester hours)

This course examines risk management as one of the key responsibilities of leaders. Students will learn to define risk management, best practices for measuring risk and threat assessments to guide organizational response. The course will look at leadership’s role in developing strategies to strengthen approaches to external and internal risk.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MGMT623 Concepts and Processes of Organizational Crisis Management (3 semester hours)

This course explores the critical concepts and processes found in crisis management. The student will be able to illustrate the components required in evaluating and developing plans for crises and disasters at the organization and community level. Techniques for organizational planning with consideration of comprehensive emergency management regulatory requirements for crisis response planning will be covered. Students will create a crisis management plan as their final project.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MGMT696 Capstone: Portfolio (3 semester hours)

This **MGMT696**, M.A. in Management Capstone: Portfolio, course is the final course in the Master's Program. This course will prepare graduate student to reflect on their graduate experience by compiling and revising artifacts from previous courses in the program into an organize e-portfolio. The e-portfolio will reflect the student's educational growth from entry in the graduate program. In addition, the graduate student will develop the skills necessary to successfully transition to and navigate post-graduate life as well as understand the civic and social responsibilities of being educated citizens. Finally, students will be given the resources to connect with APU/AMU in an ongoing relationship.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Management (NFPM)

NFPM640 Nonprofit Law, Governance, and Ethics (3 semester hours)

This course introduces students to the legal framework, governance practices, and ethical responsibilities that guide nonprofit organizations. Students examine the legal requirements that define the nonprofit sector, including state law, tax-exempt status, and the regulatory role of the Internal Revenue Service (IRS). Special emphasis is placed on the fiduciary duties of board members and executive directors, as well as governance structures and procedures used by nonprofit boards to support the organization's mission. Key topics include nonprofit accountability, risk management, bylaws, public benefit obligations, and ethical behavior in charitable organizations. Through the exploration of legal and ethical challenges faced by nonprofits, students gain foundational knowledge to lead, support, and govern nonprofit organizations with integrity and transparency.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NFPM641 The Nonprofit Organization and Executive Leadership (3 semester hours)

This course provides a comparative analysis of leadership theories, principles, and styles as they apply to nonprofit management and governance. Designed for current and emerging nonprofit leaders, the course addresses the complex challenges nonprofit organizations face, including fragmented funding, diverse stakeholder interests, and mission-driven operations. Students explore executive leadership in the nonprofit sector, the dynamics between executive directors and board members, and the legal and ethical responsibilities of nonprofit professionals. Emphasis is placed on developing leadership skills, managing staff and volunteers, understanding governance structures, and navigating the social sector to enhance organizational performance, foster community impact, and advance the mission of nonprofit organizations.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NFPM642 Financial Management in Nonprofit (3 semester hours)

This course offers a comprehensive study of nonprofit financial management practices, focusing on interpreting key financial statements to monitor an organization’s financial health. Students explore nonprofit finance topics including fund accounting, financial analysis, budgeting processes, and financial controls essential for safeguarding assets and ensuring fiscal sustainability. The course prepares nonprofit leaders, executives, and board members to analyze financial reports, assess funding sources, and apply sound financial policies to support the organization's mission and strategic goals. Emphasis is placed on using financial data to guide decision-making, maintain cash flow, manage functional expenses, and promote financial accountability throughout the entire organization.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NFPM643 Nonprofit Fundraising Planning and Implementation (3 semester hours)

This course provides a comprehensive overview of nonprofit fundraising, focusing on planning and implementing successful fundraising strategies. Students examine the dimensions of philanthropy in the United States, develop a nonprofit fundraising plan, and explore the motivations of individual donors, corporate giving, and foundations. Topics include donor stewardship, ethical fundraising practices, major donor cultivation, the roles of board members and fundraising staff, and the structure of fundraising programs. The course emphasizes strategic fundraising initiatives such as fundraising campaigns and events, donor engagement and retention, and the use of donor data and fundraising metrics to strengthen donor relationships. Students also evaluate how tax policy affects fundraising revenue and explore the competencies and skills essential for nonprofit professionals to achieve fundraising success and support the organization’s mission.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Marketing (MKTG)

MKTG600 Marketing Management (3 semester hours)

This course is designed to illustrate development, implementation, and reformulation of business strategy, with both domestic and international implications. Emphasis is placed on the need for, awareness of, and accommodation to changes in an organization's internal and external environments. Generic types of business strategies and techniques for analyzing strategies are also covered.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MKTG601 Strategic Internet Marketing (3 semester hours)

This course investigates today’s global environment of electronic commerce and that influence on today’s business enterprises. The learning’s in Strategic E-Commerce Marketing spotlight E-Commerce opportunities, issues, options and techniques necessary to create an appropriate ECommerce marketing plan for an enterprise. The course also provides the students with the real world experience of developing a pseudo working website in coincidence and in support of the Marketing plan. Other issues examined include channel structures given an electronic environment and the impact on supply chain management, e-tools, and ECommerce marketing as viewed through the traditional marketing mix. Critical evaluations of web sites, web tools, promotions, advertising, selling and communications are also explored.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MKTG602 Global Marketing Strategy (3 semester hours)

This course is a study of the elements involved in such key global marketing functions as product, price, place and promotional activities. Students will evaluate global marketing opportunities, develop strategy, and simulate implementation of it as it relates to total organizational strategy.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MKTG603 Consumer Behavior, Emotions, and Narratives (3 semester hours)

This course examines the concepts of consumer behavior in the marketplace. Behavioral aspects of the marketing process from manufacturer to consumer are considered. Consumers' actions during the search, purchase, use, and evaluation of products and services to fulfill needs are explored. This course illuminates how marketers can use the concepts of consumer behavior to influence individuals' purchases of products and services.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Mathematics (MATH)

MATH530 Applied Statistics (3 semester hours)

This is an interactive course designed to help students achieve a greater understanding of the statistical methods and models available to analyze data and to solve problems associated with making decisions and testing hypotheses in uncertain conditions. The course is designed for students seeking a thorough appreciation of how statistical tools can support sound decision making efforts in a wide range of situations. Topics covered include inferential statistics, averages, measures of variation, the Normal distribution and its uses, sampling distributions, hypothesis testing for large and small samples, regression and correlation, and Chi-Square distributions. The skills, tools and methodologies needed to analyze systems and to make decisions are provided. State of the art analytical tools and quantitative methods, including computer-based solutions are discussed. The emphasis of the course will be on the proper use of statistical techniques and their implementation rather than on mathematical proofs. However, some mathematics is necessary in order to understand the proper application of the techniques introduced and discussed during the course.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Military History (MILH)

MILH510 Studies in U.S Military History (3 semester hours)

This course examines the military heritage of the United States from the colonial period to the present time. Through an in-depth study of the extensive literature in American military history, students assess the key individuals, military policies, postures, organizations, strategies, campaigns, tactics, and battles that define the American military experience.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH511 Great Military Philosophers (3 semester hours)

This course examines the origin and development of military concepts and ideas by studying the wisdom of the great military thinkers of the past. Among the philosophers are Sun Tzu and Machiavelli, Clausewitz and Jomini, Mahan and Corbett, Douhet and Mitchell, T.E. Lawrence, and the counterinsurgency theorist and practitioner David Galula. Students compare and contrast these great thinkers to gain an understanding of the nature and conduct of war at the strategic, operational, and tactical levels.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH531 Strategy, Tactics & Leadership of the American Revolution (3 semester hours)

This course is an examination of the American Revolution with emphasis on the operational contributions of American and British military leadership. Students assess the basic concepts and principles of the war's strategic and operational levels, the tactical employment of forces, and the element of leadership to the planning and execution of the war by both sides. Special emphasis is on comparing and contrasting American and British peer-level commanders.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH532 British Perspective of the American Revolution (3 semester hours)

This course details the British view of the Revolution and the long hidden perspective of the American Revolution. Topics include British colonial politics, diplomacy, political and military leadership, factors of influence in Great Britain during the Revolution, and post-war views of America.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH536 The American Revolution (3 semester hours)

This course addresses the War for American Independence from the outset in April 1775 with the events at Concord and Lexington, Massachusetts through the return of the British main force to New York in the summer of 1778 to the final victory at Yorktown. The course analyzes not only the specific events - battles, campaigns, and engagements - but also addresses the nature of strategic decision-making, political issues, leadership, and nature of the opposing forces as well as the context of the War for American Independence in general.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH541 Civil War Strategy and Tactics (3 semester hours)

This course is a study of the American Civil War with emphasis on operational contributions of Union and Confederate military leadership. Students examine Civil War battles on two levels: the strategic doctrine as formed by the major commanders and tactical developments that affected the conduct of battle at a lower echelon of command. Special emphasis is on the interplay between these levels in order to gain a comprehensive view of strategy and tactics in both armies from 1861-1865.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH542 Civil War Command and Leadership (3 semester hours)

This course is a study of national, theater, and operational command structures of the Union and Confederacy, the leadership styles of key military leaders on both sides, and the evolution of command and control in the war. Major themes include the relationship between the commanders in chief and the generals who led the armies in the field, the relationships between the generals themselves, and the ways in which the relationships described above either served to facilitate or debilitate the causes those commanders served.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH551 World War II in Europe (3 semester hours)

This course examines the Allied victory in Europe in World War II. Students assess how the American Army, trained for speed and mobility, performed during campaigns in Italy, France and Germany. The focus is on Eisenhower's generals and their decisions concerning amphibious invasions (e.g., Sicily, Salerno, Anzio and Omaha Beach), airdrops (e.g., Italy and Holland), the race across France and slogging through Italy (e.g., the Gothic siege line and the Huertgen Forest), as well as counter strokes such as Monte Cassino and the Ardennes Bulge.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH552 World War II in the Pacific (3 semester hours)

This course is a comprehensive analysis of the fighting during World War II in the China-Burma-India Theater, New Guinea, the Solomon Islands, the Aleutians, and the Philippines. Students assess the amphibious campaigns in the central Pacific theatre and evaluate the impact of one of the most massive movements of men and arms in history. Primary focus is on land warfare, its strategies, tactics, leaders and lessons learned.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH555 World War II: Politics, Political Leadership and Diplomacy (3 semester hours)

This course is an in-depth study of the politics, political leadership, and diplomacy that defined the Axis and Allied Powers during World War II. Topics address the factors that facilitated their rise to power; the key political structures, relations, and personalities; the inter-Axis relations among political elites versus the Allied powers; and the diplomatic efforts employed by the Axis powers as they postured against the Allies and the rest of the world during the war.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH565 History of Peacekeeping: 1988 - Present (3 semester hours)

This course is a comprehensive survey of the overall evolution and functioning of United Nations peacekeeping operations from the end of the Cold War to the present. The focus of this course is the detailed analysis and comparative assessment of each peacekeeping operation as a tool of conflict management within the unique parameters in which it was established and conducted, and future trends for similar types of intervention and conflict resolution.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH620 War Since 1945 (3 semester hours)

This course is a seminar in global conflict and confrontations since the end of World War II. Students assess specific military conflicts since 1945 to include limited wars by the United States and Soviet Union; counterinsurgencies and wars of national liberation; the Arab-Israeli conflict; post-Cold War conflicts; and conflict post-9/11. Recommended prior to enrolling in MILH 621, The Cold War and Its Aftermath, and MILH 622, Great Power Military Interventions, which cover the Cold War period in greater detail.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH621 The Cold War Era and Aftermath (3 semester hours)

This course is a seminar on the US-USSR Cold War period, which dominated geopolitics and military affairs from the end of World War II to the fall of the Berlin Wall, as well as the first decade of the post-Cold War era culminating with the events of 9/11. Students assess military conflicts and confrontations between the United States, Soviet Union, and their respective allies in the years since 1945. Focus is on the proxy wars of the US and USSR to include wars of national liberation in Africa, Asia, and Latin America; the Arab-Israeli conflict; the Indo-Pakistani conflict; and post-Cold War conflicts in Africa, Asia, and Latin America.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH622 Great Power Military Interventions (3 semester hours)

This course is an in-depth seminar on the military interventions of the United States and Soviet Union/Russia since the end of World War II. Students examine the military interventions of the United States and Soviet Union/Russia. Special emphasis includes the analysis of military interventions in Greece, Korea, Suez, Vietnam, Afghanistan, Somalia, Chechnya, and Iraq.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH637 The Seven Years War (3 semester hours)

This course is a comprehensive study of the “first global war” as events unfolded in Europe, North America, the Indian sub-continent, and on the seas during the 18th century. Students discern, as a prelude to the American Revolution, how the practice of warfare among the eighteenth century nations was firmly established among European nations. In the distrust and distaste among the French, British, and Americans, the Seven Years War set a pattern that has remained central to the American way of understanding our colonial history.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH646 Civil War Cavalry and Intelligence (3 semester hours)

This course examines the theory, practice and operations of the cavalry and intelligence gathering and analysis on both sides during the Civil War. The first part will cover the development of the mounted arm and its traditional role. The theory of cavalry tactics taught by West Point will provide a knowledge base for the ideas and developed tactics by Civil War officers. The second part will address personalities, to include Nathan Bedford Forrest, Jeb Stuart, Wade Hampton, John Buford, George Custer, and others. Areas investigated, relevant to intelligence, will include espionage, Bureau of Military Information, secret services, cavalry forays, covert activities, and secret missions (including the Lincoln assassination plot). Focus of the course will be to compare and contrast the efforts of both the Union and Confederacy to stay ahead in the game of "knowing the enemy."

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH654 World War II and the Eastern Front (3 semester hours)

This course is an analysis of the German-Soviet campaign during World War II. Students will examine the three major phases of this conflict that begins with the Wehrmacht invasion of the Soviet Union in 1941, urban warfare in Stalingrad in the fall of 1942, and history’s largest tank battle at Prohorovka in 1943. Finally, this course will detail the Soviet counterattack across the Vistula and Oder Rivers that ended with the die Gotterdammerung in Berlin.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH667 The Balkans: Conflict and Peace (3 semester hours)

This course examines the military history of the region known as the Balkans and explores the turbulence behind long standing political, religious, and economic issues. Students assess the post-World War II era from 1945 to the present, by focusing on past and present conflicts and confrontations, UN and NATO interventions, transitions in government, and the pursuit of stability within the European community. Special emphasis is on further research into the rise and fall of Yugoslavia and emerging new states.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH668 The War in Vietnam (3 semester hours)

This seminar examines the origins, evolution and impact of the Vietnam War. In addition to reviewing the history of U.S. involvement in Vietnam, students explore the political, cultural and social forces and military developments that shaped the behavior of the various Vietnamese and American parties. Purpose is to develop a coherent perspective on what became one of the costliest and most divisive wars in American history.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH669 Arab-Israeli Conflict: Contemporary Politics & Diplomacy (3 semester hours)

This course examines the Middle East peace process surrounding the Arab-Israeli conflict and focuses on the historical perspectives, the roles of the various Middle Eastern countries in the process, Western intervention efforts, and the inherent successes and failures over the years. Purpose is to develop a comprehensive understanding of the background and history of conflict resolution, the hope for peace in the future, and the ability of the various nations to coexist.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH680 Special Topic: Military History (3 semester hours)

This course examines, through case studies and hypotheticals, specific Special Operations missions. The initial focus will be World War II and several of its more famous clandestine actions. The course will then progress to the Vietnam War, through the 1980s, and into the shaded world of the War on Terror. After the Second World War the primary focus is the components of what is now called the Special operations Command. Through an analytic essay, a formal decision brief, and weekly forums students will contemplate the factors behind the decision to employ Special Operations forces and discern why missions both succeed and fail.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH690 Independent Study: Military History (3 semester hours)

This course is an opportunity for Military History students to pursue an independent research project or examine a specific area of history under the mentorship of a single professor. Students must complete 24 credits of study before taking this course. The course will typically involve a major research paper; there will be no examination. Students will submit a proposal prior to the start of the project, and a rough draft of the paper, both of which will count toward the final grade. Prerequisite: University approval and Upper Level standing. Prior to registering, students should first contact the professor with whom they wish to mentor their independent study, coordinate an agreement on the grading requirements, and then NOTIFY their academic advisor with the name of their professor.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH698 Comprehensive Exam in Military History (0 semester hours)

THIS COURSE WILL REQUIRE A TEST PROCTOR. This course prepares graduate students for the Comprehensive Examination in the Master of Arts in Military History program. The purpose of this course is to provide a structured weekly review of key concepts, theories, and knowledge skill sets in their degree and particular concentration. Students are required to submit responses to a number of assignments over the course period prior to taking the exam. Students apply historical methodology in preparation for the exam and consult texts, journal articles, print & media reports, and documentaries, as well as collaborate with other students enrolled in the course to help them prepare for the exam. Assignments serve as a means of final preparation for the student and calibration with the course instructor, who will grade the exam. IMPORTANT: You must have COMPLETED all other courses in the program and have a GPA of 3.0 in order to register for this course. As a Military History student, you must pass this comprehensive exam in order to have your degree conferred. The comprehensive exam must be taken by the course end date or a failing grade will be posted. If you fail your first course attempt to pass the comprehensive exam, you will need to get approval to register for a second attempt of the course and BOTH final course grades will show in your transcript.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILH699 Military History Capstone (3 semester hours)

Preparation for the Master of Arts in Military History Capstone (Thesis) seminar begins on day one of a student's graduate program of study. The theories, research methods and analytical skills, and substantive knowledge obtained through their master's curriculum provide the basis for the thesis project. Students are required to develop primary and secondary source materials on the research topic and address the writing requirements as described in the syllabus and classroom assignments. The thesis proposal must provide a clear description of a question or problem and a proposed method of answering the question or solving the problem. Guidance on the format of the research seminar proposal and a sample proposal are contained in the APUS Thesis Manual. NOTE: This course may not be taken until all other courses are COMPLETED and student has a 3.0 GPA. THIS COURSE IS 16 WEEKS.
(Prerequisite: **HIST691**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Military Studies (MILS)

MILS510 Strategic Military Leadership (3 semester hours)

This course provides an understanding of strategic leadership as applied to military and civilian aspects of government. Through a broad examination of strategic leadership principles and theories, and relevant case studies, students explore the interaction of strategic leaders with the media, civil society, and the nation’s political leaders. Students learn how successful strategic leaders have used transformational leadership skills to innovate, motivate, and transform people and enterprises. (Prerequisites: **NSEC500** or **MILS500**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILS512 Great Military Leaders (3 semester hours)

This course is an in-depth analysis of the characteristics of leadership common to great military leaders. It focuses on those personalities and decision-making skills that are inbred and/or learned by the great leaders. Students compare and contrast the characteristics of great military leaders and choose a specific leader to assess the persona of that individual. Special emphasis is on investigating the biographical literature and what sources reveal about personality and leadership style.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILS514 The Making of Strategy (3 semester hours)

This course addresses the application of strategy and process of the making of strategy, both of which deal with the preparation and use of military power to serve the ends of politics. The treatment is chronological, as determined by the various case studies, and two themes run throughout: the relationship of strategy and the strategic level of war to other levels of war, especially policy and the political level of war; and the difficulty inherent in the process of the making of strategy. Note: Not available for students who have previously taken **MILS520**.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILS521 Strategy, Tactics, & the Operational Art (3 semester hours)

This course is a comprehensive study that explores the strategic, operational, and tactical dimensions of war through an examination of military theory in the context of historical experience. Purpose is to promote critical thinking about war based on the clash of ideas and critical inquiry and analysis. Toward that end, students examine some of the masters in the art of war in terms of their ideas and influence regarding strategy, tactics, and especially operational art.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILS534 Air and Space Power Theory: Strategy and Tactics (3 semester hours)

This course provides an overview of air and space power theory through the examination of major aspects of air and space power in their historical and contemporary contexts. Students will study the use of air power in past conflicts, examine contemporary roles of air and space power, and determine the evolving near-term roles of air and space power in warfare. (Prerequisites: **MILS500** or **NSEC500** for students on previous catalog versions)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILS560 Joint Warfare Theory and Practice (3 semester hours)

This course covers the theory and practice of joint warfare, by examining major conflicts since the mid-19th and joint warfare in the 1980s and 1990s. Students assess, through case studies, the impact of the Goldwater-Nichols Act of 1986 on the Department of Defense and U.S. national security strategy.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILS561 Joint Warfare Planning and Implementation (3 semester hours)

This course is a study of the contemporary factors essential and necessary to function effectively in joint or coalition warfare exercises at joint or combined headquarters. Students learn steps, techniques and concepts for effective joint operations planning and implementation appropriate to the operational or strategic levels of war.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILS562 Joint Warfare Command and Control (3 semester hours)

This course examines doctrinal aspects of command and control through a study of joint warfare theory in the current Joint Professional Military Education (JPME) curriculum. Emphasis is on Joint Vision, Joint Expeditionary Task Forces, Joint Air Support, and Accelerated Cumulative Warfare. Students use the Joint Military Operations Historical Collection series to explore antecedents to modern applications from the Battle of Vicksburg to Operation Uphold Democracy.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILS563 Case Studies in Joint Warfare (3 semester hours)

This course offers a series of case studies in joint warfare from World War II to the present. Students examine the U.S. military experience with joint operations, combined operations, and coalition warfare and assess the changing nature of joint warfare in the Cold War, post-Cold War, and post-9/11 global environments in light of specific operations against nation-states and non-state/transnational actors, such as terrorist networks. Special emphasis is on analysis of how joint and combined doctrine has evolved and influenced the American way of war.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILS570 Seminar in Asymmetrical Warfare (3 semester hours)

This course is an in-depth seminar in asymmetrical warfare in relation to the U.S. military history and operational experience. Students explore the changing nature of asymmetrical warfare in terms of current theory, conjecture, and definition. Key issues of asymmetry and adaptation are assessed in relation to insurgency, counterinsurgency force doctrine, and action-reaction-counteraction cycle. Special emphasis is on the value of approaches that employ innovative tactics, weapons, or technologies across the spectrum of military operations.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILS572 Special Operations Forces Application (3 semester hours)

This course examines the history and mission of United States special operations forces and roles within operational and tactical environments. Students explore special operations doctrine and tactics from past to present in the global war on terror. Students compare and contrast the use of special operations forces for pre-conflict, operations, and post-conflict scenarios in Afghanistan, Iraq, and the Philippines.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILS583 Insurgency and Revolution (3 semester hours)

This course provides a critical analysis of the origins, structures, and contemporary importance of insurgency and revolutionary movements in the modern world. Drawing on major theories and analytical frameworks, the course examines how revolutionaries and insurgent movements emerge, organize, and pursue fundamental change through various forms of conflict, including armed conflict, guerrilla warfare, and prolonged war, often aimed at the overthrow of existing government authority.

Using comparative case studies tested against the historical record, students analyze the political, economic, and social conditions that shape insurgency, including struggles for control within and against established institutions and authoritarian regimes. Emphasis is placed on understanding ideology, strategy, and the effectiveness of revolutionary action across different historical and geopolitical contexts. By the end of the course, students develop a foundational ability to analyze how insurgent and revolutionary movements evolve over time and to assess future challenges associated with revolution and insurgency.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILS620 Studies in Future War (3 semester hours)

This course considers the nature of future military conflict, the history of future war doctrine, and the impact of current conflict on the conceptualization of the "next war." Students examine current, past, and future low-intensity as well as high-intensity conflicts, and the appropriate use of military force in the power projection role to influence a diplomatic resolution to a conflict. Rogue nations, and related cultural clashes, and religious factors are related to planning for future war.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILS635 Air Power in Joint Warfare (3 semester hours)

This course is a study of the air component of joint warfare in the modern age. Students address the air component strengths and weaknesses in working in interagency, inter-service environments as seen through analysis of several modern military operations.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILS655 Naval Power in Joint Warfare (3 semester hours)

This course is a comprehensive study of the naval doctrines, strategies, and force components involved in joint warfare in the modern age. Students address the naval component strengths and weaknesses in working in interagency, interservice environments as seen through analysis of several modern military operations.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILS671 The Non-State Soldier (3 semester hours)

This course is a study of militant foreign ethnic/religious groups not outwardly affiliated with a sovereign state. Students address specific individuals and groups as case studies in order to draw out the implications and principles associated with actual non-state military, terrorist, events and actions. Focus is on the individuals and cells that carry out the military and terrorist plans to further insurgencies and revolutions.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILS680 Special Topic: Military Studies (3 semester hours)

This course, when offered, is a one-time offering on an area of special interest that will vary. NOTE: Open to graduate students as an elective. NOTE: Open to graduate students as an elective. Any substitution as a Concentration or Major course must have Dean Approval through your academic advisor.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILS690 Independent Study: Military Studies (3 semester hours)

This course is an opportunity for Military Studies students to pursue an independent research project or examine a specific area of history under the mentorship of a single professor. Students must complete 24 credits of study before taking this course. The course will typically involve a major research paper; there will be no examination. Students will submit a proposal prior to the start of the project, and a rough draft of the paper, both of which will count toward the final grade. Prerequisite: University approval and Upper Level standing. Prior to registering, students should first contact the professor with whom they wish to mentor their independent study, coordinate an agreement on the grading requirements, and then NOTIFY their academic advisor with the name of their professor.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MILS699 Military Studies Capstone (3 semester hours)

Preparation for the Master of Arts in Military Studies Capstone (Thesis) seminar begins on day one of a student's graduate program of study. The theories, research methods and analytical skills, and substantive knowledge obtained through their master's curriculum provide the basis for the thesis project. Students are required to develop primary and secondary source materials on the research topic and address the writing requirements as described in the syllabus and classroom assignments. The thesis proposal must provide a clear description of a question or problem and a proposed method of answering the question or solving the problem. Guidance on the format of the research seminar proposal and a sample proposal are contained in the APUS Thesis Manual. NOTE: This course may not be taken until all other courses are COMPLETED and student has a 3.0 GPA. THIS COURSE IS 16 WEEKS.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

National Security Studies (NSEC)

NSEC501 Institutions of National Security (3 semester hours)

The course will cover the roles, missions, organization, capabilities, unique cultures, and strategic purposes of the President, the Departments of State and Defense, Congress, the National Security Council, the Armed Forces, the Intelligence Community, and non-governmental organizations (NGOs). Students will also learn how these actors interact to formulate national security strategy. In addition, students will examine some successes and failures of the interagency process and will gain an appreciation of the capabilities, limitations, and organizational cultures of the players in the national security community.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NSEC503 U.S. National Security (3 semester hours)

This course is highly recommended as the first course for national security studies students. It assesses the major concepts of strategic thinking that underpin the national security decision-making process in the U.S.

The course surveys national security policies since the end of the Cold War and examines regional security concerns to the U.S. In addition, it covers the concept and principal components of national security strategy and evaluates the most important theories that explain how states and non-state actors interact in the international arena. Students will examine the current challenges to U.S. national security interests, including terrorism and the proliferation of Weapons of Mass Destruction, and will evaluate future national security policies and challenges.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NSEC504 International Security (3 semester hours)

During this course, the student analyzes the domestic and international contexts that shape the behavior of state and non-state actors, and which affect the formulation of national security policies. The course provides an assessment of major social, cultural, political, military, economic, technological, and historical issues that influence the international context; the roles and influence of international organizations and non-state actors; and the key transitional challenges to national security such as weapons proliferation and terrorism. The student will examine the issues and national security interests of the U.S. in regions of the world, how the U.S. has carried out its foreign policy in those regions to protect its national security, and the security interests of the nations in those regions. This course will prepare the student to conduct strategic assessments of selected organizations, regions, states, and other actors on the international stage.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NSEC506 Cyber Policy and Practice in National Security (3 semester hours)

This course will provide an overview of current cyber policy and strategy for non-practitioners in a national security framework. Students will study the cyber threat environment; laws and policies that govern cyber security; current and historical structure, functions, and capabilities of private and governmental agencies comprising the cyber community; and future trends that affect national security.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NSEC608 Regional Security Cooperation (3 semester hours)

This course examines the forces reshaping world politics and analyzes the institutions that are fostering new forms of global governance. The course will allow the student to analyze models of international cooperation and identify the states that have most actively challenged the existing order. There will be a focus on the examination of leading and emergent international institutions such as the G-20, the nascent regime for sovereign wealth funds, the International Atomic Energy Agency, and the forums organized to foster cooperation in the war on terror.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NSEC610 National Security and Globalization (3 semester hours)

This course will examine the implications of rising world-wide economic interdependence upon relevant aspects of U.S. national security policy. The phenomenon of globalization will be analyzed from an economic standpoint and related security issues, such as the effectiveness of sanctions, the ability to regulate commerce in weapons and technology, and the changing global balance in military capabilities will be considered in this context.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NSEC611 Covert Action and National Security (3 semester hours)

This course examines covert action in a national security context and will focus on intelligence, counterintelligence, unconventional warfare, and assassination issues. Other topics that will be discussed in this course include espionage spycraft, technology and agent activity, and the political and executive aspects of presidential powers exercised in covert actions.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NSEC612 National Security and Diplomacy (3 semester hours)

This course assesses the role of diplomacy in national security policy development and implementation. It investigates diplomacy as an element of national power and how diplomacy is used by senior diplomats and military officials in the international sphere.

The course provides an overview of the history, development, and trends in diplomacy. It will also examine different methods of building relationships, cross-cultural norms and communication challenges in the international environment, as well as the integration of traditional and public diplomacy with other elements of national power.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NSEC613 Current and Emerging Threats to U.S. National Security (3 semester hours)

This course examines contemporary globalization, its links to emergent
threats, and potential U.S. responses. To familiarize students with the types and effects of emergent threats, the course considers several topics including the history and future of: cyber conflict, bioterrorism and public health, climate change, radicalization of U.S. citizens, transnational organized crime, terrorism WMD, state failure and civil war, and emerging technologies. The relationship between globalization and emergent threats is explored with a focus on U.S. national security strategy. The course is about the politics of emergent threats and does not require any specialized technical background.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NSEC614 Political Psychology of Terror Groups (3 semester hours)

This course focuses on analyzing terror groups from a political psychological perspective. In particular, the course approaches terror groups from two different political psychological perspectives, individual and group processes. Together these two perspectives provide a solid foundation from which to understand terror groups.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NSEC690 Independent Study: National Security Studies (3 semester hours)

An opportunity for National Security Studies students to pursue an independent research project or examine a specific area of national security under the mentorship of a single professor. Students must complete 24 credits of study before taking this course. Participation is at the discretion of the faculty member. The course typically involves six or more telephone calls and production of a major research paper; there will be no examination. Students will submit a proposal prior to the start of the project, and a rough draft of the paper at week 10, both of which will count toward final grade. Prior to registering, students should first contact the professor with whom they wish to mentor their independent study, coordinate an agreement on the grading requirements, and then NOTIFY their academic advisor with the name of their professor.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NSEC699 National Security Studies Capstone (3 semester hours)

The National Security Studies Capstone is a 16-week capstone course for the master’s degree in national security studies. This course will involve a major research paper or thesis project that will demonstrate the student’s understanding of and ability to implement the degree program objectives.

For the research paper, the student will also demonstrate an understanding of social science research methodology as it applies to national security studies. Students must follow the requirements of the APUS Capstone Manual and the appropriate presentation style guide. NOTE: This course may not be taken until all other courses are COMPLETED and the student has a 3.0 GPA.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Nursing (NURS)

NURS500 Research and Evidence-Based Practice (3 semester hours)

Advanced degree nurses must integrate evidence-based principles into their daily practice, and promote research-based decision-making in themselves and others. This course focuses on the critical analysis of research and its application to current nursing practice. Ethical issues in the design and conduct of research are addressed. (Prerequisite: **NURS502**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NURS502 Population-Based Healthcare (3 semester hours)

This course examines how population-based theories and practice inform community/public nursing practice. An emphasis is placed on the ecology of health and the interconnectedness of the biological, behavioral, physical, and socio environmental domains. Students will analyze root causes of health disparities including cultural, political, social, racial, class, gender and economic factors and examine the role of social justice to improving population health. Strategies for collaboration and advocacy with diverse population and groups will be explored.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NURS504 Informatics and Technology (3 semester hours)

Rapidly changing healthcare systems demand that advanced degree nurses possess knowledge of the effective use of informatics and technology to enhance patient care in a variety of settings. This course provides students with the knowledge and skills necessary to improve patient outcomes through effective use of these technological resources. Topics include electronic medical records, data analysis, safe management of patient care technology, health literacy, and related ethical issues. (Prerequisite: **NURS502**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NURS505 Healthcare Systems and Health Policy (3 semester hours)

Today’s healthcare providers must promote health, influence the health delivery system, and participate in policy advocacy to improve the healthcare outcomes of populations. In this course, students will examine the effects of legal and regulatory processes on healthcare delivery at institutional, local, state, and federal levels. Topics covered in this course will include healthcare policy development, accrediting agencies, quality improvement, and patient quality and safety. (Prerequisite: **NURS502**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NURS507 Leadership for the Master's Prepared Nurse (3 semester hours)

Today’s nurse leaders must possess the essential communication, critical-thinking and decision-making skills required to effectively manage teams providing high quality healthcare to various populations. This course addresses issues related to inter-professional collaboration, quality improvement initiatives, data-driven decision making, leadership and communication styles and their effect on interaction with members of healthcare teams.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NURS601 Advanced Health Assessment (3 semester hours)

This course builds on the undergraduate foundation in health assessment and provides the foundation for the advanced assessment skills required by the Nurse Educator. Teaching methodologies will facilitate the development of skills in conducting comprehensive and systematic assessments of patients throughout the lifespan. This will include physical and psychosocial assessment, risk assessment and functional assessments in various populations.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NURS604 Advanced Pathophysiology and Pharmacology (3 semester hours)

This course builds on the undergraduate knowledge of pharmacology and the relationship of pharmacological therapies to patient health and outcomes, as well as pathophysiological conditions. Students study the actions and effects of medications as well as complementary and alternative therapies on the human system across the life span. Using a variety of theories and frameworks, students use clinical reasoning to evaluate ambiguous and complex clinical presentations. Students discuss the role of the advanced practice nurse educator in ensuring safe medication practice in a variety of settings.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NURS606 Nursing Curriculum Development, Assessment and Evaluation (3 semester hours)

This course will provide the student with the theoretical basis of curriculum development, assessment and evaluation. Students will focus on the process of curriculum design and development; integrating these concepts into the economic, social, regulatory, technological, and ethical influences and trends which impact current nursing practice. (Prerequisite: ALL CORE COURSES IN THE PROGRAM and **NURS601** and **NURS604**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NURS610 Learner-Centered Teaching Methodologies (3 semester hours)

The nurse educator must be proficient in developing and designing curriculum supportive of various learners in a variety of settings. This course introduces students to theoretical models and teaching methodologies to create stimulating learner-centered environments in both clinical and academic settings. This course explores the pedagogy of delivering effective nursing curricular content in learning environments that combine face-to-face and distance formats (blended learning) and those that deliver instruction completely online.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NURS620 Educational Assessment and Evaluation for Nurse Educators (3 semester hours)

The evaluation of learning is a critical component of advanced practice nursing education.
This course explores the strategies and models that nurse educators use to evaluate the effectiveness of their teaching. Students use evaluation data to improve and revise curriculum. Content in this course is applicable to audiences in both academic and clinical education environments.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NURS654 Program Development and Evaluation in Community and Public Health Nursing (4 semester hours)

This is a practicum course supporting community and public health nurses practicing at an advanced level. The practicum allows students to build on their previous knowledge in learning to design public health programs to improve health outcomes. Topics include assessing community and public health needs along with planning programs to meet those needs. Students work with the practicum coordinator and faculty to identify a qualified preceptor and select a practicum site. Students will complete 40 of the 160 hours of clinical practice required for completion of the program. (Prerequisites: **PBHE520**, **PBHE527**, **PBHE550**, and **PBHE607**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NURS694 Community and Public Health Nursing Practicum with Capstone Project (4 semester hours)

This practicum provides community and public health nursing students the opportunity to implement population health programs. The emphasis is on working in the community setting to improve the health of communities and populations. The final 120 hours of clinical practice are required for completion of this practicum. The students will also focus on examining the implications of implementing population health programs. Students will evaluate personal leadership skills utilized to improve patient outcomes through evidence-based practices, quality improvement methods, outcomes measurement, and systems knowledge. All core and specialty courses must be completed before taking this course. (Prerequisites: **PBHE520**, **PBHE527**, **PBHE550**, and **PBHE607**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NURS695 Practicum in Nursing Education (3 semester hours)

This practicum provides nurse educator students the opportunity to apply specialized learning essential to strengthen and advance their own nursing practice in a particular area or focus in a direct care role. Students work with the practicum coordinator and faculty to identify a qualified preceptor and to select the practicum site for a wide variety of clinical practice settings consistent with AACN®'s Master's Essentials (2011). 160 hours of clinical practice are required for completion of this practicum. All core and specialty courses must be completed before taking this course. This course requires an additional cost for the use of Typhon student practicum tracking software, to be purchased by the student prior to the start of the practicum.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NURS696 Practicum in Nursing Leadership (3 semester hours)

This practicum is completed with a nurse leader in a selected setting and will apply the leadership theories and concepts essential to the nurse leader role. The practicum provides the student the opportunity to apply their learning to their area of interest. Students engage in leadership activities such as committees, staff education, or quality improvement projects. Students work with their faculty member to select the practicum site. 160 clinical hours are required for completion of this practicum. All core and specialty courses must be completed before taking this course. This course requires an additional cost for the use of Typhon student practicum tracking software, to be purchased by the student prior to the start of the practicum.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

NURS699 Evidence-Based Practice Capstone Project (3 semester hours)

In this capstone course, students will apply the knowledge acquired throughout their graduate study. They will develop an evidence-based project proposal relevant to a problem or issue in current professional nursing practice. Components include problem identification, thorough literature review, proposal of a solution, an implementation plan, a process of evaluation, and dissemination of findings. Proposals and research are appropriate to the student's area of specialty study: education or leadership.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Political Science (POLS)

POLS501 Political Philosophy (3 semester hours)

This course takes the student into the exciting world of ideas that have always captivated mankind and inspired the great advances in Western civilization. The course examines some eternal questions: On what philosophical precepts does the rule of law depend? What are the philosophical justifications for respect for the individual? What legal and moral implications arise from these precepts? How should we behave? How should we govern ourselves and each other? Through reading, studying, and reflecting upon the works of the great philosophers ranging from Socrates to Marx and beyond, the class will enter into these “great conversations” and examine how political philosophers throughout time have relevance to the modern world.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

POLS510 The U.S. Presidency, Congress, & Bureaucracy (3 semester hours)

The course covers a combination of theories and applications that will provide the student with basic tools required to understand, navigate, and communicate with the three administrative elements of the federal government. The emphasis of the course is based on a study of composing, legislating, implementing, and enforcing public policy set against a background of both historical and current elements.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

POLS511 Political Parties and Interest Group Behavior (3 semester hours)

This course examines the organization and behavior of political parties and interest groups within the American political system. The course emphasizes the extent to which these organizations operate differently across the national, state, and local levels of government.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

POLS512 Diversity in American Politics (3 semester hours)

This course is a study of diverse groups as political players in society -- their history as outsiders, strategies for gaining political power, the evolution of public policies that affect the lives and opportunities of these groups mainly in the United States. In this course, students will explore core political constructs such as governance, policymaking, participation, conflict, and attitudes through the lens of gender, race and ethnicity. The course focuses primarily upon the experiences of several groups: African Americans, Hispanics, Asians, Arabs, women, and gays and lesbians. The goal of this course is to provide students with the necessary theoretical and methodological foundations needed to understand and analyze gender, racial, and ethnic politics in the United States

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

POLS620 Legislatures and Legislative Behavior (3 semester hours)

This course focuses on legislative structure and decision-making. Through reading, studying, and reflecting upon legislatures, legislators, and legislative processes, students will examine the U.S. legislative structure and conduct an analysis of comparative legislative behavior.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

POLS630 The Presidency: Institution and Performance (3 semester hours)

This course offers a perspective on the U.S. presidency that examines the institutional development while assessing the leadership behavior of office holders from George Washington through the present. Through reading, studying, and reflecting upon Presidential administrations and Presidential leadership styles, students will examine the development of the presidency and the role of the President in U.S. government and abroad.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

POLS640 Judicial Politics, Process, and Policy Making (3 semester hours)

This course introduces students to the role of the judiciary in American politics and policymaking and explores the questions asked and the methods employed by political scientists studying courts and the legal system. An equally important objective of this course is to familiarize students with the seminal works in judicial research, with particular emphasis on Supreme Court cases. Students will study the judicial process in the United States from a variety of perspectives in order to examine the role of law and courts in the larger political arena and social environment.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

POLS650 Federalism: The American Governance Process (3 semester hours)

This course focuses on the political, legal, financial, and administrative relationships among national, state, and local governmental units. Topics include the nature of federal and other political systems and the issues presented in each system at all levels; the evolution of the American federal system from its origins through present day; intergovernmental cooperation and conflict; and the various theory and concepts associated with a breakdown of responsibilities among federal, state, and local governments.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

POLS690 Independent Study: Political Science (3 semester hours)

An opportunity for political science and international peace and conflict resolution students to pursue an independent research project or examine a specific area of their academic discipline under the mentorship of a single professor. Students must complete 24 credits of study before taking this course. Participation is at the discretion of the faculty member. Students will typically produce a major research paper (50+ pages); there will be no examination. Prerequisite: University approval and Upper Level standing. Prior to registering, students should first contact the professor with whom they wish to mentor their independent study, coordinate an agreement on the grading requirements, and then NOTIFY their academic advisor with the name of their professor.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

POLS697 Portfolio and Critical Reflection Paper Capstone in Political Science (3 semester hours)

The course is tailored specifically to political science master’s program. The capstone course may be taken only after the completion of all other coursework. Students must successfully complete this requirement before the award of a degree. Students must apply for graduation and have a minimum GPA of 3.0 in order to be able to register for the course. The portfolio will consist of artifacts demonstrating competency in each of the program objectives. Students are expected to retain these artifacts as they progress through their program to prepare for this course. The portfolio contains a substantive analysis that contextualizes each artifact, articulates how the artifact demonstrates mastery of the learning outcome, and evaluates the student’s intellectual growth through the program.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

POLS698 Comprehensive Examination in Political Science (0 semester hours)

The comprehensive final examination is for students in the Master of Arts in Political Science program. The "Comprehensive Exam" is tailored specifically to each program and must be taken after students have completed 36 hours of study (i.e. during the semester following the final course) and must be successfully completed before the award of a degree. The purpose of this course is to provide students with a structured and self-paced review of key concepts, theories, and knowledge skill sets in the field of political science. Preparation for a comprehensive examination, however, is the student's responsibility.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Psychology (PSYC)

PSYC502 Tests and Measurements (3 semester hours)

This course serves to introduce students to the topic of psychological testing. In addition to describing the various types of psychological testing, it will also provide information about test design and construction, administration and scoring, and reliability and validity.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PSYC503 Introduction to Scholarly and Technical Writing (3 semester hours)

This course provides an overview of the primary concepts, genres and mechanics of academic writing at the graduate and professional level. Students will develop writing and editing skills that will assist them in their success as graduate students and future professionals. Discussions, assignments, readings and editing will be utilized to successfully accomplish the goals of this course.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PSYC506 Cyberpsychology: Where Psychology and Technology Meet (3 semester hours)

This is an introductory course in Cyberpsychology studying the methods that social media (SM) uses to influence consumer decisions and drive effective marketing techniques. The primary topic covered includes the role of social media platforms in social interaction. Students will become familiar with what SM was intended to do, as well as what it has evolved into and why it poses a risk to normal behavior and decision-making. Additional topics covered include an examination of factors that influence election outcomes, factors that guide thought processes and awareness through targeted messaging, and the use of blacklisting or shadow-banning content. The implications of these processes on consumer behavior will also be discussed.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PSYC507 Social Science Perspectives on Cyberdeviance (3 semester hours)

This is an introductory course to cyberdeviance with a unique emphasis on the social science components of criminality in cyber settings. Primary topics include the definition of cybercrime, cyberterrorism, cyberwarfare, and cyberbullying with consideration of possible motivation for such occurrences as well the intrapsychic impacts of such circumstances. Further topics include identify theft, hacking, the global implications of cybercrime, child pornography, law enforcement responses to cybercrime, sociological and psychological implications of cybercrime, and the prospective future of cybercrime as technology continues to evolve.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PSYC509 Child Development (3 semester hours)

This course examines theory and research relating to cognitive, physical, socio-emotional, and moral development from birth to age 18 years. Emphasis is placed on typical development with some examination of challenges faced during development. Cultural differences and commonalities are reviewed. Applications of theory to educational settings are also examined.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PSYC510 Lifespan Development (3 semester hours)

This course reviews social, emotional, cultural, cognitive, biological, and learning theories and research related to human development. Emphasis is on both healthy development and challenges experienced by individuals and groups across the human life cycle. Cultural differences and commonality noted in the developmental process are examined.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PSYC511 Learning and Cognition (3 semester hours)

This course guides students through advanced level, in-depth and detailed study of classic and contemporary models of human cognition and learning through the lenses of the principle schools of psychology. Specific theories addressed include: functionalistic, associationistic, and cognitive.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PSYC512 Introduction to Industrial/Organizational Psychology (3 semester hours)

This course provides an overview of the primary concepts and theory in industrial and organizational psychology. Focus will be on understanding human behavior in organizations and the workplace. Concepts such as motivation, leadership, employee training and recruitment, performance measurement, and work/life balance will be discussed.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PSYC513 Deployment Psychology (3 semester hours)

This course will explore the unique psychology associated with military deployment, both for the person being deployed and their family and loved ones. Military culture, common psychological difficulties such as depression and PTSD, as well as provider self-care and burnout will be discussed.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PSYC514 Disaster Psychology (3 semester hours)

Students will explore research and historical real world examples of natural and man-made disasters to consider best practices in managing effective emergency response. Specific focus will be on understanding and mitigating post-traumatic stress, as well as military related disasters and emergencies. Students will learn about emergency response, recovery, and follow-up for victims of disaster.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PSYC515 Social Psychology (3 semester hours)

This course is a graduate level study of cultural issues and social influences on human functioning. Classic foundations combine with new research, recent methodological and up-to-date theoretical innovations to form the basis of a study that integrates scholarship and applied social psychology for everyday living.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PSYC520 Personality and Counseling Theories (3 semester hours)

This course explores the processes of normal and abnormal personality development and models of counseling and psychotherapy including psychoanalytic, behavioral, cognitive, and existential approaches.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PSYC521 Organizational Behavior (3 semester hours)

In this course, students will learn about human behavior in a variety of organizational contexts. The influence of inter and intrapersonal behavior, motivation, group dynamics, leadership, organizational culture/structure, and ethics in organizational behavior will be explored through study of organizational behavioral theory, research, and case studies.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PSYC522 Leadership and Change (3 semester hours)

This course will provide students with instruction on the theory and application of leadership behaviors, particularly in the context of leading change. Concepts such as influence, motivation, decision-making, conflict/ negotiation strategies and mentoring will be explored.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PSYC525 Physiological Psychology (3 semester hours)

This advanced level course focuses on the physiological processes underlying normal and pathological behavior. Neurological features of disorders such as schizophrenia and depression are examined.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PSYC526 Psychopathology (3 semester hours)

This course guides graduate level learners in in-depth study of classic and contemporary theories and treatment of abnormal human functioning. Students will undertake extensive investigation of cultural factors related to the expression and effective assessment of pathology.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PSYC550 Professional Ethics and Standards (3 semester hours)

This course is an advanced-level study of the ethical, legal, and professional issues relevant to the practice of professional psychology, including therapy, research, and assessment.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PSYC601 Qualitative Methods in Social Science Research (3 semester hours)

This course provides an overview of the cross-section of research methods that fall under the rubric of qualitative methodology. In examining these multiple approaches to qualitative methods, this course will discuss issues of research ethics, interviewing methods, conversation and discourse analyses, content analyses, and unobtrusive measures. The completion of this course will have applications in pure research, as well as in clinical assessments.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PSYC602 Quantitative Methods in Social Science Research (3 semester hours)

This research methods course provides an in-depth examination of quantitative research methods used in sociology and related social sciences. Students will practice designing quantitative research that collects observational, interview, survey, and other types of data.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PSYC610 Multicultural Issues in Human Behavior (3 semester hours)

This graduate level course covers the historical, research and theoretical underpinnings of multicultural psychology. It guides students in a comprehensive examination of cultural groups and in-depth analysis of contemporary multicultural trends and issues related to ethnicity, race, gender, sexual orientation, socioeconomic status, disability, age and religion. Students will research issues in cultural psychology through the development and design of their own empirical study.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PSYC620 Substance Abuse and Addiction (3 semester hours)

This course guides graduate learners in advanced level study of addictive disorders, including the historical and social context of the addictive process and the neurobiology of substance dependence. Course foci include the assessment of addiction, the substances of abuse, issues experienced by special populations, and available treatments for substance abuse and addiction.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PSYC630 Crisis and Emergency Intervention (3 semester hours)

This course offers an in-depth analysis of crisis and trauma events, survivor responses and needs, and competent strategic interventions. A theoretical approach draws on systems and developmental constructs to provide an assessment and intervention model that is both holistic and integrated within particular environments. Unique crisis events are addressed, including sexual assault, domestic violence, disasters (both natural and man-made), service provider stress, complicated bereavement, child abuse and neglect, and school crises.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PSYC640 Advanced Topics in Industrial/Organizational Psychology (3 semester hours)

This course provides an in-depth exploration of the industrial organizational theory and research. With a focus on application and problem solving in organizational and work contexts, students will evaluate theories and investigate research on motivation, leadership, employee training, performance management, and work/life balance. (Prerequisite: **PSYC512**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PSYC699 Integrative Capstone Project in Psychology (3 semester hours)

This capstone course is for students completing the master of arts in psychology degree. Students will complete a multi-part, multi-format comprehensive examination to demonstrate their mastery of the knowledge and skills outlined in the program's expected outcomes. Review materials are provided as well as opportunities to interact with peers and the instructor, who will answer student questions and support the students' progress. NOTE: This course may not be taken until all other courses are COMPLETED and the student has a 3.0 GPA.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Public Administration (MAPP)

MAPP501 Foundations of Governance and Policy (3 semester hours)

In an increasingly complex geopolitical environment, concepts of "governance," "polity," and "policy" need exploration, definition, and clarity. This course lays the multi-disciplinary groundwork for this program, introducing the roots of the field and the expectations of the program. Students will explore the process of policy making, the conditions which influence administrative decisions, and the theoretical underpinnings of the discipline.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MAPP502 Public Writing (3 semester hours)

The art of good public writing involves many stages: good memos and grant proposals do not just “happen” overnight. And competent reports or engaging press releases do not constitute everything you know about their central subject. They are the product of much thought, research and frequently much revision. The good news is that, like any technique, it is one that can be learned through practice and useful feedback. MAPP 502 is designed to provide just this, with a special emphasis on developing self-evaluation techniques for you to draw from and use professionally long after you have completed your Master’s degree.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MAPP503 Digital Government (3 semester hours)

This course offers an in-depth panorama of the strategies used to design, implement and evaluate effective policies, government information and democratic procedures and practices as they are publicized online in a digital world. We examine the merits of recent initiatives in e-government and e-governance from the perspective of policy administrators and elected officials as well as the increasing array of ways that citizens and civil society groups and organizations can use, and interact with online government information and services. We also look at the problems that many government agencies encounter in their attempts to provide information and services digitally plus what challenges and opportunities may be in store for the e-governance strategies of the future. The course covers issues surrounding democratic accountability and transparency, security and privacy, citizen e-participation, e-performance reporting and public relations in online government communications. It pays special attention to giving students the opportunity to develop practical skills in how to design and develop effective, specific and comprehensive e-government strategies at the local or state level.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MAPP504 Economics and Public Policy (3 semester hours)

This course critically assesses the role the government plays in the economy and how this affects federal, state and local public policy making and vice versa. We first deconstruct and critique basic economic concepts like public goods and externalities and cover the central theoretical principles that apply to public economics. We then use these to evaluate the federal budget, taxation and income redistribution with a special focus on social security, education, health care and defense policy. Students will develop a critical sense of their own economic policy positions and apply these to their area of concentration.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

MAPP697 Public Policy Project Capstone (3 semester hours)

The Public Policy Project Capstone course gives students the opportunity to choose a current policy in which they are interested and conduct an in-depth policy analysis from many critical perspectives. This will be supported by submissions of a policy brief, target audience assessment, budgetary analysis and timeline and a strategic media plan. The creative project must demonstrate originality and will follow the style requirements set by the department currently the American Psychological Association (APA) Publication Manual. NOTE: This course may not be taken until all other courses are COMPLETED.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Public Administration (PADM)

PADM505 Ethics in Government (3 semester hours)

This course addresses the moral versus legal aspects of public administration. Ethical controversies and real and hypothetical solutions to the issues will be addressed through the components of individual attributes, organizational structure, organizational culture and societal expectations. The administrator's role in ethical decision-making will be examined along with external and internal controls. The course will offer studies in leading and building organizations of integrity and with respect for individual and group variations.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PADM510 Administrative Theory (3 semester hours)

This course covers the major administrative theories that drive macro-level public behavior. It will begin with a consideration of the broad significance of the study of public organizations for individuals in modern society. It will then examine how theorists and practitioners have sought to develop more formal perspectives on public management. It will examine those ideas that are of greatest relevance to the construction of an integrated theory of public organizations. The progression of the course follows the evolution of administrative theory from the pioneering work of Weber, Taylor.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PADM520 Public Administration in Society (3 semester hours)

The study and practice of public administration is explored in its political context. The student is introduced to the environment within which public administration functions and the dynamics of behavior within large organizations. How choices are made among competing policies, factors affecting the implementation of policy, and the role of policy evaluation in shaping policy choices are examined. Managing large-scale bureaucratic organizations is analyzed including the role of leadership, the management of personnel and finances, and the role of communication in inter- and intra-organizational relations.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PADM530 Public Policy (3 semester hours)

This course examines the way government policies emerge from the political process and are implemented through participating institutions. In this class students will investigate how good analysis can contribute to informed policy-making and review the factors that go into developing effective implementation strategies. In addition, today's need for enhanced public accountability and the challenging problems of measuring program performance are examined.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PADM610 Public Management (3 semester hours)

This course examines a range of management issues and strategies within the context of managing public organizations. The core focus is on an enhanced understanding of the theoretical and practical approaches to public management, an examination of enduring and day-to-day dilemmas faced by competent public managers, and the application of relevant theories to public management within the United States.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PADM611 Law and Public Policy (3 semester hours)

This course provides an introduction to the law and legal system as it applies to public administration and policy. It covers the interrelation of norms, moral codes and formal laws. The attempt to address social concerns with new laws and regulations has created increased pressure in the courts and legislative chambers. This course examines the sources, influences, operation and consequences of law and public policy formation, and analyzes public policy initiatives from political and legal aspects as to their intentions, achievable aims, and intended and unintended outcomes.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PADM612 Public Finance (3 semester hours)

This course covers public budgeting from the public manager's perspective. Whether you are currently or hope to be a manager for federal, state or local government or a local or national nonprofit, this course will give you a good overview of budgeting, and how it relates to you. Topics include budgetary history, revenue and expenditure management, budgeting processes and operating techniques.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PADM615 Program Appraisal (3 semester hours)

This course is designed to develop fundamental skills essential for students to evaluate public programs. Knowledge of the policy process and research methods is brought together in the ethical assessment of program needs, processes, and outcomes.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PADM620 Local Political Administration (3 semester hours)

This course will expand the student's understanding of the leading approaches to public administration with a focus on the local and state levels of government. It will cover topics including decision-making, budget and taxation, and electoral and legal differences between state and local governments and other states. It will cover the legislative process, and how it fits into the larger federal system. Students will see the implications to the larger federal issues they have studied and their application to state and local bureaucracies.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PADM697 Creative Project Capstone in Public Administration (3 semester hours)

The Public Administration Creative Project Capstone course gives students the opportunity to address issues of public importance that are directly or closely related to their own career, occupation, profession or current position. Creative projects as program capstones may derive from a wide variety of organizationally defined formats such as legislative proposals (local, state or Federal), amicus briefs, standard operating procedures, training program manual, procedure manuals, organizational change proposals, communication plans, or recruitment plans to name but a few. The format will be proposed by the student and approved by the instructor. The creative project must demonstrate originality and will follow the style requirements set by the department currently the American Psychological Association (APA) Publication Manual.
NOTE: It is mandatory for students to contact their Academic Advising team when they are 2 or 3 courses out from the capstone.
THIS COURSE IS 16 WEEKS.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Public Health (PBHE)

PBHE501 Public Health in America (3 semester hours)

This course introduces students to the role of public health systems in America. The function of federal, state, and local public health agencies will be examined, as well as current political, environmental, epidemiologic, legal and ethical issues impacting the field public health. Students will also explore future challenges facing public health professionals in the 21st century.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PBHE502 Health Policy (3 semester hours)

This course is designed to give the student an in-depth understanding of the roles that government and the consumer (the patient) can, and do, play in the ever-evolving health care industry. This course places special emphasis on politics and ethics and the results when they clash, as well as how politics and ethics form the mental attitudes of decision makers. This course is rich in information on the various political and ethical dilemmas facing the patients in the new millennium.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PBHE520 Biostatistics with Lab (4 semester hours)

Biostatistics is a fundamental course in public health. This course will prepare the students to collect, analyze and present the data through the understanding of basic concepts, principles, and techniques/methods of statistics as applied to public health. Major topics will include descriptive statistics, statistical models, probability, probability distribution, point and confidence interval estimation, sampling, hypothesis testing, general principles of study design, and comparison of discrete and continuous data such as t-test, ANOVA, correlation, and regression. The lab portion of the course will focus on the application of Biostatistics by using statistical software. The students will learn to apply the concepts learned in the course (PBHE 520, Biostatistics with Lab.) Major topics will include descriptive statistics, probability, probability distribution, point and confidence interval estimation, sampling, hypothesis testing, and comparison of discrete and continuous data such as t-test, ANOVA, correlation, and regression. Students will develop advanced skills in SPSS to run statistical procedures and interpret output. Students will ask questions of data sets, write-up results in briefs, and develop the skills to critique analysis & findings in peer-reviewed literature. NOTE: Students are required to purchase and use the statistical software, SPSS, to successfully complete this course.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PBHE526 Public Health and Environment (3 semester hours)

The study and analysis of a variety of environmental problems, issues, and exposures emphasizing the interrelationship between humans and the myriad environmental concerns.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PBHE527 Social and Behavioral Aspects of Health (3 semester hours)

This course reviews the conceptual, empirical, and theoretical contributions of the Social and Behavioral Sciences as they contribute to an understanding of health and illness.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PBHE531 Public Health Program Planning and Evaluation (3 semester hours)

This course is an analysis of public health program planning, implementation and evaluation, with examination of consumer participation, data collection, consultation, negotiation, training, budgeting, and writing program reports.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PBHE532 Ethical Issues in Public Health (3 semester hours)

This course will investigate ethical issues in public health through discussion of case studies and applicable ethical theories.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PBHE540 Emergency Management Health and Medical Issues (3 semester hours)

This course is a fascinating study of the concepts of medical and healthcare issues in emergency management in mass-casualty and high-impact incidents. The student will learn about the planning and coordination--from the national to the local levels--necessary to respond to disasters that are natural (such as earthquakes, floods, tornadoes and heat waves); industrial, technological and transportation (such as hazardous materials, air crashes and mass gatherings); conflict-related (such as terrorist attacks and mass shootings); as well as the education, training and research done before, during and after these events.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PBHE550 Research Methods in Public Health (3 semester hours)

This course teaches the student to design their own empirical research, and evaluate the research of others, in any of the sub-fields of public health. The course begins with an introduction to the field of public health. It introduces the philosophy of social science and several theoretical approaches used in public health. The course then concentrates on teaching the details of public health research design. The course takes the student step-by-step through qualitative, comparative, and quantitative research design and analysis methods. (Prerequisite: **PBHE520**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PBHE601 Health Care Administration (3 semester hours)

This course is a study of the forces that now shape, and will shape, health care in the new millennium. The emphasis is on administration. It also provides the student with a summary of the skills necessary to be an effective administrator in this evolving industry. Additionally, it details the various elements that exist in the current system, so as to provide the departure point for new ideas, proposals and restructuring under both voluntary and involuntary (legislated) provisions.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PBHE605 Quarantine (3 semester hours)

This course is a study of the theoretical, historical, and contemporary issues associated with quarantine as a public health and safety measure. Students will learn of quarantine strategy, implementation, effectiveness, and debate. The course topics will include consideration of quarantine as a health and safety measure in the modern homeland security strategy.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PBHE606 Disaster Health Management (3 semester hours)

This course focuses on the principles, types, and forms of health management systems that exist to serve public needs during society's most threatening crises. Topics range from international and national political and policy views of disaster health management down to local levels where leading hospitals and emergency managers must respond to public health disasters on a daily basis.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PBHE607 Epidemiology (3 semester hours)

This course provides a graduate level study of epidemiologic concepts and approaches to population problems in public health. It covers a wide spectrum of topics, to include outbreak investigation, test properties, and study design. The course will provide understanding of disease and disease transmission, rates and proportions associated with different forms of outbreak, and epidemiological risk management methods and measures. Students are required to utilize Epi info software to complete their assignments. (Prerequisite: **PBHE550**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PBHE696 Public Health Comprehensive Examination (3 semester hours)

This course serves as the culminating experience for the Master of Public Health degree. Students must pass this course for degree conferral. The Comprehensive Examination ensures that the student has mastered the program competencies, the Council on Education for Public Health (CEPH®) competencies, and the knowledge expected of a professional in the public health field. The course is 8 weeks of self-study using classroom resources and resources from the courses throughout the MPH program followed by an exam structured to mirror the CPH (Certified in Public Health) Exam. The two-part comprehensive exam includes multiple choice questions that mirror the CPH exam followed by in-depth take-home essay questions that address University program and CEPH competencies. The multiple-choice question portion of the Comprehensive Examination will be proctored and students will follow the Comprehensive Exam policies and guidelines as written in the EOP Manual for Master's Programs. Note: The CPH is an exam administered by the National Board of Public Health Examiners for professionals in the public health field (https://www.nbphe.org/). After successful completion of this exam, students are encouraged to sit for the CPH exam (but this is not part of the University's MPH degree program).

CEPH® is a registered trademark of the Council on Education for Public Health.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PBHE697 Public Health Practicum (4 semester hours)

This course is intended to give the student practical experience in public health. This practicum is spent in an appropriate program, under the guidance of an administrator qualified by education and/or experience. The practicum consists of a 180-200 hours supervised practical application of previously studied theory and is completed by the student throughout a 16-week course. Development and utilization of original activities is stressed, and periodic progress reports are required. Students must secure a supervised position prior to beginning this course. Students are encouraged to consult with their academic advisor with any questions, prior to registration. This course requires an additional cost for the use of Typhon student practicum tracking software, to be purchased by the student prior to the start of the practicum. This fee will be paid directly to the Typhon group. Typhon will give the students the ability to develop a professional portfolio and access the system for 5 years. (Prerequisite: Students may take the practicum after all other CORE courses are completed).

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

PBHE699 Public Health Capstone (3 semester hours)

This course will involve a major research paper or thesis option that demonstrates understanding of the program objectives. The research paper and thesis will demonstrate understanding of social science research methodology. A Research Manual with explicit guidance for the research paper and thesis option will be available. The student shall select their research paper or thesis option professor from designated APUS faculty. NOTE: This course may not be taken until all other courses are COMPLETED and student has a 3.0 GPA. THIS COURSE IS 16 WEEKS.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Religion (RELS)

RELS533 Islam (3 semester hours)

This course will enable students to examine Islam and Islamist movements in historical, political, and cultural contexts, and to understand Islam and the Islamic world more broadly. It does not focus on Islamism specifically, but does include it. The breadth of the course content reflects the inconsistent and uncertain usage of the term Islam. Strictly defined, Islam refers only to the religion founded by Muhammad. It is not a political, ethnic, geographic or cultural term any more (or less) than Christianity is. After investigating the origins and expansion of Islam through history, a central theme explored concerns the various expressions of Islam in the Middle East and beyond, and the relationship of theology to polity within Islamic societies and predominantly Muslim nations.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Reverse Logistics Management (RLMT)

RLMT500 Reverse Logistics Management (3 semester hours)

This course is a comprehensive review of the major applications of reverse logistics principles, problems and best practices in manufacturing, retail and the military. The student will study applications from apparel, aviation, automotive, electronics, food and beverage, retailers, and sporting goods. It includes an analysis of Green applications and Carbon Footprint credits for companies.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

RLMT501 Practical Applications in Economics Analysis (3 semester hours)

This course is a comprehensive study of problem formulation and calculating return on investment (ROI) in project management, such as applications for reverse logistics. The student will develop engineering economic analysis solutions to case study problems of returns, recalls, recycling, repackaging, waste management, as part of learning how to design a reverse logistics network or supply chain.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

RLMT502 Decision Making Strategies in Reverse Logistics Management (3 semester hours)

This course investigates the advanced analysis methods and techniques used to solve the pricing and packing needs of products entering the reverse logistics supply chain. The course emphasizes the most successful methods from business statistics, production and operations management, management science, and operations research fields of study. Students will be required to synthesize material from several major fields of study in order to apply it in this course. Methods of analysis will be investigated to solve these problems including probability concepts and their applications, statistical quality control, process design, forecasting, inventory control, waiting line models, transportation and assignment methods, decision analysis, and simulation modeling

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

RLMT503 Reverse Logistics Policies and Regulations (3 semester hours)

This course covers government rules, regulations, policies, etc. that govern reverse logistic operations. These policies and regulations will be analyzed toward their impact on product production, manufacturing, and retail industry. The impact of the overall reverse logistics network designs and distributions will be studied from case studies. The impact on the financial elements of a company engaging in reverse logistics practices will be examined from a return on investment and sound business planning.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

RLMT600 Global Reverse Logistics Management (3 semester hours)

This course is a comprehensive examination of the global factors affecting reverse logistics drivers from major companies to small businesses. The student will examine and analyze disaster logistics, and how it affects the resiliency of a global supply chain.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

RLMT610 Technology in Reverse Logistics Operations (3 semester hours)

This course studies the use of GPS, RFID and bar coding technology used to track and trace products through the forward supply chain and the reverse logistics process. The student will study the complex issues of data synchronization facing today’s reverse logistics manager.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

RLMT620 Resource Commitment and Performance in Reverse Logistics (3 semester hours)

Students in this course analyze the resources needed to establish and implement a reverse logistics operations in manufacturing and in retail stores. Emphasis is placed on analysis and way to measure the return on investment and other performance measures to ensure a successful reverse logistics operation.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

RLMT630 Recalls and Returns Management (3 semester hours)

This course is a focused and comprehensive examination of the recalls programs of major manufacturing companies around the world, as a thorough study of how a returns program can enhance the revenue stream of a retail store.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

RLMT645 Advanced Green Logistics (3 semester hours)

This course examines the organization, planning, and controlling of recycling, reclaimed materials, and reclaim centers projects that are designated as Green. The student is provided practical knowledge on Green project planning, managing Green project scope, and sustainment and environmental risk management.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

RLMT650 Reverse Logistics in the Retail Industry (3 semester hours)

This course is a focused and comprehensive examination of how different retail industries implement reverse logistics programs. The focus is on food and beverage, apparel, automotive, sports, hotel operations, and consumer electronics. Attention is focused on data synchronization inventory management comparing the forward and reverse logistics chains.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

School of Health Sciences (SPHS)

SPHS515 Sport History and Culture (3 semester hours)

This course focuses on the study of historical, cultural, and sport policy variables within athletic development management. Students will evaluate the relationships between athletes and stakeholders through the theoretical concepts of sociology, physiology, and kinesiology, psychology, sport management, business, and coaching. They will analyze the role of specific sports policies and play from the perspective of an athlete, coach, and stakeholder. Nuances of specific sports are examined through historical sporting events, athletic achievements, and national and international governance of amateur and professional sport.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Science and Society (STEM)

STEM693 Independent Study for Masters Students (3 semester hours)

Master's students interested in more than one area of study can take an independent study course, which is occasionally offered depending upon student interest. Students can study their chosen subjects under the guidance of a faculty mentor. These courses are limited in their offerings and scope, and the format will vary based on the student's interest and the topics to be covered. Approval of the Department Chair is needed prior to enrollment.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

STEM695 STEM Internship for Graduate Students (3 semester hours)

Participating in an internship provides students with a valuable educational and professional opportunity. During internships, students explore and gain hands on experience in a field they have an interest in working within. Within the School of Science, Technology, Engineering, and Math the primary responsibility for finding an internship belongs to the student, however there are a number of resources in place to help you in your search, and with the application process.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Security Management (SCMT)

SCMT507 Assets Protection & Loss Prevention Management (3 semester hours)

The course focuses on advanced administration and management issues related to corporate security functions, including strategic and operational management, risk management, contract security services, management of emergencies and loss prevention. Students will assess vulnerabilities and recommendations of the 9/11 Commission Report on terrorist attacks upon the Unites States. Facility protection standards are used to determine appropriate courses of action, from a security management perspective, using threat models and risk assessment concepts. Research is required and application of critical thinking is applied to address external threats and countermeasures. Practical exercises are conducted to apply research findings.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SCMT508 Evaluation of Security Programs (3 semester hours)

The course provides a comparative analysis of relevant security programs in the public and private sectors. The concept of defensible space, internal and external access control and psychological security barriers are examined and evaluated during this course.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SCMT509 Contemporary Issues in Security Management (3 semester hours)

This course is an in-depth study of contemporary issues in security management. The course will focus on tools that the professional security manager can use to increase productivity and lower operational cost. Topics explored: personnel security issues (background checks), budgeting, security liability, human resources issues and equal opportunity rights.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SCMT510 Security Management Ethics (3 semester hours)

This course is an examination of issues of professional and ethical behavior within the security industry. Key issues examined include professional behavior of the individual and the agency. Current topics such as sexual harassment, professionalism, and industry standards are discussed.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SCMT511 Chief Security Officer Fundamentals (3 semester hours)

This course will provide an overview of the Chief Security Officer (CSO) graduate certificate program while focusing on the knowledge and skills required to function at the senior corporate level of management. Students will develop an understanding of how to communicate security's value to the C-Suite. Students will learn how to identify, build and use metrics to measure success or risk. Students will develop an understanding of the need for cross-functional collaboration and leadership.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SCMT529 International Terrorism (3 semester hours)

This course examines the global terrorism phenomenon and the social, economic, political, and religious conditions of select states, groups, and individuals that influence the terrorist mindset. Students examine the definitions, origins and development of terror as a means of influencing public policy decisions and in fostering transitions in public power to promote group goals. Specific historical instances of the use of terror are evaluated, assessed, and analyzed. Examples of groups such as the Al-Qaeda terrorist network are assessed including focused discussions on current events. Topics include: geography and geopolitics of terrorism, origins and history of terrorism, characteristics and goals of terrorism, role of politics and religion in terrorism, media impact on terrorism recruiting, and Al-Qaeda in Iraq organization.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SCMT536 Protective Services (3 semester hours)

This course provides a detailed history of protective services. Topics covered include training and background requirements, obtaining contracts, selecting, training, and managing a security team, security surveys, dealing with clients, legal issues, importance of networking, information sources, and special considerations for clients in high profile industries.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SCMT537 Computer Crime (3 semester hours)

This course will examine cybercrime and the legal, social and technical issues cybercrime presents. With a multi-disciplinary perspective, we will focus on ways information technology is used to commit crimes, investigative techniques used to discover the crimes, and the challenges involved in prosecuting cybercrimes These challenges include jurisdictional issues, application of traditional laws to cybercrimes, and privacy issues encountered during prevention, investigation and prosecution.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SCMT538 Industrial Espionage (3 semester hours)

This course provides a framework for understanding and protecting against industrial espionage. It reviews the history of industrial espionage, current methods of information elicitation, and explores counterespionage options to defend organizations. Students will also learn how companies place their proprietary and protected information at risk as well as how to prevent unwanted information disclosure. Topics such as the Economic Espionage Act of 1996 and operational counterintelligence are covered. The purpose of the course is to teach how to recognize and neutralize serious threats to both business and government entities.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SCMT544 Security Architecture (3 semester hours)

This course stresses the core principles of the CPTED (Crime Prevention through Environmental Design) concept. Students learn how to work with architects, city, and municipal planners to ensure new or refurbished construction is designed in such a way as to minimize or eliminate criminal activity. Topics covered include initial planning considerations, gathering information from multiple sources, formulating and implementing the plan based on core CPTED principles, and the need for modifications and review over time.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SCMT545 Airport Security Design (3 semester hours)

This course provides a comprehensive overview of the current state-of-the-art in airport security. Air terminal security is covered from the aspect of physical security considerations, baggage screening, training requirements for security personnel, employee screening and awareness programs, aircraft security, ground and air security technologies, integrating security systems for maximum coverage and protection, effective local, state, and federal liaison, counter and anti-terrorism measures, narcotics and contraband - the use of working dog teams, and apron access and security considerations.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SCMT553 Security Program Administration (3 semester hours)

The course provides the graduate-level security professional with the tools necessary to effectively plan for, implement, monitor, and administer a security organization in a modern, global, and technologically advanced security program. Upon completion of the course, the student demonstrates expertise in administrating a security program from the following aspects: fiscal, human resource management, change management, global talent management, and resource management perspectives. Students will also assess the concepts of return on investments (ROI) including cost-benefit aspects of asset protection and liaison with other management officials in the organization.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SCMT699 Security Management Capstone (3 semester hours)

Preparation for the Security Management research seminar begins on day one of a student's graduate program of study. The theories, research methods and analytical skills, and substantive knowledge obtained through their master's curriculum provide the basis for the research seminar project. Students will support the research seminar effort, including gathering bibliographic and reference materials on the thesis topic including developing individual course research papers that may become sections of the final research seminar. Students will address the requirements as described in the syllabus and classroom assignments. The research seminar proposal shall be prepared in accordance with the standards of the academic discipline. The research seminar proposal must provide a clear and lucid description of a question or problem and a proposed method of answering the question or solving the problem. Guidance on the format of the research seminar proposal and a sample proposal are contained in the APUS Thesis Manual.
NOTE: This course may not be taken until all other courses are COMPLETED and student has a 3.0 GPA.
THIS COURSE IS 16 WEEKS.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Sociology (SOCI)

SOCI500 Social Theory in Action (3 semester hours)

This course integrates classical and contemporary sociological theory through application. Students will explore epistemology, examining theory as a framework for studying society. Students will focus on key sociological theories that apply to their research topic interests.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SOCI501 Professionalism for Sociologists: Ethics, Collaboration, and Career Planning (3 semester hours)

This course explores key professional skills for sociologists. Students examine key ethical issues for social science researchers by learning the position of key sociological professional societies on current social issues. Students learn strategies for developing their professional networks. Students will learn how to manage projects and create and document collaborative agreements with colleagues. Students will learn to create short- and long-term career plans. Students will build professional profiles through an online portfolio.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SOCI510 Introduction to Graduate Studies in Sociology (3 semester hours)

This course provides an overview of sociology as a field of study, including the historical development of the discipline. Students are introduced to the three main theoretical perspectives of sociology as well as the terms and concepts related to human behavior in society. An emphasis is placed on the impact of social forces on individuals, groups, organizations, institutions, and societies. Students will discuss social problems, social justice, and social change, as well as how sociologists research social phenomena and how to explore potential career paths in sociology.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SOCI530 Introduction to Design Thinking (3 semester hours)

Organizations and businesses face a changing social landscape in which their products and services are inextricably linked with the needs of the people who create and consume those products and services. Stakeholders looking to innovate and seize opportunity, or needing creative solutions to challenges, must thoughtfully integrate knowledge and tools from different disciplines to strike a balance between what is feasible from the organizational perspective and what is needed from the consumer perspective. For stakeholders facing multifaceted challenges, design thinking is an important process and tool that supports creative innovation and user-focused solutions. Students in this course will become familiar with design thinking as an approach and tool, learning how to apply it to their professional and personal goals.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SOCI531 Applied Design Thinking (3 semester hours)

Design thinking is an approach that helps bridge organizational needs and consumer needs, with deep focus on consumer-driven data that informs innovation and practice. Students learn how to apply design thinking principles through work on case studies as well as application to an issue in their field of study or career. This course focuses on building mixed methods research skills like participant observation, focus groups, interviews, and surveys - to create and test data-informed solutions, and report findings to organizational stakeholders. (Prerequisite: **SOCI530**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SOCI532 Applying Design Thinking to Discipline-specific challenges (3 semester hours)

This course focuses on an applied project related to the student's major field of study or career path. Integrating knowledge and skills from the other courses in the design thinking graduate certificate will be critical in this course. Students will identify a multi-faceted problem or challenge that they want to address from a design thinking perspective, collect and evaluate stakeholder insights and data, and then design and assess multiple solutions. (Prerequisite: **SOCI531**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SOCI603 Advanced Data Analysis for Social Science (3 semester hours)

This is an intermediate course focused on the use of statistical models used in qualitative and quantitative research design and analysis. Students will assess the validity and reliability of different types of statistical tests. Data will be interpreted using analysis of variance or covariance, multiple linear regression, logistic regression, and factor analysis. Students will develop advanced skills in SPSS to run statistical procedures and interpret output. Students will ask questions of data sets, write-up results in briefs, and develop the skills to critique analysis & findings in peer-reviewed literature. NOTE: Students are required to purchase and use the statistical software, SPSS, to successfully complete this course.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SOCI610 Grant Writing and Fundraising for Social Scientists (3 semester hours)

In this course, students will develop grantsmanship skills specific to social scientists working in academic and public service career fields. Students will learn how to secure funding for competitive research projects. Students will learn to identify appropriate sources of grant funding, tailor their proposals to different funding audiences, write successful grant proposals, manage research budgets, and produce summary presentations and reports for funders. In addition to grant writing, students will explore other fundraising sources and skills for social scientists.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SOCI620 Social Analysis of Education Systems (3 semester hours)

In this course the social aspects of education and the modern school system in the United States will be examined. The sociological perspective will be used as a lens to explore how life opportunities are shaped by experiences in school; how schools reproduce, reinforce, and challenge relationships of inequality in social, economic, and political structures. Students will explore the development of the modern schools system in the United States. Students will examine career opportunities for sociologists in education.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SOCI621 Medical Sociology (3 semester hours)

In this course students will assess disparities in health, illness, and healthcare accessibility and quality through application of sociological theory. Students will identify how social processes shape experiences of health, illness, and reform in the healthcare system. Students will examine the role of sociologists in health related career fields such as healthcare administration, public health, and more.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SOCI690 Independent Study: Sociology (3 semester hours)

This course is an opportunity for sociology students to pursue an independent research project or examine a specific area of sociology under the mentorship of a single professor. Students must complete 24 credits of study before taking this course. The course will typically involve a major research paper. Prior to registering, students should first contact the professor with whom they wish to mentor their independent study, coordinate an agreement on the grading requirements, and then notify their academic advisor with the name of their professor.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SOCI698 Sociology Capstone (3 semester hours)

This course provides students with an opportunity to synthesize and articulate knowledge gained during the master's in sociology program. Students will complete a research project and paper and successfully submit this capstone project to the University's Library. Students will receive substantial guidance and support from their instructor and classmates throughout the course. NOTE: This course may not be taken until all core courses are COMPLETED and the student has a 3.0 GPA.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Space Studies (SPST)

SPST500 Research Methods in Space Studies (3 semester hours)

MUST BE TAKEN AS THE SECOND COURSE IN THE SPACE STUDIES PROGRAM. This course is designed to build the student's ability to organize and conduct research in the space studies discipline, and to enable the student to present findings in a clear, concise, coherent manner. It is devoted to thinking about research logically, creatively, critically, structurally and scientifically. Course material covers qualitative research designs, theory building, role of argumentation in presenting a research report (thesis), as well as describing and analyzing quantitative variables.
IT IS HIGHLY RECOMMENDED THAT YOU HAVE PREVIOUSLY COMPLETED COLLEGE ALGEBRA BEFORE TAKING THIS COURSE

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST501 Introduction to Space Studies (3 semester hours)

This course serves as an introduction to the APUS Space Studies Master's program. It describes on the main concentrations in Space Studies: Astronomy, Aerospace Science, Space Policy, and Space Entrepreneurship. It also focuses on the technical writing proficiency expectation for graduate study and the importance of the peer review process in scientific literature. The course explores both current and future directions in NASA space exploration. It also introduces the new United States Space Force (USSF), and considers the implications of the USSF for the direction of our country's space exploration policy.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST502 Introduction to Orbital Mechanics (3 semester hours)

CORE COURSE: What is an orbit? How does a spacecraft fly to the Moon or Mars? What does NORAD use to track all of the satellites currently in orbit around Earth? How does a spacecraft move from one orbit to another? These questions and more are answered in this course. From Kepler and Newton to the modern telecommunications, navigation, and remote sensing spacecraft, knowledge of orbital mechanics is essential for the modern Space Manager to be able to plan future space missions and to converse with orbital analysts that perform the day-to-day calculations determining IT IS HIGHLY RECOMMENDED THAT YOU HAVE PREVIOUSLY COMPLETED COLLEGE ALGEBRA BEFORE TAKING THIS COURSE. (Prerequisites: **SPST500** and **SPST501**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST503 Chronology of Space (3 semester hours)

This course takes an in-depth look at the past and current structure, tasking, goals and objectives of the U.S. National Aeronautics and Space Administration (NASA). Emphasis is placed on the roles of the individual research centers, space centers and laboratories that form the NASA organization. The origins and impact of the ‘space race’ are discussed in detail.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST504 Remote Sensing Satellites (3 semester hours)

CORE COURSE: Earth orbiting remote sensing satellites play a key role in the lives of human beings. This course is a study of the major components of contemporary remote sensing satellites, the various methods of remote sensing capability, and the advantages and disadvantages of each method. Course topics also include study of remote sensing orbits, launch vehicles, and technology. IT IS HIGHLY RECOMMENDED THAT YOU HAVE PREVIOUSLY COMPLETED COLLEGE ALGEBRA BEFORE TAKING THIS COURSE. (Prerequisites: **SPST500** and **SPST501**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST611 Aircraft Propulsion Systems (3 semester hours)

This course is an introduction to aircraft propulsion systems, including their design and development, turbo propulsion combustion technology, engine/airframe performance matching, inlets and inlet/engine integration, exhaust nozzle aerodynamics, engine operability, and aeroelasticity and unsteady aerodynamics IT IS HIGHLY RECOMMENDED THAT YOU HAVE PREVIOUSLY COMPLETED COLLEGE ALGEBRA AND CALCULUS I BEFORE TAKING THIS COURSE.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST612 Rocket Propulsion (3 semester hours)

Even though the Chinese introduced rockets about 800 years ago, most of the important rocket development has taken place in the 20th Century. This course introduces rocket theory including specific impulse, thrust chamber design, nozzle design, heat transfer, and propellant composition and places particular emphasis on the development and use of liquid and solid rockets. The course concludes with a discussion of the future of rocketry including hybrid rockets, thrust vector control, and electric rockets. The material in this course is applicable and essential for any military or civilian Space Operator, Manager, or Designer who wants to achieve a better understanding of how rockets are designed and how they operate.
IT IS HIGHLY RECOMMENDED THAT YOU HAVE COMPLETED COLLEGE ALGEBRA PRIOR TO TAKING THIS COURSE

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST613 Satellite Communications (3 semester hours)

CORE COURSE: This course is a study of the principles, architectures, technologies, management, economies, advantages, and disadvantages of satellite communications. Spacecraft launch vehicles, orbits, communications modulations, radio wave propagation, payload designs/types, and spacecraft bus and antenna types are all addressed. Students will learn to devise/formulate actual satellite communications link budgets and evaluate the impact of each variable used within the equation. IT IS HIGHLY RECOMMENDED THAT YOU HAVE PREVIOUSLY COMPLETED COLLEGE ALGEBRA BEFORE TAKING THIS COURSE. (Prerequisites: **SPST500** and **SPST501**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST615 Aerodynamics (3 semester hours)

This course introduces the student to core concepts of aerodynamics, including fundamentals of inviscid, incompressible flow; compressible flow; shock waves/properties; compressible flow through nozzles, diffusers, and wind tunnels; subsonic compressible flow over airfoils; linear theory; elements of hypersonic flow, and boundary layers. IT IS HIGHLY RECOMMENDED THAT YOU HAVE PREVIOUSLY COMPLETED COLLEGE ALGEBRA AND CALCULUS I BEFORE TAKING THIS COURSE.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST616 Aircraft Design (3 semester hours)

This course is an introduction to aircraft design. The Design Process, Airfoil and Geometry Selection, Thrust-To-Weight Ratio and Wing Loading, Sizing, Crew Station, Payload, and Passengers, Propulsion and Fuel System, Landing Gear and Subsystems, Aerodynamics, Basic Propulsion, Structures and Loads, Stability, Control, and Handling Qualities, Performance and Flight Mechanics, as well as Cost Analysis, are some of the areas covered in the course. PREREQ: **SPST615** AERODYNAMICS. IT IS HIGHLY RECOMMENDED THAT YOU HAVE PREVIOUSLY COMPLETED COLLEGE ALGEBRA AND CALCULUS I BEFORE TAKING THIS COURSE.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST619 The Psychology and Physiology of Space (3 semester hours)

This course is an overview of the human ability to function, work and live for extended periods of time in the environments of space, and interface with the systems supporting successful space travel. An important element of the space medicine / human factors is to develop standards, requirements, and policies to guide the planning, space systems design, and operation. This function also includes the ability to perform repairs and planetary surface investigation, future prospecting, and resource utilization. (Prerequisites: **SPST500** and **SPST501**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST621 Current and Emerging Space Powers (3 semester hours)

Space exploration and exploitation have become global activities. While the United States and the Soviet Union were battling for supremacy during the Cold War and striving for “firsts” in the Space Race, several nascent space powers were blossoming in the background. Not limited to the U.S. and USSR, the dream of spaceflight sprouted in lands as diverse as France, Germany, China, Japan, India, Israel and Brazil. The European Space Agency, the Chinese Space Program, the Japanese Space Program and the Indian Space Program have become space powerhouses. A study of these various programs is essential to gain a thorough understanding that space exploration is not only a global enterprise, but also an important concern for our own national security.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST622 Space Policy (3 semester hours)

Since the beginning of the Space Age, U.S. Civil Space Policy has been a cornerstone in determining space organizational structures, mission objectives, and resource distribution. From the launch of Explorer 1 through the Apollo Program Moon landings and continuing on to the Space Shuttle and International Space Station operations, the U.S. Government has been heavily involved in establishing space exploration and exploitation. A study of the various players in the space community, the various government interfaces, and an emphasis on budget development is important to study the roles that policy has played in our nation's space program.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST623 National Space Organization (3 semester hours)

This course is a comparative study of the major industrialized nations' space organizations. It begins with the US and presents an overview of NASA and non-NASA government agencies supporting space exploration. Comparative views are presented for other countries which then allows the student to select the country of their choice (as approved by the instructor) to compare/contrast its space organization with that of the United States. Students will review the fundamental roles of significant space organization, budgets, and goals and objectives in comparison and contrast between the US and another country.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST628 Space Operations Structure and Design (3 semester hours)

This course is a study of management issues involved in the vision, planning, design, structure and operations of new and existing facilities and vehicles. The course will include a review of existing vehicles and facilities and those that will be required in the upcoming quarter century.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST630 Planetary and Solar System Studies (3 semester hours)

This course examines the exploration of the solar system with a focus on the methods used to explore the Sun, planets, moons, and small solar system bodies. Special emphasis is also placed on the space environment and its effects on current and future exploration activities. The threat of comet, asteroid, and meteoroid impacts on Earth will also be addressed. This course requires access to the web site MASTERING ASTRONOMY, and use of labs from the GEAS project website, which is supported by the NSF, and are used with permission. The link for GEAS labs is http://astronomy.nmsu.edu/geas/labs/html/home.shtml

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST631 Astrophysical Studies (3 semester hours)

This course examines the study of stars and galaxies with special emphasis on the methods and instrumentation used in the exploration of the universe around us. Focus is also placed on cosmology, the study of the past, present, and possible future of the universe. (Prerequisite: **SPST630**).
This course requires access to the web site MASTERING ASTRONOMY, and use of CLEA Labs, which are Windows only programs. If you are not using a Windows program, please verify that your system will be compatible with CLEA labs prior to registering for the course. The link for CLEA labs is http://www3.gettysburg.edu/~marschal/clea/CLEAhome.html

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST633 Astronomical Instrumentation (3 semester hours)

This course examines the design and construction of astronomical instruments, including mechanical design and machining, optics and commensurate optical system design, and both real-time and near-real time computer control. UV, X-ray, and gamma-ray spectrum instrumentation will also be addressed.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST635 History of Astronomy (3 semester hours)

This course reviews the historical significance and discoveries made by astronomers ranging from the early Greeks and Mayans through the discoveries of recent times using modern techniques and tools such as the Hubble Space Telescope. As both a history class and a science class, this course bridges the two by examining the interconnection of the events and people involved in astronomy through the ages as well as analyzing the observations that have formed the core of humanity's effort to understand and describe what we see around us. The majority of the course materials are primary sources, as students will read many of the original papers that have brought us to our current understanding of the universe. A major component of this course is learning to interpret history for different audiences in a wide variety of writing assignments.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST640 Space Cooperation and Diplomacy (3 semester hours)

This course will examine the importance of international space cooperation and diplomacy, enabling all nations, states, and consortiums to enjoy the benefits of space technology and ensuring the safety, stability, and security of outer space. Students will work in teams or individually and think critically about the importance of cooperating with both allies and if necessary, adversaries, to develop potential solutions to the world’s most critical and complex problems in space. Some of the topics of discussion will include the history of civilian and military space development; the ongoing debate on weapons in space; the past and current policy and guidance on space activities; the current threats to the safety and stability of space operations; the types of International cooperation; and a discussion of the cooperation strategies the US should pursue.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST650 Fundamentals of Earth and Planetary Sciences (3 semester hours)

A required course for the graduate concentration in Earth and Planetary Sciences, this survey course provides an overview of key concepts, dominant paradigms, and research frontiers in Earth and planetary sciences. The course provides a required foundation for all incoming students pursuing the Earth and Planetary Sciences concentration within Space Studies. Topics include an overview of the solar system, planetary geology, planetary atmospheres, and planetary mapping. (Prerequisite: **SPST501**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST651 Planetary Geology (3 semester hours)

Over the past decades, spacecraft exploration and related laboratory research on extraterrestrial materials have given us a new understanding of planets and how they are shaped by geological processes. This course will focus on geologic processes, adopting a comparative approach that demonstrates the similarities and differences between planets, and the reasons for these. This course will integrate data from past and present space exploration missions to compare processes operating on the surface of the Earth to processes operating on the surface of other celestial objects. Aspects of mineralogy, petrology, geochemistry, volcanology, sedimentology, geomorphology, tectonics, geophysics, and remote sensing will be used to examine this data and apply it to the geology of rocky bodies in the solar system as well as known exoplanets. (Prerequisite: **SPST650**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST652 Geology of the Moon and Mars (3 semester hours)

This course examines the processes which have shaped, and continue to shape, both the surfaces and interiors of the Moon and Mars, such as impact cratering, volcanism, and tectonics. A detailed review of past and current manned/unmanned geological exploration of each body will also be addressed. Critical aspects of the Lunar and Martian geology and environments relevant to human exploration and possible future settlements will be emphasized.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST653 Small Bodies of the Solar System (3 semester hours)

This class will cover a variety of objects within the solar system considered "small." This includes dwarf planets, moons, asteroids, meteorites, comets, and planetary rings. We will cover the composition, history, and role of these objects within the solar system. We will also address their influence on the Earth and other bodies, and what they tell us about the formation of planetary systems around other stars.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST654 Planetary Mapping (3 semester hours)

This course provides an introduction to the concepts and techniques used for mapping Earth and other planets. This includes the fundamentals of remote sensing and the applications of geographic information systems in terrestrial and extraterrestrial environments.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST655 Planetary Atmospheres (3 semester hours)

This course provides an overview of planetary atmospheres. The atmospheres of Earth, Venus, Mars, and Saturn's moon Titan are considered in detail. Atmospheres of planets orbiting other stars (exoplanets) are also considered.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST671 Space Law (3 semester hours)

This course examines space law from its origins at the commencement of space exploration to current day activities, including civilian, commercial and military/governmental issues/rulings. The Outer Space Treaty, Registration Convention, Rescue and Return Agreement, Liability Convention, and the Moon Treaty will be covered in detail, as will several other past, standing and pending legal works.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST695 Space Studies Capstone Portfolio (3 semester hours)

The portfolio course is designed as an alternative to the **SPST699** Capstone Thesis course. The proposed Capstone Portfolio course is an opportunity for students to demonstrate mastery of all the program learning objectives, including a platform to articulate other scholarly work with the professional digital portfolio being built using portfolium software. Students are expected to submit all required components of the portfolio, including keystone assignments from the program which demonstrate mastery of all program objectives. The proposal will also include a forty - fifty page document that is a reflection of the student's graduate experience, summarizing accomplishments, including past and future research efforts. The student will be expected to present the portfolio in an interview-style assessment to a committee of program faculty at the culmination of the course. NOTE: This course may not be taken until all other courses are COMPLETED and student has a 3.0 GPA. THIS COURSE IS 8 WEEKS.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPST699 Space Studies Capstone (3 semester hours)

Preparation for the Master of Science in Space Studies Thesis begins on day one of a student's graduate program of study. The theories, research methods, analytical skills, and substantive knowledge obtained through the Space Studies curriculum provide the basis for the thesis project. In this course, instructors guide students through the thesis process. Students are expected to submit all required components of the research process, including a thesis proposal. The thesis proposal must provide a clear description of a contestable question or problem and a proposed method of answering the question or solving the problem. The thesis requires students to present an original argument using proper academic writing conventions including carefully documented primary and/or secondary sources. Guidance on the format of the thesis and proposal are contained in the APUS End of Program Manual.
NOTE: This course may not be taken until all other courses are COMPLETED and student has a 3.0 GPA.
THIS COURSE IS 16 WEEKS.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Sports and Health (SPHS)

SPHS500 Statistics for Sports and Health Sciences (3 semester hours)

This course will introduce the student to graphical presentation of data, histograms and confidence intervals for binomial probabilities. One-sample and two-sample t-test as well as regression and correlation with two variables will also be discussed. The student will learn the concept of hypothesis testing and confidence intervals, multivariate regression and correlation, partial correlation coefficients, analysis of variance and covariance, and multiple comparison procedures. The analysis of research data will be emphasized in this course to provide the student with real world examples in the field of Sports and Health Sciences.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPHS501 Advanced Exercise and Sport Physiology (3 semester hours)

Designed for learners involved in the fields of health and exercise science, this course surveys and critically evaluates the basic principles of human physiology with direct application to acute and chronic exercise. Particular attention is paid to lifestyle risk factors that can lead to heart disease.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPHS502 Motor Learning (3 semester hours)

An evaluation of the physical, physiological, and psychological factors that affect motor skill acquisition, performance, retention, and transfer. With a focus on voluntary movement, topics include nervous system control of movement, sensory and perceptual contributions to motor learning, information processing, optimal conditions for learning motor skills, preferred modes of feedback delivery during learning, and individual variability in motor skill acquisition. Students will apply the principles of motor learning to coaching, fitness, and rehabilitation settings. Additionally, they will analyze motor learning settings and determine adjustments to be made in those settings to foster motor skill acquisition for a variety of populations.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPHS503 Nutrition for Sports Performance (3 semester hours)

Nutrition plays an integral part of our daily lives. It becomes even more important for athletes, who push the physical limits of their body. Providing adequate fuel is essential and can make a difference between success and failure. Yet most athletes and coaches lack basic nutrition knowledge important for enhancing strength, speed and endurance. This class will focus on the nutritional needs and requirement of athletes. First, the student will recognize and establish sound nutrition principles and the nutrients that play a role in determining these principles. Nutrients and other food constituents are integrated into the human body. These affect the athlete's metabolism, health, and performance. The student will trace the metabolic fate of dietary components and recognize how each nutrient and/or food constituent affects metabolism, health and performance. Using this knowledge, the student will design several healthy diets that optimize performance. (Prerequisite: **SPHS502**)

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPHS504 Advanced Methods of Strength and Conditioning (3 semester hours)

This course is designed to introduce the student to theoretical and practical concepts of strength exercise assessment, strength exercise interpretation and strength exercise prescription. Current research on strength training and methods is incorporated into the classroom for analysis and application. The student will develop appropriate techniques and methods used to recommend strength exercise prescription and programming for healthy and unhealthy clients. (Prerequisite: **SPHS501**)

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPHS505 Sport Psychology (3 semester hours)

Sport Psychology is the scientific study of how individuals behave in sport and exercise, and the practical application of that knowledge to performance enhancement strategies. Students in this course will investigate human behavior patterns in sports and exercise settings. Human behavior is complex, dynamic, and social. There are no easy answers when you try to determine why people behave in a certain fashion. However, this course will focus on interpreting and applying fundamental behavioral tendencies related to biological and psychological models of personality structure, motivational orientations, psychological interventions, and social dynamics. In addition, students will create useful psychological interventions that demonstrate their ability to distinguish the need for normal sport enhancement strategies from serious psycho/physical behaviors that require other professionally trained experts. Psycho/social relationships to sport performance will be analyzed. Behavior management strategies, modeling, aggression, and group dynamic models will be critiqued as students design philosophies that guide training and intervention strategies.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPHS506 Essentials of Human Performance and Exercise Science (3 semester hours)

This course is designed to introduce the student to theoretical and practical concepts of exercise assessment, exercise interpretation and exercise prescription. The student will develop appropriate techniques used to recommend exercise prescription for healthy and unhealthy clients. (Prerequisite: **SPHS501**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPHS507 Advanced Biomechanics (3 semester hours)

The purpose of this course is to provide the student with an understanding, appreciation, and ability to analyze human movement using a biomechanics approach. This course will expose the student to the laws and principles governing human motion. Emphasis will be placed on the analysis of exercise and sport movements. Research with applications to a variety of sport, exercise, and clinical settings will also be included to provide the student with knowledge of current topics of interest in the field.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPHS508 Current Topics in Exercise Science and Human Performance (3 semester hours)

Contemporary research related to wide variety of areas related exercise science and human performance are discussed and explored in this course. Students discuss relevant issues facing society regarding exercise, fitness, athletic performance, kinematic movement, motor development, and biomechanical analysis. The course challenges students to analyze and synthesize current and relevant topics and offer solutions to benefit exercise science research and related industries. (Prerequisites: **SPHS501** and **SPHS503**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPHS509 Optimal Sports Performance (3 semester hours)

This course is designed to provide an understanding of postural assessment and integrated performance profile as it relates to human performance. This course will focus on identifying and correcting musculoskeletal abnormalities and performing integrate performance assessments. The student will develop appropriate techniques used to recommend exercise prescription for individuals post assessments. This course incorporates advanced sports performance assessments and exercise techniques utilizing the Optimum Performance Training Model (OPT Model) and prepares students for the Performance Enhancement Specialist examination offered by the National Academy of Sports Medicine (NASM-PES). (Prerequisite: **SPHS501**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPHS510 Ethical and Leadership Principles of Health and Wellness Management (3 semester hours)

This course investigates methods, principles, leadership skills, and ethical decision-making responsibilities of professionals in the field of health and wellness. Readings, interactive tools, discussions, and independent activities provide students opportunities to equip themselves with skills in management, communication, team building, and personal and professional growth. Students apply these skills by taking on ethical and leadership opportunities that shape health and wellness principles and practice. This course provides practical tools they can use to approach leadership roles and ethical decisions that are implicit within health and wellness management. (Prerequisite: **SPHS501**)

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPHS511 Critical Thinking in the Sports and Health Industries (3 semester hours)

Critical Thinking in the Sports and Health Industries course will prepare both Sports Management and Sports and Health Science graduate student to address issues associated with critical thinking in these major areas of study. Students will be afforded the opportunity to begin to compile artifacts and signature assignments related to their field of study of Sports Management or Sports and Health Sciences. The course is intended to provide a foundation from which the student may use the knowledge and practices gained in this course throughout the rest of their graduate program.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPHS520 Current Topics in Health and Wellness Management (3 semester hours)

This course appraises contemporary topics, concepts, principles, and theories affecting health and wellness dimensions relative to our culture and global population. Topics include disease treatment and prevention, nutrition, exercise and fitness, stress management, personal safety, and special populations. Students will explore current issues impacting personal health and wellness across society and generate strategies designed for improving quality of life and developing a healthy lifestyle for a widespread population. (Prerequisites: **SPHS501** and **SPHS503**)

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPHS525 Exercise for Chronic Disease: Musculoskeletal Concerns (3 semester hours)

This course will explore the use of exercise as a preventive and restorative modality for individuals with, or at risk for, chronic musculoskeletal concerns. This course will provide a deeper understanding of how to apply exercise physiology, biomechanics, and exercise prescription principles for those in need of remedial exercise programming and will prepare the learner to design and implement these fitness programs. (Prerequisite: **SPHS506**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPHS530 Program Design for Health and Wellness Management (3 semester hours)

This course examines administration aspects of health and wellness program design. Students learn to assess, develop, implement, evaluate, and modify health and wellness programs. Strategies for improving muscular strength, endurance, and weight-loss will be critiqued. Program design tactics and appropriate rates of progression will be analyzed for beginners and adult populations. (Prerequisites: **SPHS501** and **SPHS503**)

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPHS535 Exercise for Chronic Disease: Physiological Concerns (3 semester hours)

This course will explore the use of exercise as a preventive and restorative modality for individuals with, or at risk for, chronic physiological and metabolic concerns. This course will provide a deeper understanding of how to apply exercise physiology, biomechanics, and exercise prescription principles for those in need of exercise programming, with particular attention to working with clients with cardiovascular and other metabolic diseases (esp. type 2 diabetes) so that learners can effectively manage many common chronic diseases, particularly in primary and secondary prevention.(Prerequisite: **SPHS525**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPHS540 Health and Wellness Coaching and Behavior Change (3 semester hours)

This course examines a range of health related coaching skills including observation, active listening, asking the right questions, and motivating clients to facilitate changes toward health and fitness goals. Students explore coaching strategies for various health and wellness professional settings such as corporate wellness and health promotion, community health organizations, personal training, senior adult, and clients with lifestyle-related diseases. Competencies in health and wellness coaching include building rapport with clients; helping clients identify goals, helping clients identify strategies for action plans geared toward reaching their goals, and building accountability measures to ensure compliance and success. (Prerequisites: **SPHS501** and **SPHS503**)

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPHS697 Sports and Health Sciences Capstone (3 semester hours)

This course requires students to complete a culminating research project based from theories, research methods and analytical skills, and substantive knowledge obtained through their master's curriculum in sports and health sciences. Research options involve concepts and applications covered throughout the student's learning experience in the master's curriculum; including bioenergetics of exercise and training, techniques in exercise, program design and prescription, and administration of testing and assessment of fitness, health, and wellness.
NOTE: This course may not be taken until all other courses are COMPLETED and student has a 3.0 GPA.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Sports Management (SPMT)

SPMT502 The Sports Industry (3 semester hours)

This course studies the sports industry across all of its disciplines, functions, economics, leaders, and organizations. It is a macro view of sports as a major component of the modern corporate, social, economic, and recreation world. The industry is studied in detail in many different aspects as it exists in society. The history, contemporary situation, and future outlook of the sports industry are addressed.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPMT601 History, Culture, and Social Contexts of Sport (3 semester hours)

Students in this course will use analytical techniques to examine the theoretical, historical, social, and cultural aspects of sport. For the historical aspect, they will explore sociological issues over the ages from ancient times through to modern times. Students will discuss how sport and human life intermix in relation to cultural aspects. In addition, several issues of the social context will be identified and discussed with an emphasis on the philosophical, physical, religious, and other contemporary topics in sport.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPMT602 Collegiate Sports Administration (3 semester hours)

Students in this course will explore principles, techniques, and process related to the management of college athletics. It is important in today's dynamic environment of collegiate athletics that students employ effective leadership and management principles. Through analyzing case studies, students will demonstrate problem solving related to handling athletic personnel and program issues. Studying collegiate athletic administration involves interpreting NCAA® By-laws, including a comparison between division I, II, and III compliance regulations. To ensure readiness for athletic management, students will evaluate the duties of an athletic director and create a strategic plan for an athletic department, including a mission statement and comprehensive budget. Lastly, students will determine the critical steps to getting hired in collegiate athletics. Students will also prepare a portfolio, including an application letter and resume customized for applying for a position in athletic administration at the collegiate level.

NCAA® is a registered trademark of the National Collegiate Athletic Association.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPMT603 High School Athletic Administration (3 semester hours)

This course is a study of one of the most complex professions in secondary education – high school athletic administration. The topics include leadership and management roles in sports/athletic administration, high school sports finance and budgeting, student-athlete issues, association regulations and guidelines, and other issues focused on the array of sports disciplines, coaches, and programs at the high school level.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPMT605 Coaching Leadership (3 semester hours)

Students in this course will learn what it takes to be a successful leader in the coaching profession. Leadership involves one or more people influencing others in effort to achieve a common goal; coaching leadership focuses on the playing arena. Students will learn strategies to effectively communicate with their players, fellow coaches, parents, administrators and other constituents who impact their program. Coaches need to be able to think on their feet, make decisions under stressful situations, while always keeping the needs of their players and team foremost in their mind. Motivation, management and creative problem solving are critical to successful coaching leadership. Students will compare and contrast how some of the most successful coaches in the business have created their formulas for success; looking at common themes of successful coaches while also learning the importance of incorporating one's own personality into the process. Students will create a coaching manual that can become their personal coaching bible starting with their coaching philosophy and culminating with their goals and strategies.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPMT606 Techniques in Coaching Strategy (3 semester hours)

Students in this course will use analytical techniques to examine coaching strategies. Methods, practices, and approaches that apply across a number of sports disciplines will be discussed. Students will study several issues related to coaching preparation. Students will research, strategize, and reflect on past, present, and future coaching strategies. Course topics will address coaching philosophy, technique, time management, character, teaching, nutrition, and physical training. Methods for learning will include critical thinking, decision making, and analytical skills necessary to form an effective coach.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPMT608 Sports Law (3 semester hours)

This course is an introduction to sports-related legal issues and concepts. Its focus is on providing an overview of the major legal issues associated with sports, sports management, and the sports industry. Students will conduct research, read, and write on issues associated with the sports legal industry. Topics include but are not limited to discrimination, legislation, regulation and rights, competition, contract, labor, tort and trademark law, and administrative, antitrust and constitutional law.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPMT609 Sports Marketing, Promotion, and Public Relations (3 semester hours)

This course focuses on the marketing, promotions, public relations, and communications involved in the multi-billion dollar sports industry. The course provides research, case analysis, and other opportunities to learn of the effective principles, theories, practices, and methods involved with all aspects of sports communications.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPMT610 Sports Finance (3 semester hours)

The main thrust of this course is the application of principles and practices of financial management, as it applies to organizations in the sport industry. This course seeks to develop the financial skills necessary to gain an understanding of an array of financial concepts that impact sport managers. Students will examine financial strategies related to sport entities and organizations and will be introduced to current economic and financial issues that impact the sport industry. Included in the course are the basics of accounting, budgets and budgeting systems, performance measures creation, and financial statement evaluation for the purpose of cost analysis and planning. Other topics include budget development, funding, capital projects, economic impact, and supply and demand in the sport industry.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPMT612 Sports Event Management (3 semester hours)

This course provides students with the fundamental knowledge and skills for designing and managing sport and recreation facilities and organizing sport events. Included in the course are topics related to planning for events and tournaments, scheduling of facilities and events, and overall management of events. Students will examine several different types of sporting events from local tournaments to the Olympics. The course will also delineate the factors involved in the planning, design and management of events while examining the social, economic and environmental impacts of sporting events on the host community. Throughout the course students are encouraged to attend and/or volunteer at sporting events to put the course knowledge in to practice.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPMT613 Sports Entrepreneurship (3 semester hours)

This course focuses on the entrepreneurial opportunities in the sports industry, to include sports management, sports franchise, sports agency, and small sports business management professions and programs. The course focuses heavily on the business plan, financial, and planning issues associated with entrepreneurial and small business ventures. Students will develop their own entrepreneurial sports plan as an independent research project for this course.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPMT614 Coaching Theory, Methods, and Issues (3 semester hours)

This course focuses on current coaching theories, methods, practices, and outcomes. Students will consider the origin, development, and arguments surrounding the character of American sport. Topics include a study of coaching principles, practical coaching situations, great coaches and their methods, decision making in coaching, coaching ethics, and other contemporary issues in 21st century collegiate and high school coaching. Students are also exposed to the importance of computers and the Internet to today's coaches.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPMT620 Leadership and Management in Sport (3 semester hours)

This course examines contemporary and productive management principles and concepts used throughout the sports industry and various sport organizations. Through this course, students will learn skills related to creative problem solving and strategic planning, while developing the skills to lead, organize, and delegate in managerial and leadership positions.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPMT630 Sales and Promotions in Sport (3 semester hours)

This course focuses on the fundamentals roles of developing, activating, and managing sport sponsorship through sales and promotion. Through shared practical examples, this course will view how to generate ticket sales through sport promotion and how to utilize e-commerce as a promotional tool in sports.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPMT650 Legal Issues in High School Athletic Administration (3 semester hours)

This course examines legal issues and considerations facing interscholastic athletic administrators. Major issues explored in this course include managing risk and liability within an interscholastic athletic department and complying with Title IX. In addition, this course will focus on development of an effective risk management program designed for interscholastic athletics. (Prerequisite: **SPMT603**)

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPMT696 Experiential Learning and Practicum Experience in Sports Management (6 semester hours)

This course is designed to provide students experiential learning in the field of sports management. Students will apply knowledge gained throughout the sports management graduate program to a professor-approved practicum site. The practicum consists of 160-180 hours of supervised field work over 16 weeks. Throughout the 16 weeks, students will share their practicum experiences with their instructor and classmates through course dialogue and complete a concluding activity designed to culminate programmatic objectives of their graduate program. The experience will entail a partnership between the student, an outside organization, and a supervising professor who is responsible for directing the intellectual content and outside activities of the practicum. To qualify, the student must identify and obtain approval for an organization/project of interest and select and obtain approval for a workplace mentor prior to registering for the course.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPMT697 Sports Management Capstone (3 semester hours)

This course requires students to complete a culminating research project based from theories, research methods and analytical skills, and substantive knowledge obtained through their master's curriculum in sports management. Research options involve concepts and applications covered throughout the student's learning experience in the master's curriculum; including marketing, finance, leadership, sociology, legal considerations, and sociology relative to sports management and the sports industry. NOTE: This course may not be taken until all other courses are COMPLETED and student has a 3.0 GPA.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPMT698 Comprehensive Exam for Sports Management (0 semester hours)

THIS COURSE REQUIRES A PROCTORED EXAM. This comprehensive final examination is for students in the Master of Sciences in Sports Management. IMPORTANT: You must have COMPLETED all other courses in the program and have a GPA of 3.0 in order to register for this course. As a Sports Management student, you must pass this comprehensive exam in order to have your degree conferred. The comprehensive exam must be taken by the course end date or a failing grade will be posted. If you fail your first course attempt to pass the comprehensive exam, you will need to get approval to register for a second attempt of the course and BOTH final course grades will show in your transcript.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SPMT699 Sports Management Practicum and Integration Project (3 semester hours)

The experiential or practical component of the course aims to apply learning in an aspect of interest related to the degree and concentration in Sports Management. The Masters of Science in Sports Management requires students to complete a cumulative hourly requirement of volunteering their services in a specific industry work environment. It is understood to be a supervised practicum which requires approval by APUS before entering into the relationship with the organization. The selection of an organization or site for the practicum must relate to the content of the student's course work and/or concentration. Students will be involved with the experiential learning process through volunteering and completing an Integration process which describes concepts and skills developed through the experience. This course may not be taken until all other courses are COMPLETED and student has a 3.0 GPA.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Graduate Course Descriptions

Supply Chain Management (SCMG)

SCMG501 Technology in Supply Chain Management (3 semester hours)

This course is the study of the impact of new technologies and methodologies in implementation of innovations in operational, tactical, and strategic initiatives in supply and demand settings. The impact on application of synchronized performance measurements by introducing technology enabled approaches will be reviewed. The critical role of new technology in reduction of cycle time, meeting the far exceeding customer demand, and creation of an effective and efficient setting will be analyzed. Topics such as computational and visibility capabilities and tracking system will be discussed.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SCMG502 Global Issues in Supply Chain Management (3 semester hours)

This course is a review of challenges and opportunities that we may encounter in management of a supply and demand chain due to Globalization. The course is intended to highlight stumbling blocks
which prevent seamless integration of operations, sales and marketing, and finance. Topics such as commercial and global risk, risk mitigating techniques, their use, and legal and ethical issues in a global setting will be discussed.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SCMG503 Sustainable Supply Chain Strategy (3 semester hours)

This course is a study of supply chain management as an indispensable part of a business's sustainability program. It is critical to know the level of environmental, social, and economic impact and viability of your vendors and customers is becoming increasingly common as all industries move towards a more sustainable future. Government pressures are unlikely to be the driver of this change, but you're already seeing corporate pressures on suppliers and vendors. This course will examine the intersection of the components of sustainability and the tools required to achieve optimum balance with corporate profitability, supplier relationships and customer service.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SCMG604 Managerial Supply Chain Risk Management (3 semester hours)

This course is a study of the integration of organizational objectives with objectives to optimize operational performance and minimize operational vulnerability. This course will delve into understanding the implementation of strategies to manage every day and exceptional risks along the supply chain through continuous risk assessment with the objective of reducing vulnerability and ensuring continuity. Managing supply chain risk utilizes tools to balance risk exposure with supplier relationships and customer service. Topics include risk concepts, risk management strategies, risk resilience, risk appetite, risk response planning, risk compliance and risk governance.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SCMG605 Case Studies in Supply Chain Management (3 semester hours)

This course is the study of a series of case studies in supply chain management which demonstrate the application of supply chain principles to optimize organizational outcomes and achieve corporate objectives. Supply chain practitioners often state that theory is fine but case studies are better. But blending the two is the best. Supply chains exist throughout commercial and public sectors. Case studies will be offered in both including the US Department of Defense, the world's largest supply chain. Cases will show the global nature of supply chains and will demonstrate its foundations including SCOR processes such as Plan, Source, Make, Deliver, Return and Enable.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

SCMG609 Supply Chain Analytics (3 semester hours)

This course is the study of how data analytics will be used in quantitative and qualitative mode to create actionable intelligence across supply and demand chain. We will discuss the use of analytics in the context of supply chain management in descriptive, Topics such as inferential, and prescriptive modes in sourcing, operations, logistics, marketing, sales, and finance. The modeling aspects of integrated supply chain activities for the purpose of decision support system will be studied.

Spanish language learners may complete this course in Spanish.

Graduate Course Descriptions

Transportation and Logistics (TLMT)

TLMT500 History of Transportation (3 semester hours)

This course is designed to provide the graduate student with a study of the major historical events in the transportation industry. Topics include agricultural, industrial, information, interstate, and transtate transportation events and precedents. The course will provide both broad analysis of the industry and specific seminal events in its history.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

TLMT501 Transportation Policy and Planning (3 semester hours)

This course demonstrates the 21st century importance of strategic transportation and logistics planning in contributing to corporate profits, customer service enhancements leading to higher sales and a marketing weapon to gain sustainable competitive advantage. The importance of moving information becomes equal to the movement of goods. Managerial perspectives are offered on aligning corporate planning, technology, financial controls and logistics performance measurement. We will also gain an overview on the interaction among stakeholders in the public and private sectors in aligning public policy with global uncertainties.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

TLMT502 Comparative Transportation Systems (3 semester hours)

This course is designed to provide students with a solid knowledge of multi-modal transportation systems, the characteristics of individual transportation modes, international differences in transportation management, and transportation economics as they apply to multi-modal transportation management. Topics include comparative analysis of the various modes (motor carriers, railroads, water carriers, air carriers and pipelines), international differences in transportation management, economics of transportation systems, and the role of transportation systems in the modern organization.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

TLMT600 National Transportation Management (3 semester hours)

This course aligns transportation management with a comprehensive overview of intermodal transportation and logistics management. We will look at recent trends in the field and its important stakeholders. Business logistics/supply chain will be viewed from managerial perspectives impacting physical distribution, materials management, transportation management, and logistics and supply chain management. The course covers the planning, organizing, and controlling of these activities including sub-activities such as transportation basics, inventory and location strategies.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

TLMT601 Transportation Economics (3 semester hours)

The course provides the student with a coherent and integrated framework, based on micro and macro economic principles, for understanding aggregate transportation activity. Issues include: regulation, tariffs, interstate commercial policy, international trade, and transportation exchange rates.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

TLMT602 RFID Uses in Logistics (3 semester hours)

The course will teach students how to analyze and advise decision makers in the use of RFID technology compared to the use of bar code tracking systems in logistics and transportation applications. Students will be able to describe the history, rationale and management impacts of why this technology was mandated by the Department of Defense and Walmart in January 2005 to be used on all shipping pallets and containers. Students will classify and explain how different active and passive RFID technology can be used to increase product movement and storage visibility along supply chains. Students will examine and compare how a real-world application of this technology is improving logistics visibility in a military or retail environment. Students will design an implementation plan to incorporate RFID technology as part of a real-world business model. Students will work in a team environment as well as individuals in creating a series of written papers on the current state of the art in using RFID technology to meet the retail or military transportation and logistics needs. Students will conduct an informal survey of military or retail decision makers to learn how to appraise qualitative as well as quantitative data and reports of the use of this technology

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

TLMT603 Strategic Intermodal Transportation (3 semester hours)

This course examines the United States and worldwide commercial freight transportation systems, with an emphasis on international intermodal surface transportation. Modal/intermodal economic and operating characteristics will be surveyed, along with cost, pricing, and regulation of transportation services. In addition, students will be introduced to electronic data interchange (EDI) in commercial transportation and the use of computer software applications in transportation management—all with the goal of providing students with an in-depth understanding of the principles of intermodal transportation systems, a grasp of transportation terminology, and the interrelationship between the Defense Transportation System (DTS) and the global commercial transportation infrastructure.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

TLMT605 Cargo Security Management (3 semester hours)

This course is designed to address the multi-billion dollar annual loss globally due to cargo theft. Topics include: asset protection in the transportation industry, analysis of freight system vulnerability, development of an effective cargo security plan, review of industry standards, and best practices in the industry.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

TLMT607 Port and Terminal Operations (3 semester hours)

An in-depth look at the workings of maritime port operations and intermodal transportation systems. Course topics include the governance and administration of ports and marine terminals, the role of regulatory agencies, navigation and safety, port operations and development including the process to fund and carry out dredging projects. Cargo handling for containers and dry and liquid bulk operations will be discussed along with a look at productivity of terminal operations. Comparisons will be made with other regions of the world. A review of major steamship lines, their trading patterns and future trends among the industry will be covered along with technological advances in vessels and terminal operating equipment. A strong emphasis will be placed on current issues in port policy.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

TLMT611 Global Logistics Management (3 semester hours)

This course provides an understanding of leading-edge logistics management, as well as principles and techniques available to achieve optimum operational efficiencies. Topics include: development of logistics, logistical economic significance, the importance of logistics management in transportation operations, application of supply chain management concepts, role of information systems, elements and management of global logistics, distinctions and characteristics of international versus domestic logistics, global transportation options, traffic management, global transportation decision-making, management of inventory costs, measurement and control of integrated logistics systems, and development of effective world-wide logistics strategies.

Spanish language learners may complete this course in Spanish.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

TLMT698 Comprehensive Exam in Transportation and Logistics (0 semester hours)

This course is the comprehensive final examination for students in the Master of Arts in Transportation and Logistics Management program. IMPORTANT: You must have COMPLETED all other courses in the program and have a GPA of 3.0 in order to register for this course. As a Transportation and Logistics Management student, you must pass this comprehensive exam in order to have your degree conferred. The comprehensive exam must be taken by the course end date or a failing grade will be posted. If you fail your first course attempt to pass the comprehensive exam, you will need to get approval to register for a second attempt of the course and BOTH final course grades will show in your transcript.

View the course schedule to find out details about each course including prerequisites, course objectives, course materials, a snapshot of the syllabi, and session dates.

Course Materials

Students are encouraged to review the Course Materials section of the Student Handbook for detailed policy information.

Through the APU Book Grant, eBooks are provided at no cost to students enrolled in courses for academic credit. However, this grant does not cover required software or laboratory equipment. Students registered in courses requiring these materials are responsible for purchasing them independently. For complete information regarding course materials, please refer to the Student Handbook and the APU Course Materials Guide.

Note: Federal regulations establish specific conditions under which Title IV Federal Student Aid (FSA) recipients with credit balances may access funds to obtain required course materials. Eligible students will be notified and provided with instructions to access these resources prior to the seventh day of their course. For full details, please review the Course Materials Allowance policy in the Student Handbook.

Philosophy of General Education

The university's general education curriculum provides a broad-based, integrative, and practical learning experience meant to prepare students for responsible civic and cultural engagement in a global context. By completing general education coursework, you will have gained skills and knowledge in arts, humanities, literature, communication, civics, political science, social science, mathematics and applied reasoning, and natural sciences. This level of knowledge and skill helps our students to become effective leaders, creative thinkers, responsible citizens, and ethical decision makers.

The general education categories span six broad areas of study that encompass existing disciplines frequently found in liberal education, while providing the flexibility to explore topics of interest relevant to your degree program. Completion of the courses listed below fulfills the university's general education requirements within all associate and bachelor's degree programs, but your program may have unique requirements. We encourage you to carefully review the course requirements in your academic plan.

Arts & Humanities (6 semester hours)

Courses in the arts, humanities, and literature provide students with the opportunity to analyze and interpret artifacts within the appropriate historical, cultural, economic, social, or religious contexts. Students gain an appreciation for the myriad ways art, music, literature, cinema, theater, media, sports, and other artistic and creative forms of community and self-expression contribute to the production and reception of ideas, and how these shape all aspects of society both within and across cultural boundaries.

Competency: Explain the value and contribution of the humanities in contemporary society.

Civics, Political & Social Sciences (6 semester hours)

Explore cultural, economic, historical, political, psychological, social, or technological systems and issues that have shaped and continue to shape societies around the world. Courses explore trends and issues in globalization, emerging technologies, theoretical and practical models used for understanding local, transnational and transglobal problems, and differences in the ways individuals and societies experience and perceive the world.

Competency: Explain the inter-dependence of cultural, economic, historical, political, psychological, social, or technological systems within and across cultures.

Communication: Written, Oral, and Multimedia (9 semester hours)

Communication includes interpersonal, intercultural, and professional exchanges of information, including interactive, social, public and mass exchanges. Categories of communication include digital, oral, and written, as well as engaging in multi-modal forms of communication mediated by technology (new media), popular social media, and traditional and non-traditional public relations.

Competency: Be conversant in one or more forms of communication (digital, written, and oral).

Code	Title	Semester Hours
COMM120	Information and Digital Literacy	3
COMM150	Emerging Technology for College Success	3
COMM200	Public Speaking	3
COMM285	Interpersonal Communications (Public Health Majors)	3

Mathematics and Applied Reasoning (3 semester hours)

Focuses on the development of quantitative and qualitative logical literacy. Students will prepare for advanced study by practicing analytical concepts and problem solving techniques. This category focuses on the conceptual and theoretical tools students need to make decisions based on the evaluation of data, and to gather, organize, analyze, and draw inferences from information.

Competency: Utilize qualitative and quantitative analysis in addition to scientific reasoning to problem-solve effectively.

Code	Title	Semester Hours
ACCT100	Accounting I	3
ACCT105	Accounting for Non Accounting Majors	3
ENTD150	Beginning Programming	3

MATH125	Math for Liberal Arts Majors	3
MATH225	Calculus	3

Natural Sciences (3 - 4 semester hours)

Provides students with the ability to use the inquiry-based process of science to describe, evaluate, and consider alternative explanations for scientific findings. Students will apply key concepts, facts, and theories about living systems and the physical universe, and use describe the scientific method and the quantitative tools of science. Students will relate that information to problems of wide global and societal concern.

Competency: Describe the inquiry-based scientific process to formulate hypotheses, make observations, design experiments, collect and analyze data, and reach conclusions.

Code	Title	Semester Hours
BIOL180	Introduction to Biology[1]	3
BIOL181	Introduction to Human Anatomy and Physiology[1]	3

CHEM180	Introduction to Chemistry[1]	3
ERSC180	Introduction to Meteorology[1]	3

1. Please note that some degree programs specify science courses to fulfill general education requirements, while others allow for a choice of any science course from the list above.

The Richard G. Trefry Library

The Trefry Library is an electronic academic library serving American Public University (APU) students, faculty, staff, and alumni. It is comprised of thousands of online resources including licensed article/scholarly journal databases, ebooks, and video collections chosen specifically to support the educational programs at APU. Our team of professional librarians is available 365 days a year at librarian@apus.edu to assist with research strategies, website navigation, and identifying and utilizing appropriate credible and scholarly information resources.

Students can access the library directly from the classroom or ecampus. Faculty access is provided through the classroom and the Faculty Connect portal. As a benefit to our APU graduates, lifelong access to many of the library's resources is available through their ecampus page.

The Trefry Library offers an array of online resources and self-help tools like library video tutorials to assist with searching techniques and navigating databases, librarian created guides designed to help direct scholarly research in hundreds of disciplines, math tutorial videos, streaming film & music, the Pronunciator language lab, and information literacy resources. We offer information on how to access live one-on-one tutoring on a wide variety of subjects, and our writing reference resources provide supplemental writing support for APU writers across disciplines.

The mission of the Richard G. Trefry Library is to provide quality resources to support learning across all disciplines. Our goal is to assist students in the development of information literacy skills relevant to the digital era to promote research, discovery, and critical thinking. We offer research and reference guidance, using methods of communication that fit the lifestyle of today’s students. We support the university’s mission by providing virtual access to American Public University students and faculty worldwide.

Examinations and Proctors

APU professors use examinations as one method of evaluating student performance during a course. Examinations may be proctored or unproctored, and professors can set any exam so that a proctor is required. Proctors are individuals who ensure the integrity of the examination process by monitoring student work during the exam and verifying that the student complied with exam instructions regarding the use of outside materials, doing their own work, etc. If a proctor is required, the student must locate a suitable proctor who will be able to give the student access to a computer for 3-4 hours and who has an email address. Proctors must meet certain qualifications, as described in the Examinations and Proctor section of the Student Handbook.

Prior to exam day, the professor will email a password to your proctor. On the day of your exam, your proctor will provide the password and monitor you as you take your final exam online.

Student Learning Outcomes and Assessment

At American Public University (APU), assessment is a cornerstone of our commitment to academic excellence and student success. We view assessment not as a compliance exercise, but as a vital process that informs continuous improvement and advances our institutional mission. By systematically analyzing evidence of student learning, we ensure that our programs foster the knowledge, skills, and dispositions needed for graduates to thrive in a dynamic global landscape.

Our approach is guided by broad learning categories originally adopted from Lumina Foundation's Degree Qualifications Profile (DQP), which remain central to our vision of student achievement. These categories specified below provide a framework for understanding and enhancing learning across all levels.

Assessment occurs at multiple levels: academic programs, general education, and institution-wide initiatives. We use data-driven insights to strengthen curricula, refine teaching practices, and support student development. This ongoing cycle of evaluation and improvement aligns with our mission and reflects our dedication to preparing students for meaningful careers, responsible citizenship, and lifelong learning.

Institutional Student Learning Outcomes

APU students are expected to demonstrate proficiency in the following learning areas upon completion of any academic program in any discipline:

- **Specialized/Industry Knowledge** addresses what students in any specialization, major field of study, or career pathway should demonstrate with respect to that specialization.
- **Broad and Integrative Knowledge** asks students to bring together learning from industry knowledge, experience, and/or different fields of study to discover and explore the implications of concepts and questions that bridge essential areas of learning/practice as well as integrate their knowledge to advance solutions in support of a humane, just, and democratic society.
- **Intellectual/Critical Thinking Skills** includes analytic inquiry, use of information resources, engaging diverse perspectives, ethical reasoning, quantitative fluency and communicative fluency.
- **Applied and Collaborative Learning** emphasizes what students can do with what they know. Students are asked to demonstrate their learning by addressing unscripted problems in scholarly inquiry, at work and in other settings outside the classroom, individually and in teams.
- **Civic/Democratic and Global Learning** recognizes higher education's responsibilities both to democracy and the global community. Students engage in integration of their knowledge and skills by addressing and responding to civic, social, environmental, economic, equity, inclusion, and social justice challenges at local, national, and global levels.
- **Digital Information Literacy** is concerned with responsibly, safely, ethically, effectively and efficiently accessing, evaluating, collaborating, organizing, and distributing information in the digital world. It includes using tools, technologies, techniques, and best practices, to develop responsible and safe consumers and communicators of information in the digital information world to support research and to solve real world problems.

Program Level Student Learning Outcomes

APU students are expected to achieve student learning outcomes at the **degree program level** upon graduation from a particular degree program. Student learning at the degree program level is assessed through coursework, end-of-program experiences, and surveys to ensure the student has achieved proficiency in the knowledge and skills expected of a professional in the respective discipline. Signature assessments and standardized tests are examples of measures used to evaluate the effectiveness of students achieving desired learning outcomes at the degree program level.

Course Level Student Learning Outcomes

APU students are expected to achieve **course level** student learning outcomes upon completion of a course. Course developed exams, simulations, case studies, discussion boards, collaborative research projects, and writing assignments are examples of measures used to evaluate the effectiveness of students achieving desired learning outcomes at the course level.

Assessment of Student Learning Outcomes

APU is committed to student learning assessment and its impact on the quality of teaching and learning. The learning outcomes assessment cycle at APU:

- Enables the University to evaluate the effectiveness of its academic courses and programs in terms of achieving the desired learning outcomes for its students.
- Is used for continuous improvement at all levels of the institution.
- Ensures that students are prepared for success in work and citizenship in a diverse, global society.
- Protects the privacy of its students including ensuring the confidentiality of student work submitted for assessment as well as the feedback resulting from assessment activities.

Through this comprehensive approach to assessment, APU ensures that learning remains purposeful, measurable, and aligned with our mission.

Admission and Registration

The university's admissions team is comprised of dedicated staff members who work to support you from the first time you request information about the university through completion of your first week of courses here. The team provides you with guidance on enrolling in a program, understanding policies and procedures, and also acts as your liaison with financial aid, student services, and other departments at the university. If you have any questions, an admissions team member is ready to help!

Need to speak with a team member?

The Admissions Team is available Monday - Thursday from 8 a.m. to 8 p.m., Fridays from 8 a.m. to 4:30 p. m., and Saturdays from 11 a.m. to 3 p.m. All hours are Eastern Time (ET). You can reach us by phone at 877-379-8773 or email at info@apus.edu.

Application and Registration Process

To begin your enrollment process, you will need to review our policies and procedures and declare your academic goal during completion of the online application for admission. Upon completion of the application, a member of the Admissions Team will work with you throughout the enrollment process.

Admissions Criteria and Status

Undergraduate Admissions Criteria

- You must have at least a high school diploma or equivalent (i.e. GED, international high school equivalent, etc.) to apply to the University.
- Please be prepared to submit a legible color copy of your valid government-issued photo ID (civilian students) or government issued JST or CCAF transcript (military students) upon request.
- You may be required to fulfill additional admission requirements based on the program you select during the admission application.
- If you are a transfer student, you will be asked to submit your transcripts from any other schools where you earned college-level academic credit.

Master’s Level Admissions Criteria

- You are required to possess and provide documentation showing a bachelor’s degree or higher from a regionally or nationally accredited institution or the international equivalent.

- Please be prepared to submit a legible color copy of your valid government-issued photo ID (civilian students) or government issued JST or CCAF transcript (military students) upon request.
- You may be required to fulfill additional admission requirements based on the program you select during the admission application.

Admission Status

You will be admitted to the University after you have submitted the online application for admission and verified that you meet any additional admission requirements. After you are admitted to the University, a member of the Admissions Team will be available to walk you through all the follow-up steps and discuss any remaining documentation that will be required.

Doctoral Program Admissions

The Doctoral Admission Representative engages with you, answers your questions about completing the application, and ensures that the necessary documentation is complete.

Admissions Requirements

The programs' public web pages provide the definitive list of admissions requirements. The list below provides an outline for reference.

- Prior Education and Professional Practice: MA/MS in the discipline, or closely-related discipline, plus 3-5 years work experience in the field, or closely-related field.
- Curriculum Vitae (CV) or Resume: This biographical statement document includes work history, professional accomplishments, service to the profession, and, as appropriate, teaching and research experience.
- Grade Point Average (GPA): A master's degree with a minimum GPA of 3.0 (or equivalent) is required.
- Photo ID: Submit a legible color copy of your valid government-issued photo ID.
- Three Doctoral Reference Forms: Students will be prompted to enter the contact information for at least three academic or professional reference providers.
- Official Transcripts: All official transcripts verifying the award of a master's degree must be sent to APU from the issuing institution and arrive in sealed envelopes or by official electronic copy. No faxed or unsealed transcripts sent by you will be accepted, even for preliminary review purposes. Once received, all admission documents are a permanent part of your student record and the property of APU. They cannot be returned to you.
- Unofficial Transcript: Applicants must provide an unofficial or official copy of other graduate-level work as well as an undergraduate transcript, showing a conferred BA/BS degree.
- Doctoral Admissions Essay: Please follow the writing prompt provided to you.
- Admissions Interview: Applicants may be interviewed by the Doctoral Admissions Committee.
- English Proficiency: If you are from a country whose native language is not English (regardless of current residence), you must provide proof of English proficiency, in one of the following ways:
  - Transcripts from a conferred bachelor's degree or higher in residence at a regionally accredited college/university in the United States.
  - Transcripts from at least 12 semester hours of graduate coursework with a GPA of 3.0 (out of 4.0) in residence at a regionally accredited institution in the United States.
  - Standardized Test Scores. Please review the Admission of International Students Section of the Student Handbook for more information.
- Nonrefundable Application Fee of $100 (You may request a fee waiver due to financial hardship through the Doctoral Admissions Representative).

Applications will only be evaluated once the admissions package is complete.

Categories of Admission

1. Admission to Doctoral Program: This category is used if you satisfy all requirements. There is no provisional admission status due to Federal Student Aid requirements.
2. There is no direct Post-Baccalaureate entry. You must have already earned a master's degree in the discipline or a closely related discipline, and have 3-5 years of experience in the field or a closely related field.

Course Registration

You may register for courses upon acceptance to the University after all of your admission requirements have been met. If you are using Federal Student Aid as your payment type, you will need to select an academic year when you register for courses.

If you have credits to transfer from another university, you may wish to wait until after you have submitted your transfer credit evaluation form and the evaluation is complete before you register for courses.

Master's programs typically have a first required course. During course registration, you may be presented with multiple sessions per course.

Tuition, Fees, and Financing

We understand that choosing where to start or continue your college education comes with some level of uncertainty, which is why we offer easy-to-understand tuition rates, low-cost fees with no surprises, and plenty of help with financial aid. As you'll quickly discover, our competitive tuition rates make earning your degree here not only a smart investment in your future, but a responsible financial decision.

Tuition and Fees

American Public University operates nearly exclusively through tuition revenue and provides affordable education. The following is the current tuition/fee schedule:

Undergraduate Tuition and Fees

Tuition Rates per Credit Hour

- Undergraduate: $360 | Preferred Military Rate of $250[1]
- Audit: $100

8- and 16-Week Sessions	2 semester hours	3 semester hours	4 semester hours
Undergraduate Academic Credit	$720/$500[1]	$1080/$750[1]	$1440/$1000[1]
Audit	$200	$300	$400

Veteran Grant: All veterans and family members (parents, spouses, legal partners, siblings, and dependents) are eligible to receive a 10% Veteran Grant on standard undergraduate-level courses. Course grants cannot be combined with any other special rates, promotions, or grants and only one can be applied per course.

Opportunity Grant: All non-Military or Veteran affiliated students are eligible to receive a 10% Opportunity Grant on standard undergraduate and master's-level courses. Course grants cannot be combined with any other special rates, promotions, or grants and only one can be applied per course.

Student Fees

Admission Fee	$0

Registration Fee	$0
Late Registration Fee	$50
Average Undergraduate Course Materials (per course)	$0
Undergraduate Prior Learning Assessment Fee	$250
Completion Fee: Certificate	$25
Graduation Fee for Associate Degrees	$250
Graduation Fee for Bachelor Degrees	$350
Transcripts (each):

Official paper[2]	$20

Masters and Graduate Certificate Tuition and Fees

Tuition Rates per Credit Hour

- Master's Degree and Graduate Certificate: $470 | Preferred Military Rate of $250[1]
- Audit: $100

8- and 16-Week Sessions	2 semester hours	3 semester hours	4 semester hours
Master's Degree and Graduate Certificate Academic Credit	N/A	$1410/$750[1]	$1880/$1000[1]
Audit	$200	$300	$400

Veteran Grant: All veterans and family members (parents, spouses, legal partners, siblings, and dependents) are eligible to receive a 15% Veteran Grant on standard master's-level courses. Course grants cannot be combined with any other special rates, promotions, or grants and only one can be applied per course.

Opportunity Grant: All non-Military or Veteran affiliated students are eligible to receive a 10% Opportunity Grant on standard undergraduate and master's-level courses. Course grants cannot be combined with any other special rates, promotions, or grants and only one can be applied per course.

Student Fees

Admission Fee	$0
Registration Fee	$0
Late Registration Fee	$50
Graduate Technology Fee (per course)	$85
Average Graduate Course Materials (per course) - Active-duty military students	$50
Average Graduate Course Materials (per course)	$100
Graduate Prior Learning Assessment Fee	$325
Completion Fee: Certificate	$25
Graduate Comprehensive Exam (0 credit hour courses only)	$250

Cost of Attendance

Learn more about APU's cost components and full cost of attendance.

1. **Preferred Military Rate**: All U.S. active-duty servicemembers, National Guard members, Reservists, and military families, (parents, spouses, legal partners, siblings, and dependents) are eligible for the Preferred Military Rate of $250/credit for undergraduate and master's-level courses. The Preferred Military Rate, which is applied automatically, supersedes all other university grants and special rates, and cannot be combined with any other special promotions. Please note that a technology fee applies to master's-level courses.
2. Plus applicable state and local sales tax
3. Tuition rate is effective starting with the May 2025 courses.
4. Covered by tuition
5. Plus applicable state and local sales tax

Satisfactory Academic Progress (SAP)

Satisfactory Academic Progress (SAP) indicates the successful completion of coursework towards a degree or certificate.

- According to federal regulations, students who fail to make SAP in their education program will lose their eligibility to receive Federal Student Aid (FSA) funds (i.e., financial aid).
- SAP rules apply to all students applying for financial aid, including those who have not previously received financial aid.
- APU evaluates a student's SAP at the end of each payment period (i.e., semester). If APU determines that a student has failed to meet the University's SAP standards, the student may be placed on a "financial aid warning" semester during which they may retain their FSA eligibility. This determination is made at APU discretion.
  - Students are only eligible for financial aid warning status if the following criteria is met:
    - The student had no "unearned F's" in the previous semester.
    - The student was previously meeting SAP without a warning or appeal in the most recent completed semester or was in the first payment period of their program when they failed to meet SAP.
- If APU determines that a student has failed to meet the University's SAP standards and determines that a financial aid warning is inappropriate, the student will lose their FSA eligibility. Students who lose their FSA eligibility may appeal the loss provided there are extenuating circumstances that inhibited their academic progress (e.g., student illness or injury, death of a relative.)
- Students who submit an appeal must provide:
  - A statement that explains the extenuating circumstances that contributed to the student's failure to meet SAP and what has changed in the student's situation that will allow the student to either meet SAP at the next evaluation or to meet the requirements of an academic plan that would lead to meeting SAP in the future.
  - Documentation that confirms the extenuating circumstances and date(s) during which the events occurred.
- If an appeal is approved, the student is placed on "financial aid probation" and their FSA eligibility is reinstated for one semester. The student must meet SAP at the next evaluation or meet the requirements of the academic plan in order to remain FSA eligible for future semesters.
- If a student's appeal is unsuccessful, the student may take classes to demonstrate improvement for a future appeal, but they cannot receive FSA to pay for those classes. A student cannot meet SAP simply by paying for their classes on their own but must earn the necessary GPA or completion rate.
- To otherwise restore FSA eligibility, students must achieve the GPA and credit hour completion targets as defined in the policy.

SAP is evaluated based on grades posted at the end of each semester (defined as a 16-week period of academic study).

- The criteria used to measure Satisfactory Academic Progress include:
  - Cumulative grade point average (qualitative)
  - Credit hour completion/Program Pace (quantitative)
- The requirements of each criterion must be met and are described in detail below.

Cumulative Grade Point Average (CGPA)

- Cumulative GPA is the qualitative measure of SAP, meaning that it looks at the quality of the grades that each student earns in their courses.
- CGPA is initially calculated after 6 undergraduate credits, or 6 graduate credits are completed at APU. Evaluation thereafter occurs at the end of each semester according to the table below.
- Only credits completed at APU with a final grade of A through F are included in the CGPA calculation.
- If a failed course is retaken, the later grade will replace the failed grade and factor into the CGPA.
- To meet SAP requirements, students must maintain a CGPA that meets or exceeds our minimum as shown in the chart below.
- Students who fail to meet CGPA requirements will be determined ineligible for FSA.

SAP Criteria on Cumulative GPA (CGPA) and Credits Completed

	Total Credits Completed (including transferred credits[1])	Minimum CGPA Required for Financial Aid

Undergraduate Students	6-12	1.50
	13+	2.00
Masters and Graduate Certificate Students	6-8	2.50
	9+	3.00
RN to MSN	6-8	2.50
	9+	3.00
Doctoral	6+	3.00

Credit Hour Completion and Program Pace

Credit hour completion is the quantitative measure of SAP, meaning that students must complete a certain percentage of courses toward certificate or degree completion in order to maintain FSA eligibility. Each academic program within APU has a defined number of credit hours required for completion. To maintain SAP, students must achieve a minimum percentage of credits completed (i.e., earned) versus credits attempted.

- A student must complete their program within 150% of the published length of the program. For example, a student in a two-year program must be on track to complete their program within three years.
- Any course in which the student remains beyond Week One (add/drop) will count towards attempted credits regardless of the grade received.
- Undergraduate courses with a final undergraduate grade of A through D- will be counted towards credits attempted and completed.
- Graduate courses with a final grade of A through C will be counted towards credits attempted and completed.
- Final grades that fall below the minimums (D- for undergraduates and C for graduates) are not counted as credits completed but will be considered credits attempted.
- Courses with grades of incomplete (“I”) will not be considered attempted until a final grade is earned by the student, or the Registrar or instructor converts the “I” grade to an “F”.
- Doctoral courses with a final grade of Satisfactory (“S”) will be counted towards credits attempted and completed.
- Doctoral courses with a final grade of Unsatisfactory (“U”) are not counted as credits completed but will be considered credits attempted.
- Courses from which a student has withdrawn (“W”) will be counted towards credits attempted.
- Courses dropped within the add/drop period will not be counted towards credits attempted.
- Course retakes: All attempted courses are factored into the credit hour completion percentage.
- Remedial courses do not count towards attempted credits; however, APU does not offer remedial courses.
- Repeated courses will count as attempted courses.
- For students who change programs, credits that apply to the new program will be counted in credit hour completion and program pace.

Note: All students are required to log into each of their courses during Week One and submit an academic activity. Students who do not submit this assignment during the first week of class will be administratively dropped from any courses for which this assignment has not been completed.

SAP Criteria Based on Credits Attempted versus Credits Completed

	Credits Attempted	Credits Completed %
Undergraduate Students	6-12	50%
	13-24	60%
	25-36	65%
	37+	67%

Masters and Graduate Certificate Students	6-9	50%
	10-18	60%
	19+	67%
RN to MSN	6-9	50%
	10-18	60%
	19+	67%
Doctoral	6-9	67%
	10+	75%

Credits transferred from another college or university are included in determining the credits completed percentage for the quantitative measure - completed hours divided by attempted hours. Likewise, the total of APU and transfer credits that a student has from another college, or university will be factored into determining where they fall on the chart above.

Financial Aid Appeal Process

If APU determines that a student has not met SAP, the student will be placed on “Financial Aid Denial” status, meaning they have lost their FSA eligibility. Any student placed on “Financial Aid Denial” status may appeal their denial due to extenuating circumstances (i.e., situations that have had a negative effect on the student’s ability to successfully meet SAP standards, such as student illness or injury, death of a relative, or other special circumstances).

An electronic SAP Appeal Form is made available to students who are not meeting SAP through their ecampus. This form may be found in the ecampus FINANCE CENTER under the subsection for “Satisfactory Academic Progress”. Students who complete an appeal are required to provide supporting documentation. A hard copy SAP appeal form is also available, as needed.

Appeals must include a written statement submitted to APU Financial Aid Services that addresses the extenuating circumstances that contributed to the student’s failure to meet SAP and what has changed in the student’s situation that will allow the student to either meet SAP at the next evaluation or to meet the requirements of an academic plan that would lead to meeting SAP in the future. The student also must provide documentation to support the existence of the extenuating circumstances. The deadline to submit the completed appeal form, with supporting documentation, to Financial Aid Services is the Thursday of the start week of the semester after the student has been informed of their “Financial Aid Denial” status. No appeals will be accepted for after that date. An appeals Committee will consider all appeals. Students will be notified by email of the committee’s decision. All decisions made by the committee are final.

Loss of Financial Aid Eligibility

Students failing to meet or maintain SAP during any period of evaluation will be placed on "Financial Aid Denial” status and will lose FSA eligibility. Students who receive veterans’ education benefits will also lose eligibility for that funding. Students will be notified of their “Financial Aid Denial” status by APU financial aid staff. To regain FSA eligibility, students must successfully appeal the determination or otherwise satisfy all SAP requirements.

Re-establishing Financial Aid Eligibility

Students placed on “Financial Aid Denial” status may reestablish their FSA eligibility by attending and earning the GPA and semester hour requirements of the SAP policy without the use of FSA funding. Once students meet SAP requirements, APU will package and disburse eligible aid for which they have applied.

Financial Aid "Warning" Period

The school may reinstate eligibility for aid for one payment period and may do so without a student appeal. This “financial aid warning” status may be granted only to students who were making SAP in the prior payment period in which they were enrolled or who were in the first payment period of their program when they failed to meet SAP. Students who qualify for the "warning" period will be notified by email.

- Students do not qualify for financial aid warning status if there are any “unearned F’s” in last semester
- Typically, a financial aid warning is granted only once. APU in its discretion may permit a second warning status if the student meets SAP standards at the next evaluation, then subsequently fails to meet SAP.

---

1. Credits transferred in from another college or university via an official Transfer Credit Evaluation are factored into the calculation of how many credits a student has completed in determining the minimum Cumulative GPA threshold from the chart.

Doctoral Satisfactory Academic Progress (SAP)

Satisfactory Academic Progress (SAP) indicates the successful completion of coursework towards a degree or certificate.

- According to federal regulations, students who fail to make SAP in their education program will lose their eligibility to receive Federal Student Aid (FSA) funds (i.e., financial aid).
- SAP rules apply to all students applying for financial aid, including those who have not previously received financial aid.
- APU evaluates a student’s SAP at the end of each payment period (i.e., semester). If APU determines that a student has failed to meet the University’s SAP standards, the student may be placed on a “financial aid warning” semester during which they may retain their FSA eligibility. This determination is made at APU's discretion.
  - Students are only eligible for financial aid warning status if the following criteria is met:
    - The student had no “unearned F’s” in the previous semester.
    - The student was previously meeting SAP without a warning or appeal in the most recent completed semester or was in the first payment period of their program when they failed to meet SAP.
- If APU determines that a student has failed to meet the University’s SAP standards and determines that a financial aid warning is inappropriate, the student will lose their FSA eligibility. Students who lose their FSA eligibility may appeal the loss provided there are extenuating circumstances that inhibited their academic progress (e.g., student illness or injury, death of a relative.)
- Students who submit an appeal must provide:
  - A statement that explains the extenuating circumstances that contributed to the student’s failure to meet SAP and what has changed in the student’s situation that will allow the student to either meet SAP at the next evaluation or to meet the requirements of an academic plan that would lead to meeting SAP in the future.
  - Documentation that confirms the extenuating circumstances and date(s) during which the events occurred.
- If an appeal is approved, the student is placed on “financial aid probation” and their FSA eligibility is reinstated for one semester. The student must meet SAP at the next evaluation or meet the requirements of the academic plan in order to remain FSA eligible for future semesters.
- If a student’s appeal is unsuccessful, the student may take classes to demonstrate improvement for a future appeal, but they cannot receive FSA to pay for those classes. A student cannot meet SAP simply by paying for their classes on their own but must earn the necessary GPA or completion rate.
- To otherwise restore FSA eligibility, students must achieve the GPA and credit hour completion targets as defined in the policy.

SAP is evaluated based on grades posted at the end of each semester (defined as a 16-week period of academic study).

- The criteria used to measure Satisfactory Academic Progress include:
  - Cumulative grade point average (qualitative)
  - Credit hour completion/Program Pace (quantitative)
- The requirements of each criterion must be met and are described in detail below.

Cumulative Grade Point Average (CGPA)

- Cumulative GPA is the qualitative measure of SAP, meaning that it looks at the quality of the grades that each student earns in their courses.
- CGPA is initially calculated after 6 undergraduate credits, or 6 graduate credits are completed at APU. Evaluation thereafter occurs at the end of each semester according to the table below.

- Only credits completed at APU with a final grade of A through F are included in the CGPA calculation.
- If a failed course is retaken, the later grade will replace the failed grade and factor into the CGPA.
- To meet SAP requirements, students must maintain a CGPA that meets or exceeds our minimum as shown in the chart below.
- Students who fail to meet CGPA requirements will be determined ineligible for FSA.

SAP Criteria on Cumulative GPA (CGPA) and Credits Completed

	Total Credits Completed (including transferred credits[1])	Minimum CGPA Required for Financial Aid
Doctoral	6+	3.00

Credit Hour Completion and Program Pace

Credit hour completion is the quantitative measure of SAP, meaning that students must complete a certain percentage of courses toward certificate or degree completion in order to maintain FSA eligibility. Each academic program within APU has a defined number of credit hours required for completion. To maintain SAP, students must achieve a minimum percentage of credits completed (i.e., earned) versus credits attempted.

- A student must complete their program within 150% of the published length of the program. For example, a student in a two-year program must be on track to complete their program within three years.
- Any course in which the student remains beyond Week One (add/drop) will count towards attempted credits regardless of the grade received.
- Undergraduate courses with a final undergraduate grade of A through D- will be counted towards credits attempted and completed.
- Graduate courses with a final grade of A through C will be counted towards credits attempted and completed.
- Final grades that fall below the minimums (D- for undergraduates and C for graduates) are not counted as credits completed but will be considered credits attempted.
- Courses with grades of incomplete (“I”) will not be considered attempted until a final grade is earned by the student, or the Registrar or instructor converts the “I” grade to an “F”.
- Doctoral courses with a final grade of Satisfactory (“S”) will be counted towards credits attempted and completed.
- Doctoral courses with a final grade of Unsatisfactory (“U”) are not counted as credits completed but will be considered credits attempted.
- Courses from which a student has withdrawn (“W”) will be counted towards credits attempted.
- Courses dropped within the add/drop period will not be counted towards credits attempted.
- Course retakes: All attempted courses are factored into the credit hour completion percentage.
- Remedial courses do not count towards attempted credits; however, APU does not offer remedial courses.
- Repeated courses will count as attempted courses.
- For students who change programs, credits that apply to the new program will be counted in credit hour completion and program pace.

Note: All students are required to log into each of their courses during Week One and submit an academic activity. Students who do not submit this assignment during the first week of class will be administratively dropped from any courses for which this assignment has not been completed.

SAP Criteria Based on Credits Attempted versus Credits Completed

	Credits Attempted	Credits Completed %
Doctoral	6-9	67%
	10+	75%

Credits transferred from another college or university are included in determining the credits completed percentage for the quantitative measure - completed hours divided by attempted hours. Likewise, the total of APU and transfer credits that a student has from another college, or university will be factored into determining where they fall on the chart above.

Financial Aid Appeal Process

If APU determines that a student has not met SAP, the student will be placed on “Financial Aid Denial” status, meaning they have lost their FSA eligibility. Any student placed on “Financial Aid Denial” status may appeal their denial due to extenuating circumstances (i.e., situations that have had a negative effect on the student’s ability to successfully meet SAP standards, such as student illness or injury, death of a relative, or other special circumstances).

An electronic SAP Appeal Form is made available to students who are not meeting SAP through their ecampus. This form may be found in the ecampus FINANCE CENTER under the subsection for “Satisfactory Academic Progress”. Students who complete an appeal are required to provide supporting documentation. A hard copy SAP appeal form is also available, as needed.

Appeals must include a written statement submitted to APU's Financial Aid Services that addresses the extenuating circumstances that contributed to the student’s failure to meet SAP and what has changed in the student’s situation that will allow the student to either meet SAP at the next evaluation or to meet the requirements of an academic plan that would lead to meeting SAP in the future. The student also must provide documentation to support the existence of the extenuating circumstances. The deadline to submit the completed appeal form, with supporting documentation, to Financial Aid Services is the Thursday of the start week of the semester after the student has been informed of their “Financial Aid Denial” status. No appeals will be accepted for after that date. An appeals Committee will consider all appeals. Students will be notified by email of the committee’s decision. All decisions made by the committee are final.

Loss of Financial Aid Eligibility

Students failing to meet or maintain SAP during any period of evaluation will be placed on "Financial Aid Denial” status and will lose FSA eligibility. Students who receive veterans’ education benefits will also lose eligibility for that funding. Students will be notified of their “Financial Aid Denial” status by APU's financial aid staff. To regain FSA eligibility, students must successfully appeal the determination or otherwise satisfy all SAP requirements.

Re-establishing Financial Aid Eligibility

Students placed on “Financial Aid Denial” status may reestablish their FSA eligibility by attending and earning the GPA and semester hour requirements of the SAP policy without the use of FSA funding. Once students meet SAP requirements, APU will package and disburse eligible aid for which they have applied.

Financial Aid "Warning" Period

The school may reinstate eligibility for aid for one payment period and may do so without a student appeal. This “financial aid warning” status may be granted only to students who were making SAP in the prior payment period in which they were enrolled or who were in the first payment period of their program when they failed to meet SAP. Students who qualify for the "warning" period will be notified by email.

- Students do not qualify for financial aid warning status if there are any “unearned F’s” in last semester
- Typically, a financial aid warning is granted only once. APU in its discretion may permit a second warning status if the student meets SAP standards at the next evaluation, then subsequently fails to meet SAP.

---

1. Credits transferred in from another college or university via an official Transfer Credit Evaluation are factored into the calculation of how many credits a student has completed in determining the minimum Cumulative GPA threshold from the chart.

Drop/Withdrawal/Extension and Refund Policies

Students registered for a course are expected to complete all scheduled requirements (as listed in the classroom’s course syllabus) within the allotted timeframe: 8 weeks, or 16 weeks. If a student changes their mind about taking a course, or circumstances prevent them from completing a course for which they are registered, they may consider requesting a course drop, withdrawal or extension. Students should

be aware that any change to their enrollment status due to dropping, being administratively dropped, or withdrawing from any course may impact their financial aid.

Withdrawal Counseling

Students experiencing difficulties that may prevent them from completing their coursework on time should discuss their situation with their instructor. In extreme situations, they may wish to consult the Student Handbook to determine whether they should submit a formal request for a course extension or withdraw from the course entirely. Procedures for both actions are explained in the Student Handbook. Students who elect to submit a request for a course extension forfeit the option to withdraw from the course; but in most cases, a course extension is preferable because it allows time for students to complete the course and advance towards their academic goals. In addition, a course withdrawal will reduce the number of credit hours being taken during the semester and may have a negative impact on students' status as a full- time or part-time student, academic progress, and eligibility for some forms of financial aid. Required forms are available in the student eCampus.

Drop/Withdrawal Policies and Refunds

Course Drop

If a student decides to drop from a course, the online Drop/Withdrawal Course Form must be submitted by the posted deadline that occurs before the first week of the course has ended. APU will not consider appeals for a drop after the first week has ended based on late book arrival as it is the student's responsibility to drop the course on time.

There are student funding approval and payment deadlines for each course. The deadlines are posted on the Academic Calendar. Students who do have not their funding approved (i.e.; a confirmed Federal Student Aid package or TA approval) or have not submitted payment by the deadline will automatically be dropped from courses.

During Week One students are required to log into all courses and submit a minimum 250-word introductory forum post for each course. Students who do not submit this forum post during the first week of class will be automatically dropped from any courses in which the forum post has not been completed. A course drop will reduce the number of credit hours being taken during the semester and may have a negative impact on student's status as a full-time or part-time student, academic progress, and eligibility for some forms of financial aid.

Course Withdrawal

If a student earning academic credit submits an online Drop/Withdrawal Course Form after the first week of the course, then they will be withdrawn and receive a grade of "W" as long as the withdrawal was requested during the allowed timeframe. A “W” grade does not carry a grade point value and has no effect on the student's cumulative APU GPA. However, a withdrawn course is considered an attempted course and will be factored into the quantitative measure of Satisfactory Academic Progress (SAP) for financial aid.

Students taking courses as Audit (not seeking academic credit) will receive a "W" if they withdraw at any time during the course. Students taking Audit courses are not eligible for any tuition refund after week 1 of their course. Course Withdrawals may be requested after the start of the second week until the beginning of the last week of the course. The date of withdrawal will be the date the request is received.

Tuition Refunds

Tuition refunds are given for courses taken for academic credit under the guidelines listed below.

Institutional Refunds are processed as follows:

- After a course begins, refunds will be based on the weekly course schedule.
- Please find the appropriate session length on the Refund Schedule below to determine the refund.

Students should allow 30 days for the processing of tuition refunds.

Tuition Refund Schedules

The institution refund schedules below apply unless a specific state refund policy applies for a student and the state policy is more beneficial to the student than the below schedules.

2-Week Course - Tuition Refund Schedule

Withdrawal Request Date	Tuition Refund Percentage
Before or During Week 1	100%
During Week 2	No Refund

8-Week Course - Tuition Refund Schedule

Withdrawal Request Date	Tuition Refund Percentage
Before or During Week 1	100%
During Week 2	75%
During Weeks 3 and 4	50%
During Weeks 5 through 8	No Refund

16-Week Course - Tuition Refund Schedule

Withdrawal Request Date	Tuition Refund Percentage
Before or During Weeks 1 or 2	100%
During Weeks 3 and 4	75%
During Weeks 5 through 8	50%
During Weeks 9 through 16	No Refund

Military TA Refund Schedule

2-Week Course - Tuition Refund Schedule

Withdrawal Request Date	Tuition Refund Percentage
Before or During Week 1	100%
During Week 2	No Refund

8-Week Course - Tuition Refund Schedule

Withdrawal Request Date	Tuition Refund Percentage
Before or During Week 1	100%
During Week 2	75%
During Weeks 3 and 4	50%
During Week 5	40%
During Weeks 6 through 8	No Refund

16-Week Course - Tuition Refund Schedule

Withdrawal Request Date	Tuition Refund Percentage
Before or During Weeks 1 or 2	100%

During Weeks 3 and 4	75%
During Weeks 5 through 8	50%
During Weeks 9 and 10	40%
During Weeks 11 through 16	No Refund

The Department of Defense requires the University to return any unearned Military Tuition Assistance (TA) funds to the Department should a service member withdraw from a course that was paid for using TA. If a service member withdraws from any course on or before the 60% completion date (during week 5 for an 8-week course and during week 9/10 for a 16-week course), a prorated refund will be issued back to the Department for the TA funds that were provided. The schedules above determine the prorated amount of TA funds refunded to the Department based on the date of service member's withdrawal from a course. For example, if a service member withdraws from a course at the 60% mark (during week 5 for an 8-week course and during week 9/10 for a 16-week course), 40% of TA funds used for the course will be returned to the Department. In instances when a service member stops attending due to a documented military service obligation, the University will work with the affected service member to identify solutions that may not result in a student debt to the University for the portion of TA funds returned to the Department.

Financial Assistance

American Public University (APU) offers several educational financing options including Federal Student Aid (FSA), grants and loans, alternative (private) loans, and an automatic debit payment plan. Students who intend to use FSA are encouraged to complete the Free Application for Federal Student Aid (FAFSA) as soon as possible, establish an APU Federal Student Aid (FSA) Academic Year online and enter the online Financial Aid Office five weeks (or at least 10 days) prior to the start of the semester.

Additionally, APU is authorized to accept funds from the U.S. Department of Defense Tuition Assistance (TA) programs as well as the Veterans Administration GI Bill® programs (including REAP and Veteran Readiness and Employment (VR&E), formerly Vocational Rehabilitation).

Students employed in the private sector should consult with their Human Resources department regarding employer-based tuition assistance programs. We also encourage you to research grants from the state in which you currently reside. To find out more about grants in your home state, please contact our Financial Aid Office.

Automatic Debit Plan (ADP)

American Public Univerisity offers an Automatic Debit Plan (ADP) to enable students to spread tuition payments over time by having them automatically charged to a credit card on a preset schedule. The amount and number of payments is proportional to the length of the course and ensures course tuition is paid prior to the end of the academic period. Students in 16-week courses make four ADP payments. Students in 8-week courses make two ADP payments. To be eligible for the ADP plan, any student must be registered for credit-bearing courses. Audit students are not eligible for ADP.

ADP Schedules

16-Week ADP Schedule

Upon Registration	1/4 tuition due + technology fee
15th of Session's First Month	1/4 of tuition due (i.e., for May 5th course, payment due 5/15/XX)
15th of Session's Second Month	1/4 of tuition due (i.e., for May 5th course, payment due 6/15/XX)
15th of Session's Third Month	1/4 of tuition due (i.e., for May 5th course, payment due 7/15/XX)

8-Week ADP Schedule

Upon Registration	1/2 tuition due + technology fee
15th of Session's First Month	1/2 tuition due (i.e., for May 5th course, final 1/2 due 5/15/XX)

ADP Late Payments

If a credit card is declined, the student will be notified to immediately contact stuaccounts@apus.edu and make the payment. If payment is not received, the student's account is placed on “balance due hold”.

Veterans Benefits Information

Applying for Benefits

Students interested in applying for VA educational benefits (GI Bill®) should complete an application for benefits on the VA website. Please note, the VA School Certifying Officials (SCO) at APU cannot determine eligibility for VA education benefits. The Department of Veterans Affairs may approve or deny benefits, based on the information provided on the application.

When completing an application for benefits, please use the following information for the school:

American Public University
111 West Congress Street
Charles Town, WV 25414

Once the VA has completed review of the student's application, they will mail a Certificate of Eligibility (COE), outlining the student's entitlement information, which will need to be provided to APU. Students may upload a copy of their COE securely through the Secure Document Upload portal using their ecampus login credentials, or email it to VAQuestions@apus.edu.

VA Enrollment Information

Enrollment certifications cannot be submitted to the VA until APU receives a copy of the student's Certificate of Eligibility (COE) and they have successfully enrolled in a class. Once the student's paperwork is processed and they have started classes, the VA School Certifying Official (SCO) will electronically submit an enrollment certification to the VA. All VA enrollment certifications will be submitted after the session add/drop period, at which time the student will receive an email from the VA as verification.

Enrollment Verification

The VA requires that any students using GI Bill® benefits verify their enrollment at the end of every month after their courses begin. Students can verify their enrollment online, via text message, via email, or by calling the Education Call Center (ECC) at 888-442-4551. For more information regarding monthly enrollment verification, students can visit the VA website.

Using Tuition Assistance and GI Bill® Benefits

Federal law prohibits active-duty service members from receiving VA education benefits for the same course for which they receive Military Tuition Assistance (TA). If a student is using Chapter 33 benefits, TA must be applied to the registration first, and any remaining tuition can be submitted to the VA under Chapter 33 benefits. Active-duty service members who are eligible for Chapter 30 benefits can use non-active-duty TA in conjunction with VA education benefits. Students who are using Chapter 30 benefits and who are approved for active-duty TA may use Tuition Assistance Top-Up if the course cost is not fully funding by TA.

Students who wish to apply for TA Top-Up should contact VAQuestions@apus.edu to request a TA Top-Up Request Form. APU will submit an enrollment certification to the VA to include the amount of tuition and fees not funded by TA. **Please note**, the use of Top-Up will exhaust a portion of the student's GI Bill® benefits. For more information regarding the Top-Up option, please visit the VA website.

VA Payments

Students using benefits under Chapters 30, 35, and 1606 will receive monthly payments from the VA based on their monthly enrollment status. Payments are sent from the VA after the student has verified their monthly attendance. APU requires students using Chapters 30, 35, and 1606 to make payment arrangements with the university prior to the start of courses. An enrollment certification **will not** be submitted to the VA until payment arrangements have been finalized.

Tuition and fees for Chapter 33 are paid directly to APU. If a student is not receiving the 100% benefit rate, payment arrangements for the remaining amount will need to be made to the university prior to course access being granted. Current VA payment rates may be viewed on the VA website.

The following information pertains to students with a primary payment type of Post 9/11 GI Bill® or Veteran Readiness and Employment (VR&E - Chapter 31):

The university permits any student using benefits under the Post 9/11 GI Bill® (Chapter 33) or Veteran Readiness and Employment (VR&E - Chapter 31) to attend or participate in their program of study when the individual provides a Certificate of Eligibility (COE) or Purchase Order (PO) for entitlement to educational assistance ending on the earlier of the following dates: (1) The date on which payment from the VA is made to the university; and (2) 90 days after the date the university certified tuition and fees following the receipt of the COE or PO.

If the VA has not made payment within 90 days of APU submitting an enrollment certification, (1) APU will not impose any penalties on students, including the assessment of late fees, the denial of access to courses, library resources, or other student services; and (2) APU will not require that a covered student borrow additional funds because of the student's inability to meet their financial obligations to APU due to delayed VA payment. If, however, APU is notified by the VA that a student has exhausted VA entitlements or is not eligible for veterans' education benefits, the student will be responsible for tuition and applicable fees, and APU collection policies will apply.

Basic Allowance for Housing (BAH)

Post 9/11 GI Bill® students (other than those on active duty) will receive a monthly housing allowance (BAH) for online courses, which is equal to half of the national average for BAH. Students **must** be enrolled at a rate of pursuit greater than half time (.51%) to receive this benefit. The housing allowance is pro-rated based off the student's enrollment status, percentage of eligibility, and dates of course enrollments. Current VA payment rates may be viewed on the VA website.

Using VA Benefits at Multiple Institutions

The VA requires students to declare an institution at which they will receive a degree or certification. VA education benefits cannot be used at multiple institutions without the declaration of a primary or "parent" school and subsequent secondary or "guest" school. For more information regarding using benefits at APU and another institution, please contact VAQuestions@apus.edu.

VA Consent to Enrollments Submitted

When a student selects a VA payment option at the time of registration, they are consenting that they wish to have their enrollment for that particular course(s) submitted to the VA on their behalf. Students who register selecting a payment option other than VA will be prompted to provide consent at the time of registration to have the course(s) submitted to the VA on their behalf. Students who register prior to submitting required VA documents to APU may be required to complete a Veterans Benefits Certification Request Form to identify courses or terms they would like to have submitted to the VA.

Change of Academic Program

When a student using VA education benefits changes their academic program with APU, the VA will be notified of the change in academic pursuit. A credit evaluation will be completed by APU for the new program and any credits that are applicable towards the new program of study will be applied. When registering for courses under the new program, students must provide consent for APU to submit an enrollment certification to the VA on their behalf. If a student changes their program mid-term, they should avoid enrolling in courses under

their new program until the term in which they are enrolled ends. The VA will not pay for any course(s) where there is an overlap with programs.

Yellow Ribbon Program

The Yellow Ribbon Program is an agreement between the VA and participating institutions to cover all, or a portion of tuition and fees charged after a student has met or exceeded the yearly tuition cap. As a participating university in the Post 9/11 GI Bill® Yellow Ribbon Program, APU agrees to make additional funds available for a qualifying student's education program without an additional charge to their GI Bill® entitlement.

It is important that students designate themselves as an active-duty service member or veteran when completing the university's admission application. Current students are encouraged to check their contact information (Updating Contact Information on File with the University) to be sure it shows their current military status and update if necessary.

Students should visit the VA Benefits website to determine if they may be eligible for this benefit. Eligible students must complete a Yellow Ribbon Application Form for courses for which they are using Post 9/11 GI Bill® funding. Students may contact VAQuestions@apus.edu for questions about this program.

Course Drops/Withdrawals

APU is required to report changes in enrollment to the VA. If a student drops or withdraws from a course(s), an amended enrollment certification will be sent to the VA within 30 days of the change in enrollment. A reduction or termination of enrolled credit hours could result in:

- A student debt with the VA for BAH and books/supplies if they are using the Post 9/11 GI Bill®;
- A student debt with the VA for tuition and fees if they are using the Montgomery GI Bill®

Under the Post 9/11 GI Bill®, tuition and fee debts will be issued to the school if a student withdraws from a course(s) after the add/drop period. The VA will request repayment of tuition and fees and will send a debt letter to APU. If the VA debt letter requests school repayment that exceeds the institutional refund policy, students may be assigned a debt to the school. For more information regarding GI Bill® debts, to include ways to prevent a debt from occurring, please visit the VA website.

Mitigating Circumstances

Mitigating circumstances are circumstances beyond the student's control that prevent the student from continuing in school or that cause the student to reduce credits. The VA requires schools to determine any potential mitigating circumstances. If mitigating circumstances cannot be validated, the VA may request repayment of BAH, books/supplies, or tuition and fees, as of the first date of the term. View more information on mitigating circumstances.

Rounding Out

The practice of "rounding out" provides eligible GI Bill® students who are in their last term with the option to take additional classes to bring their course load to full-time status and receive up to full-time benefit payments or the maximum allowable monthly housing allowance. Classes that have been previously completed cannot be used to round out the student's course load. Students may contact VAQuestions@apus.edu for more information about this program.

Graduations

When a student using VA education benefits has successfully completed the requirements for their program of study and has officially conferred from the program of study, APU will report the student's graduation to the VA via electronic certification. Students using Chapter 33 benefits and students using the Chapter 30 benefits who are on active duty may have the mandatory graduation fee accessed by APU paid for by the VA as long as their GI Bill® benefits were used for their last course required to complete their program of study.

Course Extensions

If a student is granted a course extension from their professor, they will **not** receive VA education benefits during the extension period. The VA will automatically discontinue benefits on the day after their original term ending date. Benefits will not start until a new course has been enrolled in and an enrollment certification has been sent to the VA. Submission of a course extension for VA education benefits will likely result in an adjustment to the student's rate of pursuit and an overpayment which will require future repayment.

Unsatisfactory Academic Progress, Conduct and Attendance

VA requires APU to report when students using GI Bill® benefits are not meeting the institution's academic standards. When APU is made aware of a student who is no longer meeting academic standards, notification will be electronically reported to the VA.

Excessive Credits

Students who are using VA education benefits may not register for courses that are not applicable to their current program of study. Any course that is deemed not applicable to the student's current program of study will be considered an excessive credit and an enrollment certification for the course will not be submitted to the VA. If a previously submitted enrollment results in an excessive credit, the enrollment must be terminated. The resulting termination will likely result in a reduction in tuition and fees, BAH and/or books and supplies payment for the course/term and may require repayment of this debt.

Prior Credits

The VA requires that all prior credit must be evaluated by APU prior to a student's initial enrollment. Students must identify any prior credit that has been earned. Additionally, a Joint Services Transcript (JST) or Community College of the Air Force (CCAF) transcript must be received by APU for all students who will be using VA education benefits for any courses. Students who are currently having prior credits evaluated are strongly encouraged to register only for courses for which they know they will not receive prior credit. If prior credit is later given for a course a student is currently taking using VA education benefits, APU must terminate the enrollment certification with the VA, as this would constitute an excessive credit. Terminations of enrollment will likely result in a reduction in tuition and fees, BAH and/or books and supplies payment for the course for which a prior credit was awarded.

Courses for Transfer Programs

Students who are enrolled in an Undergraduate Courses for Transfer program at APU are restricted by VA policy on which courses can be submitted under VA education benefits. A student must be below a junior in academic standing. **Please note**, the junior status also includes any credits previously taken at other institutions. Only general education courses can be submitted to the VA while a student has an undeclared program, unless a valid Parent School Letter is on file stating the course(s) taken at APU will transfer to the students primary or "parent school" school. Pre-requisite courses and courses which apply to a CCAF degree may also be approved for submission to the VA.

Tutorial Assistance

Tutorial assistance is available to help students pay for tutoring necessary to advance their education if they are receiving VA educational benefits at the half-time or greater rate of pursuit and have a deficiency in a subject, making tutoring necessary. For more information on VA Tutorial Assistance, please visit the VA website.

Enrollment Status Definitions & Requirements for VA Benefits

APU offers courses in an 8-week and 16-week formats. Courses start the first Monday of each month at APU. All VA enrollments are based on a student's monthly enrollment status. Overlapping course starts may result in differing enrollment statuses than those below.

Course Load and Student Status for VA Benefits

Student status for VA education benefits is based on monthly course load. The chart below applies to VA benefit requirements for full, three quarter, or half-time benefit levels.

Session of Courses	Monthly Course Load	Student Status	Rate of Pursuit [1] [2]
Master's Level: 8-Week Courses	Session of Courses	Monthly Course Load	Student Status
	4+ Credit Hours	Full-time	1.00
	3 Credit Hours	Three-quarter time	.75
Master's Level: 16-Week Courses	Session of Courses	Monthly Course Load	Student Status
	9+ Credit Hours	Full-time	1.00
	6 Credit Hours	Three-quarter time	.75
	3 Credit Hours	Half-time	.38
Undergraduate: 8-Week Courses	Session of Courses	Monthly Course Load	Student Status
	6+ Credit Hours	Full-time	1.00
	5 Credit Hours	Three-quarter time	.83
	4 Credit Hours	Three-quarter time	.67
	3 Credit Hours	Half-time	.56
	2 Credit Hours	Less than Half-time	.38
Undergraduate: 16-Week Courses	Session of Courses	Monthly Course Load	Student Status
	12+ Credit Hours	Full-time	1.00
	9 Credit Hours	Three-quarter time	.75
	6 Credit Hours	Half-time	.50
	4 Credit Hours	Less than Half-time	.33
	3 Credit Hours	Less than Half-time	.25

Doctoral Student Enrollment Status for VA Benefits

Doctoral: 16-Week Courses

Credit Hours per 16-Week Term	Student Status
4+ credit hours or enrolled in dissertation course (DOCT899)	Credit Hours per 16-Week TermFull-time
1 to 2 credit hours	Credit Hours per 16-Week TermHalf-time

Doctoral: 8-Week Courses

Credit Hours per 8-Week Term	Student Status
4+ credit hours or enrolled in dissertation course (DOCT899)	Credit Hours per 8-Week TermFull-time

3 credit hours	Credit Hours per 8-Week TermThree-quarter time
1 to 2 credit hours	Credit Hours per 8-Week TermHalf-time

Please note: The above charts do not apply to Federal Student Aid (FSA). If a student is applying for Federal Student Aid, there are different standards by which enrollment is measured. Please refer to the Enrollment Status Definitions & Requirements for FSA.

About

Institutional Overview

Welcome

You have selected a college designed with the motivated, mature learner in mind. We are committed to providing a high-quality education that serves our communities of interest. As you get to know us, you will have the opportunity to meet and work with our faculty who are experienced, dedicated and passionate educators. Our faculty bring significant hands-on professional experience to the classroom, lab and clinical experiences at Hondros College of Nursing. This allows us to provide our students with an education based on sound academic theory and real-world experience.

We appreciate and support your commitment to your future! Best wishes with your educational endeavors.

History of Hondros College of Nursing

Hondros College of Nursing, which started as a real estate preparatory school in 1981, began serving nursing students in January 2007, when the College launched its Practical Nursing and Associate Degree in Nursing programs at its West Chester, OH (Cincinnati-area) location. The College expanded its nursing programs to new locations throughout Ohio, opening campuses in Westerville (Columbus-area, 2008), Fairborn (Dayton-area, 2009), and Independence (Cleveland-area, 2011).

In 2013, Hondros College of Nursing, then called Hondros College, was acquired by American Public Education, Inc. (APEI). With APEI's support, Hondros College of Nursing continued to grow and refine its nursing programs, introducing weekend/evening scheduling options, investing in on-campus simulation labs, and launching innovative, concept-based curricula. To better reflect its commitment to nursing education, the College officially changed its name to Hondros College of Nursing in 2016.

Hondros College of Nursing continued to expand, launching campuses in Maumee, OH (2017), Indianapolis, IN (2020), Akron, OH (2021), and Bingham Farms, MI (Detroit-area, 2022). In 2023, the Fairborn, OH campus was relocated to a nearby address in Dayton, OH. Similarly, in 2024, the campus in Westerville, OH, relocated to a new facility in Columbus, OH, and the campus in Maumee, OH, also moved to a different location. These efforts support the College's growth, providing additional space for learning in modern, convenient environments. Additionally, Hondros College of Nursing launched a Medical Assisting program in Fall 2024 at three Ohio campuses.

Since the launch of its first nursing programs in 2007, Hondros College of Nursing has been committed to improving the health outcomes of the communities it serves by graduating skilled healthcare professionals. The College continues to innovate new ways to help address the challenges in the healthcare field.

Hondros College of Nursing Timeline:

1981 – Hondros College begins as a real estate preparatory school

2006 – Hondros College gains approval from the Ohio Board of Nursing to offer Practical Nursing and Associate Degree in Nursing programs

2007 – PN and ADN programs are launched at the West Chester, OH (Cincinnati) campus

2008 – Westerville, OH (Columbus) campus opens

2009 – Fairborn, OH (Dayton) campus opens

2011 – Independence, OH (Cleveland) campus opens

2011 – RN-BSN program launches (program ended in 2018)

2013 – Hondros College is acquired by American Public Education, Inc (APEI)

2016 – Hondros College changes its name to Hondros College of Nursing

2017 – Maumee, OH (Toledo) campus opens

2017 – Medical Laboratory Technology program launches (program ended in 2019)

2018 – Practical Nursing program awarded programmatic accreditation through the National League for Nursing Commission on Nursing Education Accreditation (NLN CNEA)

2020 – Indianapolis, IN campus opens

2021 – Akron, OH campus opens

2022 – Bingham Farms, MI (Detroit) campus opens

2023 – Fairborn, OH campus moves to its new location in Dayton, OH

2024 – Westerville, OH campus moves to its new location in Columbus, OH

2024 – Maumee, OH campus moves to its new location

2024 – Medical Assisting program launches at three Ohio campuses (program ended Spring 2026)

Legal Control of the College

American Public University System, Inc., d.b.a. Hondros College of Nursing is a wholly-owned subsidiary of American Public Education, Inc., (APEI), a Delaware Corporation. APEI is a publicly-traded corporation, the common stock of which is listed on NASDAQ. APEI is located at 111 W. Congress Street, Charles Town, WV 25414.

Students maintaining continuous enrollment should follow the policies in effect at the time of enrollment. Students will be notified via the Student Portal of any addenda to the catalog, or publication of a new catalog. In accordance with Ohio Administrative Code 4723-5-12(B), Hondros College of Nursing will not implement changes to policies for student progression or requirements for completion for any students currently enrolled in the nursing programs.

Mission and Purpose

Mission Statement

The mission of Hondros College of Nursing is to provide education through the baccalaureate level to a diverse and motivated population of students through traditional and non-traditional delivery methods. We will do this through providing high-quality education that is immediately applicable to our students' career goals and the communities in which they serve, by faculty who have relevant and demonstrated experience.

College Objectives

As an extension of its mission, Hondros College of Nursing strives to prepare students to meet the following objectives.

1. Demonstrate effective verbal and written communication
2. Apply scientific, legal, and ethical principles to professional practice

3. Integrate critical thinking into decision making
4. Engage in professional life-long learning
5. Demonstrate social responsibility, cultural sensitivity, and service in the community
6. Utilize technology in professional practice

Purpose

Hondros College of Nursing's primary purpose is to provide students with quality education in diploma and associate degree programs, and assist graduates in obtaining rewarding careers in their field of study.

COLUMBUS, OH CAMPUS

State Board of Career Colleges and Schools Registration #2024

SUBURBAN COLUMBUS

1105 Schrock Road, 7th Floor, Columbus, OH 43229
Programs: Associate Degree in Nursing (AAS); Diploma, Practical Nursing; Diploma

The Hondros College of Nursing programs at the Columbus, OH main campus utilize five (5) classrooms, three (3) nursing labs, one (1) science lab, one (1) student resource room, and four (4) student study rooms to accommodate the multiple classes offered throughout the week. The five (5) classrooms each include a permanently mounted PC, DVD, LCD projector, presentation devices (such as remote mouse or laser pointer), and P/A sound system. The three (3) nursing labs are equipped with four (4) hospital beds, four (4) simulated moderate-fidelity patient mannequins, four (4) IV poles, two (2) laundry carts, eight (8) sets of hospital linens, four (4) blood pressure cuffs, a wheelchair, crutches, a multitude of additional hospital equipment and numerous supplies. The science lab is equipped with three (3) tables/six (6) stations, microscopes, body part models, skeletons, and additional supplies for lab simulation and study.

AKRON, OH CAMPUS

State Board of Career Colleges and Schools Registration #2187

755 White Pond Drive, Akron, OH 44320
Programs: Associate Degree in Nursing (AAS); Diploma, Practical Nursing; Diploma

The Hondros College of Nursing programs at the Akron, OH non-main campus utilize six (6) classrooms, two (2) nursing labs, one (1) science lab, one (1) student lounge/resource room, and one (1) student study room to accommodate the multiple classes offered throughout the week. The six (6) classrooms each include a permanently mounted PC, DVD, LCD projector, presentation devices (such as remote mouse or laser pointer), projection screen and P/A sound system. The two (2) nursing labs equipped with LCD projection screens, four (4) hospital beds, four (4) simulated moderate-fidelity patient mannequins, four (4) IV poles, two (2) laundry carts, eight (8) sets of hospital linens, four (4) blood pressure cuffs, a wheelchair, crutches, a multitude of additional hospital equipment and numerous

supplies. The science lab is equipped with six (6) tables/stations, microscopes, body part models, skeletons, and additional supplies for lab simulation and study.

BINGHAM FARMS, MI CAMPUS

SUBURBAN DETROIT

30700 Telegraph Road, Suite 4400, Bingham Farms, MI 48025
Programs: Diploma, Practical Nursing

The Hondros College of Nursing program at the Bingham Farms, MI non-main campus utilizes six (6) classrooms, four (4) nursing labs, one (1) student resource room, and three (3) student study rooms to accommodate the multiple classes offered throughout the week. The six (6) classrooms each include a permanently mounted PC, DVD, LCD projector, presentation devices (such as remote mouse or laser pointer), projection screen and P/A sound system. The four (4) nursing lab are equipped with LCD projection screens, four (4) hospital beds, four (4) simulated moderate-fidelity patient mannequins, three (3) or four (4) IV poles, two (2) laundry carts, eight (8) sets of hospital linens, four (4) blood pressure cuffs, a wheelchair, crutches, a multitude of additional hospital equipment and numerous supplies. Upon completion, the science lab will be equipped with three (3) large tables/stations, microscopes, body part models, skeletons, and additional supplies for lab simulation and study.

DAYTON, OH CAMPUS CAMPUS

State Board of Career Colleges and Schools Registration #2025

6520 Poe Ave., Dayton, OH 45414
Programs: Associate Degree in Nursing (AAS); Diploma, Practical Nursing; Diploma

The Hondros College of Nursing programs at the Dayton, OH non-main campus utilize six (6) classrooms, three (3) nursing labs, one (1) science lab, one (1) student resource room, and one (1) student study room to accommodate the multiple classes offered throughout the week. The six (6) classrooms include each include a permanently mounted PC, DVD, LCD projector, presentation devices (such as remote mouse or laser pointer), projection screen, and P/A sound system. The three (3) nursing labs are each equipped with LCD projection screens, four (4) hospital beds, four (4) simulated moderate-fidelity patient mannequins, three (3) IV poles, two (2) laundry carts, eight (8) sets of hospital linens, four (4) blood pressure cuffs, a wheelchair, crutches, a multitude of additional hospital equipment and numerous supplies. The science lab is equipped with two (2) large tables/stations seating 24 students, microscopes, body part models, skeletons, and additional supplies for lab simulation and study.

INDEPENDENCE, OH CAMPUS

State Board of Career Colleges and Schools Registration #2026

SUBURBAN CLEVELAND

5005 Rockside Road, Suite 130, Independence, OH 44131
Programs: Associate Degree in Nursing (AAS); Diploma, Practical Nursing; Diploma

The Hondros College of Nursing programs at the Independence, OH non-main campus utilize eight (8) classrooms, three (3) nursing labs, one (1) science lab, one (1) student resource room, and one (1) student study room to accommodate the multiple classes offered throughout the week. The eight (8) classrooms each include a permanently mounted PC, DVD, LCD projector, presentation devices (such as remote mouse or laser pointer), projection screen, and P/A sound system. The three (3) nursing labs are each equipped with four (4) hospital beds, four (4) simulated moderate-fidelity patient mannequins, four (4) IV poles, two (2) laundry carts, eight (8) sets of hospital linens, four (4) blood pressure cuffs, a wheelchair, crutches, a multitude of additional hospital equipment and numerous supplies. The science lab is equipped with six (6) tables/stations, microscopes, body part models, skeletons, and additional supplies for lab simulation and study.

INDIANAPOLIS, IN CAMPUS CAMPUS

3500 DePauw Boulevard, Suite 1070, Indianapolis, IN 46268
Programs: Diploma, Practical Nursing

The Hondros College of Nursing program at the Indianapolis, IN non-main campus utilizes four (4) classrooms, two (2) nursing labs, 1 science lab (in process), and three (3) student study rooms to accommodate the multiple classes offered throughout the week. The four (4) classrooms each include a permanently mounted PC, DVD, LCD projector, presentation devices (such as remote mouse or laser pointer), projection screen and P/A sound system. The two (2) nursing labs are equipped with LCD projection screens, four (4) hospital beds, four (4) simulated moderate-fidelity patient mannequins, four (4) IV poles, two (2) laundry carts, eight (8) sets of hospital linens, four (4) blood pressure cuffs, a wheelchair, crutches, a multitude of additional hospital equipment and numerous supplies. Upon completion, the science lab will be equipped with three (3) large tables/stations, microscopes, body part models, skeletons, and additional supplies for lab simulation and study.

MAUMEE, OH CAMPUS

State Board of Career Colleges and Schools Registration #2038

SUBURBAN TOLEDO

1695 Indian Wood Circle, Suite 200, Maumee, OH 43537
Programs: Associate Degree in Nursing (AAS); Diploma, Practical Nursing; Diploma

The Hondros College of Nursing programs at the Maumee, OH non-main campus utilize four (4) classrooms, three (3) nursing labs, one (1) science lab, one (1) student resource room, and three (3) student study rooms to accommodate the multiple classes offered throughout the week. The four (4) classrooms each include a permanently mounted PC, LCD projector, presentation devices (such as remote mouse or laser pointer), projection screen and P/A system. The three (3) nursing labs are each equipped with LCD projectors and screens, three (3) hospital beds, three (3) simulated moderate-fidelity patient mannequins, two (2) IV poles, one (1) laundry cart, eight (8) sets of hospital linens, four (4) blood pressure cuffs, a wheelchair, crutches, a multitude of additional hospital equipment and numerous supplies. The science lab is equipped with three (3) large tables to seat 24, microscopes, body part models, skeletons, and additional supplies for lab simulation and study.

WEST CHESTER, OH CAMPUS CAMPUS

State Board of Career Colleges and Schools Registration #2027

SUBURBAN CINCINNATI

7600 Tyler’s Place Blvd., West Chester, OH 45069
Programs: Associate Degree in Nursing (AAS); and Diploma, Practical Nursing; Diploma

The Hondros College of Nursing programs at the West Chester, OH non-main campus utilize five (5) classrooms, four (4) nursing labs, one (1) science lab, one (1) student resource room, and one (1) student study room to accommodate the multiple classes offered throughout the week. The five (5) classrooms each include a permanently mounted a PC, DVD, LCD projector, presentation devices (such as remote mouse or laser pointer), projection screen, and P/A sound system. Three (3) nursing labs are each equipped with LCD projection screens, four (4) hospital beds, four (4) simulated moderate-fidelity patient mannequins, four (4) IV poles, two (2) laundry carts, eight (8) sets of hospital linens, and four (4) blood pressure cuffs. One (1) nursing lab is equipped with LCD projection screens, two (2) hospital beds, two (2) simulated moderate-fidelity patient mannequins, two (2) IV poles, one (1) laundry cart, four (4) sets of hospital linens, and two (2) blood pressure cuffs. The nursing labs also house wheelchairs, crutches, a multitude of additional hospital equipment and numerous supplies. The science lab is equipped with three (3) large tables/stations to seat 24, microscopes, body part models, skeletons, and additional supplies for lab simulation and study.

Academic Calendar

Spring Quarter 2026

Event	Date
Spring Quarter Begins	April 6, 2026
Registration Opens for Summer Quarter 2026	May 24, 2026
College Closed – Memorial Day	May 25, 2026
Registration Closes for Summer Quarter 2026	June 5, 2026
Finals Week	June 15-20, 2026
College Closed – Juneteenth	June 19. 2026
Spring Quarter Ends	June 20. 2026
Break	June 21, 2026 – July 5, 2026
Commencement	Date Provided by Campus

Summer Module 2026

Event	Date
Summer Module Begins*	June 22, 2026
College Closed – Independence Day	July 3, 2026
Summer Module Ends	July 3, 2026

Break	December 19, 2027 – January 2, 2028
Commencement	Date Provided by Campus

*Non-Title IV eligible, two-week module applicable to Ohio and Michigan Practical Nursing program students admitted for Summer 2023 and beyond. The one (1) two-week module is a required prerequisite for the four (4) eleven-week degree program. The one (1) two-week module is a no-cost, no-materials needed, non-transferable, no-credit, non-Title IV (Federal Financial Aid) eligible course.

Accreditation

The Hondros College of Nursing Practical/Vocational Nursing Program (System) holds continuing accreditation from the National League for Nursing Commission for Nursing Education Accreditation (NLN CNEA), located at 2600 Virginia Avenue, NW, Washington, DC 20037. 202-909-2487.

NLN CNEA accreditation applies to the Practical Nursing program as delivered at the Columbus, OH main campus and the Akron, OH, Bingham Farms, MI, Dayton, OH, Independence, OH, Indianapolis, IN, Maumee, OH, and West Chester, OH non-main campuses.

Leadership & Administration

Administration Leadership

- **David Kramer, MA, BS** - Interim President
- **Kelly Cavanagh, M.Ed, BBA** - Vice President of Operations
- **Gregory Guzmán, Ph.D, MPA, BS** - Vice President, Financial Aid Services and Government Liaison
- **Adam Bulizak, MA** - Vice President, Accreditation and Compliance
- **Jacqueline Merritt** - Registrar
- **Millicent Ryan, MI** - Manager, Library and Academic Resources

Academic Leadership

- **Sarah Wandstrat, DNP, MSN, RN** - Area Dean of Nursing and Program Administrator, Ohio
- **Jennifer Glaze, MSN, RN** - Campus Dean of Nursing and Program Administrator, Indiana
- **Terrie Franks, MSN, RN** - Campus Dean of Nursing and Program Administrator, Michigan

Services & Resources

Academic Advising & Tutoring

Academic advising is available to students throughout the student's course of study, and is confidential and impartial. Students seeking academic advising should schedule an appointment with a faculty member or Academic Support Advisor outside of regular class time.

In addition, students are provided the opportunity to participate in one-on-one, group, student-to-student, faculty-led, and/or online tutoring sessions. Students are able to participate in tutoring sessions throughout their education and are encouraged to seek assistance from faculty on a regular basis.

Students seeking counseling services should speak with the Campus Executive Director or Academic Support Advisor for appropriate referrals to counseling services and community service organizations.

Career Services

The College aids alumni in finding employment by assisting with resume preparation, helping with development of interviewing skills, and identifying appropriate job leads. Through career development, including professionalism, motivation, and the maintenance of ethical standards, students and alumni are empowered with the skills necessary to foster a successful and ongoing career.

Obtaining employment is ultimately the responsibility of the alumni. Alumni are highly encouraged to pursue their own independent employment opportunities. Recent alumni who have yet to obtain employment in their field of study should contact the College about available job openings in their community.

Pursuant to accreditation requirements, the College will confirm employment of alumni by contacting both the employer and alumni. The College cannot guarantee employment or salary.

Career Events

Hondros College of Nursing seeks to assist students and alumni in making informed career decisions and partner with employers to maximize recruiting results. To accomplish these goals, the College offers quarterly career events which may include Community

Partner Week, career fairs, on-campus recruiting, and virtual recruiting. These events are offered exclusively to the Hondros College of Nursing students/alumni and provide a variety of networking opportunities.

Online Job Board

Career partners have the ability to post jobs directly through the Hondros College of Nursing website. These job postings appear in the Student Portal for all students. In addition, continued access to current job postings will be available for alumni via the Student Portal. Therefore, students will have ongoing access to current positions with our career partners.

Lab Resources

The nursing skills lab and the science lab are available for student practice during open lab times. These times will be posted in the laboratory. Students may seek additional help during these times. Students may also seek additional help from the Laboratory Manager by appointment.

Library Services

The College provides a completely online library collection. Students are able to research multiple databases and find up-to-date information by accessing the online resources and periodicals. The online library is available through the Student Portal.

Transcript Request

Requests for official transcripts are processed through the National Student Clearinghouse. Official transcripts may be ordered online at https://tsorder.studentclearinghouse.org/school/ficecode/04074300 . There is a $15 fee for each request. Additional fees may apply for expedited shipping. Transcript requests are processed within 3-10 business day.

Printing Services

Through the Student Portal, students have access to a printing service called PaperCut. PaperCut conveniently allows students to print from their laptop to the campus printer. A nominal fee applies.

Student Parking

Every campus offers free parking to Hondros College of Nursing students. Students must park in designated school parking spaces and adhere to regulations regarding handicapped and special parking. Violators will be towed at the owner’s expense. The College is not responsible for lost or stolen items.

Students attending clinical may be required to obtain an additional parking pass. Students are responsible for any parking expenses and fees incurred while attending the College or any off-campus locations related to their education at the College.

Accommodations Policy

Hondros College of Nursing is committed to providing educational services to students with disabilities as required by the Americans with Disabilities Act (ADA) of 1990 and Section 504 of the Rehabilitation Act of 1973 (both as amended).

Hondros College of Nursing will provide reasonable accommodations for qualified students with disabilities. To be eligible for a reasonable accommodation (or academic adjustment), the student must have:

1. A disability (as defined by applicable law) that substantially limits a major life activity and subsequently necessitates an accommodation;
2. Documentation on file with Hondros College of Nursing that supports the need for the requested documentation; and

3. Medical documentation that substantiates the disability and how the accommodation will assist the student.

Qualified students with disabilities seeking reasonable accommodations are responsible for initiating contact with the Campus Dean/Director of Nursing or designee to request an appropriate reasonable accommodation. Essential program outcomes, course objectives, and/or skill competency achievement standards cannot be substantially lowered, waived or otherwise modified as accommodations. Any modifications in the manner in which a course, lab, and/or clinical is conducted are restricted to changes in the format of instruction or evaluation. Such modifications must not substantially lower the essential academic standards or modify basic content of the course, lab, and/or clinical.

No accommodations may be made prior to the notification of disability and the submission of documentation. Students must identify themselves to the Campus Dean/Director of Nursing or designee and provide the required documentation at least 30 days in advance of the start of the accommodation being requested. It is the student's responsibility to ensure that documentation meeting the published requirements is submitted 30 days prior to the start of the accommodation(s).

If the accommodations provided are not meeting the student's needs, it is the student's responsibility to notify the Campus Dean/Director of Nursing or designee as soon as possible.

Student Safety

Students must follow established standard precautions for their own safety in clinical settings and on-campus laboratory activities. Students must know basic preparedness for emergency procedures, such as fire or weather-related occurrences, that are posted on the student portal.

Standard Precautions

Standard precautions will be followed at all times, including in nursing and science laboratories. This method of infection control requires the student to assume that all human blood and specified human body fluids are infectious for HBV, HIV, and other blood borne pathogens. Where differentiation of types of body fluids is difficult or impossible, all body fluids are to be considered as potentially infectious.

Blood-borne Pathogens & Exposure Control Protocol

Hepatitis B Virus (HBV) and Human Immunodeficiency Virus (HIV) Education and Management

1. Prior to any exposure to clients/patients and as a prerequisite to clinical preparation, students will receive instruction on universal precautions for blood and body borne infections in accordance with applicable Centers for Disease Control (CDC) guidelines. Information regarding personal health habits, HBV and HIV prevention, and risk behaviors will be given. Exposure control education will be provided in the first quarter courses, and will be continually reinforced. Documentation indicating that each student has been provided this information will be kept on file with the departmental office.
2. All healthcare personnel are ethically and professionally obligated to provide client/patient care with compassion and respect for human dignity. No healthcare personnel may ethically refuse to treat a patient solely because the patient is at risk of contracting, or has, an infectious disease such as HIV, AIDS, or HBV. Students and faculty must understand and follow rules of confidentiality as stated under Patient Rights, as well as all applicable laws and regulations.
3. Clinical supervision is managed to ensure strict compliance in all clinical learning experiences.

Students Who are HBV or HIV Postitive

1. Students who are HBV or HIV positive, or who have AIDS, must follow the CDC guidelines and universal precautions.
2. Students who know they are infected are encouraged to voluntarily inform their Campus Dean/Director of Nursing, Dean of the Medical Assisting program or designee. The Campus Dean/Director of Nursing, Dean of the Medical Assisting program or

designee will begin a process to assess the need for necessary modifications/accommodations in a clinical education or job function.

3. Clinical and laboratory settings that pose additional risk to the personal health of HIV positive students and faculty should be identified. Such persons should be advised of these risks and urged to consult their health care provider to assess the significance of the risks to their own health.
4. Any modification of clinical/lab activity of HBV positive or HIV positive students will take into account the nature of the clinical/lab activity, the technical expertise of the infected person, the risks posed by HBV or HIV carriage, functional disabilities, and the transmissibility of simultaneously carried infectious agents.

Testing Guidelines for HBV and HIV

Students have ethical responsibilities to know their HBV and HIV status and have an obligation to be tested if they believe they may be at risk for HBV or HIV antibody. While the testing decision should be voluntary for the individual, there may be instances in which testing could be required. Students may choose where to receive testing. The College supports the principle of confidentiality and individual rights in conjunction with the CDC guidelines on exposure to blood-borne disease.

Hepatitis B Vaccine Immunization

In accordance with College and clinical agency policies, all students are required to present documentation of a completed series of HBV immunizations prior to attending clinical. If the student declines to complete the series due to health, religious, or other reasons, a declination form must be signed.

Universal Precautions

Universal precautions will be followed at all times. This method of infection control requires the student to assume that all human blood and specified human body fluids are infectious for HBV, HIV, and other bloodborne pathogens. Where differentiation of types of body fluids is difficult or impossible, all body fluids are to be considered as potentially infectious.

Post-exposure Protocol for Prophylaxis of HBV or HIV

The use of personal protective equipment, appropriate engineering controls, and proper work practices must be continually reinforced among faculty and students to prevent exposure incidents to blood or other potentially infectious materials (OPIM). However, if an incident occurs, faculty and students should report the incident as soon as possible and be fully familiar with the procedures for testing, evaluation, and treatment.

A potential exposure incident can include:

1. Percutaneous inoculation: needle sticks or sharps
2. Non-needle percutaneous injury: open cuts or abrasions
3. Direct mucous membrane contact: accidental splash
4. Non-intact skin contact with blood or OPIM

Initial Response to Exposure

1. Immediately apply first aid as appropriate
2. Allow to bleed freely (for needle stick/puncture injury)
3. Wash thoroughly with soap and water
4. Mucous membrane: flush copiously with water
5. Eyes: Irrigate and/or flush copiously with water
6. Document the incident, including:
   - Route of exposure
   - How and when exposure occurred

- The source individual, if known

7. Report exposure immediately to nursing, medical assisting, or science faculty and appropriate supervisor on campus or at the clinical agency.

Post Exposure Response by Students

In the event a student receives a needle puncture injury or other parenteral contact, the guidelines of the affiliating agency shall be followed. It is the injured/exposed student's responsibility to report and follow the criteria established by the facility to report the incident to the instructor, and to address any expenses incurred. The College will not accept responsibility for expenses incurred.

1. Student and instructor should determine immediately if the incident involved a clean or used needle.
2. Any student on clinical rotation who has a needle puncture shall be sent to his/her physician or other health care agency. Protocols of the facility will be followed.
3. Injuries sustained with needles that have not been used on patients or their blood products require careful cleansing. Ice should be applied to the wound if needle contained a vesicant chemotherapeutic agent. Tetanus prophylaxis should be individualized.
4. If a student reports a potential exposure incident to blood or OPIM, the following CDC guidelines are to be followed.
   - A student should be tested for HIV to establish zero negativity first, followed by a retest at 6 weeks, 3 months, 6 months, and one year. Students are financially responsible for any cost incurred with testing or treatment.
   - A blood borne exposure form should be completed and taken to the health care provider for appropriate testing and possible treatment. A copy will be kept in a confidential file. If the student elects not to follow the guidelines, she or he must sign the declination statement.

Information obtained from http://www.cdc.gov .

Academic Programs

Nursing Programs

Nursing Programs

- The PN and ADN programs are full-time programs with classroom, lab, and clinical components. Some individuals may be eligible to complete the PN program according to a part-time scheduling track.
- Enrollment for the Indianapolis PN program and Ohio ADN programs occurs 4 times per year (January, April, July and October).
- Enrollment for the Ohio and Michigan PN programs occurs 4 times per year (March, June, September, and December).
- The PN and ADN programs require a specific number of hours of clinical practice per week, depending on the course.

Clinical shifts are usually 6-12 hours in length and may be scheduled during the day, evening, or weekends. The College has clinical agreements with long term care facilities, MRDD facilities, daycares, hospitals, hospice, surgery clinics, and government agencies to provide students with a thorough, hands-on learning experience.

Diploma in Practical Nursing - Ohio and Michigan

- Arranged to be completed in 1 two-week prerequisite module and 4 eleven-week quarters for full-time students, or 1 two-week prerequisite module and 7 eleven-week quarters for part-time students.
- Students who graduate from the PN program will be eligible to apply for the NCLEX®-PN exam.
- After graduation from the PN program and passing the NCLEX®-PN exam, students may choose to begin their career as a Licensed Practical Nurse and/or apply to the Associate Degree in Nursing program.

PN program details: Ohio

PN program details: Michigan

Diploma in Practical Nursing - Indiana

- Arranged to be completed in 4 quarters.
- Students who graduate from the PN program will be eligible to apply for the NCLEX®-PN exam.
- After graduation from the PN program and passing the NCLEX®-PN exam, students may choose to begin their career as a Licensed Practical Nurse and/or apply to the Associate Degree in Nursing program.

PN program details: Indiana

Associate Degree in Nursing - Associate of Applied Science - Ohio

- Arranged to be completed in 5 quarters.
- Students who graduate from the ADN program will be eligible to apply for the NCLEX®-RN exam.
- After graduation from the ADN program and passing the NCLEX®-RN exam, students may choose to begin their career as a Registered Nurse and/or apply to an RN-BSN completion program.

ADN program details: Ohio

Nursing Mission and Framework

Hondros College of Nursing strives to serve society and the community. Our Practical Nursing and Associate Degree in Nursing programs respond to society's healthcare needs and specifically to the nursing shortage. These nursing programs will stress the highest standards and values as they provide an educational ladder for Licensed Practical Nurses to become Associate-degreed Registered Nurses.

The curricular design of the programs promotes the opportunity for students to continue their nursing education. The nursing faculty is committed to providing high quality nursing education.

There are four (4) major concepts supporting the framework for education in the nursing programs. They are:

Human Beings

Human beings are individuals who are unique and ever-changing as they move toward achieving their own individual potential. They are accountable for their own actions and decisions, although their behavior is influenced by both internal factors such as state of health, life stage development, and age, as well as external factors such as environmental, socioeconomic status and cultural practices. Human beings are parts of families, groups, and communities.

Health

Health is optimal body and mental functioning. It is a process by which an individual uses available resources to achieve his or her maximum potential or health. This requires effective balancing of internal and external systems. The inability to do so results in illness. Health is further defined by one's perception of his/her own well-being. Everyone has the right to optimal healthcare which is a shared responsibility of health professionals and the individuals for whom they care.

Environment

The environment consists of the interaction between one's internal and external systems. The internal system includes the individual's biological, psychological, and spiritual components, while the external system is composed of a person's social network, sociocultural influences, family, healthcare systems and political and economic policy. One's external environment can influence health and healing in both positive and negative ways. Nursing strives to optimize the environment to promote health.

Nursing

Nursing is an art and a science that provides a human service. It integrates biological principles, behavioral sciences, technological theories, research, and caring to assist individuals and families to reach their maximum health potential. The nurse/client relationship is collaborative as the goal of health promotion, health maintenance and health restoration is accomplished. Through the use of the nursing process and therapeutic communication skills, nurses provide caring and respectful care to their clients. Nurses collaborate with other healthcare professionals, consumers, and health care policy makers.

Nursing Conceptual Framework

An organizing framework for the Program was chosen to reflect not only a contemporary high-quality curriculum, but also a curriculum that is innovative in teaching and learning opportunities, and relevant to the practice of nursing at the practical nurse and registered nurse levels. To that end, the organizing framework of a concept-based curriculum has been adopted. The evolution from a content-based, medical model curriculum to a concept-based curriculum reflects the need for nurses to be critical thinkers and continuous learners.

The organizing framework is based on Giddens's *Concepts for Nursing Practice*. The Concepts for Nursing Practice framework is organized into 1) specific overarching units; 2) themes; and 3) concepts. Each overarching unit has specific themes. The themes have concepts to further organize knowledge. Concepts are integrated throughout the curriculum in order to meet specific course objectives and student learning outcomes. The progression of knowledge occurs as concepts and exemplars (examples) are leveled from basic to complex throughout the curriculum.

The faculty of Hondros College of Nursing has identified a multitude of concepts that are woven throughout the program offering structure as a conceptual framework for the curriculum. The conceptual framework is built upon the major components of the philosophy: human beings, nursing, environment, and health. The supporting concepts of nursing roles, teaching-learning, therapeutic interventions, culture, standards of practice, ethical and legal principles, nursing process, critical thinking, therapeutic communication, caring and client advocacy, professional accountability, and leadership and management help students develop and expand in their role as a nurse.

Nursing Roles

Nurses practice within three (3) specific roles: provider of care, manager of care, and member of the discipline of nursing.

At the practical nursing level, the graduate role, under the direction of a Registered Nurse, includes the following:

Provider of Care

1. Participates collaboratively in the nursing process by contributing to data collection for assessment, implementation, and evaluation of individualized plans of care.
2. Uses critical thinking, standards of practice, and organizational skills in providing individualized nursing care to clients based on developmental, physiological, sociocultural, religious, and spiritual variations in clients.
3. Performs basic therapeutic nursing interventions using nursing knowledge, skills, and current technologies in a competent and safe manner.
4. Acts as a client advocate showing caring, empathy, and respect for the rights, beliefs, property, and dignity of the individual.
5. Manages assignment of clients and delegates within the scope of practice to trained unlicensed personnel.
6. Practices the principles of effective and therapeutic communication with clients and their families.
7. Communicates pertinent observations related to the client to appropriate members of the health team.
8. Documents observations and care appropriately.

Member of the Discipline of Nursing Practices

1. Within the profession’s ethical and legal framework, being accountable for one’s own nursing practice and professional growth.

At the ADN level, the graduate role expands to include the following:

Provider of Care

1. Uses the nursing process (assessment, diagnosis, planning, implementation, and evaluation) and standards of practice as a basis for clinical decision-making in developing individualized plans of care.
2. Performs complex therapeutic interventions using nursing knowledge, advanced skills, and current technology in a competent and safe manner.

Manager of Care

1. Demonstrates leadership and accountability.
2. Delegates tasks appropriately.
3. Supervises assistive and unlicensed personnel and PNs.
4. Manages client care within a multidisciplinary healthcare system.
5. Collaborates and communicates effectively with clients, families, and health team members.

Member of the Discipline of Nursing

1. Demonstrates an awareness of community and world health issues and their impact on individuals and healthcare.

At the BSN level, the graduate role expands to include the following:

Provider of Care

1. Provides advanced clinical reasoning and problem-solving skills when working with clients with more complex needs.
2. Manages advanced technology and applies scientific reasoning skills when applying evidence-based research findings in the clinical setting.
3. Ability to read and utilize appropriate research findings in the practice arena.
4. Develops strong humanistic and communication skills when caring for clients who have complex, multiple organ dysfunction, complicated family dynamics, and a need for collaboration with physicians and other departments for referral.

Manager of Care

1. Provides leadership in both structured and non-structured settings.
2. Ability to practice in community sites, such as health maintenance organizations, home health, community clinics, and managed care firms.
3. Applies advanced critical thinking skills to clinical decisions that enhance the quality of care for clients.

Member of the Discipline of Nursing

1. BSN-level nurses are prepared to assume leadership roles in the community, join professional organizations, become advocates at a legislative level, and complete specialty certification in their area of expertise.

Teaching - Learning

Teaching – learning is a dynamic process by which the teacher promotes active student involvement in the learning process by acting as a facilitator, focusing on individual student learning styles and diverse needs. Effective teachers empower learners to think critically, communicate effectively in speaking, writing, and interaction with others, as well as reflect on their own learning to make it more meaningful.

Learning is a life-long process. Due to the generation of new knowledge that keeps health care content ever changing, learning experiences must focus on developing student abilities to be self-directed in gathering, analyzing and integrating new knowledge into their existing knowledge base. This will enable them to develop creative and innovative solutions to intellectual and clinical problems.

Therapeutic Interventions

Therapeutic interventions are the skills and techniques used by nurses to implement the plan of care developed in the nursing process. These skills and techniques help clients achieve the desired outcomes.

Culture

Culture refers to one’s values, beliefs, norms, and practices of these systems in one’s life. Cultural awareness or knowing about the similarities and differences among cultures helps to end prejudice and discrimination. Nurses must provide culturally competent care, appreciating the diversity and adapting care to fit the cultural context of the client

Standards of Practice

Standards of practice are formal statements by a profession related to quality of care and accountability of its practitioners. Evidence based practice is essential for quality nursing care.

Ethical and Legal Principles

Nurses routinely practice using the beliefs and values inherent in professional nursing. Ethical decision making is guided by the Nurse’s Code of Ethics, while the Nurse Practice Act and governing laws provide rules of conduct and regulations to guide the nurse legally.

Nursing Process

Nursing process is a specific problem-solving method nurses use for decision-making. It is comprised of five (5) specific steps:

1. Assessment
2. Diagnosis
3. Planning
4. Implementation using therapeutic interventions
5. Evaluation

Critical Thinking

Critical thinking is a purposeful process that enables a nurse to interpret, clarify and analyze nursing problems, as well as generate multiple therapeutic solutions, evaluating the merits and shortcomings of each. In this process, one monitors and reflects on his/her own thinking and learning.

Therapeutic Communication

Therapeutic communication is an art in which nurses use interpersonal skills to help clients communicate their thoughts and feelings while displaying non-judgmental acceptance that promotes trust, an essential element to the therapeutic nurse-client relationship. Communication techniques, self-awareness and collaborative skills are essential components of therapeutic communication.

Caring and Client Advocacy

Caring is an art in which the nurse watches over, attends to, and provides for the needs of clients. Essential to caring is an attitude of respect, empathy, and nurturing. Client advocacy is acting in the best interest of the client. Nurses must advocate for clients who are unable to do so for themselves.

Leadership and Management

Leadership is a role and a process in which the nurse involves others in their plan for action. The leader must use the skills of facilitation, coordination, communication and mentoring to get others to work more effectively. Management regulates care and resources through planning, organizing, directing, delegating, coordinating, and controlling.

Essential Functions

Graduates of the Practical Nursing, Associate Degree in Nursing, and Medical Assisting programs must have the essential skills and knowledge to function in a broad variety of healthcare settings and demonstrate a commitment to life-long learning.

Essential functions are those processes, procedures, or behaviors that nursing professionals must perform in the ordinary course of their duties. Essential job functions are non-academic qualities that employees must possess in order to be successful in the field. Students in the Practical Nursing, Associate Degree in Nursing, and Medical Assisting programs must carry out several essential functions in order to safeguard patients, fellow students, instructors, and the general public. These essential functions are also necessary in order for the student to successfully complete the Practical Nursing, Associate Degree in Nursing, or Medical Assisting program.

If a student or applicant has a disability and thinks that they may require a reasonable accommodation to meet these essential functions, then the student or applicant should refer to the process outlined in the Americans with Disabilities Act (ADA) policy in this Catalog.

Practical Nursing, Associate Degree in Nursing, and Medical Assisting students understand and acknowledge that these essential functions include, but are not limited to:

Critical Thinking

Students must demonstrate the ability to have clinical judgment to provide safe, quality patient care; and the ability to acquire, assimilate, integrate, and apply information, and problem solve.

Interpersonal

- Students must be able to recognize and accept responsibility for his or her own mistakes and behavior, without making excuses or blaming others.
- Students must demonstrate acceptance of differences of race and culture.
- Students must be able to engage in actions that support teamwork and respond to corrections and criticism without being quarrelsome or defensive.

Communication

- Students must be able to communicate fluently in English by written and oral and/or alternate means, including the ability to successfully receive and transmit information.
- Students must be able to read and follow instructions and ask for clarification, if necessary.

Sensory

- Students must be able to perform close and distance visual activities involving objects, persons, and paperwork as well as discriminate depth and color perception.
- Students must be able to perform a patient assessment through visualization, direct and indirect auscultation, and detection of odors, palpation, and percussion.
- Students must be able to discriminate between sharp/dull and hot/cold when using hands.
- Students must be able to respond and react immediately to auditory requests, instructions, monitor equipment, and perform auditory auscultation without auditory impediments.

Motor

Students must demonstrate dexterity and range of motion conducive to assisting patients and manipulating equipment without threatening harm or violating safety protocols.

Mobility

- Students must be able to engage in and sustain physical activity that may require sitting, standing, or walking for extended periods of time.
- Students must be able to lift and transfer patients up to six inches from a stooped position, then push or pull the patient up to three feet. In addition, students must be able to lift and transfer patients from a stooped to an upright position to accomplish bed-to-chair and chair-to-bed transfers.
- Students must be able to physically apply up to 10 pounds of pressure to bleeding sites or in performing CPR.
- Students must be able to physically perform up to a 12-hour clinical experience.

Behavioral

Students must be able to accurately perform duties in a stressful environment. This includes, but is not limited to, identifying and responding to emergency and non-routine situations.

Cognitive

Students must be able to use previous theory content/skills to enhance learning; comprehend written and verbal information; apply previous content/skills in new situations; and organize and synthesize facts and concepts.

Ethical

Students must uphold honesty and personal integrity in all campus/clinical activities and must be able to function as a patient advocate when planning and implementing nursing care.

Diploma in Practical Nursing

Diploma in Practical Nursing - Ohio

Overview

Program Outcomes

Upon successful completion of one (1) two-week module and four (4) eleven-week quarters* (46 weeks) of the Practical Nursing curriculum, and meeting all graduation requirements, the graduate will be awarded a diploma and be certified to the Ohio Board of Nursing, which will determine the student's eligibility to sit for the National Council Licensure Examination for Practical Nurses (NCLEX®-PN). The one (1) two-week module is a required prerequisite for the four (4) eleven-week degree program. The one (1) two-week module is a no-cost, no-materials needed, non-transferable, no-credit, non-Title IV (Federal Financial Aid) eligible course. Within the scope of practice for the licensed practical nurse, and at the direction of a licensed physician, dentist, podiatrist, optometrist, chiropractor or registered nurse, the graduate will meet the client's needs by fulfilling the following program outcomes:

1. Provide safe, quality, evidence-based, patient-centered nursing care to diverse patients across the lifespan in a variety of structured healthcare settings within the scope of practice of the Practical Nurse.

- Collect data related to physical, behavioral, psychological, and spiritual aspects of health and illness parameters in patients experiencing common health problems, using developmentally and culturally appropriate approaches.
- Work with the Registered Nurse or other healthcare provider to identify patient needs based on the data collected.
- Contribute to a patient-centered plan of care based on knowledge of evidence and patient information/preferences to meet individual patient needs.
- Provide patient-centered care focusing on restoration, promotion, and maintenance of physical and mental health.
- Incorporate factors that create a culture of safety when providing patient care.
- Provide patient teaching that reflects developmental stage, age, culture, spirituality, patient preferences, and health literacy considerations.
- Implement nursing interventions to prevent illness, and restore, promote and maintain physical and mental health of patients across the lifespan.
- Analyze collected patient outcome data to determine the effectiveness and impact of nursing care.
- Deliver care within expected time frame.
- Communicate information about care provided and evaluation data including appropriate hand-off at each transition in care.
- Incorporate cultural awareness/sensitivity when providing care to diverse patients in a variety of healthcare settings.
- Assist with the revision of the plan of care based on an ongoing collection of patient data including recognition of alterations to previous patient conditions.

- Safely perform all psychomotor skills needed for efficient, safe, and compassionate patient care including accurate calculation of dosages.
- Accurately document all aspects of patient care.

2. Engage in clinical judgment to make patient-centered care decisions within the scope of practice of the Practical Nurse.

- Use clinical judgment to ensure accurate and safe care when implementing all steps of the nursing process.
- Anticipate risks, and predict and manage potential complications for patients experiencing common health problems.
- Prioritize patient care.
- Incorporate knowledge of the healthcare system and how it impacts the nurse's ability to provide safe, quality care.

3. Incorporate quality improvement activities to improve patient care.

- Participate in quality improvement activities.
- Use the data from quality improvement activities to plan patient care.
- Report identified quality improvement concerns to appropriate personnel (e.g., nurse manager, risk manager, etc.).
- Implement National Patient Safety Goals in all applicable patient care settings.

4. Participate in teamwork and collaboration with the inter-professional team, the patient, and the patient's support persons.

- Share pertinent, accurate, and complete information with the inter-professional team.
- Work with the Registered Nurse to plan for patient safety and quality improvements within the context of the interprofessional team.
- Interpret the impact of team functioning on safety and quality improvement.

5. Use information technology to support and communicate the provision of patient care.

- Use patient care technologies, information systems/technologies, and communication devices to support safe nursing practice.
- Use high quality electronic sources of healthcare information.
- Enter computer documentation accurately, completely, and in a timely manner.

6. Incorporate management, legal, and ethical guidelines within the scope of practice of a Practical Nurse.

- Practice within the legal and ethical frameworks of Practical Nursing.
- Demonstrate accountability for nursing care given by self and/or delegated to unlicensed personnel.
- Delegate nursing tasks to unlicensed personnel.
- Advocate for patient rights and needs.
- Initiate a plan for ongoing professional development and lifelong learning.

7. Promote a culture of caring to provide support, compassion and culturally-competent, holistic care.

- Provide support, empowerment, and hope when caring for diverse patients.
- Reflect on care provided to continue to improve caring relationships.
- Deliver compassionate, culturally-competent care that respects patient and family preferences.
- Maintain an environment conducive to well-being.

**Full-time students only. Part-time students in Ohio will complete one (1) two-week module and seven (7) eleven-week quarters.*

Admission Requirements

Admission Requirements

Acceptance to Hondros College of Nursing is based on the following requirements:

1. The applicant must be a U.S. citizen or permanent resident of the United States. The applicant must submit official, un-expired government-issued documentation needed for admission (driver's license, state ID, passport, or proof of citizenship or permanent residency if not a U.S. citizen);
2. The applicant must be at least 18 years of age or older at the time he or she starts the program;
3. The applicant must complete and sign the application for admission and pay the applicable application fee;
4. The applicant must complete the Student Online Readiness Survey. For technology requirements, refer to the "Technology Requirements and Acceptable Use Policy". There are no additional costs to enroll in courses offered only via distance education;
5. The applicant must be a high school graduate or possess the recognized equivalent of a high school diploma. The applicant must provide documentation of graduation from high school in the form of a valid high school diploma, transcript, or other acceptable documentation issued by an authorized state education agency (e.g., General Education Development (GED)). Applicants for Indiana state must provide a high school transcript, or other acceptable documentation issued by an authorized student education agency (e.g., General Education Development (GED)). International transcripts/documents need to be evaluated by an organization that is a member of the National Association of Credential Evaluation Services (NACES) or Association of International Credential Evaluators, Inc. (AICE); and
6. The applicant must complete and sign the enrollment agreement and pay any applicable enrollment agreement fees.

Additional Requirements for Ohio Practical Nursing Applicants:

1. The applicant must have an ACT Score of 18 within 5 years, or an SAT score of 980 within 5 years, or take the Wonderlic SLE and receive a cumulative score of 18 or the HESI Admission Assessment Exam and achieve a cumulative score of 70% or higher.
2. The applicant must complete an interview with an admissions representative.
3. The applicant must complete a federal and state criminal background check via Viewpoint Screening or National Background Check, Inc., and pay the applicable fee (certain convictions and/or pending charges may result in an adverse admissions decision).

- Provide support, empowerment, and hope when caring for diverse patients.
- Reflect on care provided to continue to improve caring relationships.
- Deliver compassionate, culturally-competent care that respects patient and family preferences.
- Maintain an environment conducive to well-being.

Admission Requirements

Admission Requirements

Acceptance to Hondros College of Nursing is based on the following general requirements.

1. The applicant must be a U.S. citizen or permanent resident of the United States. The applicant must submit official, un-expired government-issued documentation needed for admission (driver's license, state ID, passport, or proof of citizen-ship or permanent residency if not a U.S. citizen) The applicant's physical location, as it pertains to courses offered via distance education, will be determined by the address listed on the un-expired government-issued document;
2. The applicant must be at least 18 years of age or older at the time he or she starts the program;
3. The applicant must complete and sign the application for admission and pay the applicable application fee;

4. The applicant must complete the Student Online Readiness Survey. For technology requirements, refer to the “Technology Requirements and Acceptable Use Policy”. There are no additional costs to enroll in courses offered only via distance education
5. The applicant must be a high school graduate or possess the recognized equivalent of a high school diploma. The applicant must provide documentation of graduation from high school in the form of a valid high school diploma, transcript, or other acceptable documentation issued by an authorized state education agency (e.g., General Education Development (GED)). International transcripts/documents need to be evaluated by an organization that is a member of the National Association of Credential Evaluation Services (NACES) or Association of International Credential Evaluators, Inc. (AICE); and
6. The applicant must complete and sign the enrollment agreement and pay any applicable enrollment agreement fees.

Additional Requirements for Indiana Practical Nursing Applicants

1. The applicant must have an ACT Score of 18 within 5 years, or an SAT score of 980 within 5 years, or take the HESI Admission Assessment Exam and achieve a cumulative scor of 70% or higher.
2. The applicant must complete an interview with an admissions representative.
3. The applicant must complete a federal and state criminal background check via Viewpoint Screening or Indiana State Police, and pay the applicable fee (certain convictions and/or pending charges may result in an adverse admissions decision);
4. The applicant must complete a 10-panel drug screen through LabCorp, and pay the applicable fee. A positive result on the drug screen may result in an adverse admissions decision.

Associate Degree in Nursing (ADN) - Ohio

Overview

Program Outcomes

Upon successful completion of five (5) quarters (55 weeks) of the Associate Degree in Nursing curriculum, and meeting all graduation requirements, the graduate will be awarded an Associate Degree in Nursing (Associate of Applied Science degree). The graduate will be certified to the Ohio Board of Nursing, which will determine the graduate's eligibility to sit for the National Council Licensure Examination for Registered Nurses (NCLEX®-RN). Graduates of the Associate Degree in Nursing Program will be able to meet the client's needs by fulfilling the following program outcomes:

1. Provide safe, quality, evidence-based, patient-centered nursing care to diverse patients across the lifespan in a variety of healthcare settings.

- Complete a comprehensive and/or focused physical, behavioral, psychological, and spiritual assessment of health and illness parameters in patients, using developmentally and culturally appropriate approaches.
- Use assessment findings to identify patient needs.
- Develop a plan of care based on evidence-based practice considering individual patient needs.
- Provide patient-centered care based on an understanding of human growth and development, pathophysiology, pharmacology, nutrition, medical management, and nursing management.
- Promote factors that create a culture of safety.
- Provide teaching that reflects the patient's developmental stage, age, culture, religion, spirituality, patient preferences, and health literacy considerations.
- Monitor patient outcomes to evaluate the effectiveness and impact of nursing care.
- Deliver care within expected time frame.
- Provide patient-centered transitions of care and hand-off communications.
- Revise the plan of care based on an ongoing evaluation of patient outcomes.
- Safely perform psychomotor skills.
- Accurately document all aspects of patient care.

2. Exercise clinical judgment to make increasingly complex patient-centered care decisions in a safe care environment.

- Use clinical judgement to make management decisions to ensure accurate and safe nursing care, including addressing anticipated changes in the patient's condition.
- Anticipate risks, and predict and manage potential complications.
- Prioritize patient care.
- Examine the clinical microsystem to determine its impact on the nurse's ability to provide safe, quality care.

3. Participate in quality improvement processes to improve patient care outcomes.

- Use quality improvement processes to effectively implement patient safety initiatives and monitor performance measures, including nursing-sensitive indicators.
- Analyze information about quality improvement processes used in a variety of healthcare settings.
- Participate in analyzing errors and identifying system improvements.

- Implement National Patient Safety Goals in all applicable patient care settings.

4. Participate in teamwork and collaboration with members of the inter-professional team, the patient, and the patient's support persons.

- Effectively communicate with all members of the healthcare team, including the patient and the patient's support network when making decisions and planning care.
- Collaborate with appropriate inter-professional healthcare professionals when developing a plan of care.
- Use conflict resolution principles as needed.

5. Use information management systems and patient care technology to communicate, manage knowledge, mitigate error, and support decision-making.

- Use patient care technologies, information systems/technologies, and communication devices to support safe nursing practice.
- Evaluate the role of information technology and information systems in improving patient outcomes and creating a safe care environment.

6. Incorporate leadership, management, legal, and ethical principles to guide practice as a Registered Nurse.

- Practice within the legal and ethical frameworks of Registered Nursing practice.
- Analyze patient care within the context of the ANA Standards of Practice.
- Demonstrate accountability for nursing care given by self and/or delegated to others.
- Apply leadership and management skills when working with other healthcare team members.
- Serve as a patient advocate.
- Evaluate the impact of economic, political, social, and demographic forces on the provision of health care.
- Complete a plan for ongoing professional development and lifelong learning.

7. Promote a culture of caring to provide holistic, compassionate patient care.

- Provide support, empowerment, and hope when caring for diverse patients in a variety of healthcare systems.
- Deliver compassionate, culturally-competent care that respects patient and family preferences.

Students will receive 48 advance standing credits for completion of their approved practical nursing program or previously completed college equivalent work.

Admission Requirements

Admission Requirements

Acceptance to Hondros College of Nursing is based on the following general requirements:

1. The applicant must be a U.S. citizen or permanent resident of the United States. The applicant must submit official, un-expired government-issued documentation needed for admission (driver's license, state ID, passport, or proof of citizenship or permanent residency if not a U.S. citizen);
2. The applicant must be at least 18 years of age or older at the time he or she starts the program;
3. The applicant must complete and sign the application for admission and pay the applicable application fee;
4. The applicant must complete the Student Online Readiness Survey. For technology requirements, refer to the "Technology Requirements and Acceptable Use Policy". There are no additional costs to enroll in courses offered only via distance education
5. The applicant must be a high school graduate or possess the recognized equivalent of a high school diploma. The applicant must provide documentation of graduation from high school in the form of a valid high school diploma, transcript, or other acceptable documentation issued by an authorized state education agency (e.g., General Education Development (GED)). Applicants for Indiana state must provide a high school transcript, or other acceptable documentation issued by an authorized student education

agency (e.g., General Education Development (GED)). International transcripts/documents need to be evaluated by an organization that is a member of the National Association of Credential Evaluation Services (NACES) or Association of International Credential Evaluators, Inc. (AICE); and

6. The applicant must complete and sign the enrollment agreement and pay any applicable enrollment agreement fees.

Additional Requirements for ADN Applicants in Ohio

Applicants may be admitted to the Associate Degree in Nursing program by meeting the criteria of either having completed an approved practical nursing program or through the direct entry option.

1. The applicant must complete an interview with an admissions representative;
2. The applicant must complete a criminal background check via Viewpoint Screening or National Background Check, Inc., and pay the applicable fee (certain convictions and/or pending charges may result in an adverse admissions decision).

Practical Nursing Program Completers Option

1. Applicants who have not graduated from Hondros College of Nursing Practical Nursing Program are required to have, and maintain throughout the duration of the program, an active unencumbered PN license. Failure to maintain an active, unencumbered license throughout the duration of the program will result in being administratively withdrawn from the College.
2. Applicants must have graduated from an approved practical nursing program. Submission of a practical nursing program transcript is required. International transcripts/documents need to be evaluated by an organization that is a member of the National Association of Credential Evaluation Services (NACES) or Association of International Credential Evaluators, Inc. (AICE).
3. Hondros College of Nursing's Practical Nursing program graduates applying to start the Associate Degree in Nursing Program the quarter immediately following their PN graduation may be admitted to the program prior to possessing an active unencumbered PN license, but must obtain, and maintain throughout the duration of the program, an active, unencumbered PN license prior to the start of their second quarter of enrollment in the Associate Degree in Nursing Program. Failure to obtain an active, unencumbered PN license prior to the start of the second quarter of enrollment in the Associate Degree in Nursing Program, or to maintain the license throughout the duration of the program, will result in being administratively withdrawn from the College.
4. If the applicant’s PN license shows a prior history of disciplinary action by a state Board of Nursing, the license history must be reviewed and approved by the ADN Program Administrator. This review may result in an adverse admissions decision.
5. Applicants that have completed a practical nursing program are not eligible for the Direct Entry option.

Direct Entry Option

1. The applicant must have completed a minimum of 32 semester credits/48 quarter credits of associate level or higher general education course work from prior college experience as determined by an official evaluation completed by Hondros College of Nursing. Coursework will be granted as Advanced Standing credit. Coursework eligible for transfer credit will not be granted as advanced standing credit. Please refer to the Transfer Credit Policy. International transcripts/documents need to be evaluated by an organization that is a member of the National Association of Credential Evaluation Services (NACES) or Association of International Credential Evaluators, Inc. (AICE).
2. An unofficial transcript is required from each previous post-secondary institution attended. The applicant must have earned a cumulative GPA of 2.50, or higher, from each prior college experience. Applicants that have not achieved a minimum cumulative GPA of 2.50 may request an appeal with the Campus Executive Director. The Campus Executive Director will notify the applicant of the appeal decision in writing. Official transcripts will be required from institutions where courses are being applied towards the Advanced Standing credits. Applicants with an earned bachelor’s degree do not have a cumulative GPA requirement.
3. The applicant must have an ACT score of 19 within 5 years, or an SAT score of 1030 within 5 years, or take the Wonderlic SLE and receive a cumulative score of 22 or the HESI Admissions Assessment Exam and achieve a cumulative score of 75% or higher. The HESI Admissions Assessment Exam will include the following components: Reading Comprehensive, Grammar, Vocabulary & General Knowledge, Math, Anatomy & Physiology, and Biology.

Curriculum

Associate Degree in Nursing Program Curriculum - Ohio (Effective April 7, 2019)

This is the current curriculum and applies to all students who started on or after April 7, 2019.

- 61 Quarter Credits
- 48 Advance Standing Credits
- 1,530 Clock Hours
- 55 Weeks
- 109 credits awarded for Associate Degree in Nursing (AAS)

ENG205 Prerequisite: The prerequisite for ENG205 is ENG200: English Composition I. Students will not receive transfer credit for ENG200, but are required to satisfy the prerequisite by:

1. Submitting documentation showing successful completion of equivalent course at another institution
2. Submitting documentation of CLEP credit for equivalent course
3. Completing ENG200 at Hondros College of Nursing before registering for ENG205

Course Descriptions

Explanation of Course Numbering System

The College utilizes intuitive course prefixes, typically abbreviations or truncations of the actual course subject name, for all credit courses (i.e., Psychology is noted as PSY). It continues to follow the numbering system noted below. The college does not offer remedial courses.

- **100 level:** These courses are entry level or first year courses as related to their subject matter.
- **200 level:** These courses are college level as related to their subject matter.

Course Codes	Course Subject	Legend
BIO	Biology	**C** Offered in the classroom
COM	Communications	**O** Offered online - Traditional Online Course
ENG	English	† Science Course
NUR	Nursing	▲ General Education Course
PSY	Psychology	✱ Core Course
MTH	Mathematics	

Courses Offered via Distance Education

Hondros College of Nursing utilizes two different modalities for delivering distance education: asynchronous “traditional” online courses delivered through the MyClassroom learning management system, and synchronous virtual lectures delivered using broadcasting software like Zoom.

Asynchronous online courses delivered via the MyClassroom learning management system emphasize interaction between students and their faculty, their peers, and the course content. In these courses, students will engage with course material presented in slideshows, readings, and other media; interact with other students via discussion forums, peer reviews, and group activities; review instructor feedback on papers, projects, and other assignments; take tests and quizzes through the online classroom; and communicate with the instructor using a variety of tools, including email, a course chat room, and/or a synchronous virtual classroom.

Select courses in the Practical Nursing and Associate Degree in Nursing are only offered online in the asynchronous modality. These courses, designated as “offered online” on the program curriculum tables in this Catalog, are delivered by the Columbus, OH Campus the Akron, OH; Bingham Farms, MI; Dayton, OH; Independence, OH; Indianapolis, IN; Maumee, OH; and West Chester, OH Campuses. The delivery of courses has no impact on student licensure or employment, nor will students incur any additional charges for enrollment in these courses.

Students enrolled in an online course must adhere to the Single Course Drop Policy and the Withdrawal Policy in the Student Catalog for the program in which they are enrolled. The time that a student should expect to devote to the mastery of course learning objectives does not vary with the instructional delivery method. All students receive information about how to access and use the online classroom as part of an orientation experience.

On-ground lectures may have a synchronous virtual lecture option. Students participating in a virtual lecture option are not considered as enrolled in a traditionally offered online course.

BIO 117 Introduction to Anatomy and Physiology C†Δ

4 Quarter Credit Hours

Lecture: 4 Credits
Lecture: 40 clock hours

This course serves as an introduction to the structure and function of the human body, including basic chemical, physical and cellular principles for students in the practical nurse program. The course uses a body systems approach, with emphasis on the interrelationships between form and function at the gross and microscopic levels of organization. Introduction to Anatomy and Physiology includes: basic anatomical and directional terminology; fundamental concepts of physics, chemistry, biochemistry, cell biology and histology. The course covers the anatomy and physiology of the integumentary, muscular, skeletal, respiratory, cardiovascular, blood, urinary, reproductive, lymphatic, endocrine, nervous and sensory systems and the fundamental structural and physiological concepts of reproduction, heredity, human development, fluid-electrolyte balance, microbiology, immunology and nutrition.

Prerequisites: Indianapolis campus: None | Ohio and Michigan campuses: **COL 099**

BIO 253 Anatomy and Physiology I C†Δ

5 Quarter Credit Hours

Lecture: 4 Credits, Lab: 1 Credit
Lecture: 40 clock hours, Lab: 20 clock hours

This course is a detailed study of the structure and function of the human body. This is the first of a two-part series designed to introduce students to the fundamentals of human anatomy and physiology. The course uses a body systems approach, with emphasis on the interrelationships between form and function at the gross and microscopic levels of organization. Anatomy & Physiology I includes: cellular biology, the nervous, endocrine, cardiovascular, respiratory, and urinary systems. Microbiology and pathophysiology will also be discussed, as they relate to the various systems. Laboratory experiences include both hands-on study of anatomical models and simple physiology experiments.

BIO 254 Anatomy and Physiology II C†Δ

3 Quarter Credit Hours

Lecture: 2 Credits, Lab: 1 Credit
Lecture: 20 clock hours, Lab: 20 clock hours

This course is a detailed study of the structure and function of the human body. This is the second of a two-part series designed to introduce students to the fundamentals of human anatomy and physiology. The course uses a body systems approach, with emphasis on the interrelationships between form and function at the gross and microscopic levels of organization. Anatomy & Physiology II includes: the musculoskeletal system, endocrine, the lymphatic system and immunity, digestion and nutrition, reproduction, development and genetics. Microbiology and pathophysiology will also be discussed, as they relate to the various systems. Laboratory experiences include both hands-on study of anatomical models and simple physiology experiments.

Prerequisites: **BIO 253**

BIO 254 Anatomy and Physiology II C†Δ

3 Quarter Credit Hours

Lecture: 2 Credits, Lab: 1 Credit
Lecture: 20 clock hours, Lab: 20 clock hours

This course is a detailed study of the structure and function of the human body. This is the second of a two-part series designed to introduce students to the fundamentals of human anatomy and physiology. The course uses a body systems approach, with emphasis on the interrelationships between form and function at the gross and microscopic levels of organization. Anatomy & Physiology II includes: the musculoskeletal system, endocrine, the lymphatic system and immunity, digestion and nutrition, reproduction, development and genetics. Microbiology and pathophysiology will also be discussed, as they relate to the various systems. Laboratory experiences include both hands-on study of anatomical models and simple physiology experiments.

Prerequisites: **BIO 253**

COL College Strategies

COL 099 Strategies for Successful Nursing Professionals CΔ

0 Quarter Credit Hours

Lecture: 0 Credits
Lecture: 10 clock hours (Indianapolis campus - 5 weeks) (Ohio/Michigan campuses - 2 weeks)

This course will help students become familiar with expectations for academic success at the college level. The learning activities will help students understand their learning style and enhance their study skills to maximize academic success. Students will learn basic computer literacy and be introduced to the college's student portal. Students will learn how to use the needed technology for success in the nursing program. The course will emphasize time management skills, stress reduction activities, and test anxiety coping strategies.

COM Communications

COM 200 Public Speaking C Δ

2 Quarter Credit Hours

Lecture: 2 Credits
Lecture: 20 clock hours

The course will cover various types of communication. Students will practice and hone verbal and nonverbal presentation and listening skills. In addition to preparing and delivering various forms of presentations, students will also study and analyze the content, structure, and style of both oral and written presentations.

ENG English

ENG 200 English Composition I OΔ

3 Quarter Credit Hours

Lecture: 3 Credits
Lecture: 30 clock hours

In this course, students will develop the fundamentals of college-level writing, and produce works of structured written prose. Specific topics include the writing process; mechanics, usage, grammar, and spelling; locating, evaluating, and integrating sources; constructing thesis statements; and proper citing and referencing.

ENG 205 English Composition II OΔ

3 Quarter Credit Hours

Lecture: 3 Credits
Lecture: 30 clock hours

In this course, students continue their development as college-level writers, applying the skills learned in English Composition I to the development of longer and more complex written works. Students will focus primarily on research skills and the effective integration of outside sources into essays and papers. Students will engage with additional topics related to writing style, grammar, mechanics, and usage.

Prerequisites: **ENG 200** or equivalent

MTH Mathematics

MTH 101 Basic Math and Dosage Calculation CΔ

3 Quarter Credit Hours

Lecture: 3 Credits
Lecture: 30 clock hours

This course is designed to enhance the math skills of students essential for the safe administration of medications. This course includes a review of basic mathematics, the metric system, apothecary and household systems, conversions within each system, conversions from one system to another, dosage calculations of oral and parenteral drugs for adult and pediatric patients. The students will also learn basic intravenous calculations and be introduced to principles of pediatric dosage calculations based on weight, and safe dose ranges.

Prerequisites: Indianapolis campus: None | Ohio and Michigan campuses: **COL 099**

MTH 203 College Math and Dosage Calculation CΔ

2 Quarter Credit Hours

Lecture: 2 Credits
Lecture: 20 clock hours

This course is designed to reinforce and enhance the math skills of nursing students essential for the safe administration of medications, and cover essential concepts in college mathematics. Basic mathematic skills, conversions, dosage calculations of oral and parenteral drugs for adult and pediatric patients, intravenous calculations, and safe dosage ranges will be reviewed. Other topics covered include arithmetic expressions; factors and multiples; fractions; decimals; negative numbers; rates, ratios and proportions; and solving application problems involving proportions, percentages, and fractions.

Prerequisites: All Term 1 ADN Courses

NUR Nursing

NUR 150 Fundamental Concepts of Practical Nursing I C*

3 Quarter Credit Hours

Lecture: 2 Credits, Lab: 1 Credit
Lecture: 20 clock hours, Lab: 20 clock hours

This course focuses on fundamental concepts necessary for safe, patient-centered nursing care for a diverse patient population with well-defined healthcare concerns, with an introduction to the legal and ethical responsibilities of the Practical Nurse. This course introduces the use of clinical judgment applied to nursing, the nursing process, cultural diversity, and communication techniques used when interacting with patients, families, other support persons, and members of the inter-professional team. Other program concepts such as evidence-based care, teamwork/collaboration, and information technology are also introduced. Selected nursing skills are taught in the skills laboratory with opportunities to apply fundamental concepts to basic nursing skills.

Prerequisites: Indianapolis campus: None | Ohio (Full-Time) and Michigan campuses: **COL 099**, Ohio (Part-Time) campuses: All Term 1 (Part-Time) PN Courses

NUR 155 Critical Thinking for the Practical Nurse C*

2 Quarter Credit Hours

Lecture: 2 Credits
Lecture: 20 clock hours

This course introduces the learner to critical thinking skills and strategies used in nursing. The student learns to use critical thinking skills and strategies that underscore the clinical judgment represented in the nursing process as well as dealing with aspects of the healthcare system for safe practice in the current healthcare environment. This course forms the basis for the thinking processes applied throughout all nursing courses.

Prerequisites: Indianapolis campus: None | Ohio (Full-Time) and Michigan campuses: **COL 099**, Ohio (Part-Time) campuses: All Term 1 (Part-Time) PN Courses

NUR 160 Fundamental Concepts of Practical Nursing II C*

6 Quarter Credit Hours

Lecture: 3 Credits, Lab: 2 Credits, Clinical: 1 Credit
Lecture: 30 clock hours, Lab: 40 clock hours, Clinical: 30 clock hours

This course is a continuation of Fundamental Concepts of Practical Nursing I, and focuses on fundamental concepts necessary for safe, patient-centered nursing care for a diverse patient population with consideration of the legal and ethical responsibilities of the Practical Nurse. This course applies the thinking learned in Critical Thinking for the Practical Nurse as students learn additional concepts in the classroom and nursing skills in the skills laboratory, and care for patients with common healthcare problems in the clinical setting.

Prerequisites: Ohio (Full-Time), Indiana and Michigan campuses: All Term 1 (Full-Time) PN Courses, Ohio (Part-Time) campuses: All Term 1, and Term 2 (Part-Time) PN Courses

NUR 163 Concepts of Practical Nursing in the Care of Elderly Patients C*

3 Quarter Credit Hours

Lecture: 3 Credits
Lecture: 30 clock hours

This course incorporates and builds on previously learned concepts for the acquisition and application of concepts necessary for safe, patient-centered nursing care of diverse elderly patients considering the legal and ethical responsibilities of the Practical Nurse. Students begin to apply clinical judgment to nursing care of the elderly, the nursing process, cultural diversity, and communication techniques used when interacting with the elderly, their family, other support persons, and members of the inter-professional team. Other program concepts such as evidence-based care, teamwork/collaboration, and information technology are related to the care of the elderly.

Prerequisites: Ohio (Full-Time), Indiana and Michigan campuses: All Term 1 (Full-Time) PN Courses, Ohio (Part-Time) campuses: All Term 1, and Term 2 (Part-Time) PN Courses

NUR 166 Concepts of Family-Centered Nursing for the Practical Nurse C*

4 Quarter Credit Hours

Lecture: 2 Credits, Lab: 2 Credits
Lecture: 20 clock hours, Lab: 40 clock hours

This course incorporates and builds on previously learned concepts for the acquisition and application of basic nursing theory, communication, collaboration, and clinical judgment necessary for safe, patient-centered nursing care to diverse families during childbearing and to children with a focus on growth and development. The course incorporates the legal and ethical responsibilities of the Practical Nurse in the care of the childbearing family and children. Application of knowledge and skills occurs in the nursing skills laboratory.

Prerequisites: Ohio (Full-Time), Indiana and Michigan campuses: All Term 1 and Term 2 (Full-Time) PN Courses, Ohio (Part-Time) campuses: All Term 1, Term 2, and Term 3 (Part-Time) PN Courses

NUR 167 Concepts of Family-Centered Nursing for the Practical Nurse (Indianapolis PN Program Only) C*

5 Quarter Credit Hours

Lecture: 2 Credits, Lab: 2 Credits, Clinical: 1 Credit
Lecture: 20 clock hours, Lab: 40 clock hours, Clinical: 30 clock hours

This course incorporates and builds on previously learned concepts for the acquisition and application of basic nursing theory, communication, collaboration, and clinical judgment necessary for safe, patient-centered nursing care to diverse families during childbearing and to children with a focus on growth and development. The course incorporates the legal and ethical responsibilities of the Practical Nurse in the care of the childbearing family and children. Application of knowledge and skills occurs in variety of lab and clinical settings.

Prerequisites: All Term 1 and Term 2 PN Courses

NUR 172 Intravenous Therapy for the Practical Nurse C*

3 Quarter Credit Hours

Lecture: 2 Credits, Lab: 1 Credit
Lecture: 20 clock hours, Lab: 20 clock hours

This course offers the theoretical basis for intravenous therapy administered by the Practical Nurse. Hands-on learning and practice is accomplished in the skills laboratory. Supervised clinical practice of the skills of intravenous therapy learned in the course is provided in concurrent and subsequent clinical nursing courses.

Prerequisites: Ohio (Full-Time), Indiana and Michigan campuses: All Term 1 and Term 2 (Full-Time) PN Courses, Ohio (Part-Time) campuses: All Term 1, Term 2, and Term 3 (Part-Time) PN Courses

NUR 176 Concepts of Adult Health Nursing for the Practical Nurse I C*

5 Quarter Credit Hours

Lecture: 3 Credits, Clinical: 2 Credits
Lecture: 30 clock hours, Clinical: 60 clock hours

This course incorporates and builds on the concepts introduced in the first two terms and provides for the acquisition and application of basic nursing theory, communication, collaboration, and clinical judgment necessary for safe, patient-centered nursing care to diverse adult patients experiencing various medical/surgical interventions. The course incorporates the legal and ethical responsibilities of the Practical Nurse in the care of adult patients with common health problems. Application of knowledge and skills occurs in a variety of clinical settings.

Prerequisites: Ohio (Full-Time), Indiana and Michigan campuses: All Term 1 and Term 2 (Full-Time) PN Courses, Ohio (Part-Time) campuses: All Term 1, Term 2, Term 3 and Term 4 (Part-Time) PN Courses

---

NUR 180 Concepts of Mental Health Nursing for the Practical Nurse C*

3 Quarter Credit Hours

Lecture: 3 Credits
Lecture: 30 clock hours

This theory course incorporates and builds on previously learned concepts for the acquisition and application of basic nursing theory, communication, collaboration, and clinical judgment necessary for safe, patient-centered nursing care to diverse patients needing various levels of mental health promotion and mental illness management while integrating legal and ethical responsibilities of the Practical Nurse. Application of knowledge and skills occurs in a variety of clinical settings during the concurrent Adult Health Nursing Course.

Prerequisites: Ohio (Full-Time), Indiana and Michigan campuses: All Term 1, Term 2, and Term 3 (Full-Time) PN Courses, Ohio (Part-Time) campuses: All Term 1, Term 2, Term 3, Term 4, and Term 5 (Part-Time) PN Courses

---

NUR 185 Concepts of Adult Health Nursing for the Practical Nurse II C*

3 Quarter Credit Hours

Lecture: 1 Credit, Clinical: 2 Credits
Lecture: 10 clock hours, Clinical: 60 clock hours

This course is a continuation of Concepts of Adult Health Nursing for the Practical Nurse I, and provides for the acquisition and application of basic nursing theory, communication, collaboration, and clinical judgment necessary for safe, patient-centered nursing care to diverse adult patients experiencing various medical/surgical interventions. The course incorporates the legal and ethical responsibilities of the Practical Nurse in the care of adult patients with common health problems. Application of knowledge and skills occurs in a variety of clinical settings.

Prerequisites: Ohio (Full-Time), Indiana and Michigan campuses: All Term 1, Term 2, and Term 3 (Full-Time) PN Courses, Ohio (Part-Time) campuses: All Term 1, Term 2, Term 3, Term 4, Term 5, and Term 6 (Part-Time) PN Courses

---

NUR 190 Transition to Practical Nursing Practice C*

3 Quarter Credit Hours

Lecture: 3 Credits
Lecture: 30 clock hours

This advanced, comprehensive course provides a synthesis of all concepts and nursing content taught throughout the program. This course enables the individual student to recognize areas that need enhancement prior to entering Practical Nursing practice. This course includes a review for the NCLEX-PN® and strategies for success.

Prerequisites: Ohio (Full-Time), Indiana and Michigan campuses: All Term 1, Term 2, and Term 3 (Full-Time) PN Courses, Ohio (Part-Time) campuses: All Term 1, Term 2, Term 3, Term 4, Term 5, and Term 6 (Part-Time) PN Courses

---

NUR 195 Application of Clinical Judgment in Practical Nursing Practice C*

3 Quarter Credit Hours

Lecture: 1 Credit, Lab: 2 Credits
Lecture: 10 clock hours, Lab: 40 clock hours

This course expands on and reinforces previously learned concepts with application of clinical judgment in the care of patients with multiple health issues. The course incorporates the legal and ethical responsibilities of the Practical Nurse in the care of patients with a variety of health concerns. In addition, the course facilitates the transition from student to Practical Nurse through application of all program concepts as students demonstrate achievement of program student learning outcomes in the simulation laboratory.

Prerequisites: Ohio (Full-Time), Indiana and Michigan campuses: All Term 1, Term 2, and Term 3 (Full-Time) PN Courses, Ohio (Part-Time) campuses: All Term 1, Term 2, Term 3, Term 4, and Term 5 (Part-Time) PN Courses

---

NUR 200 Critical Thinking for the Registered Nurse C*

2 Quarter Credit Hours

Lecture: 2 Credits
Lecture: 20 clock hours

This course introduces the learner to critical thinking skills and strategies used by the Registered Nurse. The student applies critical thinking skills and strategies at the RN level that underscore the clinical judgment represented in the nursing process as well as dealing with aspects of the healthcare system for safe practice in the current healthcare environment. This course reinforces the thinking processes applied throughout all nursing courses.

NUR 205 Transition to Associate Degree Nursing C*

5 Quarter Credit Hours

Lecture: 3 Credits, Lab: 1 Credit, Clinical: 1 Credit
Lecture: 30 clock hours, Lab: 20 clock hours, Clinical: 30 clock hours

The course focuses on the difference between the practice of a Practical Nurse and the practice of a Registered Nurse. Common concepts and content learned in a Practical Nursing program are revisited differentiating the scope of practice for a Registered Nurse. Specific concepts include the nursing process, management of care, delegation, legal aspects, and other common differentiating practices related to the scope of practice between the two levels of nursing. Additional nursing skills that are commonly taught in the first year of a Registered Nursing program are included. Course concepts are applied through the care of patients with common healthcare issues in a variety of healthcare settings.

NUR 212 Concepts of Nursing Care of the Adult I C*

7 Quarter Credit Hours

Lecture: 3 Credits, Lab: 1 Credit, Clinical: 3 Credits
Lecture: 30 clock hours, Lab: 20 clock hours, Clinical: 90 clock hours

This course builds on concepts of nursing practice for the acquisition and application of adult health nursing theory, communication, collaboration, and clinical judgment necessary for safe, patient-centered nursing care of adults. The course incorporates the legal and ethical responsibilities of the Registered Nurse in the care of adults, their families, and other support persons. Application of knowledge and skills occurs in the nursing skills laboratory and a variety of clinical settings.

Prerequisites: All Term 1 ADN Courses

NUR 221 Concepts of Nursing Care of the Reproducing Family C*

5 Quarter Credit Hours

Lecture: 3 Credits, Lab: 2 Credits
Lecture: 30 clock hours, Lab: 40 clock hours

This course builds on concepts of nursing practice for the acquisition and application of maternal/child nursing theory, communication, collaboration, and clinical judgment necessary for safe, patient-centered nursing care of the reproducing family and other support persons. The course incorporates the legal and ethical responsibilities of the Registered Nurse in the care of reproducing families. Application of knowledge and skills occurs in the nursing skills laboratory and a variety of clinical settings.

Prerequisites: All Term 1 and Term 2 ADN Courses

NUR 225 Professional Nursing Issues O*

3 Quarter Credit Hours

Lecture: 3 Credits
Lecture: 30 clock hours

This course presents various practice issues related to contemporary nursing practice. Also covered are issues relevant to the healthcare system. A major emphasis is on the provision of a safe healthcare environment to promote improved patient outcomes. Specific topics covered in the course are planned to reflect current nursing practice and healthcare system issues.

Prerequisites: All Term 1 and Term 2 ADN Courses

NUR 230 Concepts of Nursing Care of Diverse Populations O*

2 Quarter Credit Hours

Lecture: 2 Credits
Lecture: 20 clock hours

Diversity of populations is a major emphasis in health care. Improved patient outcomes are often dependent on patient-centered care that represents a deep understanding of cultural competence and sensitivity. This course addresses aspects of diversity including, but not limited to, diversity of culture, religion, ethnicity, sexual orientation, and diversity of thought.

Prerequisites: All Term 1, Term 2 and Term 3 ADN Courses

NUR 232 Concepts of Pediatric Nursing C*

4 Quarter Credit Hours

Lecture: 2 Credits, Lab: 2 Credits
Lecture: 20 clock hours, Lab: 40 clock hours

This course builds on concepts of nursing practice for the acquisition and application of pediatric nursing theory, communication, collaboration, and clinical judgment necessary for safe, patient-centered nursing care of diverse children, their families, and other support persons. The course incorporates the legal and ethical responsibilities of the Registered Nurse in the care of children. Application of knowledge and skills occurs in the nursing skills laboratory.

Prerequisites: All Term 1, Term 2 and Term 3 ADN Courses.

NUR 233 Concepts of Mental Health Nursing C*

3 Quarter Credit Hours

Lecture: 3 Credits
Lecture: 30 clock hours

This course builds on concepts of nursing practice for the acquisition and application of mental health nursing theory, communication, collaboration, and clinical judgment necessary for safe, patient-centered nursing care of diverse patients needing various levels of mental health promotion and mental illness management, their families, and other support persons. The course incorporates the legal and ethical responsibilities of the Registered Nurse in mental health nursing. Application of knowledge and patient care skills occurs in a variety of clinical settings in concurrent and subsequent clinical courses.

Prerequisites: All Term 1, Term 2 and Term 3 ADN Courses.

NUR 240 Transition to Registered Nursing C*

3 Quarter Credit Hours

Lecture: 3 Credits
Lecture: 30 clock hours

This advanced, comprehensive course provides a synthesis of all concepts and nursing content taught throughout the program. This course enables the individual student to recognize areas that need enhancement prior to entering Registered Nursing practice. This course includes a review for the NCLEX-RN® and strategies for success.

Prerequisites: All Term 1, Term 2, Term 3 and Term 4 ADN Courses

---

NUR 243 Application of Clinical Judgment in RN Practice C*

3 Quarter Credit Hours

Lecture: 1 Credit, Lab: 2 Credits
Lecture: 10 clock hours, Lab: 40 clock hours

This course expands on and reinforces previously learned concepts with application of clinical judgment in the care of patients across the lifespan with complex health issues. The course incorporates the legal and ethical responsibilities of the Registered Nurse. In addition, the course facilitates the transition from student to Registered Nurse practice through application of all program concepts as students demonstrate achievement of program student learning outcomes in the simulation laboratory.

Prerequisites: All Term 1, Term 2, Term 3 and Term 4 ADN Courses

---

NUR 245 Concepts of Nursing Care of the Adult II C*

7 Quarter Credit Hours

Lecture: 3 Credits, Lab: 1 Credit, Clinical: 3 Credits
Lecture: 30 clock hours, Lab: 20 clock hours, Clinical: 90 clock hours

This course is a continuation of Concepts of Nursing Care of the Adult I and builds on concepts of nursing practice for the acquisition and application of adult health nursing theory, communication, collaboration, and clinical judgment necessary for safe, patient-centered nursing care of adults with complex healthcare issues. The course incorporates the legal and ethical responsibilities of the Registered Nurse in the care of adults, their families, and other support persons. Application of knowledge and skills occurs in the nursing skills laboratory and a variety of clinical settings.

Prerequisites: All Term 1, Term 2, Term 3 and Term 4 ADN Courses

PSY Psychology

PSY 205 Lifespan Development OΔ

2 Quarter Credit Hours

Lecture: 2 Credits
Lecture: 20 clock hours

This course explores lifespan development through the lenses of social, cultural, cognitive, biological, and learning theories and research. Students will develop a conceptual understanding of healthy development, and a practical understanding of how to help children, adolescents, and adults address the developmental challenges they face across the lifespan. Additional focus is placed on one's own developmental processes, as well as the role of cultural differences and commonalities in the developmental process.

Academic Policies & Standards

Academic Information

Students are expected to progress through the program in an uninterrupted pattern:

- Diploma in Practical Nursing should take 1 two-week module and either 4 quarters (full-time) or 7 quarters (part-time);
- Associate Degree in Nursing should take 5 quarters.

Definition of Enrollment Status

- **Full-time:** Students are enrolled for 12 or more credit hours per quarter.
- **Three-quarters:** Students are enrolled for 9-11 credit hours per quarter.
- **Half-time:** Students are enrolled for 6-8 credit hours per quarter.
- **Below Half:** Students are enrolled for under 6 credit hours per quarter.

Grade Scale

All grades are awarded in whole letter values only.

General Education and Science Courses

Percentage Range	Letter Grade	Grade Points Awarded
90 - 100	A	4.00
80 - 89.99	B	3.00
70 - 79.99	C	2.00
69.99 - Below	F	0.00

Nursing Courses

Percentage Range	Letter Grade	Grade Points Awarded
93 - 100	A	4.00
85 - 92.99	B	3.00

78 - 84.99	C	2.00
77.99 - Below	F	0.00

Applicable to All Programs

Letter Grade	Description	Grade Points Awarded
AU	Audit	No grade points awarded
I	Incomplete	No grade points awarded
LA	Leave of Absence	No grade points awarded
LR	Leave of Absence return but not completed	No grade points awarded
NP	No-Pass	No grade points awarded
P	Pass	No grade points awarded
TR	Transfer	No grade points awarded
W	Withdrawal	No grade points awarded
WT	Withdrawal - transfer credit awarded	No grade points awarded

Grade Point Calculation

Quality points are determined by multiplying the grade point by the credit hours. The grade point average is determined by dividing the total quality points by total credit hours received. Transferred coursework, withdraw/transfers, withdrawals, audits, and incompletes are not calculated into the grade point average; however, transfer credits are accounted for in the total hours earned.

Example

Grade A = 4.0 grade points x 4 credit hours = 16 quality points
Grade B = 3.0 grade points x 5 credit hours = 15 quality points
Total quality points = (16 + 15) = 31 divided by total credits of (9) = 3.444 grade point averag

Clinical Information

The College strives to ensure that each student has excellent clinical learning experiences. This is a challenging goal in today's competitive health care arena, in which clinical facilities are being asked to meet the needs of learners from a growing number of educational programs. Therefore, clinical times and locations may change from quarter to quarter.

Clinical assignments are to be treated as employment; professional, responsible behavior is mandatory. Failure to comply with professional standards or the Student Code of Conduct may result in disciplinary action, up to and including dismissal. Students must remain flexible and be prepared for clinical placement in a variety of settings and at a variety of times.

The College reserves the right to adjust clinical schedules to ensure seamless programming and accommodation of the clinical facilities and the nursing programs.

Students Will Need To:

1. Have transportation.
2. Arrange child care, as applicable, including coverage for days, evenings and/or possible weekends.

3. Plan to travel up to 90 minutes one way to a clinical facility from the campus.
4. Arrive at the facility at least 10 minutes prior to the start of the clinical day.

Clinical Requirements and Vaccination Policy

The following items are required to be submitted and approved by the end of week 4 for ADN students attending **NUR 205**. All continuing or returning students are required to meet clinical eligibility by 5pm on the second Friday prior to the quarter start in which a clinical will be taken. Refer to the academic calendar for quarter start and end dates.

- Background check (reviewed and approved).
- CPR certification: American Heart Association, BLS provider only.
- Complete Clinical Eligibility Packet, including records of current, up-to-date immunizations, seasonal flu vaccine, and annual TB testing (according to Center for Disease Control and Prevention [CDC] guidelines).

Additional requirements, such as a clean drug test, may also be imposed according to a clinical agency's affiliation agreement. Proof of health insurance will likely be required to complete your program's clinical component. Failure to be compliant with the clinical requirements by the timeframe defined above will result in the student being deemed ineligible to attend clinicals. Students who are ineligible to attend the clinical component cannot pass the associated course and may either drop the course or earn a failing grade.

Performance of Nursing Clinical Skills in a Clinical Setting Policy

In general, skills performed by a student must be checked off in an on-campus lab prior to performing the skill in clinical. Students are not permitted to do any invasive procedures or administer medications without an instructor present. An invasive procedure is defined as entering the skin or body cavity.

1. All skills performed by a student must follow the policy and procedures of the facility and qualify as accepted safe practice.
2. No student is legally permitted to perform IV push medications.
3. Students scheduled for observation are not permitted to perform any procedures or administer medications.
4. Failure to comply with these policies will result, at a minimum, in a critical incident and failure in the course.

Student Rights and Professional Responsibilities

Hondros College of Nursing expects all students to uphold the highest standards of integrity, professionalism, compassion and respect for fellow human beings. The Hondros College of Nursing Student Code of Conduct strengthens this philosophy by holding students to the highest standards. Any violation of the Student Code of Conduct may result in disciplinary action, up to and including dismissal from the college.

Examples of behaviors that violate the student code of conduct include:

- Academic Integrity Policy
- Non-Academic Misconduct
- Ohio Board of Nursing Student Conduct Requirements (OAC,4723-5-12(C))

Academic Integrity Policy & Honor Code

Academic Integrity is core to the mission of Hondros College of Nursing and sets the foundation for academic excellence. It is with utmost importance that students understand how to be responsible learners and conduct themselves with the highest standards of honor and integrity. As such, the Academic Integrity Policy defines the College's expectations for student academic behavior and outlines procedures for handling allegations of academic misconduct. Academic misconduct, whether intentional or unintentional, may be a violation of the Academic Integrity Policy. Violations of the Academic Integrity Policy may lead to disciplinary action up to and

including dismissal from the College. Students are expected to commit to the following Honor Code when completing academic requirements and related activities.

Honor Code

Hondros College of Nursing expects students to commit themselves to adhering to the highest standards of ethical behavior and academic integrity when completing all coursework, participating in internship and clinical experiences, and fulfilling exam requirements. To reinforce this commitment, the College has adopted an Honor Code that outlines the College's expectations of honorable conduct. All students enrolled in a course or program at Hondros College of Nursing are expected to adhere to this Honor Code and pledge to avoid any action that violates the Academic Integrity Policy. Students are expected to approach their academic obligations with honor and uphold the five tenants of the Honor Code which are: Honesty, Ownership, Nobility, Observance, and Respect. As a student, you may be required to attest to this Honor Code throughout your academic experiences. Failure to pledge or attest to the Honor Code is neither an offense against the Honor Code, nor a defense of an alleged academic integrity violation.

Honesty: I am committed to upholding the highest standards of academic integrity. I understand that integrity and honesty are important values for my success in school and within my chosen career field.

Ownership: I will conduct myself ethically with honor and integrity in all the coursework I produce. Under the guidance of my instructors and through using College-approved learning resources, it is my responsibility to understand the course content and show what I have learned on course work (including exams and quizzes), using my independent ability free of cheating, collusion, interference, plagiarism, forgery, submitting acquired work as my own, and the use of generative artificial intelligence (AI) that does not adhere to the expectations as outlined in the Generative Artificial Intelligence (AI) Learning Assessment and Research Policy.

Nobility: I hold myself and others accountable to the academic integrity policy. I will not engage in behavior that undermines the learning environment or reputation of the College. Concerns regarding my actions or actions of others will be reported to College officials.

Observance: I will observe and revere this Honor Code, and I acknowledge that a violation of the Honor Code or the Academic Integrity Policy may result in disciplinary action that may impact the outcome of my education.

Respect: I will treat faculty, staff, and students with respect and promote an environment of fairness, trust, and professionalism.

Academic Integrity Policy: Definitions

1. Academic Misconduct is the violation of the Academic Integrity Policy, including all forms of academic cheating including, but not limited to, acts listed below and any other act that results in unfair advantage to the student.
2. Cheating is defined as fraud, deceit, or dishonesty on an assignment, quiz, exam, assessment, discussion posts, or any other academic work, collectively referred to for the purposes of this policy as "Academic Activity." Examples include, but are not limited to:
   - Copying answers, data, or information for any Academic Activity from another student in which the student is not permitted to work jointly with others.
   - Utilizing an unauthorized 3rd party for help with Academic Activities.
   - Misusing Artificial Intelligence sites in violation of the Generative Artificial Intelligence (AI) Learning Assessment and Research Policy.
   - Using or attempting to use unauthorized materials, texts, notes, information, or study aids to gain unfair advantage in any Academic Activity.
   - Using prohibited electronic devices during exams or assignments, such as using a hidden earpiece to receive answers or accessing unauthorized information on a device.
3. Collusion is collaborating with another person or entity to create an unfair advantage, assisting, attempting to assist, or receiving assistance from another person to create an unfair advantage; or conspiring with another person or entity in or outside the College to create an unfair advantage. Examples include, but are not limited to:
   - Allowing others to use your Academic Activities or providing unauthorized access to your Academic Activities, College technological resources, or College-issued academic accounts to any other individual.

- Gaining unauthorized access to another student's Academic Activities, College technological resources, or College-issued academic accounts.
- Sharing and disclosing any Academic Activities.
- Submitting College or student content to unauthorized 3rd-party sites.
- Using content from unauthorized 3rd-party sites without appropriate citations and without permission from the College.

4. Fabrication is the act of creating something that does not exist. Falsification is the act of changing something to deceive. Forgery is the act of imitating or counterfeiting documents, signatures and the like. Examples include, but are not limited to:
   - Deliberately falsifying, altering, or inventing student academic records.
   - Deliberately falsifying, altering, or inventing information for an Academic Activity.
   - Deliberately falsifying, altering, or inventing citations used in an Academic Activity.
5. Impersonation is defined as assuming another person's identity or allowing another person or entity to impersonate you or assume your identity to complete an Academic or Enrollment Activity. Examples include, but are not limited to:
   - Completing official documents, such as entrance requirements or accommodation requests.
   - Taking exams/quizzes.
   - Submitting assignments or deliverables for a course.
   - Attending (or logging in to) class in lieu of another individual.
   - Taking part in clinicals or externships.
   - Communicating under the guise of the student.
6. Plagiarism is the act of representing an individual's or organization's words, thoughts, or ideas as one's own. Examples include, but are not limited to:
   - Using information (a paraphrase or quotation, in whole or in part) from a source without attempting to give credit to the author of that source.
   - Using charts, illustrations, images, figures, equations, etc., without citing the source.
   - Using an Academic Activity (in whole or in part) purchased, copied, or obtained from an unauthorized 3rd party.
   - Violating copyright or committing piracy, including the use, alteration, or duplication of media, software, code, or information when expressly prohibited or where copyright exists or is implied.
   - Misusing generative Artificial Intelligence without citing the use of it or in any other manner against the College's Generative Artificial Intelligence (AI) Learning Assessment and Research Policy.
   - Self-plagiarizing through the re-use of academic work that was submitted previously in another course, whether that course was taken at the College or at another institution. This includes work that was previously submitted to the same course or assignment in a different term.
7. Sabotage seeks to gain unfair academic advantage by destroying, damaging, or stealing another person's work and or property, or obstructing or interfering with an instructor's materials or another student's academic work (including documents, design, data, technology, etc.) Examples include, but are not limited to:
   - Installing spyware, viruses, or other damaging software in another person's computer or academic equipment to undermine or damage another person's academic progress.
   - Withholding or misrepresenting common knowledge about an Academic Activity as a deliberate attempt to harm another person's academic progress.
   - Revealing confidential data about another person or their Academic Activity.

Academic Integrity Policy Violations

Students who violate the Academic Integrity Policy are subject to corrective action to deter future misconduct and to hold students accountable for their actions.

Consequences of Academic Integrity Policy violations will be based on past academic integrity violation records, the level of severity of the violation, and the impact upon the academic community. Documentation of Academic Integrity Policy violations is maintained. Examples of consequences that will be implemented include but are not limited to the following:

Consequence of Academic Integrity Policy Violation(s):

Level One Violations: Level One violations are less severe and may be intentional or unintentional in nature. These violations may occur due to gaps and/or misunderstandings in the learning process of what constitutes academic misconduct, or a disregard for the Honor Code. It is not the responsibility of the College to identify the intentionality of academic misconduct violations. Examples of Level One violations may include but are not limited to the following: minor citation errors, using information without giving credit to the author of that source, assisting others to violate academic integrity, and the use or sharing of unapproved resources.

Faculty-Implemented Consequences: Level One Violations

- Redo Academic Activity for partial or full credit; Late Assignment Submission Policy deduction may apply.
- No resubmission – Partial credit on Academic Activity
- No resubmission – Zero credit on Academic Activity

Level Two Violations: Level Two violations are more severe and egregious and may be intentional or unintentional in nature. It is not the responsibility of the College to identify the intentionality of academic misconduct. The egregiousness and/or the accumulation of multiple Level One violations is what differentiates the implementation of a Level One Consequence vs. Level Two Consequence. Examples of Level Two violations may include but are not limited to the following: full-text plagiarism, collusion, contract cheating, falsification of data or results, forgery, and impersonation.

Academic Leadership or Academic Integrity Committee-Implemented Consequences: Level Two Violations

- Withdrawal from the course and receive a Fail (F) grade.
- Dismissal from the College

The College reserves the right to dismiss a student from the College for academic misconduct; students who are dismissed from the College because of academic misconduct may not re-enroll. Students who commit Academic Misconduct also risk harming future educational and employment opportunities.

Academic Integrity Appeal Process

When there is a finding of academic misconduct, the student will have the opportunity to provide any additional and pertinent information they would like considered, so long as the basis for the appeal is to claim that the act of academic misconduct was not committed or that the consequence was too severe for the type of violation. Attempting to justify the act of misconduct is not an acceptable basis for an appeal.

- Faculty-Implemented Consequences must be appealed first to the faculty within 5 business days of the violation determination. If not resolved at the faculty level, the student may appeal within 5 business days of the faculty's response to the academic program leader. Decisions made by the academic program leader are final.
- Academic Leadership or Academic Integrity Committee-Implemented Consequences must be appealed within 5 business days of the decision to an Academic Appeals Committee. Decisions made by the Academic Appeals Committee are final.

Generative Artificial Intelligence (AI) Learning, Assessment, and Research Policy

Hondros College of Nursing supports students' ethical and transparent use of generative artificial intelligence (AI). Generative AI refers to technologies that can create content autonomously, such as text, images, or multimedia. Ethical use of generative AI includes implementation of such tools in the processes of brainstorming and editing. All use of the generative AI by students must comply with Hondros College of Nursing's academic integrity policy. Any use of generative AI to supplement student submissions of course assignments and deliverables – written, visual, or otherwise – must be cited appropriately with the A.I. tool employed, e.g., (OpenAI, 2025). Generative AI should not be used by students to complete assignments or deliverables in total. Hondros College of Nursing

students are responsible for the quality of ideas as well as the accuracy of information and sources within all their submitted assignments.

Academic Appeal Policy

Students are encouraged to discuss questions or concerns about grades with their faculty first. Students should refer to the course syllabus for expectations regarding assignment submissions/grading. Students who seek to appeal a decision related to grade calculation and/or grade error(s) should follow the Academic Appeal Policy using the Academic Appeal Form, located in the Commonly Used Forms section of the Student Portal.
Academic concerns regarding requests for rounding grades, extra credit, or extra assignments to improve a grade is not considered an academic appeal.

Appeals related to an assignment grade calculation and the final course grade will follow the process below:

Appeals related to an assignment grade must be submitted within seven (7) business days of receiving the grade. Appeals related to the final course grade must be submitted by the Friday of week 11 at 5:00pm.

Appeals submitted after the deadline will not be reviewed and final grades will stand as submitted.

1.The Campus Dean/Director of Nursing or designee will review the appeal and make a decision within five (5) business days and communicate the decision to the student.

2.If the student is not satisfied with the outcome of the Campus Dean/Director of Nursing or designee or they did not receive a response within the timeline, they may appeal to the Program Administrator or designee for the program within two (2) business days.

3.The final decision will be made by the Program Administrator or designee for the program within five (5) business days and the Program Administrator or designee will communicate the decision to the student. The appeal decision is final.

Failure to follow the timelines prescribed in the appeal procedure will result in an automatic denial of appeal and forfeiture of future consideration from Hondros College of Nursing.

Ohio Board of Nursing (OAC,4723-5-12(C)) Student Conduct Requirements

1. A student shall, in a complete, accurate, and timely manner, report and document nursing assessments or observations, the care provided by the student for the client, and the client's response to that care.
2. A student shall, in an accurate and timely manner, report to the appropriate practitioner errors in or deviations from the current valid order.
3. A student shall not falsify any client record or any other document prepared or utilized in the course of, or in conjunction with, nursing practice. This includes, but is not limited to, case management documents or reports or time records, reports, and other documents related to billing for nursing services.
4. A student shall implement measures to promote a safe environment for each client.
5. A student shall delineate, establish, and maintain professional boundaries with each client.
6. At all times when a student is providing direct nursing care to a client the student shall:
   - a. Provide privacy during examination or treatment and in the care of personal or bodily needs;
   - b. Treat each client with courtesy, respect, and with full recognition of dignity and individuality.
7. A student shall practice within the appropriate scope of practice as set forth in division (B) of section 4723.01 and division (B)(20) of section 4723.28 of the Revised Code for a registered nurse and division (F) of section 4723.01 and division (B)(21) of section 4723.28 of the Revised Code for a practical nurse.
8. A student shall use universal blood and body fluid pre-cautions established by Chapter 4723-20 of the Administrative Code.
9. A student shall not:
   - a. Engage in behavior that causes or may cause physical, verbal, mental, or emotional abuse to a client

- b. Engage in behavior toward a client that may reasonably be interpreted as physical, verbal, mental, or emotional abuse.

For the purpose of the following paragraph, the client is always presumed incapable of giving free, full, or informed consent to the behaviors by the student set forth in this paragraph.

0. A student shall not misappropriate a client's property or:
   - a. Engage in behavior to seek or obtain personal gain at the client's expense;
   - b. Engage in behavior that may reasonably be interpreted as behavior to seek or obtain personal gain at the client's expense;
   - c. Engage in behavior that constitutes inappropriate involvement in the client's personal relationships; or
   - d. Engage in behavior that may reasonably be interpreted as inappropriate involvement in the client's personal relationships.

For the purpose of the following paragraph, the client is always presumed incapable of giving free, full, or informed consent to sexual activity with the student.

1. A student shall not:
   - a. Engage in sexual conduct with a client; Engage in conduct in the course of practice that may reasonably be interpreted as sexual;
   - b. Engage in any verbal behavior that is seductive or sexually demeaning to a client;
   - c. Engage in verbal behavior that may reasonably be interpreted as seductive, or sexually demeaning to a client.
2. A student shall not, regardless of whether the contact or verbal behavior is consensual, engage with a patient other than the spouse of the student in any of the following:
   - a. Sexual contact, as defined in section 2907.01 of the Revised Code;
   - b. Verbal behavior that is sexually demeaning to the patient or may be reasonably interpreted by the patient as sexually demeaning.
3. A student shall not self-administer or otherwise take into the body any dangerous drug, as defined in section 4729.01 of the Revised Code, in any way not in accordance with a legal, valid prescription issued for the student.
4. A student shall not habitually indulge in the use of controlled substances, other habit-forming drugs, or alcohol or other chemical substances to an extent that impairs ability to practice.
5. A student shall not have impairment of the ability to practice according to acceptable and prevailing standards of safe nursing care because of habitual or excessive use of drugs, alcohol, or other chemical substances that impair the ability to practice.
6. A student shall not have impairment of the ability to practice according to acceptable and prevailing standards of safe nursing care because of a physical or mental disability.
7. A student shall not assault or cause harm to a patient or deprive a patient of the means to summon assistance.
8. A student shall not obtain or attempt to obtain money or anything of value by intentional misrepresentation or material deception in the course of practice.
9. A student shall not have been adjudicated by a probate court of being mentally ill or mentally incompetent, unless restored to competency by the court.
0. A student shall not aid and abet a person in that person's practice of nursing without a license, practice as a dialysis technician without a certificate issued by the board, or administration of medications as a medication aide without a certificate issued by the board.
1. A student shall not prescribe any drug or device to perform or induce an abortion, or otherwise perform or induce an abortion.
2. A student shall not assist suicide as defined in section 3795.01 of the Revised Code.
3. A student shall not submit or cause to be submitted any false, misleading or deceptive statements, information, or document to the nursing program, its faculty or preceptors, or to the board.
4. A student shall maintain the confidentiality of patient information. The student shall communicate patient information with other members of the health care team for health care purposes only, shall access patient information only for purposes of patient care or for otherwise fulfilling the student's assigned clinical responsibilities, and shall not disseminate patient information for purposes other than patient care or for otherwise fulfilling the student's assigned clinical responsibilities through social media, texting, emailing or any other form of communication.

5. To the maximum extent feasible, identifiable patient health care information shall not be disclosed by a student unless the patient has consented to the disclosure of identifiable patient health care information. A student shall report individually identifiable patient information without written consent in limited circumstances only and in accordance with an authorized law, rule, or other recognized legal authority.
6. For purposes of paragraphs (C)(5), (C)(6), (C)(9), (C)(10), (C)(11) and (C)(12) of this rule, a student shall not use social media, texting, emailing, or other forms of communication with, or about a patient, for non-health care purposes or for purposes other than fulfilling the student's assigned clinical responsibilities.

Academic Standing & Progress

Academic Standing Status Policy

Students' academic progress will be evaluated at the end of each quarter. A satisfactory progress report indicating progress and academic standing in the program can be found in the Student Portal in the format of an unofficial transcript.

Good Standing

Students earning a minimum cumulative grade point average of 2.0 are considered to be in good academic standing. Good Standing will be noted on the student's official transcript.

2. Honors

Students, enrolled half-time or more, with a quarterly grade point average of 3.25 or higher in a given quarter are eligible for honors, according to the following table:

GPA Range	Honor List
3.75 - 4.00	President's List
3.50 - 3.74	Dean's List
3.25 - 3.49	Merit List

Students who graduate from a program with a cumulative grade point average of 3.25 or higher will earn graduation honors, according to the following table:

CGPA Range	Graduation Honor
3.75 - 4.00	Summa Cum Laude
3.50 - 3.74	Magna Cum Laude
3.25 - 3.49	Cum Laude

The appropriate honor will be noted on the student's official transcript for the term in which it is earned.

Academic Probation

A student earning a cumulative grade point average below a 2.0 or being reinstated from an academic dismissal will be placed on academic probation Academic Probation will be noted on the student's official transcript. Students will receive written notification if placed on academic probation.

Students on academic probation may be required to be advised and/or tutored for assistance prior to registering for future courses. Students on academic probation may still be eligible for financial aid.

A third subsequent quarter with a cumulative grade point average below the 2.0 minimum will result in academic dismissal.

Students will return to an academic status of Good Standing once the cumulative grade point average is a 2.0 or higher and/or the reinstatement requirements have been met.

Academic Dismissal

Academic Dismissal results when a student has met at least one of the following criteria:

1. Fails to earn a cumulative grade point average of 2.0 or better for a third quarter in the program.
2. Fails the same course for a second time. This criterion is not applicable to students whose latest signed Enrollment Agreement specifies enrollment or re-enrollment in the Spring 2023 term or any term thereafter.

Academic Dismissal is noted on the student's official transcript. Students will receive written notification if academically dismissed.

Incomplete Policy

Students who have completed a quarter through week 9 may request to receive an incomplete grade ("I") if they are unable to complete assignments, projects, and/or a final exam due to documented extenuating circumstances beyond the student's control (for example, hospitalization or death of an immediate family member). Permission must be granted from the Campus Dean/Director of Nursing or designee.

Students receiving an incomplete will have until the start of the following quarter course(s) to submit all work required to complete the course(s). Deadlines for missing work will be outlined by the Campus Dean/Director of Nursing or designee, in conjunction with the faculty member who will be working with the student to resolve the student's incomplete coursework. If the student fails to complete the incomplete coursework within the established timeline, the "I" will be changed to an "F". Failure of a course will result in the student needing to repeat the course; in addition, the student may be placed on academic probation, or may be academically dismissed.

Students receiving an incomplete may not progress in the program until they have successfully completed the course(s) by earning a "C" or better. Students successfully completing incomplete coursework prior to the end of the allotted quarter timeline must wait until the start of the next quarter to progress in the program.

Repeat Policy

Students must repeat and pass any courses in which they receive a failing grade or from which they have withdrawn or dropped. Students who need to repeat a course may complete an academic advising session to review scheduling options and registration. Students may be required to repeat in an on-ground modality section, if the option is available. Students who need to repeat a course that is no longer offered due to a revised curriculum may have a blended curriculum, which may consist of a revised progression plan. Students cannot repeat a course(s) they have previously passed to simply improve their cumulative grade point average (CGPA).

1. Students on academic probation are not permitted to take any additional course(s) out of sequence when repeating a failed course. Students repeating a course, but not on academic probation, may request to take a general education course, excluding **BIO 254**, out of sequence if space is available. Students must make the request in writing to the Campus Dean/Director of Nursing. Courses taken out of sequence are subject to all policies regarding unsuccessful progression and attendance. Students that are unsuccessful in a course taken out of sequence may be required to successfully complete only that course prior to advancing in their program.
2. All earned grades will become part of the student's academic record and will be reflected on the academic transcript. Repeated coursework in which a passing grade was earned will be marked with an "R" on the academic transcript to indicate the course was repeated.
3. Once a course has been repeated with a passing grade, only the latest earned passing grade for a repeated course will be used in the calculation of the cumulative grade point average. Withdrawals (W) are not counted as an earned grade when recalculating the cumulative grade point average. If a student is repeating a previously passed course due to starting a program over, only the highest grades earned will calculate into the cumulative grade point average.
4. Repeated coursework must be taken at Hondros College of Nursing.
5. The student is responsible for all costs associated with repeated coursework. In some cases, financial aid may not be available for repeated coursework.

6. The student may not receive Title IV aid for retaking previously passed courses if the student is required to retake those courses because the student failed a different course in a prior term.
7. Students required to repeat a course will be able to do so only when space is available. If the student is required to repeat a course that is not offered in the following term, he or she must repeat the course the next time the course is offered.
8. Students repeating a course may be required to audit an additional course(s). Audit courses may have associated lab/material fees charged to the student.

Critical Incident Policy

A critical incident is defined as any incident that reflects poor performance in providing nursing care, managing care, or performing as a student in a professional manner. This behavior may or may not result in failure of the course in which the incident occurred. Critical incidents may be given for unsatisfactory behavior in the classroom, lab, and/or clinical. Critical incidents include, but are not limited to, the following: unsafe clinical or laboratory practice, violation of HIPAA, excessive tardiness, violations of the Student Code of Conduct, and dishonesty.

One critical incident, or a pattern of critical incidents, could result in failure of the course, or dismissal from the College, depending upon the severity of the incident. Violations will be reviewed by the Campus Dean/Director of Nursing, or designee. Documentation of the Critical Incident will be kept in the student file on a Critical Incident Form.

Leaves of Absence

Medical Leave Policy

Medical Leave is intended for enrolled and programmatically accepted students who need to take time away from their academic program for significant health reasons and who, for medical reasons, are unable to complete the quarter in which they are currently enrolled. Medical Leave is also available for students who are primary caregivers for someone who is experiencing a health or medical issue, which has resulted in their inability to complete the term in which they are currently enrolled. Each Medical Leave can be up to one quarter and may be extended through the following quarter/term. No approved medical leave may extend for more than two consecutive quarters or up to a maximum of six months in total length, excluding break weeks. At the end of the approved leave, the student must return on the next start date based on their term cycle and program of enrollment. During a student’s enrollment, there is no limit to the total number of non-consecutive quarters/terms that a student may apply for and accumulate medical leave.

Qualified students with a disability under the Americans with Disabilities Act (ADA) who are seeking academic adjustments, auxiliary aids, or other support services should refer to our Accommodations Policy. Temporary medical conditions are not considered a disability under the ADA unless they are severe enough to result in a substantial limitation of one or more major life activities. Such a determination is made on a case-by-case basis, taking into consideration the duration or expected duration of the impairment, and the extent to which it actually limits a major life activity of the individual. If you believe that your medical condition may qualify as a disability under the ADA and require support services or other accommodations, please contact an Accommodations Liaison.

Students who are placed on a Medical Leave of Absence are treated as a drop/ withdrawal for Financial Aid purposes. If the student received federal financial aid funding for the term in which the student withdrew, a calculation of the amount of aid earned for that term will be performed along with a calculation of the student’s tuition obligation for the same period. As a result of these calculations, the student may have a tuition balance, may have unearned federal aid funds that must be returned by the College or student, or may have a tuition refund due. These calculations will be performed according to federal guidelines and institutional policy, and the student will be notified of the outcome. If a tuition refund is due to the student, it will be returned to the student. Refunds will be paid to the appropriate funding agency within 45 days, and the student will be billed for any remaining unpaid balance. See the Refund Policy.

Students with federal financial aid, federal loan obligations, or military tuition assistance must contact their lenders and the military financial aid specialist to ascertain their loan repayment status or repayment of tuition assistance during the Medical Leave. Students who received federal student loans at any point during their enrollment at the College will receive further information regarding their

loan obligations and repayment in an exit interview provided by the College within 30 days of the student's withdrawal date. Students who return from a Medical Leave of Absence will have their eligibility to apply for financial aid reinstated, but the funding package may be different from the term in which the student withdrew due to changes in student eligibility.

Applying for Medical Leave of Absence: To apply for a Medical Leave, the student must obtain the Medical Leave Request Form from their Academic Support Advisor. The student will be required to present and upload a signed note from a professional therapist/physician on letterhead where the professional practices. The note must include a timeframe, specifically the expected start date of the leave and the anticipated conclusion of the leave. The student cannot remain enrolled in the quarter/term in which the leave begins.

Returning After Medical Leave of Absence: To return from Medical Leave, the student must complete and submit the Medical Leave Return Request Form prior to the first day of the quarter/term in which the student wants to return to complete the reentry process. Additionally, the student must submit a signed note from the student's professional therapist and/or physician stating the student's medical situation and that the professional therapist/physician believes the student is able to return to the College. A student returning after a Medical Leave of Absence will be returned to their previous program and catalog.

Policy Regarding Grades in the Event of a Medical Leave of Absence

- If the student takes Medical Leave before the start of an upcoming quarter those course(s) will be dropped without being recorded on the student's transcript and tuition will not be charged.
- A grade of "W" will be recorded for each course for which a student was registered if the student takes Medical Leave from the College at any time following the course drop period of the quarter/term. The student will need to repeat any course required in their program for which the W grade was awarded.
- When a student completes any course(s) and then takes a Medical Leave, the letter grades earned for the completed courses will remain on their transcript.
- Academic probations, warnings, and dismissals related to Satisfactory Academic Progress remain applicable to students who take a Medical Leave. If a student is already on probation or is placed on probation while on leave, the conditions of his or her probation are continued to the quarter/term in which they return to the College.

Medical Leave Withdrawal: Students who do not return to their academic program following their Medical Leave will be withdrawn with a status of Medical Leave Withdrawal.

Returning After Medical Leave Withdrawal Re-enrollment will require a student to reapply to the College and the terms of the Re-Entry policy will apply.

Military Leave

Hondros College of Nursing supports our students who are service members and veterans, their spouses, and other family members.

A. **Eligibility**: Students or prospective students with service requirements that make it difficult or impossible for them to succeed in their academic program are eligible for a military leave. For purposes of granting Military Leave, service requirement is defined as (a) deployment, (b) mobilization leading to deployment, or (c) mandatory training.

B. **Military Leave Procedures**:

- Students must contact their Academic Support Advisor to request Military Leave and provide a copy of their military orders for authentication. Students who have yet to receive orders need to provide a memo from their commanding officer supporting the request for Military Leave.
- The student cannot remain enrolled in the quarter/term in which the leave begins.
- If the student is currently enrolled for the quarter/term in which their requested leave is to begin, it is the responsibility of the student to request military leave and drop/withdraw from their classes.
- Students receiving benefits under any of the GI Bills will have their enrollment certifications terminated for the initial term of the military leave and any subsequent terms for which leave is approved.

Financial Aid and Tuition/Books/Fees Impact of a Military Leave:

- Students are treated as a withdrawal from the College for financial aid purposes because students who take a military leave are generally not able to return to the same point in their academic studies upon return, as certain scheduling adjustments may be required.
- If the student received federal financial aid funding for the withdrawal term, a calculation of the amount of aid earned for the withdrawal term will be performed, along with a calculation of the student's tuition obligation for the same period. As a result of these calculations, the student may have a tuition balance, have unearned federal aid funds that must be returned by the College or the student, or have a tuition refund due. These calculations will be performed according to federal guidelines and institutional policy, and the student will be notified of the outcome.
- If a tuition refund is due to the student, it will be returned to the student. Refunds will be paid to the appropriate funding agency within 45 days, and the student will be billed for any remaining unpaid balance. See the Refund Policy
- Students who return from a Military Leave will have their federal financial aid reinstated, but the funding package may be different from the term of withdrawal due to changes in student eligibility.
- Students with federal financial aid and federal loan obligations must contact their lenders; in addition, if receiving military tuition assistance must also contact the military financial aid specialist to ascertain their loan repayment status or repayment of tuition assistance during the Medical Leave.
- Students who received federal student loans at any point during their enrollment at the College will receive further information regarding their loan obligations and repayment in an exit interview provided within 30 days of the student's withdrawal date.
- If the student discontinues their program, any supplies or textbooks issued to and paid for by the student become the student's property. Electronic resources, access to which the student paid for as part of the Technology Fee, shall remain accessible to the student as long as the license provided by the publisher/ content owner allows. Licenses for electronic resources, which are utilized in most courses at Hondros College of Nursing, are typically active for a length of 180 days to two years, depending on the publisher.

C. Academic Impact of a Military Leave

- A grade of "W" will be recorded for each course for which a student was registered if the student takes Military Leave from the College at any time following the course drop period of the quarter. The student will need to repeat any course for which the W grade was awarded.
- All academic probations, warnings, and dismissals remain applicable to students who take a Military Leave. If a student is already on probation or is placed on probation while on leave, the conditions of their probation continue until the quarter in which they return to the College.
- The standard transfer of credit policies apply for courses taken elsewhere while on leave to any academic work done by the student while on Military Leave from the College.

D. Long Term Military Leave for More Than Two Quarters in Length

Military service members who are given official orders to deploy for state or federal needs, as well as their spouses, who cannot complete the academic quarter due to the deployment, may withdraw without penalty from any or all classes in which they are enrolled, even if the established deadline for withdrawal has passed. These students are entitled to a full refund of tuition and mandatory fees for the term, subject to applicable laws governing federal or state financial aid programs and allocation or refund as required under those programs. Students in good standing who withdraw under this policy may be readmitted and reenroll into the same program under the catalog that is current at the time of re-enrollment, without penalty or redetermination of admission eligibility, within one year following their release from active military service upon submission of military orders showing their military deployment has been completed. Programs with specialized admissions requirements are excluded from this policy; students must meet those additional requirements at the time of re-enrollment.

E. Short Term Military Leave for Up to Two Quarters in Length

Military service members who are given official orders for mandatory training and cannot complete the academic quarter due to military training may withdraw without penalty from any or all classes in which they are enrolled, even if the established deadline for withdrawal has passed. Each leave may be for up to two consecutive quarters. There is no limit to the total number of Military Leaves that a

student may accumulate during their enrollment with the College. Students in good standing who withdraw under this short-term (up to two quarters in length) leave policy reenroll at the start of the next term/quarter after the military training is complete and will be allowed to return into the same program under the catalog that the student was enrolled in prior to the military leave. The student will be charged the same tuition rate as their original program or the new tuition rate, whichever is lower. The student must contact their Academic Support Advisor at least one week prior to the first day of the quarter/term in which the student wants to return to complete the reentry process and submit the military orders showing their military training has been completed. If the student reenrolls after more than one quarter, they will reenroll under the catalog and tuition rate that is current at the time of re-enrollment, without penalty or redetermination of admission eligibility, within one year following their release from military training. Programs with specialized admissions requirements are excluded from this policy; students must meet those additional requirements at the time of re-enrollment.

Short-Term Leave Policy

A Short-Term Leave status is a form of administrative withdrawal that may be initiated by Hondros College of Nursing under the following circumstances when the student has expressly indicated an intent to return in the next scheduled quarter/term:

- A student who has completed all of their registered courses in the quarter/term prior to the end of the quarter/term.
- A student who has no viable options to maintain at least a part-time student status through the end of a quarter/term due to a Hondros College of Nursing -initiated policy or decision to cancel a course, temporarily suspend a student's participation in a course or program, temporarily suspend a program's operation, or temporarily close a campus location.
- A student residing within an area declared a disaster by a state or federal agency may initiate a request. The address on file in the student's record is the address that will be used to determine eligibility.
- A student who experiences the death of an immediate family member (spouse/domestic partner, children, siblings, grandparents, grandchildren, parents/guardians) and is unable to complete the quarter in which they are currently enrolled. Documentation will be required.

A student in a Short-Term Leave status is reported as withdrawn to the U.S. Department of Education, and any outstanding student loans will enter the applicable grace period/ repayment period. A student who is placed on Short-Term Leave may have their federal financial aid recalculated per the Federal Return of Title IV Funds Policy. This recalculation may result in the return of federal financial aid funds to the U.S. Department of Education and result in a balance owed to the College. A student placed on Short-Term Leave may return to the College on the next scheduled quarter/term start date and continue their studies. A student on Short-Term Leave who does not resume their studies by the end of the first week of the subsequent term will be administratively withdrawn from the College.

Enrollment Changes & Exits

Withdrawal Policy

Attendance must be evident by the end of the first week for continuing students, or the student will be administratively withdrawn from the College. Students who post week 10 attendance and then stop attending or fail to meet the attendance requirements during or after week 10 will receive the grade earned at the end of the quarter, which may result in academic probation, an administrative withdraw, or academic dismissal from the college.

The student gives notice of the intent to withdraw from the College by contacting the Campus Dean/Director of Nursing or designee in person, in writing, by e-mail, or by phone. Withdrawals initiated with a last date of attendance up through the end of week 9 will earn a grade of "W"; a grade of "W" has no effect on cumulative grade point average. Withdrawals initiated with a last date of attendance after week 9 will receive the grade earned at the end of the quarter. Failure of a course may result in the student being placed on academic probation or being academically dismissed. The withdrawal will not supersede academic probation or academic dismissal. Withdrawal from the College may require funds to be returned to the U.S. Department of Education.

Single Course Drop Policy

Students may drop from one or more individual course(s) up through the end of week 9 of the quarter and will receive a grade of “W”. Students must meet with their Campus Executive Director or designee to complete a Course Drop form. A grade of “W” has no effect on cumulative grade point average, but does impact pace of progression and maximum timeframe. Students must post attendance to be eligible for a course drop.

Students that drop all courses within a quarter will be considered withdrawn from the College.

Students must successfully repeat any dropped course prior to progressing in the program. Students may be required to audit additional courses when repeating a dropped course. Please refer to the Repeat Policy for more information.

Audit Policy

Students interested in auditing a course must receive approval from the Campus Dean/Director of Nursing or designee. Depending on the course, there may be associated lab/material fees charged to the student. Students repeating a course may also be required to audit an additional course(s). Depending on the course, there may be associated lab/material fees charged to the student. Audit courses are added to the student schedule and appear on the academic transcript. Audit courses do not count as attempted or earned credits, or apply to the CGPA for SAP purposes.

Students required to audit a course due to the Repeat Policy are subject to all applicable attendance policies. If the student is subject to an administrative course withdrawal from an audit course, the repeating course, and any other associated audit course, will also be subject to the administrative course withdrawal regardless of that course’s attendance.

Re-entry Policy

A former student who has been withdrawn, voluntarily or administratively, may apply to the College for reentry to his or her previous program. The former student must satisfactorily demonstrate that the barriers that prevented him or her from completing the program during the previous enrollment have been resolved, and there is reasonable probability that he or she can complete the program of study within the maximum allowable timeframe. Applicants seeking re-entry should contact the Campus Manager prior to the start of the re-entry term. All re-entry requests are due by the end of week 9, prior to the re-entry term. Students withdrawn for more than two quarters may be required to restart the program.

Former students approved for re-entry are required to sign a new enrollment agreement, which lists the current curriculum, current tuition, fees, term of enrollment, and other required disclosures. Former students approved for re-entry must meet all admissions requirements to his or her program in effect at the time of re-entry. In addition, they may be required to complete a new background check in accordance with the policy in effect at the time of re- entry. The College reserves the right to deny re-entry to any former student that carries an unpaid balance from his or her previous enrollment. Re-entry is not guaranteed and is dependent upon previous academic history, space, and availability.

Students previously dismissed pursuant to the College’s academic dismissal policy and seeking reinstatement to the same program should refer to the Reinstatement Policy.

Students previously dismissed pursuant to the College’s academic dismissal policy and seeking entry to a different program should refer to the Admissions Policy.

Reinstatement Policy

Students previously dismissed pursuant to the College’s academic dismissal policy and seeking entry to a different program should refer to the Admissions Policy.

Students who have been academically dismissed and are attempting to re-enter in the same program may seek reinstatement by submitting the Request for Reinstatement form to the Campus Dean/Director of Nursing or designee. Supporting documentation may be required. All requests for reinstatement will be reviewed by the College's Reinstatement Committee. Students will be notified in writing of the Committee's decision. The Committee's decision is final and cannot be appealed. Reinstatement is not guaranteed.

The Reinstatement Committee will meet twice per quarter. The Week 9 meeting is for students who were academically dismissed prior to the previous quarter. The Week 13 meeting is for students who were academically dismissed in the previous quarter. Those requesting reinstatement should contact their campus for request deadlines.

Students granted reinstatement will be placed on Academic Probation if their cumulative grade point average is below the required 2.0. Students granted reinstatement must follow all policies in effect at the time of the reinstatement. Reinstated students may be required to sign a new enrollment agreement, which lists the current curriculum requirements, tuition, fees, term of enrollment, and other required disclosures.

In addition, reinstated students may be required to complete a new background check in accordance with the policy in effect at the time of reinstatement. A reinstated student may also be required to make a payment toward their balance to be registered.

Students who have been dismissed due to a Student Code of Conduct violation are prohibited from being on College property and are not eligible for reinstatement or admission to any other program.

Attendance Policies

Lecture Attendance Policy

Hondros College of Nursing believes active participation in on ground and online courses are essential for the development of the healthcare professional. Students receiving funds from any state or federal agency may be subject to the additional attendance requirements of that specific agency.

Attendance is expected in all courses. A record will be maintained for each student's attendance and tardiness patterns in on ground and online lectures. All absences put the student's ability to be successful at risk. A student will be withdrawn from their program when any of the following criteria are met:

- A student fails to post any attendance during week 1; or
- A student who has unexcused absences from all classes (including lab and clinicals) for fourteen (14) consecutive calendar days, including holidays.
- A student fails to post attendance in at least one component (lecture, lab or clinical) for each registered class within the first three weeks of the term.

Lecture meetings for an individual course count as a separate "meeting" for that week. Courses traditionally offered online are considered as "meeting" once per week. Students absent from scheduled lectures for an individual course(s) between weeks 1 through 9 of the term, as outlined in the following schedule, will be administratively withdrawn from that course(s) by the College with a grade of "W" and will need to follow the Repeat Policy, in this catalog.

Lectures Meeting Per Week	Maximum Absences During Weeks 1-9 of the Term
1	3
2	5

- Students are not required to turn in documentation for a missed lecture.
  - If a student exceeds the maximum absences, they can submit documentation supporting an extenuating circumstance for their last of the lecture absences.
  - Documentation must be submitted within 24 hours of the students return to any scheduled class.

        - Documentation will be reviewed by academic leadership. If approved, the next absence - excused or unexcused - may result in being withdrawn from the course.
- Students enrolled in an online course will post attendance through the submission of weekly course work in an asynchronous or synchronous format.
- Make-up opportunities for lectures will not be offered.
    - Students should refer to their syllabi regarding assignment completion and acceptance.
- This policy relates to students missing an entire scheduled class period.
    - Students who are late to or leave early from lecture(s) will be subject to the Disruptive and Unethical Code of Conduct policy.
    - Students who are absent for a scheduled exam and are approved for an exam makeup (per the missed exam policy) are subject to the above attendance policy.
    - Failure to sign in will be counted as an absence.
- For courses taking attendance via the attendance application, students must sign in and sign out to be counted as Present. Students who do not sign in, or who sign in and fail to sign out, will be marked Absent.
- Any student attendance recorded as Other or Holiday are not applicable.

Clinical/Lab Attendance

Clinical Attendance

- Students are expected to attend 100% of all scheduled clinical time. Students are required to make-up all missed clinical time resulting from an absence, tardy or leaving early.
    - This also applies to **NUR 166** lab, **NUR 167** lab, **NUR 221** lab, and **NUR 232** lab as they are considered clinicals.
- Due to the hands-on nature of the nursing clinical, experiences may be difficult or impossible to replicate. The College is under no obligation to provide make-up opportunities.
- Absences will be reviewed by academic leadership on a case-by-case basis per the Guidelines for Lab and Clinical Attendance.
- Students missing 15 minutes or more of any scheduled clinical will be considered absent.
- Students arriving 15 minutes or more after the start of clinical will not be permitted to stay, will be considered absent and will be required to request a makeup.
- Students leaving the clinical for any reason will do so with permission from the instructor. Repetitive leaving and extended absences from a clinical in progress is considered disruptive conduct per the Student Code of Conduct.
- A no call/ no show is defined as a student who does not contact the clinical instructor prior to the missed offsite clinical experience. A no call/ no show will result in a critical incident and may not be eligible for a clinical make-up.

Lab Attendance:

- Students are expected to attend 100% of all scheduled lab time.
    - **NUR 166** lab, **NUR 167** lab, **NUR 221** lab, and **NUR 232** lab are considered clinicals, refer to Clinical Attendance section.
- Due to the hands-on nature of the lab(s), experiences may be difficult or impossible to replicate. The College is under no obligation to provide make-up opportunities.
- Absences will be reviewed by academic leadership on a case-by-case basis per the Guidelines for Lab and Clinical Attendance.
- Students missing 15 minutes or more of any scheduled lab will be considered absent.
- Student arriving 15 minutes or more after the start of lab will not be permitted to stay, will be considered absent and will be required to request a makeup.
- Students leaving the lab for any reason will do so with permission from the instructor. Repetitive leaving and extended absences from a lab in progress is considered disruptive conduct per the Student Code of Conduct.

Guidelines for Lab and Clinical Attendance

Students must submit a makeup request form with extenuating circumstances documentation within 24 hours upon return to the College. Make up request forms without extenuating circumstances documentation will not be accepted. The student should submit no more than one lab and/or clinical make up request per course, per term.

Missed lab/clinical time due to tardies/leaving early will be made up at the faculty's discretion in alignment with the course make up requirements.

Online Attendance - for Traditional Online Courses Only

Students are required to “attend” an online course through submission of weekly course work in an asynchronous or synchronous format.

Students who were unable to complete online coursework due to a valid, verifiable excuse (per the Extenuating Circumstances), but who are still considered as present in the course during the timeframe in which the missed coursework was due, may make up the missed coursework if they provide proof of the excuse to the Campus Dean/ Director of Nursing or designee within five (5) days of the due date of the missed coursework.

Excused absences only allow students to make up missed online coursework with a due date during the time period covered by the excuse, not the entire week for which the student received attendance.

Bereavement Policy

Bereavement may be applicable in the event of the death of an immediate or extended family member (spouse/domestic partner, children, siblings, grandparents, grandchildren, parents/guardians). Bereavement leave should not exceed 3 days total.

Documentation is required (e.g. newspaper notice, funeral notice, obituary, or church handout). Students without verifiable documentation will not be approved.

Students must communicate with their faculty. Students must also communicate with the Campus Dean/Director of Nursing about the need for time off.

- Nursing programs have additional attendance and make-up requirements that must be met. A make-up opportunity or alternative learning experience is not always possible to meet the learning objectives of the course.
- The student should submit no more than one lab and/or clinical make-up request per course, per quarter.
- Students must submit a makeup request as early as possible, but no later than 24 hours upon return to classes.

Extenuating Circumstances

During your studies, you may experience circumstances outside your control that may impact your ability to fulfill the requirements of your courses or program. These guidelines are in place to ensure equity for all students.

Extenuating Circumstances are generally defined as a combination of the following:

- Situations that are different from your usual day-to-day life.
- They are unforeseen and outside of your control: You could not have prevented them.
- They are likely to substantially impact your ability to comply with the policies of the College.

The following are considered extenuating circumstances with appropriate documentation:

- Military service
- Jury duty
- Formal written accommodations obtained through the Campus Dean/Director of Nursing as permitted under the Accommodations Policy.

If the extenuating circumstances reported fall under a Title IX offense and/or pregnancy-related conditions, this should be reported to the Title IX Coordinator at titleix@hondros.edu for support and consideration. Title IX Offenses include incidents of sexual misconduct such as sex-based harassment, sexual violence, dating and domestic violence.

The following situations may be considered extenuating circumstances with appropriate documentation; this list is not all-inclusive:

- Serious ill health or caregiving of self or an immediate family member
- Personal accident or injury of a significant nature
- Bereavement due to the recent loss of a close family member
- Victim of a crime
- Short-term incarceration
- Court Appearance when mandated as third-party or witness
- Unforeseen transportation or traffic emergencies
- Unforeseen conflicts with childcare
- Unexpected medical complications
- Natural disasters or other emergencies declared by a state or federal agency

Standards of acceptable evidence include the following:

- A Health Provider’s letter or certificate that confirms your illness and clearly identifies the time of the illness
- Hospital admission and discharge letter, to confirm your time spent in the hospital
- Death Certificate / Order of Service / Funeral Director’s Letter
- Police Report
- Military Orders
- Jury Duty Summons - stamped jury duty form from the court
- Emergency Declaration
- Intake and Release Paperwork
- Accommodations Plan on file

The following situations are generally not considered extenuating circumstances; this list is not all-inclusive:

- Poor Time Management: Failure to manage time effectively or procrastination
- Work Commitments: Not planning appropriately for work commitments or volunteer work
- Holidays or Travel Plans: Lack of prioritization for academic expectations related to vacations or trips
- Lack of Preparation: Not completing work related to exams or assignments, misreading of schedule or tardiness
- Transportation Issues: Not planning for routine/expected traffic delays
- Non-Urgent Appointments: Routine appointments that can be scheduled at alternative times
- Minor Illnesses that do not significantly impact academic performance

Virtual Lecture Policy

Students are responsible to ensure they attend all virtual classes just as you are required to attend in-person lectures. Students must be registered for the class and attend the class as scheduled. Student Code of Conduct, behavior expectations, Dress Code Policies, and Attendance Policies do not change with remote teaching and learning; therefore, students must adhere to the written college policies as identified in the student catalog.

- Students are prohibited from recording virtual lectures and providing virtual links with others.
- All students attending virtual classes are to be stationary and clearly observed. The student is to remain visible on camera in order to create a collaborative learning environment.
- Students must log in with their full name as listed in CAMS. Failure to use their full name may result in the student being recorded as absent if the college is unable to verify attendance.
- Students are expected to follow some basic etiquette rules when attending virtual lectures including but not limited to; minimizing background noise, muting of the student’s microphone when not speaking.

- Students are encouraged to ask questions and make comments using either the chat feature or microphone but always demonstrating respect to their instructor and classmates by using appropriate language and tone.
- To ensure a positive and productive virtual learning experience students should plan an area free of interruptions, avoid multitasking, and avoid participating in other activities that may distract the student or others from the lecture. Students are expected to engage in virtual classroom instruction and/or classroom activities as directed.

Fitness for Duty Policy

Students assigned to lab or clinical experiences shall be deemed “fit for duty” by the student’s health care provider. If the clinical agency wants to verify the health records of any student assigned to the named agency, those records will be provided upon request.

Students prohibited by a health care provider to participate in lab, or clinical due to an illness, accident, or injury must notify the faculty member. A note from the student’s health care provider must be submitted to the Campus Dean/Director of Nursing, or designee to verify student’s fitness for duty upon return to classes (lab or clinical). Students may not be permitted to attend lab or clinical without this verification.

Dress Code

Requirements for grooming and appearance are based on safety, infection control, and the need to present a professional appearance.

Grooming Standards

1. The skin should be cleansed daily. Deodorant should also be used daily. Makeup should be used in moderation with no heavy application of foundation, rouge, eye makeup or lipstick. False eyelashes should not be worn in the clinical or lab setting. Perfumes, colognes, and scented lotions or body sprays are not permitted.
2. The hair should be neatly groomed and of a natural color. For lab and clinical, long hair should be arranged back in a ponytail, braids, or bun so that it does not fall into the face, on the back of the collar, or obstruct vision. Hair extensions and styles should be conservative. Beards and/or mustaches should be short, neat, and well-trimmed.
3. The hands should be clean and well cared for, with short fingernails, (natural nail tips no longer than 1/4 inch). Nail polish, nail overlay of any type, or artificial nails are not permitted at any time.
4. Any tattoos of offensive nature must be covered at all times if required by campus leadership or clinical site.
5. For lab or clinical: only one small stud earring per lower ear lobe may be worn. Gauge type piercings must be clear or skin tone colored. Only one plain, stone-less, smooth ring is permitted. A watch with a second hand or digital display is required (no smart watches). Medic Alert jewelry will be permitted at all times. No other jewelry will be allowed.
6. Hats, scarves, and other head coverings are not permitted in class, lab, or clinical unless required by verifiable religious exemption or a medical accommodation. A head covering is defined as anything that covers a majority of the head, including scrub caps and stocking caps. Headbands may be worn; however, they must be no wider than one (1) inch and of a solid neutral color and without adornments or designs.

Uniforms

All admitted students are given information about how to order College uniforms.

1. Students must wear approved uniforms to all lectures, labs, and clinical unless otherwise authorized by the campus leadership.
2. Students will be issued a photo ID badge that must be worn and visible above the waist at all times while on campus and at off-campus clinical sites. Lost ID badges must be replaced immediately. There is a $10 replacement cost for each badge.
3. Uniform must be freshly laundered, without wrinkles, and in good condition.
4. Students are permitted to wear a plain white short or long sleeve t-shirt under the uniform.
5. Students must wear flesh/white color nylons, stockings, tights, or solid color socks.
6. Students are to wear clean white or black leather or leather-like non-mesh nursing, non-mesh athletic shoes without any decoration or color to lab and clinical. Shoes must cover the whole foot. Students are permitted to wear any type of nursing or athletic shoe for

class only.

Disciplinary Action Related to Dress Code Violations

Students not in uniform or not in adherence with the College Dress Code policy during any classroom, lab, or clinical experiences may be asked to leave. The attendance policy will be applied and any absence incurred as a result of being out of dress code will be recorded.

Violations of the dress code policy will be handled as follows:

1. First occurrence: The student will be given a warning of the dress code violation. Documentation of the warning will be kept in the student's file on an Opportunity for Growth Form.
2. Second occurrence: A written warning will be issued to the student via a Critical Incident Form.
3. Third Occurrence: The student will meet with the Campus Dean/Director of Nursing and Campus Executive Director to address their refusal to comply with the dress code. A second and final Critical Incident Form will be issued to the student.
4. Fourth Occurrence: The College reserves the right to dismiss a student for failure to comply with the dress code.

Assignment & Exam Policies

Student Testing Policy

Assessment is defined as: Evaluations or measurements used to document students' academic readiness, learning progress, skill acquisition, or educational needs.

Assessment takers are expected to comply with the Student Testing Policy when taking any assessment, as defined in this policy. Failure to adhere to the policy may result in an academic integrity policy violation inquiry.

- Assessment takers are not permitted to take an assessment for any other student.
- Assessment takers are not permitted to have another person take an assessment on their behalf.
- During testing, assessment takers may not use the computer for any function other than completing the proctored assessment.
- Assessment takers are not permitted to copy, reproduce, record, distribute, or disclose the assessment questions by any means or allow another individual to do so.
- Assessment takers with an approved accommodation are expected to notify their faculty of the specific assessment-related accommodations they need at least 24 hours in advance of the exam. This will help ensure that the accommodations are provided on time.
- Assessment takers must immediately notify the proctor if they experience technical difficulties during an assessment.
- To access the assessment, assessment takers must show their photo identification. Photo identifications should be the College issued Photo ID, or if necessary, an original, current (valid) ID issued by a city/state/federal government agency.
  - You must use the name on your ID to register to test, and the photo ID must be clearly recognizable as you.
- For Assessments that require a webcam to ensure the best experience,
  - If a webcam is required, your face should be clearly visible.
  - Position the webcam so your face is centered in the frame the entire time you are signed in and complete your assessment.
  - Ensure all other computer applications are closed, and if required, anti-virus software is disabled before you begin your assessment.
  - Do not attempt to block the webcam's view by moving the device, blocking the webcam with a piece of paper or other objects, or sliding the cover over the lens.
  - Avoid leaving the view of the webcam, using unauthorized materials, moving in an unusual or excessive way, looking away from the screen, or speaking.
- There are two time constraints on the exam/quiz: when the exam/quiz deadline passes (that is, the date and time at which students will no longer be able to access the exam or quiz), and when the time limit on the exam/quiz has ended (that is, when the amount of

time allotted for students to take the exam/quiz is completed). Students must be careful to leave themselves enough time to complete the exam/quiz before the deadline passes, and must be cognizant of the time limitations of the exam/quiz, as well.

- Cheating hurts everyone. If you see it, report it. If you suspect another tester is attempting to create an unfair advantage or encounter any other attempt to violate the academic integrity policy, you are encouraged to report the activity to Hondros College of Nursing Officials.

In-Person Assessments Require:

- Assessment takers are expected to be on campus, in the designated testing area, and ready for the assessment at or prior to the scheduled start time of the assessment. The campus will use a process to determine on-time arrival. Assessment takers should expect the doors to the assessment environment to be closed at the scheduled start time of the exam. Students arriving after the doors are closed, regardless of check-in status, will be considered late and will not be permitted to enter the assessment environment, forfeiting their opportunity to take the exam.
- Assessment takers may be required to wait in a designated waiting area outside of the testing environment prior to the testing time.
- Assessment takers must take care of any personal needs (i.e., restroom) before entering the room for the assessment.
- Assessment takers may not eat food or candy, drink, or chew gum during the assessment unless an approved accommodation requires it.
- Assessment takers are required to utilize laptops/computers approved by the school with the appropriate lockdown platforms installed. Students who do not meet this requirement will not be permitted to take the exam.
- For examinations delivered electronically via Examplify (the ExamSoft testing platform): students must bring a working laptop with the Examplify software installed that meets the technology requirements.
- For paper-based testing, written responses to questions must be designated clearly. Students will record their name, the date and the course name and section number on each piece of paper.
- Students must submit the exam by the conclusion of the testing period. If technical difficulty prevents a student from submitting the exam, the issue must be immediately documented by the proctor and elevated to the faculty member for next steps, which may include a resubmittal of the original exam immediately following the resolved technical issue, or a make-up exam offered if necessary.
- If an assessment taker leaves the testing environment for any reason without permission, they are not permitted to re-enter the environment during testing.
- If an assessment taker must leave for any reason during the assessment prior to completing the assessment, any personal items that were allowed to stay in the room must remain in the assessment environment until the assessment is completed by all students. The proctor has the discretion to approve a temporary exit from, and to allow the removal of any personal items from the assessment environment and approve their return to the assessment environment.
- Makeup Exams – Makeup eligibility is determined by the following situations:
  - Arrived late or exited early due to extenuating circumstances. - See the Extenuating Circumstances policy for additional information. Depending on the type of assessment, students must work with the campus Dean/Director of Nursing to determine if a makeup is allowed.
  - Missed assessments due to extenuating circumstances - See the Extenuating Circumstances Policy for additional information. Depending on the type of assessment, students must work with the Campus Dean/Director of Nursing to determine if a makeup is allowed.
  - Arrived late or exited early without approval – No makeup allowed.
  - Did not comply with provisions of the testing policy – No makeup allowed.
  - Entrance Exams make-up will require the approval of the Campus Executive Director.
  - Early exams/quizzes will not be given prior to the originally scheduled date.
  - Unannounced or pop quizzes cannot be made up.
- Within 24 hours of the missed exam/quiz, student must contact their instructor by phone, e-mail, or in-person and provide documentation of an extenuating circumstance for faculty to determine whether an extenuating circumstance exists and whether a make-up exam/quiz will be offered. If the student knows in advance of the exam/quiz that they will not be able to take the exam/quiz as scheduled, the instructor must be notified of the anticipated absence before the original exam/quiz is given. If a make-up

exam/quiz will be offered, then students are generally expected to make up the exam within two business days of their return; the make-up date and time determination will be made by the faculty/dean.

- For assessments with a scheduled break, you may eat or drink outside the assessment room during the break. Electronic devices are not to be used during scheduled breaks. Ensure that you have returned to your seat prior to the end of the break period.
- During the assessment, only authorized resources and exam materials are permitted on your desk or workspace in the testing area. Unauthorized electronic devices, including cell phones, tablets, smartwatches, calculators, cameras, smart glasses, pagers, wireless headphones, or other electronic equipment, are not allowed.
  - Calculators, if allowed, along with writing tools and scratch paper will be provided by the campus.
  - If you utilize scratch paper, you must:
  - Not write on scratch paper until you have started the assessment.
  - Write your name on the piece of scratch paper distributed once the assessment begins.
  - Not copy or reconstruct assessment items during or after the assessment for any reason.
  - Return all scratch paper to the proctor at the end of the assessment.
  - Personal belongings are strictly prohibited in the assessment environment. This includes bags, backpacks, purses and wallets, cosmetics, including lip balm; any item that could be used to conceal your identity or an unauthorized testing aid.
  - Personal items allowed to stay in the room will be placed in a designated location, and the student must prove that all electronic devices are turned off.
  - Assessment takers should leave personal items in a locked vehicle, out of sight of passersby, or at home if they are not required for their time on campus. Hondros College of Nursing is not liable for any loss of, damage to, and/or theft of personal property left unattended by an assessment taker anywhere on campus, in the parking lot, or in a vehicle while complying with this policy.
- Assessment takers may be asked to roll up their sleeves, empty their pockets, or remove their glasses to demonstrate that their person is free of any electronic devices or other prohibited items upon entry to the testing environment.
  - Assessment takers who refuse to comply with the personal item expectations will be asked to exit the testing environment and will not be permitted to complete the proctored assessment.
  - Assessment takers asked to roll up their sleeves who wear long sleeves as part of a modesty provision of a sincerely-held religious belief may request a private screening area.
- Students are expected to wear their uniforms for any testing on campus, see Dress Code policy.

Exceptions to personal belongings rule:

- Personal Laptops that are approved by the institution for test-taking. When laptops/computers are provided by the institution, those must be used.
- Cultural-religious attire
  - Assessment takers may be asked to pull back their head covering and demonstrate that they do not have listening devices unrelated to a documented accommodation upon entry to the testing environment.
  - Assessment takers who refuse to comply with the head check expectations will be asked to exit the testing environment and will not be permitted to complete the proctored assessment.
  - Assessment takers asked to pull back their head covering who wear the head covering as part of a modesty provision of a sincerely-held religious belief may request a private screening area.
- Campus-provided earplugs or noise-canceling headphones.

Exiting the Assessment Environment at the end of the Assessment:

- Log out of the assessment and leave the computer in place.
- Turn in your scratch paper and remove any permitted personal belongings.
- Quietly leave the testing environment as soon as you finish the assessment.
- Students are not permitted to re-enter the environment during the assessment.

Late Assignment Policy (Classroom, Virtual Online Lecture Option, and On-Campus Labs)

All assignments should be submitted on time. Late assignments will lose 5% for each calendar day late. Assignments will not be accepted once the graded assignments are returned to the class. Due to their nature, pre-class assignments and in-class assignments (such as laboratories, in-class demonstrations, speeches, etc.) cannot be accepted late. No assignments will be accepted after the last day of class

Late Assignment Policy (Online) - For traditional online courses only

All assignments should be submitted on time. For each day late, assignments (including essays, papers, and other homework assignments) will be penalized by 5% of the assignment's maximum score. Assignments will not be accepted more than 48 hours after the deadline. No assignments will be accepted after the last day of class.

Late Discussion Posts and Replies Policy (Online) - For traditional online courses only

Discussion forums posts and replies submitted after the discussion's final due date will not be accepted for a grade. For each day late, an initial or main post will be penalized by 5% of the post's point value. Initial or main posts will not be accepted more than 48 hours after the deadline. Reply posts are not accepted late.

Patients Rights

Consumers of health care have the right to be respected as individuals. The client has the right to expect confidentiality of communication pertaining to his or her care. No part of the client's record may be removed from the agency or reproduced. Written material submitted as a required assignment that contains information regarding an actual patient or client is the property of Hondros College of Nursing. All rules and regulations under the Health Insurance Portability and Accountability Act (HIPAA) of 1996 will be strictly followed. For more information on HIPAA please go to http://www.hhs.gov/ocr/privacy/ .

Hospital: 2025 National Patient Safety Goals

The purpose of the National Patient Safety Goals is to improve patient safety. The goals focus on problems in health care safety and how to solve them. Students are required to monitor all aspects of patient safety. The National Patient Safety Goals address specific areas:

1. **Identify patients correctly:** Use at least two ways to identify patients. For example, use the patient's name and date of birth. This is done to make sure that each patient gets the correct medicine and treatment.
2. **Improve staff communication:** Get important test results to the right staff person on time.
3. **Use medicine safely:** Before a procedure, label medicines that are not labeled. For example, medicines in syringes, cups, and basins. Do this in the area where medicines and supplies are set up. Take extra care with patients who take medicines to thin their blood. Record and pass along correct information about a patient's medicines. Find out what medicines the patient is taking. Compare those medicines to new medicines given to the patient. Give the patient written information about the medicines they need to take. Tell the patient it is important to bring their up-to-date list of medicines every time they visit a doctor.
4. **Use alarms safely:** Make improvements to ensure that alarms on medical equipment are heard and responded to on time.
5. **Prevent infection:** Use the hand cleaning guidelines from the Centers for Disease Control and Prevention or the World Health Organization. Set goals for improving hand cleaning.
6. **Identify patient safety risks:** Reduce the risk of suicide.
7. **Improve health care equity:** Improving health care equity is a quality and patient safety priority. For example, health care disparities in the patient population are identified and a written plan describes ways to improve health care equity.
8. **Prevent mistakes in surgery:** Make sure that the correct surgery is done on the correct patient and at the correct place on the patient's body. Mark the correct place on the patient's body where the surgery is to be done. Pause before the surgery to make sure that a mistake is not being made.

Information obtained from http://www.jointcommission.org/standards_information/npsgs.aspx .

Student Grievance Procedure

The College recognizes the rights of individuals affiliated with the College to receive due process under the policies and practices that govern the College, and thus, individuals may submit a complaint through the impartial procedures of grievance as defined in these policies.

For the purposes of these policies, the following terms are defined:

- **Complaint:** An expressed feeling of dissatisfaction held by an individual regarding an action taken by the College or by members of the College community.

Not all complaints rise to the level of a grievance unless specific allegations warrant the need to use the following grievance procedures to resolve the complaint. Complaints that do not include the specific allegations that make the concern eligible to be processed under the following grievance procedure should be directly addressed with the individual and/or department that oversees the area of concern.

A grievance is a complaint that alleges the College failed to properly apply its policy, procedure, and/or standard practice. Disagreement with the outcome of a properly applied policy, procedure, and/or standard practice does not constitute a grievance.

No retaliatory action may be taken against those who have a complaint or submit a grievance, participate in the resolution process, or are the subject of the matter. The College will investigate and attempt to resolve each grievance made under this policy and any associated allegations of retaliation.

1. Submit in writing, within five (5) business days, a detail of the grievance and a recommendation of resolution to the Campus Executive Director. The Campus Executive Director will formally respond, in writing, to the student within three (3) business days.

   If the student feels the grievance has not been satisfactorily resolved, the student may appeal to the Vice President of Operations. Appeals must be submitted, in writing, within three (3) business days of receiving the Campus Executive Director's decision.

2. The College's Vice President of Operations will convene an unbiased panel to review the request. The College's Vice President of Operations will formally respond, in writing, to the student within five (5) business days. This decision is final and no further appeal will be considered by the College.

Failure to follow the timelines prescribed in the grievance procedure will result in an automatic denial of appeal and forfeiture of future consideration from Hondros College of Nursing.

If the student is not satisfied, the student may lodge a complaint with the appropriate state agency.

- Students in Ohio may contact the Executive Director of the State Board of Career Colleges and Schools, 30 East Broad Street, Suite 2481, Columbus, OH 43215, (614) 466-2752.
- Students in Indiana may contact the Indiana Commission for Higher Education/Indiana Board for Proprietary Education, 101 West Ohio Street, Suite 300, Indianapolis, IN 46204-4206, (317) 232-1033.
- Students in Michigan may contact the State of Michigan Department of Labor and Economic Opportunity, Employment & Training, Post-Secondary Schools, P.O. Box 30726, Lansing, MI 48907, (517) 335-4000.

Technology Requirements

Students are required to have personal laptops for classroom and online learning experiences and any other educational activity. Having the accessibility of a laptop will allow students to stay connected with their classmates and faculty throughout their courses. Technology requirements for student laptops for all programs are listed below:

- A non-ARM based, multi-core Windows-compatible processor, that operates at a minimum of 2.0 GHz. *Chromebooks, iPads and devices with ARM processors are not supported by the College's testing technology or by the campus technical staff.*
- Windows 10 operating system or newer. Alternate versions of Windows such as Windows RT and Windows 10 S, are not supported.
- Minimum 4 GB of usable RAM; 8 GB or more recommended.
- Minimum 100 GB of free hard disk space or more; 256 GB or more recommended.
- Built-in microphone and speakers or headset.
- A display capable of 1024 x 768 resolution or greater.
- A graphics card capable of producing high-quality graphics and video.
- A wireless card or built-in wireless networking.
- An installed copy of Microsoft Office - HCN licenses Office 365 for all enrolled students.
- Anti-virus software (current and regularly updated according to the software manufacturer).
- The latest versions of:
  - Chrome
  - Firefox
  - Java
  - Adobe Acrobat Reader
- Wired headset or wired earbuds for exams; wireless devices are not permitted for testing.
- Webcam for virtual lecture and exams as applicable.

In addition, students need access to a broadband internet connection of 3 Mbps or faster. Free wireless internet is available at each College campus. All students are responsible for acquiring wireless access off campus.

Students using adaptive technology are recommended to use JAWS (version 10.0 or later) or Window-Eyes (version 7.0 or later) with MyClassroom.

Students may elect to purchase a technology package from the College, which includes a laptop, software, and capabilities for wireless connection. Having the accessibility of a laptop will allow students to stay connected with their classmates and faculty throughout their courses. All students are responsible for acquiring wireless access off campus. Free wireless access is available at each College campus.

Every student is expected to be proficient and responsible with the technology used at the College; this includes:

- **College E-mail** - Enrolled students are given a College student e-mail address. This e-mail address will be used to communicate with faculty, administration, and fellow students; it is the official e-mail address the College will use to communicate with students. Students should check their Hondros College of Nursing e-mail at least daily.
- **CAMS Student Portal** - Students are required to utilize the Student Portal throughout their program. The College will post vital information, including addenda to this catalog, on the Student Portal. It is the responsibility of the student to access the Student Portal to:

1. Read news postings;
2. Stay current on changes/addenda to the Student Catalog;
3. Receive documentation and communication specific to his or her student record;
4. Access official midterm and final grades;
5. Complete end-of-term evaluations;
6. Access unofficial transcripts;
7. Access the student email system; and,
8. Access MyClassroom.

- **MyClassroom** – All students taking classes traditionally offered online at Hondros College of Nursing will utilize the MyClassroom learning management system as their course classroom. MyClassroom houses course lessons and documents, assignments and assessments, discussion forums, and the course gradebook. Students should log in to their online courses at least once per day. The

Campus Dean/Director of Nursing, or designee provides technical support for electronic educational products including, but not limited to, MyClassroom, HESI, Connect, etc.

Students are shown how to access the learning management system utilizing their own personal username and password.

While students are welcome and encouraged to contact the Helpdesk and student support services on their campuses for assistance, issues that cannot be resolved locally are escalated to the support team that administrates the Hondros MyClassroom learning management system.

This Team Can Be Reached by Phone or Email During the Following Hours:

- Monday – Friday: 6:00 a.m. to 10:00 p.m. ET
- Saturday: 8:00 a.m. to 10:00 p.m. ET
- Sunday: 7:00 a.m. to 12:00 a.m. (Midnight) ET

For assistance, students should call 855-90-NURSE or email myclassroomsupport@hondros.edu.

Non-academic Misconduct

Harassment Conduct/Hazing Conduct

1. Physically or verbally abusing, assaulting, threatening, endangering, or harassing any person connected with the College or a clinical agency.
2. Engaging in harassment based on race, ethnicity, gender, sexual orientation, ability, or religious affiliation.
3. Engaging in sexual assault, sexual exploitation, sexual harassment, non-consensual contact, and/or stalking, as defined by the Ohio Revised Code.
4. Engaging in, or coercing another individual to engage in, any act related to initiation or membership in a student or other organization that causes or creates a substantial risk of mental or physical harm to any person.

Disruptive and Unethical Conduct

1. Improper verbal or physical conduct in any classroom, lab, clinical location while on College property or wearing the College uniform.
2. Threatening or actually physically harming another person or person's property.
3. Disruption while in a classroom, lab, or clinical location. Disruptive conduct may include, but not limited to, arriving late to class, leaving class early, frequent breaks, outbursts, or any other activity that disrupts the educational and learning opportunities of other students.
4. Use of cellular phone and Bluetooth devices while in class, lab, or at clinical locations including texting and Internet usage. Due to patient confidentiality, cellular phones and Bluetooth devices are prohibited in the clinical setting.
5. Sleeping during class, lab, or at clinical locations.
6. Leaving the clinical facility before the end of the scheduled shift without faculty permission.
7. Unauthorized entry to or use of College facilities.
8. Theft or damage to the College or College property.
9. Possession, use, distribution and/or sale of any illicit/illegal substance, including the use, distribution, and/or sale of marijuana or cannabis. Regardless of whether a medical marijuana prescription and/or card has been issued, the College considers marijuana an illegal substance, and using it is strictly prohibited. This is applicable even in cases where the state has legalized marijuana use for medical and/or recreational purposes.
0. Use of or being under the influence of alcohol or drugs while on College property and/or any clinical location. Students should report any knowledge of such activities to the appropriate College personnel. Whenever anyone with supervisory responsibilities within the College suspects a student has fallen short of performance or behavioral standards due to the use of alcohol or drugs, or is under the influence of alcohol or drugs, the College may require that individual to submit a saliva, blood, or urine sample for alcohol and/or drug testing to stay enrolled in a program.

1. Carrying a firearm, deadly weapon, or dangerous ordinance anywhere on College property or on any clinical campus used by the College.
2. Having children on campus. Children are not permitted to attend classes, including labs and clinicals. Children are not permitted on campus or common areas used by the campus.
3. Smoking and tobacco use. Students may not smoke or use tobacco products of any kind, including electronic cigarettes, snuff, chewing tobacco, etc. at any clinical sites, while in uniform, or while on campus.
4. Students are not permitted to eat or drink in the nursing skills lab or the science lab.
5. Falsifying Information, including, not limited to, providing false information to College officials or clinical agencies, participating in forgery, and knowingly supplying the college false or altered documentation or information.
6. Failing to abide by College policies.

Consequences of Non-Academic Misconduct

The College has the right to discipline any student whose behavior violates the Student Code of Conduct or Ohio Board of Nursing regulations, as outlined below. Students will receive written notification of any disciplinary actions.

Depending upon the severity of the violation, the College may:

1. Issue a verbal warning to the student.
2. Issue a written warning to the student. The warning will be placed in the student file.
3. Administratively Withdraw the student from a course(s) with a “W” or “F” grade.
4. Immediately dismiss the student from the College.

Additionally, the College may be required to notify the state board of nursing of certain behaviors or offenses. If a student is subject to any of the consequences listed above the College reserves the right to suspend the students right to attend course(s) while an investigations takes place. If a student is subject to any of the consequences listed above and disagrees with the outcome, he or she may refer to the Student Grievanc Procedure. Students who are dismissed due to a violation of the Student Code of Conduct are prohibited from being on College property and are not eligible for reinstatement or admission to any other program.

Graduation, Credentialing & Honors

The candidate for program completion must:

1. Have successfully completed all program requirements with a minimum grade of "C" (2.0 GPA) or better in all courses.
2. Achieve the minimum number of credit hours required for the program of enrollment.

Graduation Requirements

The candidate for graduation must:

1. Meet all program completion requirements.
2. Pay applicable graduation fee(s).
3. Be free of indebtedness to the College.

Candidates who meet program completion requirements but have not met all other graduation requirements listed above will be placed in completer status. Once all graduation requirements have been fulfilled, the candidate will be moved to graduate status. Only students in graduate status will have their completion letters released.

Commencement/Pinning Ceremonies

Commencement ceremonies are held throughout the year. Students assume the ultimate responsibility for meeting all graduation requirements. Failure to meet the graduation requirements may result in a student being deemed ineligible to attend the commencement and pinning ceremonies.

NCLEX® Exam and Licensing

Ohio Board of Nursing Licensure - Application Requirement

As of June 2004, the Ohio Board of Nursing requires all applicants for licensure to declare any existing psychiatric condition(s). Please check with the Board of Nursing for further clarification or questions at (614) 466-3947, or email board@nursing.ohio.gov.

Proof of Citizenship Required for NCLEX® Candidates

The federal law known as the Personal Responsibility and Work Opportunity Reconciliation Act (PRWORA) limits state licensure to U.S. citizens and other qualified applicants. The State Board of Nursing is required to keep assurance of citizenship on record with applications for licensure.

Ohio Board of Nursing Felony Policy

Section 4723.28 of the Ohio Revised Code, the law regulating the practice of nursing, states that the Board of Nursing may deny a person the privilege of sitting for the licensing examination based on certain past behaviors or legal history.

Each applicant for licensure will be required to answer questions on the application related to whether the individual seeking licensure has:

1. Been convicted of, found guilty of, pled guilty to, pled no contest to, or received treatment in lieu of conviction for any misdemeanor committed in the course of practice in Ohio.
2. Been convicted of, found guilty of, pled guilty to, pled no contest to, or received treatment in lieu of conviction for any felony.
3. Been convicted of, found guilty of, pled guilty to, pled no contest to, or received treatment in lieu of conviction for any crime involving gross immorality or moral turpitude.
4. Violated any municipal, county, state, or federal law.

Transferability of Credits

Hondros College of Nursing cannot guarantee the transferability of credits earned at any other institution. Determinations on the transferability of credits are made by the receiving institution.

Transfer Credit Policy Effective Fall 2026 and beyond

Transfer credit is only awarded from an official transcript. Official transcripts must be delivered in a sealed envelope or sent electronically through a certified credentialing agency from the originating institution. Official transcripts should be received no later than the end of week one (1) of the first quarter of the program for evaluation. Official College Level Examination Program (CLEP) exam results should be received no later than the end of week seven (7) of the first quarter of the program for evaluation.

Hondros College of Nursing cannot guarantee evaluation of transfer credit for transcripts received later than week one (1) of the program or later than week seven (7) for CLEP exams. Questions regarding the Transfer Credit policy should be directed to the Office of the Registrar.

Applies to All Programs

1. Transfer credit will be considered for courses with a grade equivalent to a "C-" or better earned.
2. College Level Examination Program (CLEP) will be accepted for **ENG 200**.
    - CLEP exams accepted are College Composition or College Composition Modular. A minimum score of 50 must be obtained.
3. Transfer credit is not awarded for Hondros College of Nursing courses with the "NUR" prefix.
4. Transfer credits are transcribed on the Hondros College of Nursing transcript and are counted in the cumulative hours completed, but they are not counted in the credit hours attempted as part of the cumulative grade point average.
5. Hondros awards quarter credits. In considering transfer courses, 1 semester credit is equivalent to 1.5 quarter credits. The calculated number is rounded down to the nearest whole number. Transfer credits based on a different unit of credit than quarters will be subject to conversion prior to being transferred.
6. Upon a student's formal request, the College will determine whether any of the student's military education and/or skills training is substantially equivalent to courses in their program. Students who wish to have their military experience and/or National Guard experience and training evaluated for equivalency transfer credit should submit the appropriate documentation, in the form of official transcripts and forms DD 214 (veterans) and DD 295 (active-duty military personnel), to the Registrar for formal evaluation.The College may also accept as transfer credit completion of formal military courses as recommended by the American Council on Education (ACE) when verified through official transcripts (Army/ACE Registry Transcript System, Community College of the Air Force, Sailor/Marine/ACE Registry Transcript, Registry of Credit Recommendations, or National Registry for Training Programs).In addition, credit may be awarded through review of a student's certified Department of Defense (DD) Form 214 (Armed Forces of the United States Report of Transfer or Discharge) in conjunction with the ACE Handbook, Evaluation of Educational Experiences in the Armed Forces.
7. Transfer credit will be considered for international transcripts evaluated by an organization that is a member of the National Association of Credential Evaluation Services (NACES) or the Association of International Credential Evaluators, Inc. (AICE).
8. Transfer credit will be evaluated for course content and credit hour. Transfer credit considered for **BIO 117**, Introduction to Anatomy and Physiology, may be a higher-content course.
9. Credits earned at another institution during the period of enrollment at Hondros College of Nursing will not be considered for transfer credit.
0. Science courses, as defined in the program curriculum, must have been completed within the past 5 years.
1. The Associate Degree in Nursing anatomy and physiology series at Hondros College of Nursing is evaluated for anatomy, physiology, and microbiology content. A stand-alone microbiology course is often required to receive transfer credit.

Declining Transfer of Credit

A student may choose to decline external transfer credit that would otherwise be awarded by submitting the Transfer Credit Declination form to registrar@hondros.edu. The transfer credits will be removed from the student's current enrollment record.

The request must explicitly state for which course(s) the student wants to waive the transfer of credit. The declined transfer credit may be rescinded at a later date by submitting a written request to registrar@hondros.edu.

Students using Veteran's Affairs (VA) educational benefits must submit all previously completed college-level coursework for transfer evaluation, and all credits deemed eligible for transfer must be accepted by Hondros.

The U.S. Department of Veteran's Affairs does not allow students using VA education benefits to decline transfer of credit. A student who chooses to decline eligible transfer credit will not receive military funding for declined transfer courses and will need to secure other means of payment.

Admission and Registration

General Admission Requirements

Acceptance to Hondros College of Nursing is based on the following requirements:

1. The applicant must be a U.S. citizen or permanent resident of the United States. The applicant must submit official, un-expired government-issued documentation needed for admission (driver's license, state ID, passport, or proof of citizenship or permanent residency if not a U.S. citizen);
2. The applicant must be at least 18 years of age or older at the time he or she starts the program
3. The applicant must complete and sign the application for admission and pay the applicable application fee;
4. The applicant must complete the Student Online Readiness Survey. For technology requirements, refer to the "Technology Requirements and Acceptable Use Policy". There are no additional costs to enroll in courses offered only via distance education
5. The applicant must be a high school graduate or possess the recognized equivalent of a high school diploma. The applicant must provide documentation of graduation from high school in the form of a valid high school diploma, transcript, or other acceptable documentation issued by an authorized state education agency (e.g., General Education Development (GED)). Applicants for Indiana state must provide a high school transcript, or other acceptable documentation issued by an authorized student education agency (e.g., General Education Development (GED)). International transcripts/documents need to be evaluated by an organization that is a member of the National Association of Credential Evaluation Services (NACES) or Association of International Credential Evaluators, Inc. (AICE); and
6. The applicant must complete and sign the enrollment agreement and pay any applicable enrollment agreement fees.

Program Admission Requirements

- Practical Nursing Diploma: Ohio
- Practical Nursing Diploma: Indiana
- Practical Nursing Diploma: Michigan
- Associate Degree in Nursing

Registration Information

Students are responsible for their own academic planning and scheduling to meet graduation requirements. Students are required to register for courses via the Student Portal during open registration. Students who have an outstanding balance or have not submitted all required documentation will not be able to register for upcoming quarters. Students are expected to complete the courses in an uninterrupted pattern as indicated on the curriculum listing page in this catalog.

Students not registered for an upcoming quarter will be withdrawn from the college. Students who need to change their program track, if multiple tracks are available at their campus, must request a change prior to the end of week 1 of the quarter in which they need to change tracks. All change requests must be approved by the Campus Dean/Director of Nursing. No section or track changes will occur after the end of week 1 of the quarter.

Students who need to repeat a course may complete academic advising with their Campus Dean/Director of Nursing or designee before being registered for the repeat course. Please refer to the Repeat Policy for additional information.

Physical Location Determination

Hondros College of Nursing determines each student's location at the time of initial enrollment using the address provided on the application. Students must process changes to their address using the CAMS Student Portal, by clicking the "Edit Profile" link.

Relocation to a state in which Hondros College of Nursing is not approved to operate may adversely impact the student's ability to complete the program. Further, moving to a state where Hondros College of Nursing has not determined that the program will lead to licensure may impact the student's ability to become licensed within the state. More information can be found under the Professional Licensure Disclosure on the Consumer Information area of the Hondros College of Nursing website.

Tuition & Financing

Tuition & Financing

Tuition & Fees

Policies, tuition, fees, and charges will be effective Summer 2026, July 1, 2026, and beyond and are subject to change without prior notice. The College requires that tuition, textbooks, and fees be covered in full at the time of registration and no later than prior to the first day of classes. A student may use financial aid, and/or payment can be made by cash, check, and credit or debit card.

2026 Ohio & Michigan Diploma in Practical Nursing Rate Sheet - Full-Time Track

Cost Component	Amount
Tuition	$19,440.00
Program Admin Fee	$495.00
Technology Fee	$200.00
Lab/Incidental Fees	$750.00
Textbooks/Materials (estimated, as consumed)	$3,241.94
FBI/BCI Fees (Exit)	$72.00
Technology Package	$697.00
Graduation Fees	$100.00
Total Direct Costs	**$24,995.94**

2026 Ohio Diploma in Practical Nursing Rate Sheet - Part-Time Track

Cost Component	Amount
Tuition	$19,440.00
Program Admin Fee	$495.00
Technology Fee	$350.00
Lab/Incidental Fees	$750.00
Textbooks/Materials (estimated, as consumed)	$3,241.94
FBI/BCI Fees (Exit)	$72.00
Technology Package	$697.00

Graduation Fees	$100.00
Total Direct Costs	**$25,145.94**

2026 Indiana Diploma in Practical Nursing Rate Sheet - Full-Time Track

Cost Component	Amount
Tuition	$19,845.00
Program Admin Fee	$495.00
Technology Fee	$200.00
Lab/Incidental Fees	$750.00
Textbooks/Materials (estimated, as consumed)	$3,241.94
Technology Package	$697.00
Graduation Fees	$100.00
Total Direct Costs	**$25,328.94**

2026 Ohio Associate Degree in Nursing Rate Sheet

Cost Component	Amount
Tuition	$28,487.00
Program Admin Fee	$495.00
Technology Fee	$250.00
Lab/Incidental Fees	$1,200.00
Textbooks/Materials (estimated, as consumed)	$4,217.89
FBI/BCI Fees (Exit)	$72.00
Technology Package	$697.00
Graduation Fees	$100.00
Total Direct Costs	**$35,518.89**

*Tuition for PN Alumni is $27,145

Cost of CPR, physical examination, and immunizations are not included in the above costs. These costs will vary depending upon the provider. Costs listed are estimated based on an average student. Books and other consumable costs may change. Tuition may be less depending on transferred course work. Tuition and fees are subject to periodic reviews and increases. Estimated costs do not include applicable tax.

Duplicate Diploma/Degree Fee

Diplomas, at the time of issuance, reflect the date the degree/certificate was awarded and bear signatures of the current administration.There is a $23 fee for each duplicate diploma or degree. Students with an outstanding balance will not be issued a diploma or degree. To request a duplicate diploma or degree email nursingstudentaccounts@hondros.edu.

Financial Clearance

Tuition and fees for the quarter are due and payable in full at registration. Details of payment options may be obtained from the student financial aid office.

All students must be financially cleared before registration. Financial clearance is defined as:

- Payment in full for the current quarter;
- A financial plan in place that is estimated to cover current costs in full; and
- Appropriate paperwork completed as defined by the financial aid office.

Students choosing to finance part or all of their education through a tuition payment arrangement must maintain a current payment status.

- All newly admitted students (including readmits and reinstated student signing a new Enrollment Agreement) are required to make their first payment by 5pm, Friday of week 1 of their first quarter in the program or the quarter returning to their program, regardless of payment due date.

Failure to make payments by the deadlines established by the College may result in cancellation, short term leave, or administrative withdrawal

Replacement ID Badge Fee

Lost ID badges will be replaced immediately. There is a $10 replacement cost for each badge.

Returned Check Fee & Payment Verification Hold

All returned checks are subject to a $30 Returned Check Fee. This fee charged is in addition to any fees charged by your bank or financial institution. Payments made by check for an amount of $500 or greater are subject to a payment verification hold period of five (5) business days before being applied to the student's ledger.

Transcript Fee

There is a $15 fee for each official transcript. The college does not withhold transcripts for any reason.

Right to Cancel Policy - Indiana

A student who completes an enrollment agreement or application may cancel their enrollment at any time up through the end of Wednesday of the second calendar week of the student’s first enrollment quarter. A student that cancels by Wednesday of the second week of their first quarter of enrollment will receive a refund of any tuition paid to the College. Refunds will be processed based on the student’s right to cancel section of the signed enrollment agreement. Books and materials technology fees are subject to the Bookstore Refund Policy.

If I choose to withdraw after classes begin, and after the right to cancel period has ended, the terms of the Refund Policy will apply.

Right to Cancel Policy - Ohio and Michigan

A student who completes an enrollment agreement or application may cancel their enrollment at any time during the two (2)-week module (if applicable) and up through Wednesday of the second calendar week of the student’s first quarter of enrollment. A student who cancels by Wednesday of the second week of their first quarter of enrollment will receive a full refund of any tuition paid to the College. Refunds will be processed based on the student’s right to cancel section of the signed enrollment agreement. Books and materials are subject to the Bookstore Refund Policy.

Students in the Practical Nursing program who exercise their right to cancel will have their academic history from the **COL 099** Strategies for Successful Nursing Professionals course in the two (2)-week module erased and will need to re-take the course before progressing to the first quarter.

If I choose to withdraw after classes begin, and after the right to cancel period has ended, the terms of the Refund Policy will apply.

Cost of Attendance

Cost of Attendance (COA) is established for use in determining Federal Student Aid eligibility. The COA below is an estimate of a student's educational expenses for a 9-month, 36 quarter credit hour basis, full-time enrollment status, applicable program of study, and housing status.

The Higher Education Act of 1965, as amended, defines COA components for all federal student aid programs. These components include direct costs, such as tuition and fees, and indirect costs, like food and housing. COA can be adjusted annually to reflect changes to these cost components.

Cost of Attendance will vary depending on your program of study, credit hour enrollment, and housing status. Students are not allowed to receive aid that exceeds their COA. It is important to budget wisely and make responsible borrowing decisions. Please email CSFinancialAid@hondros.edu for COA information for enrollment other than full-time.

The COA below is an estimate of a student's educational expenses for a 9-month, 36 quarter credit hour basis, full-time enrollment status, applicable program of study, and housing status. It does not represent the cost of the overall program nor when charges are applied. All institutions of higher education are required to provide an estimated budget that would best state the average overall COA for a student to attend their school. In addition to tuition and fees, categorical items in this budget include the estimated cost of living expenses, books, supplies, & course materials, miscellaneous personal expenses, and transportation. The COA provides an idea, or estimate, of how much the student might need to spend, in addition to paying tuition and fees. These estimates can help to determine the student's ability to attend HCN. Anything listed in the COA budget that is not tuition and fees is not owed to HCN unless the student purchases items through the College, such as books, computers, supplies, etc.

Diploma of Practical Nursing (PN): 2026-27 Award Year

Beginning in the Summer 2026 Quarter
Applicable to all students who sign an Enrollment Agreement for Summer 2026 onward.

Students who enrolled prior to Summer 2026 should refer to their prior year Catalog, contact financialaid@hondros.edu for assistance.

Federally Derived Cost of Attendance (COA)
9-Month Academic Year Basis, 36 credit hours, Full-time enrollment

OHIO/MICHIGAN – PN Independent**, Off-Campus

Cost Component	Amount
Tuition (36 credit hours)*	$14,580.00
Fees*	$1,212.75
Books, Supplies, & Course Materials	$2,954.21
Food & Housing (Living Expenses)	$10,512.00
Miscellaneous Personal Expenses	$3,303.00
Transportation	$5,670.00
Total	**$38,231.96**

OHIO/MICHIGAN – PN Dependent** with Parent or Military Housing

Cost Component	Amount
Tuition (36 credit hours)*	$14,580.00
Fees*	$1,212.75
Books, Supplies, & Course Materials	$2,954.21
Food & Housing (Living Expenses)	$5,265.00
Miscellaneous Personal Expenses	$3,303.00
Transportation	$5,670.00
Total	**$32,984.96**

**PN Students attending the Indianapolis Campus must add an additional Tuition & Fees charge of $378.98 to the above COA.*
***As Determined by the United States Department of Education, Office of Federal Student Aid, Free Application for Federal Student Aid (FAFSA).*

Students attending Part-Time will incur additional fee charges per quarter thereby increasing the overall published COA. The typical additional fee charge for students enrolled in the Part-Time Program of Study is $150 over the course of the published Part-Time Program length.

Associate Degree Nursing Student (ADN): 2026-27 Award Year

Beginning in the Summer 2026 Quarter
Applicable to all students who sign an Enrollment Agreement for Summer 2026 onward.

Students who enrolled prior to Summer 2026 should refer to their prior year Catalog, contact financialaid@hondros.edu for assistance.
Federally Derived Cost of Attendance (COA)
9-Month Academic Year Basis, 36 credit hours, Full-time enrollment

ADN Independent**, Off-Campus

Tuition (36 credit hours)*	$16,812.00
Fees*	$1,249.38
Books, Supplies, & Course Materials	$2,900.59
Food & Housing (Living Expenses)	$10,512.00
Miscellaneous Personal Expenses	$3,303.00
Transportation	$5,670.00
Total	**$40,446.97**

ADN Dependent** with Parent or Military Housing

Tuition (36 credit hours)*	$16,812.00
Fees*	$1,249.38

Food & Housing (Living Expenses)	$5,265.00
Miscellaneous Personal Expenses	$3,3.03.00

Transportation	$5,670.00
Total	**$35,199.97**

***As Determined by the United States Department of Education, Office of Federal Student Aid, Free Application for Federal Student Aid (FAFSA)*.

Cost of Attendance Components – Definitions

Below we provide the updated definitions of commonly used COA terms based on the statutory changes in section 472 of the HEA, incorporating, as applicable and/or requested via the Professional Judgement process:

Tuition and fees – *charged by the College directly to the student*
An amount normally assessed a student carrying the same full-time academic workload, as determined by the institution.

Books, course materials, supplies, and equipment – *possibly charged by the College, if the student purchases through HCN*
An allowance for books, course materials, and equipment, which must include all such costs required of all students in the same course of study, including a reasonable allowance for the rental or upfront purchase of a personal computer, as determined by the institution.

Miscellaneous personal expenses – *not charged by the College*
An allowance, as determined by the institution, for a student attending the institution on at least a half-time basis.

Transportation – *not charged by the College*
An allowance, as determined by the institution, which may include transportation between campus, residences, and place of work.

Living expenses – *not charged by the College*
An allowance for food and housing costs, as determined by the institution, to be incurred by the student attending the institution on at least a half-time basis, including a standard food allowance that provides the equivalent of three meals each day.

Dependent care – *not charged by the College*
An allowance based on the estimated actual expenses incurred for dependent care, based on the number and age of such dependents. The period for which dependent care is required includes, but is not limited to, class-time, study-time, field work, internships, and commuting time.

Disability-related expenses – *not charged by the College*
An allowance, as determined by the institution, for expenses associated with a student's disability, including special services, personal assistance, transportation, equipment, and supplies that are reasonably incurred and not provided for by other agencies.

Professional licensure, certification, or a first professional credential – *not charged by the College.* An allowance for the costs associated with obtaining a license, certification, or a first professional credential, for a student in a program that prepares them to enter a profession that requires such a qualification.

Financial Aid

Financial Information

Who We Are

Hondros College of Nursing's (HCN) Financial Aid Office is comprised of both a system-wide, or Central Support Team, and campus-based aid administrators known as Financial Service Advisors. Our Office is, additionally, assisted by the services of a third-party servicer. Our full Team and associated entities are structured to meet administratively capability requirements of the United States Department of Education Office of Federal Student Aid (USDOE FSA), Title IV of the Higher Education Act of 1965 (HEA), as amended,

the Code of Federal Regulations, Title 34 – Education, applicable State aid governing bodies, local and municipal governmental aid agencies, and all other student aid assistance organizations.

Mission Statement

Hondros College of Nursing (HCN) Office of Financial Aid strives to meet the needs of students by providing access to federal, state, and local resources of assistance. It is, furthermore, the mission of HCN's Office of Financial Aid to adhere strictly to the rules, regulations, and interpretations of the United States Department of Education Office of Federal Student Aid (USDOE FSA) by whom Title IV access is granted.

As required by the Higher Education Opportunity Act of 2008, HCN has established and abides by a Title IV Code of Conduct. The following link provides HCN's Title IV Code of Conduct: https://www.hondros.edu/tuition-and-financial-aid/title-iv-code-of-conduct/

HCN offers several educational financing options including Federal Student Aid, grants and loans, Veterans' Benefits (not available at all Campuses), and more. Financial aid is available to those that qualify. Students requesting to use Federal Financial Aid are required to complete the Free Application for Federal Student Aid (FAFSA®) and abide by all filing mandates of the United States Department of Education Office of Federal Student Aid. Failure to do so will result in a student being ineligible to access Federal Financial Aid assistance.

Information provided on and through the FAFSA® is used to calculate a Student Aid Index (SAI). The SAI is derived from a calculation performed by the United States Department of Education Office of Federal Student Aid in accordance with the 2021 FAFSA Simplification Act and associated provisions. HCN will receive the necessary SAI electronically after the student meets all filing requirements of the USDOE FSA.

For HCN to process and award aid, all applicants must also complete HCN's Online Student Financial Aid Portal. HCN will use the USDOE FSA provided SAI in combination with the HEA Federal Financial Aid Cost of Attendance (COA) to establish aid eligibility for each student. Students will use the HCN Online Student Financial Aid Portal to view, accept, decline, and monitor for changes and necessary actions. Financial aid disbursements, both positive and negative, occur throughout the term, generally beginning in the third week of classes, as required by the governing rules and regulations. Disbursements are made via a credit to a student's institutional account.

Federal Student Aid Programs

FAFSA®, Direct Loans, and the Direct Loan Program are registered trademarks of the U.S. Department of Education. There are three categories of federal financial assistance:

- **Grant** – aid that does not need to be repaid.
- **Loan** – aid that must be repaid, but generally not until the students have graduated, enroll less than half time, or stop attending school.
- **Work Study** – wages for part-time, educationally related, student or community-service employment. Federal Work Study (FWS) allows students who demonstrate financial need to earn a portion of their educational expenses. Students must complete the FAFSA® to be considered for FWS funds. In this program, students earn at least the current hourly minimum wage by working at Hondros College of Nursing or in community service roles. Certain restrictions apply.

Colleges and Universities are required to inform students that grant funding is a more beneficial form of financial aid assistance as it generally does not have to be repaid. Likewise, federal student loans should only be utilized if necessary. Loans are a form of federal financial aid that must be repaid. Failure to repay student loans can result in serious consequences. Please visit www.studentaid.gov to learn more. Additional information is available on the Hondros College website under the Student Loan Responsibility page.

General Eligibility for Federal Programs

In order to qualify for federal financial assistance*, you must:

- Enroll as a degree-seeking student.

- Be a U.S. citizen or an eligible noncitizen.
- Meet and consent to all Federal FAFSA® filing requirements.
- Qualify in accordance with all applicable Title IV rules and regulations defined under Chapter 34 of the Code of Federal Regulations; the 1965 Higher Education Act, as amended; the FAFSA Simplification Act (Act) that was enacted into law as part of the Consolidated Appropriations Act, 2021; and the amended provisions of the Consolidated Appropriations Act, 2022.
- Demonstrate financial need for need based aid programs according to the federally defined formula.
- Meet all measures of the Federal Satisfactory Academic Progress standards.
- Not be in default on a federal education loan.
- Not owe a refund on a federal education grant
- Have a high school diploma or verifiable recognized equivalent.

* *Financial aid is available for those who qualify.*

Veteran Benefits

Students who may qualify for veterans' educational benefits should notify their financial aid representative regarding eligibility as far in advance of their scheduled class start date as possible.

Federal Work-Study (FWS)

FWS provides part-time jobs for qualifying students with financial need, allowing them to earn money to help pay education expenses. Students must complete the FAFSA® to be considered for FWS funds. In this program, students earn at least the current hourly minimum wage by working at Hondros College of Nursing or in community service roles. Certain restrictions apply.

State-funded Programs

In addition to federal financial assistance, state programs may be available to students who demonstrate financial need or who have successfully achieved certain academic qualifications. Typically, state recipients must attend an institution in their home state, and they or their parents must have resided in the state for a specified period of time. Proof of residency is usually required. Check your State's higher education website for more information. https://highered.ohio.gov/

Additional Aid

Hondros College of Nursing Alumni Achievement Grant

This Alumni Achievement Grant is designed to assist Hondros College of Nursing Alumni as they progress into our Associate Degree in Nursing (ADN) program.

Hondros College of Nursing Institutional Affordability Grant (IAG)

This Institutional Affordability Grant (IAG) is designed to assist Hondros College of Nursing (the "College") students thathave financial need in order to cover their gap funding, i.e., the difference between total cost of tuition and fees (direct) less the amount of all eligible financial aid resources.

Private Education Loans

Many lenders also offer private education loans to students to supplement their federal financial aid. Terms of repayment, including interest rates, vary by loan. Lenders perform a credit check and determine a loan applicant's creditworthiness before approving these loans. A loan applicant may also be required to provide a credit-worthy cosigner. The following link provides more information on private education loans: https://www.hondros.edu/how-to-pay/financial-aid-programs

Employer Tuition Reimbursement

Students eligible for employer tuition reimbursement benefits should contact their employer or human resources department. Tuition reimbursement does not eliminate a student's responsibility to pay tuition. Students receiving tuition reimbursement are required to disclose to the college the benefit and the amount as is must be considered as Estimated Financial Assistance.

Completing Your FAFSA®

Students must complete the FAFSA® annually to be considered for financial aid eligibility. All students seeking access to federal financial aid must abide fully with the filing mandates associated with the FAFSA Simplification Act (Act) that was enacted into law as part of the Consolidated Appropriations Act, 2021, and amended by the Consolidated Appropriations Act, 2022. The Act further amends the Higher Education Act of 1965, as amended (HEA), and impacts the Free Application for Federal Student Aid (FAFSA®). The FAFSA® serves as the application for all federal, state, and institutional financial aid (grants and loans) at HCN and, generally, must be completed online at FSA's website, www.studentaid.gov A notification of aid eligibility from the FAFSA® filing site is not confirmation, nor assurance, that a student will be eligible for aid. It is an early indicator of possible eligibility.

Beginning with 2024-25, all persons, now known as contributors, on the FAFSA must provide consent for the U.S. Department of Education to receive tax information or confirmation of non-filing status directly from the IRS using the IRS Direct Data Exchange (DDX). Denial of consent will result in FSA rejecting the application and the applicant will not be eligible for federal student aid until all required contributors provide consent.

Contributor is a term used by FSA. It refers to anyone asked to provide information on a student's FAFSA®. A contributor could be the student, the student's spouse, a biological or adoptive parent, or the parent's spouse (stepparent). Contributors must provide consent for the U.S. Department of Education to receive tax information or confirmation of non-filing status directly from the IRS using the IRS Direct Data Exchange (DDX). Denial of consent will result in FSA rejecting the application and the applicant will not be eligible for federal student aid until all required contributors provide consent.

All students and their required contributors must create an FSA ID at www.studentaid.gov to complete a FAFSA form online. The FSA ID will be used to login to the FAFSA site and apply for aid consideration. To create an FSA ID, a Social Security Number (SSN), full legal name, and date of birth will be required. If a contributor does not have a social security number, they still can get a FSA ID using their Individual Tax Identification Number (ITIN) to fill out their portion of the FAFSA®.

The FSA ID will be used to file the FAFSA®, be used as the applicant's electronic signature, and be used to access the FSA site for updates, corrections, and subsequent aid filing years.

Hondros Federal School Code 040743

Students who wish to attend HCN and be considered for Federal Student Aid, grants and loans, must have the results sent to Hondros College of Nursing, using the school code 040743. Regardless of the campus the student is attending, students must use the State of Ohio to locate the school on the FAFSA® application.

Apply for a FSA ID

The information provided on-and-through the FAFSA® is used to determine the SAI. After the FAFSA® has been processed, the student will receive a FAFSA® Submission Summary (FSS). The student and/or their contributors must review their FSS for accuracy and update FAFSA® with any necessary corrections.

Financial need is determined by subtracting the SAI and other financial assistance from the Cost of Attendance (COA). Do note, COA is an estimate of a student's educational expenses for a 9-month, 36 quarter credit hour based, full-time period of enrollment. COA is not a representation of actual expenses incurred by each student. The Higher Education Act of 1965, as amended, defines COA components for all federal student aid programs. These components include Direct Costs. Direct costs are expenses that the College will charge directly to the student, such as tuition and fees. The COA will also include Indirect Costs. Indirect Costs are expenses that are not directly charged by the College, but should be budgeted for by the student, such as food and housing.

The SAI is the foundation for all financial aid awards. Students with a valid FAFSA® on file and a complete HCN Online Student Financial Aid Portal will be awarded maximum eligibility in accordance with all governing rules and regulations. Students may view their aid awards through the HCN Online Student Financial Aid Portal. Student aid is disbursed quarterly. Students must complete all requested and required steps/paperwork prior to disbursement.

2025-26 Financial Need

Financial need is based on the following formula and applicable aid year:

Cost of Attendance (Direct Costs + Indirect Costs) – **SAI** – **Other Financial Assistance** = Financial Need

- **Direct Costs** include tuition, fees, books (if purchased through the College) and supplies (if purchased through the College).
- **Indirect Costs** include transportation, housing, food, personal and miscellaneous. These are not costs charged by the College, however, should be budgeted for by the student to prepare for a successful educational journey.
- **Student Aid Index (SAI)** is determined by a federally defined formula using information you provide on-and-through your Free Application for Federal Student Aid (FAFSA®).

Cost of Attendance

Cost of Attendance (COA) is established for use in determining Federal Student Aid eligibility. The COA below is an estimate of a student's educational expenses for a 9-month, 36 quarter credit hour basis, full-time enrollment status, applicable program of study, and housing status. It does not represent the cost of the overall program nor when charges are applied.

Cost of Attendance will vary depending on your program of study, credit hour enrollment, and housing status. Students are not allowed to receive aid that exceeds their COA. It is important to budget wisely and make responsible borrowing decisions. Please email CSFinancialAid@hondros.edu for COA information for enrollment other than full-time.

Diploma of Practical Nursing Student: 2026-27 Award Year

Beginning in the Summer 2026 Quarter
Applicable to all students who sign an Enrollment Agreement for Summer 2026 onward.

Students who enrolled prior to Summer 2026 should refer to their prior year Catalog, contact financialaid@hondros.edu for assistance.

Federally Derived Cost of Attendance (COA)

Miscellaneous Personal Expenses	$3,303.00
Transportation	$5,760.00
Total	**$32,984.96**

**PN Students attending the Indianapolis Campus must add an additional Tuition & Fees charge of $378.98 to the above COA.*
***As Determined by the United States Department of Education, Office of Federal Student Aid, Free Application for Federal Student Aid (FAFSA).*

Students attending Part-Time will incur additional fee charges per quarter thereby increasing the overall published COA. The typical additional fee charge for students enrolled in the Part-Time Program of Study is $150 over the course of the published Part-Time Program length.

Associate Degree Nursing Student (ADN): 2026-27 Award Year

Beginning in the Summer 2026 Quarter
Applicable to all students who sign an Enrollment Agreement for Summer 2026 onward.

Students who enrolled prior to Summer 2026 should refer to their prior year Catalog, contact financialaid@hondros.edu for assistance.

Federally Derived Cost of Attendance (COA)
9-Month Academic Year Basis, 36 credit hours, Full-time enrollment

Independent**, Off-Campus

Cost Component	Amount
Tuition (36 credit hours)*	$16,812.00
Fees*	$1,249.38
Books, Supplies, & Course Materials	$2,900.59
Food & Housing (Living Expenses)	$10,512.00
Miscellaneous Personal Expenses	$3,303.00
Transportation	$5,670.00
Total	**$40,446.97**

Dependent** with Parent or Military Housing

Cost Component	Amount
Tuition (36 credit hours)*	$16,812.00
Fees*	$1,249.38
Books, Supplies, & Course Materials	$2,900.59
Food & Housing (Living Expenses)	$5,265.00

Miscellaneous Personal Expenses	$3,303.00
Transportation	$5,670.00
Total	**$35,199.97**

***As Determined by the United States Department of Education, Office of Federal Student Aid, Free Application for Federal Student Aid (FAFSA)*.

Net Price Calculator (NPC)

HCN's Net Price Calculator provides an early estimate of:

1. The expected cost to attend HCN, and
2. How much financial aid you may qualify for.

Note: The NPC is a very valuable financial planning tool. The NPC is an estimation tool not an application for admission or an application for financial aid.

Net Price Calculator (NPC)

Accepting, Declining, and/or Adjusting Aid

Every student is provided a Financial Aid Overview during their aid counseling session. During the counseling session students are informed that they have the ability to accept, decline, and/or adjust their awarded aid amounts within 30-days of having received the official Financial Aid Disbursement Notification Email; and that these adjustments can be made by notifying Financial Aid via email, phone, or in-person.

Dependency Status

The Federal Government has established how dependency status is determined for Federal Financial Aid purposes. If a student is considered a dependent, his or her parents, also known as contributors, must provide income and asset information on the FAFSA®. If a student is unsure who their parent is, the online FAFSA® will provide a "Who's My Parent" wizard to help determine which parent or parents (contributors) will need to provide information on the FAFSA® form. This information will be used in addition to the student's income and asset information to determine the previously mentioned SAI.

Verification

The federal government requires some federal student aid applicants to verify the accuracy of information provided on and through the FAFSA®. In accordance with federal requirements, Hondros College of Nursing requires students to submit verification documents prior to disbursement of funds. Students and their contributors may be required to submit a verification worksheet, federal tax return transcripts and additional information necessary to complete verification or clear conflicting information.

If information on any documents is found to be conflicting, students may, likewise, be selected for verification by the College and required to provide additional information. Failure to complete verification may result in a loss of financial aid eligibility. All verification documentation must be submitted prior to the student's last day of their academic year.

If Hondros College of Nursing suspects that an individual falsified information and/or altered documentation and fraudulently obtained federal funds, Hondros College of Nursing is legally obligated to file a report with the Office of the Inspector General and/or local law enforcement officials.

Professional Judgement

Federal Student Aid regulations allow financial aid administrators to use professional judgment, on a case-by-case basis and with supporting documentation, as determined by the Financial Aid Office. Students are welcome to pursue a Professional Judgement based on special or unusual circumstances; see below for definitions.

All fully completed submissions will be considered within 60-days of enrollment. Adjustments must be deemed reasonable and related to the Professional Judgement request.

The FAFSA Simplification Act distinguishes between different categories of Professional Judgment by amending section 479A of the HEA.

Special Circumstances refer to the financial situations (loss of a job, etc.) that justify an HCN aid administrator adjusting data elements in the COA or in the need analysis factors.

Unusual Circumstances refer to the conditions that justify an aid administrator making an adjustment to a student's dependency status based on a unique situation (e.g. human trafficking, refugee or asylee status, parental abandonment) more commonly referred to as a dependency override.

It is important to note that the U.S. Department of Education has given guidance regarding situations that do and do not qualify as an Unusual Circumstance to merit a dependency override. In particular, the following circumstances do not merit a dependency override, either alone or in combination:

- Parents refuse to contribute to the student's education;
- Parents are unwilling to provide information on the FAFSA or for verification;
- Parents do not claim the student as a dependent for income tax purposes;
- Student demonstrates total self-sufficiency.

A student cannot become independent just because the parents are unwilling to help pay for the student's college education. Although these circumstances are not sufficient for a dependency override, they do not preclude it. Sometimes there are additional circumstances that occur in conjunction with these circumstances that do merit a dependency override such as abusive family environment (e.g. sexual, physical or domestic abuse), incarceration or institutionalization of both parents, court documented abandonment, etc. To learn more please visit the studentaid.gov webpage concerning dependency at: https://studentaid.gov/apply-for-aid/fafsa/filling-out/dependency. A student may have both a special circumstance and an unusual circumstance, with appropriate documentation.

To Request a Professional Judgment:

The first step in HCN's process for a student to request a Professional Judgement consideration is to contact the campus Financial Services Advisor at financialaid@hondros.edu and make them aware of the situation.

Once HCN becomes aware of the student's situation and their request for Professional Judgement consideration, HCN will request that the student provide applicable supporting documentation. Following the submission of all requested documentation, and the student's applicable completion of the FAFSA, HCN will provide the student a decision.

End-to-end all decisions and processing will occur within 60-days of the student's material submittal/enrollment, as defined by the U.S. Department of Education.

Federal Grants

Federal Pell Grants

Federal Pell Grants help fund post-secondary education for undergraduate students who have not previously earned a bachelor's degree. The amount of Federal Pell Grant funds you may receive over your lifetime is limited by federal law to be the equivalent of six years of Pell Grant funding. Since the maximum amount of Pell Grant funding you can receive each year is equal to 100%, the six-year equivalent is 600%. For many students, these grants provide a foundation of financial aid to which aid from other sources may be added.

Pell Grant-eligible students who have Title IV funds awarded in excess of school charges are eligible for a refund.

The refund should be made by the seventh day of the applicable payment period to obtain books and supplies. HCN meets this requirement by refunding the student his or her Title IV credit balance by the seventh day of the applicable payment period.

If a student has not yet established eligibility to receive Title IV funds because of outstanding verification requirements, or unresolved conflicting information, etc., this requirement does not apply. For further information, contact nursingstudentaccounts@hondros.edu.

Federal Supplemental Educational Opportunity Grants (FSEOG)

Federal Supplemental Educational Opportunity Grants (FSEOG) provide supplemental funds to undergraduate students with exceptional need, with priority given to Federal Pell Grant recipients. To be eligible for FSEOG, students must be enrolled in an undergraduate program and have not previously earned a bachelor's degree or first professional degree.

Exceptional need is defined as the lowest SAI per federal-need-analysis methodology. Because FSEOG funds are limited, students should apply for these grants by completing their FAFSA® as early as possible. FSEOG awards range from $300 to $1200 per academic year.

Federal Loans

Federal Direct Loan

Direct Subsidized, Direct Unsubsidized and Direct PLUS Loans obtained through the Direct Loan Program® are acquired directly from the U.S. Department of Education. Students who receive a student loan of any type have a legal obligation to repay the loan. The student's degree of success at Hondros College of Nursing does not alter this obligation. Terms and conditions of Federal Student Loans (Direct and Direct PLUS Loans) are listed on the Master Promissory Note signed by the borrower accepting the loan. To view a sample Master Promissory Note, go to https://studentaid.gov/mpn/.

Institutions are required to inform the student or parent that Direct Stafford loans will be submitted to the National Student Loan Data System (NSLDS), and will be accessible by the student/parent, guaranty agencies, lenders, and institutions determined to be authorized users of the data system.

As required by the Higher Education Opportunity Act of 2008, HCN has established and abides by the Title IV Code of Conduct. For more information, visit: HCN's Title IV Code of Conduct

Federal Direct Subsidized & Federal Direct Unsubsidized Loans

Direct Subsidized Loans and Direct Unsubsidized Loans are federal student loans offered by the U.S. Department of Education (ED) to help eligible students cover the cost of higher education. Undergraduate students may be eligible for the Direct Loan Program. These interest-based loans offer a range of repayment options. Repayment can also be deferred while the student is enrolled at least half-time. Loan amounts are based on several factors, including the number of credit hours taken each term and grade level as follows:

Number of Credits	Grade Level
0-35 Credits Earned	Freshman Level Loan Limits
36-71 Credits Earned	Sophomore Level Loan Limits
72 or more Credits Earned	Junior and Senior Level Loan Limits

Federal Direct Subsidized Loans

Available to undergraduate students who demonstrate financial need and otherwise meet the eligibility criteria. The federal government pays the interest on the loan while the student continues to be enrolled at least half time.

Federal Direct Unsubsidized Loans

Available to undergraduate and graduate students, regardless of financial need. Interest is charged during in-school attendance, during post-enrollment, during deferments, and during grace periods. The student is responsible for the accrued interest on the loan. The student may allow the interest to accumulate over the loan period, but Hondros College of Nursing suggests that the student pay the interest while in school.

Requesting a Direct Loan

Students requesting to use Direct Loans will be required to complete a Master Promissory Note (MPN) and Entrance Counseling (EC), if they are first-time borrowers.

Complete Entrance Counseling (EC)

Complete a Master Promissory Note (MPN)

Students begin repaying the loan after ceasing to be enrolled at least half time. Additional information on repayment, interest rates and loan fees can be found on the Federal Direct Loans website. Monthly payments are based on aggregate borrowing, though the minimum monthly payment is $50 for each loan. Repayment is usually completed within 10 years. Students who leave school or drop below half-time status are contacted by their loan servicer to establish repayment schedules. Students must notify the college and their lender of a change in address.

Loan Exit Counseling

Federal student aid regulations require that all borrowers complete loan exit counseling for their Federal Direct Loans. Students must complete loan exit counseling when they are graduating, leaving Hondros College of Nursing, or enrolling for fewer than six credit hours. Loan exit counseling notifications are provided to all identified students, and students may visit the website to complete the process.

Complete Loan Exit Counseling

Federal Direct Plus Loans

This loan allows parents of undergraduate students who are dependent by federal definition to borrow the maximum of educational costs less financial aid per academic year (3 quarters). Additional information on interest rates and loan fees can be found on the Federal Direct Loans website. A credit check is performed to establish creditworthiness. Any credit refund created by a Federal Direct PLUS loan will be paid to the parent.

Learn More About Interest Rates and Loan Fees

HCN Grants

Hondros Alumni Achievement Grant

This Alumni Achievement Grant is designed to assist Hondros College of Nursing Alumni as they progress into our Associate Degree in Nursing (ADN) program.

Basic Student Eligibility Requirements:

1. Eligible students must be graduates of a Hondros College of Nursing program
2. Eligible students must be enrolled in the Hondros College of Nursing ADN program (at any campus)
3. Eligible students must have a PN program CGPA of a 2.5 or higher

Awarding Criteria:

- Alumni meeting the criteria above will receive up to $1,200.
- Awards will be equally distributed over the first three quarters of the program.

*CGPA - Cumulative Grade Point Average

Hondros College of Nursing Institutional Affordability Grant (IAG)

This Institutional Affordability Grant (IAG) is designed to assist Hondros College of Nursing (the “College”) students that have financial need in order to cover their academic year gap funding, i.e., the difference between total cost of tuition and fees (direct) less the amount of all eligible financial aid resources. The IAG will be applied quarterly to a student’s ledger. The IAG is for students with the most significant financial need.

Basic Student Eligibility Requirements:

1. Eligible students must be currently enrolled in a Hondros College of Nursing program;
2. Eligible students must be eligible for the Federal Pell Grant (regardless of amount) and otherwise be eligible for Title IV financial aid programs;
3. Eligible students must file a FAFSA each year by the deadline and meet verification deadlines, if any;
4. Eligible students must make required monthly on-time payments to the College; and
5. Eligible students must have exhausted all other eligible financial aid resources (e.g., WIA, employer tuition reimbursement, veterans’ affairs benefits, etc.)

Awarding Criteria

Grant amounts are determined based on financial need.

Award Amount	HCN IAG
Up to $600.00 per academic term	Practical Nursing Program – IAG award is up to a maximum of $200.00 per month/$600.00 per academic term/$2,400.00 for the program.
Up to $600.00 per academic term	Associate Degree in Nursing Program – IAG award is up to a maximum of $200.00 per month/$600.00 per academic term/$3,000.00 for the program.
Up to $600.00 per academic term	Medical Assisting Program – IAG award is up to a maximum of $200.00 per month/$600.00 per academic term/$2,400.00 for the program.

Example of potential IAG awards:

Practical Nursing Program

1. Student has a program gap of $4,500.00. Monthly payments are $500.00 ($4,500.00/9 months (academic year length)). IAG award is $200.00 per month for 9 months=$1,800.00 (maximum academic year IAG award). Revised student payment is $300.00 per month.
2. Student has a program gap of $2,700.00. Monthly payments are $300.00 ($2,700.00/9 months (academic year length)). IAG award is $100.00 per month for 9 months=$900.00 (maximum academic year IAG award). Revised payment amount is $200 per month.

Associate Degree in Nursing Program

1. Student has a program gap of $5,400.00. Monthly payments are $600.00 ($5,400.00/9 months (academic year length)). IAG award is $200.00 per month for 9 months=$1,800.00 (maximum academic year IAG award). Revised student payment is $400.00 per month.
2. Student has a program gap of $2,250.00. Monthly payments are $250.00 ($2,700.00/9 months (academic year length)). IAG award is $50.00 per month for 9 months=$450.00 (maximum academic year IAG award). Revised payment amount is $200 per month.

Veteran Benefits

Not all Hondros College of Nursing campuses are approved to authorize Veterans Educational Benefits, please check with the specific campus to which you intend to enroll. Students who may qualify for veterans' educational benefits should notify their financial services advisor regarding eligibility as far in advance of their scheduled class start date as possible. On December 31, 2018, the President signed into law the Veterans Benefits and Transition Act of 2018. It contains a provision (Section 103) that takes effect on August 1, 2019. Therefore, despite any policy to the contrary, for any students using U.S. Department of Veterans Affairs (VA) Post 9/11 G.I. Bill® (Ch. 33) or Vocational Rehabilitation and Employment (Ch. 31) benefits, while payment to the institution is pending from the VA, Hondros College of Nursing will not: prevent a veteran student's enrollment; impose any penalty fee to a veteran student; require a veteran student to secure alternative or additional funding; or deny a veteran student access to any resources (access to classes, libraries, or other institutional facilities) available to other students who have satisfied their tuition and fee bills to the institution. However, to qualify for this provision, veteran students may be required to: produce the VA's Certificate of Eligibility by the first day of class; provide written request to be certified; or provide additional information needed to properly certify the enrollment as described in other institutional policies.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government Web site at https://www.benefits.va.gov/gibill

For the purpose of certifying Veterans Affairs (VA) benefits, students are required to submit all previous transcripts. Veteran students enrolled in a course in which they are eligible to receive transfer credit will not have that course included in the total hours reported to the U.S. Department of Veterans Affairs. It is the student's responsibility to be aware of prior credit eligible for transfer.

Hondros College of Nursing notifies the Department of Veterans Affairs of those students who are receiving veterans' education benefits and whose status is academic probation. For details on standards of academic progress, refer to the Academic Standing Status Policy section of this catalog. Student on academic probation are eligible to receive veterans' education benefits for that quarter.

A student who has been dismissed for failing to meet standards of academic progress may appeal for reinstatement. Those with approved appeals remain eligible for veterans' educational benefits. Students who do not successfully appeal their dismissals are dismissed and have their veterans' benefits terminated. The VA is notified of such dismissals. If the veteran or eligible person continues in training despite unsatisfactory progress, conduct, or despite having failed to meet the regularly prescribed standards of attendance at the school, the school must report the fact of his or her unsatisfactory progress.

Veteran students must notify their campus Financial Services Advisor immediately upon withdrawal from school. For students receiving veterans' education benefits, Hondros College of Nursing notifies the VA of changes in student status within 30 days of the official last date of attendance.

Student Financial Rights & Responsibilities

Students have the right to:

- Know what financial assistance programs are available to them, including all federal, state, and institutional financial aid programs.
- Know the deadlines for submitting applications for each of the financial aid programs available, and the process required.
- Know the method and frequency of financial aid disbursements.
- Know how financial need is determined, including how costs for tuition and fees, housing and food, travel, books and supplies, personal and miscellaneous expenses, etc., are considered in their budget.
- Know resources (such as parental contribution, other financial aid, assets, etc.) were considered in the calculation of need.
- Know how much of the financial need as determined by the institution has been met.
- Request an explanation of the various programs in the student aid package.
- Know the school's refund policy, including what portion of the financial aid you received must be repaid, and what portion is grant aid. If the aid is a loan, students have the right to know what the interest rate is, the total amount that must be repaid, the payback procedures, the length of time they have to repay the loan, and when repayment is to begin.
- Know how the school determines whether students are making satisfactory progress (SAP), and consequences of not meeting SAP.
- Request a review of their current financial situation if they meet certain criteria based on changes since filing the current aid year FAFSA® application.

Students have the responsibility to:

- Federal Financial Aid is heavily regulated by the United States Department of Education, Office of Federal Student Aid. The HCN Office of Financial Aid must adhere to all Federal Rules, Regulations, and Laws – even when the student disagrees with decisions or processes. The HCN Financial Aid Team is here to help students navigate the complexities of the Federal Aid Process. Mistreatment of the Financial Services and Aid Team at HCN will not be tolerated and may result in detrimental student consequences in accordance with the Student Code of Conduct.
- Be aware of the ability to pay any institutional charges based on available financial aid and personal resources.
- Review and understand the terms and conditions of their financial aid award.
- Complete all requirements accurately, in a timely manner, and by the appropriate deadlines.
- Inform Hondros College of Nursing of any outside scholarships, tuition reimbursement, or additional resources that they receive.
- Fill out the FAFSA® application completely and accurately, provide all requested documents in a timely manner, and ensure that all submitted materials are complete and accurate. Falsification of information on application forms for federal financial assistance is considered a criminal offense and may be subject to penalties under the U.S. Criminal Code.
- Read, understand, and keep copies of all forms that they are asked to sign.
- Accept responsibility for all signed agreements.
- Be aware of and comply with all policies and procedures at Hondros College of Nursing.

- Be informed of the College’s refund policies and procedures.
- Manage the financial aid experience.

Refund Policies

Ohio and Michigan Students

Hondros College of Nursing’s refund policy complies with the state law as follows and is applicable to each term:

1. A student who starts class and withdraws or drops a single course(s) during the first full calendar week of the quarter shall be obligated for twenty-five percent (25%) of the tuition and refundable fees for that academic term, plus the registration fee.
2. A student who withdraws or drops a single course(s) during the second full calendar week of the quarter shall be obligated for fifty (50%) percent of the tuition and refundable fees for that period.
3. A student who withdraws or drops a single course(s) during the third full calendar week of the quarter shall be obligated for seventy-five (75%) percent of the tuition and refundable fees for that period, plus the registration fee.
4. A student who withdraws or drops a single course(s) beginning the fourth full calendar week of the academic term will not be entitled to a refund of any portion of the tuition and fees, plus the registration fee.
5. Refunds will be issued by check from Hondros College of Nursing within 30 days. Last date of attendance is determined by the student’s last attended day of clinical, lab, lecture, or the last submitted assignment in an online course.

Last date of attendance is determined by the student’s last attended day of clinical, lab, lecture, or the last submitted assignment in a traditional online course.

Indiana Students

1. A student is entitled to a full refund if one (1) or more of the following criteria are met:
   - A. The student cancels the institutional student contract or enrollment agreement within six (6) business days after signing.
   - B. The student does not meet the postsecondary educational institution's minimum admission requirements.
   - C. The student's enrollment was procured as a result of a misrepresentation in the written materials utilized by the postsecondary educational institution.
   - D. If the student has not visited the postsecondary educational institution prior to enrollment, and, upon touring the institution or attending the regularly scheduled orientation/classes, the student withdrew from the program within three (3) days.
2. A student withdrawing from an instructional program, after starting the instructional program at a postsecondary educational institution and attending one (1) week or less, is entitled to a refund of ninety percent (90%) of the cost of the financial obligation, less an application/enrollment fee of ten percent (10%) of the total tuition, not to exceed one hundred dollars ($100).
3. A student withdrawing from an instructional program, after attending more than one (1) week but equal to or less than twenty-five percent (25%) of the duration of the instructional program, is entitled to a refund of seventy-five percent (75%) of the cost of the financial obligation, less an application/enrollment fee of ten percent (10%) of the total tuition, not to exceed one hundred dollars ($100).
4. A student withdrawing from an instructional program, after attending more than twenty-five percent (25%) but equal to or less than fifty percent (50%) of the duration of the instructional program, is entitled to a refund of fifty percent (50%) of the cost of the financial obligation, less an application/enrollment fee of ten percent (10%) of the total tuition, not to exceed one hundred dollars ($100).
5. A student withdrawing from an instructional program, after attending more than fifty percent (50%) but equal to or less than sixty percent (60%) of the duration of the instructional program, is entitled to a refund of forty percent (40%) of the cost of the financial obligation, less an application/enrollment fee of ten percent (10%) of the total tuition, not to exceed one hundred dollars ($100).

Credit Balance Refund Policy

All non-Title IV credit balances are applied to future term charges unless requested. Students with a credit balance after satisfying current term balance must email nursingstudentaccounts@hondros.edu to request a refund. Requests for non-Title IV credit balances

will be reviewed and issued within 14 days.

Bookstore Refund Policy

The College does not participate in a buy-back program for textbooks or other required course material, including, but not limited to, the technology package. For products being returned, the item and all included materials must be returned in the original packaging in original condition, and must be accompanied by an original receipt and returned within 30 days of purchase. No refunds are given for the technology package if consumed. Refunds will be issued via BankMobile if the student has selected a refund preference. If a student has not selected a refund preference, refunds will be issued by check from Hondros College of Nursing. Refunds will be issued by check from Hondros College of Nursing within 30 days.

Policies, tuition, and fees are effective July 1, 2026 and are subject to change.

Community Partner Policy

The College offers a reduction in tuition for students who are employed at community partners. In order to receive a reduction in tuition, students are required to submit a paystub dated within 30 days of each term start to paystubs@hondros.edu. Students must submit the paystub every quarter to continue to receive the reduction in tuition. Failure to provide a paystub by the first day of class will result in forfeiture of the reduction in tuition.

Satisfactory Academic Progress (SAP)

Hondros College of Nursing has academic standards that a student must achieve to remain in good academic standing. Additionally, to participate in federal financial aid programs (Federal Direct Stafford Student Loans, Federal PLUS Loans, Federal Pell Grants, and Federal Supplemental Educational Opportunity Grants), Hondros College of Nursing must take steps to fulfill federal requirements to implement and make public the standards for satisfactory academic progress that students must meet to be eligible to receive financial aid. These standards are for financial aid purposes and are a part of the academic policies of Hondros College of Nursing.

Satisfactory Academic Progress (SAP) is based on three components:

SAP Cumulative GPA Requirement

Students must achieve a minimum cumulative grade point average of a 2.0 at the end of each quarter. Please refer to the repeat policy.

- Repeated courses and failed courses will also count towards the cumulative GPA.
- Students that do not meet the minimum cumulative GPA of a 2.0 for the third time will be academically dismissed from the College in accordance with the College's academic dismissal policy, and must formally apply to be reinstated; please refer to the Reinstatement Policy.

Pace of Progression

Students must satisfactorily complete 67% of all attempted credits to accomplish pace of progression and be considered as meeting this element of satisfactory academic progress. Pace of progression is calculated by dividing the cumulative total credit hours earned by the cumulative total credit hours attempted. Pace of progression will be evaluated at the end of each quarter. Attempted hours will include grades of F, W, I, and NP, but, these grades will not count as earned hours. Grades tracking the start of a leave of absence, "LA", or the return from a leave of absence, "LR" will not be included in the attempted or earned hours. Transfer credit received will be included in both the attempted and earned credit hours.

Attempted Credit Hours	Minimum Pace of Progression	Required Earned Credit Hours
13	13 x .67	9

15	15 x .67	10
18	18 x .67	12
21	21 x .67	14

Maximum Timeframe

Students must be able to complete their program within the maximum timeframe in order to be considered as meeting satisfactory academic progress. Maximum timeframe is defined as graduating before accumulating 150% of the attempted credit hours required for completion. Maximum timeframe will be evaluated at the end of each quarter. Students who are identified as not meeting satisfactory academic progress due to maximum timeframe may be dismissed from the College.

By program:

- Ohio and Michigan - PN Program must be completed within 72 attempted credit hours
- Ohio - ADN Program must be completed within 164 attempted credit hours
- Indiana - PN Program must be completed within 74 attempted credit hours

Transfer credit hours must be included in the maximum timeframe calculation.

Repeated courses, failed courses and withdrawals will also count towards the maximum.

Additional Credential

General education courses and advanced standing credit previously earned at Hondros College of Nursing are counted as transfer credit as applicable in the subsequent program and therefore affect the student's pace of progression (both attempted and earned credits) and maximum timeframe calculations.

SAP Review

At the end of each quarter, HCN will review cumulative GPA, pace of progression, and maximum timeframe for each student enrolled in that quarter. Depending on the student's status relative to these factors, the student's satisfactory academic progress will be determined as follows:

Good Standing: Applies to any student who met the 2.0 cumulative GPA requirement, met pace of progression (67%), and has not exceeded the maximum total attempted hours allowed for their program.

Financial Aid Warning: Applies to any student who fails to meet the requirements of pace of progression, cumulative GPA, and/or timeframe listed above for the quarter. A warning letter will be sent at the end of the quarter to the student to indicate why he or she is receiving a warning and what must be done within the next quarter to meet SAP. If the student fails to meet these requirements, his or her federal, state, and other types of financial aid will be suspended for future quarters. The student must bring his or her hours and/or cumulative GPA back into good standing to regain financial aid eligibility. A student cannot have two consecutive quarters on Financial Aid Warning.

Financial Aid Suspension: Applies to a student who has not met the requirements for cumulative GPA, pace of progression, or has reached maximum timeframe after the warning period. This student is not eligible for federal, state, and/or other types of financial aid until he/she meets the requirements in each of the three areas listed above or completes and is approved for a SAP Appeal.

Financial Aid Probation: Applies only to a student who has failed to meet SAP requirements and has had an appeal approved. A student may be on probation for one quarter only. If a student has not met the SAP requirements above, he or she should work with a Financial Services Advisor to understand what options exist to regain financial aid eligibility.

Financial Aid Academic Plan: This status applies to any student who is required to submit an academic plan as part of a SAP appeal. Student must meet all goals as outlined by the plan. The student continues to remain eligible for federal and state financial aid, but does

not meet the definition of a SAP-eligible student. Students who do not meet all goals as outlined by the plan, at the least, will have their aid suspended and should work with a Financial Services Advisor to understand what options exist to regain financial aid eligibility. Students that do not meet all goals as outlined by the plan may be academically dismissed from the college.

SAP Appeal Process

1. A student who is not meeting the Satisfactory Academic Progress requirements will receive a SAP Suspension notification letter to their student email account which details the reasoning behind a student's SAP suspension status. A student who wishes to appeal his/her unsatisfactory academic progress determination must submit a SAP Appeal Form to the Central Support Office of Financial Aid through electronic means, prescribed in the email notification. The SAP Appeal Form must be completed in its entirety to be considered for appeal. SAP appeals are reviewed based on the extenuating circumstances such as serious injury or illness involving the student, death of an immediate family member, or other circumstances beyond the student's control that prevented him or her from achieving satisfactory progress. Each student's circumstance is reviewed on an individual basis. The student may be required to submit an academic plan indicating exactly what the student must take to complete their academic program and detail the timeframe in which this can be accomplished. Academic Plans must be completed with a campus Dean/Director of Nursing, program or designee and forwarded to the Campus Financial Services Advisor.
2. The appeal will be reviewed to determine next steps and/or the appeal outcome. To receive aid in a term of "Suspension" status, appeal requests must be fully completed by the end of week 9. Appeals may take up to 14 days, therefore students should submit completed appeals by the end of Week 7 to allow time for processing, evaluation, and consideration. Students will be notified of the results of the appeal via their Hondros College of Nursing email account.

Summary

Students are encouraged to review these standards. It is important that the student have a clear understanding of his/her individual progress and financial assistance. The College recognizes that circumstances and conditions regarding these standards may require discretional judgment. Examples of such conditions include changing majors or career objectives, as well as various personal reasons. Any questions regarding SAP or these conditions should contact their campus Financial Services Advisor.

Title IV & Withdraws

Financial Aid Census Date and adding/Dropping Courses

Financial Aid Census is the point in time that the financial aid office evaluates students' official enrollment status for financial aid purposes. The Financial Aid Census date is always the second (2nd) Friday of every quarter.

A student's financial aid award is prepared based on anticipated full-time enrollment. If the student's actual attendance is less than full-time (e.g., half-time), the financial aid awards will be adjusted accordingly. Awards are adjusted each quarter, as required, based on the student's enrollment as of the "Census Date" for that quarter. Specifically, Pell grant payments will be based on the number of credit hours for which a student is enrolled as of the Census Date for that quarter.

Treatment of Title IV aid when a student withdraws

The law specifies how Hondros College of Nursing (HCN) must determine the amount of Title IV program assistance that a student earns if they withdraw from school. The Title IV programs that are covered by this law are: Federal Pell Grants, Iraq and Afghanistan Service Grants, TEACH Grants, Direct Loans, Direct PLUS Loans, Federal Supplemental Educational Opportunity Grants (FSEOGs), and Federal Perkins Loans.

Though the student's aid is posted to the account at the start of each period, the funds are earned as the period is completed. If the student withdraws during the payment period, the amount of Title IV program assistance that is earned up to that point is determined by a specific formula. If the student received (or HCN or parent received on the student's behalf) less assistance than the amount earned, the student may be able to receive those additional funds. If the student received more assistance than was earned, the excess funds must be returned by HCN and/or the student.

The withdrawal date is always the last day of attendance. The withdrawal date is also the date used for federal reporting and Return to Title IV (R2T4) for official withdrawals and for unofficial withdrawals in which a student earns a passing grade in at least one course. For a student that fails to earn a passing grade in at least one course and is not documented to have completed the term, the withdrawal date is the midpoint of the term.

The amount of assistance earned is determined on a pro rata basis. For example, if the student completed 30% of the payment period, they will earn 30% of the assistance they were originally scheduled to receive. Once the student completes more than 60% of the payment period or period of enrollment, they earn all the assistance that they were scheduled to receive for that period.

If the student did not receive all of the funds that earned, a post-withdrawal disbursement may be due. If the post-withdrawal disbursement includes loan funds, HCN must get the student's permission before it can disburse them. The student may choose to decline some or all of the loan funds to avoid incurring additional debt. HCN may automatically use all or a portion of the student's post-withdrawal disbursement of grant funds for tuition and/or fees. HCN needs the student's permission to use the post-withdrawal grant disbursement for all other school charges. If the student does not give permission, the funds will be offered. However, it may be in student's best interest to allow HCN to keep the funds to reduce their debt at HCN.

If the student receives (or HCN or parent receives on the student's behalf) excess Title IV program funds that must be returned, HCN must return a portion of the excess equal to the lesser of:

1. Student's institutional charges multiplied by the unearned percentage of your funds, or
2. The entire amount of excess funds.

HCN must return this amount even if it didn't keep this amount of the student's Title IV program funds. If HCN is not required to return all of the excess funds, the student must return the remaining amount. Any loan funds that the student must return, they (or a parent for a Direct PLUS Loan) repay in accordance with the terms of the promissory note. That is, you must make scheduled payments to the holder of the loan over a period of time.

Any amount of unearned grant funds that the student must return is called an overpayment. The maximum amount of a grant overpayment that the student must repay is half of the grant funds you received or were scheduled to receive. The student does not have to repay a grant overpayment if the original amount of the overpayment is $50 or less. The student must make arrangements with HCN or the Department of Education to return the unearned grant funds.

Title IV funds are returned electronically and the order for the return of Title IV funds is as follows:

1. Federal Direct Unsubsidized Loan
2. Federal Direct Subsidized Loan
3. Federal Direct PLUS Loan
4. Federal Pell Grant
5. Federal Supplemental Education Opportunity Grant (FSEOG)
6. Other Title IV aid programs

Students will be notified of their eligibility for a post-withdrawal disbursement within 30 days of HCN's determination that the student withdrew. The student will have 14 days to respond to the notification. A student that does not respond or responds after 14 days will be considered to have not accepted the post-withdrawal disbursement offer. As soon as possible, but no later than 45 days after the date HCN determined the student withdrew, all unearned Title IV funds will be returned.

The requirements for Title IV program funds when the student withdraws are separate from the HCN institutional refund policy. Therefore, the student may still owe funds to HCN to cover unpaid institutional charges. HCN may also charge the student for any Title IV program funds that the school was required to return.

For questions about Title IV program funds, call the Federal Student Aid Information Center at 1-800-4-FEDAID (1-800-433-3243). TTY users may call 1-800-730-8913. Information is also available at https://studentaid.gov/ .

R2T4 example

If federal financial aid is received, the student must "earn" the aid received by staying enrolled in school. The amount of federal financial aid assistance earned is determined on a pro rata basis. If the student withdraws or stop attending classes during the enrollment period, the student may be required to return some of the financial aid awarded. For example, if the student completes 30 percent of the quarter, they earn 30 percent of the aid they were originally scheduled to receive. This means that 70 percent of the student's scheduled awards remain unearned and must be returned to the federal government.

The following formula is used to determine unearned aid that has to be returned:

Percent earned = number of calendar days completed up to the withdrawal date divided by total calendar days in the payment period

Percent unearned = 100 percent minus percent earned

The following example illustrates how the federal refund policy would affect a student who withdraws from classes at Hondros College of Nursing (HCN):

Student is attending Fall term which is 117 calendar days in length:

- Financial Aid: Pell Grant - $1,650
- Direct Subsidized Loan - $3,390
- Total Financial Aid Award - $5,040
- Tuition and Fees - $1,621

Financial Aid disbursed to student after Tuition and Fees are paid $3,419

Student withdraws on the 24th day of the quarter, which is the fourth week. Consult Catalog for HCN Institutional Refund Policy. Percent of federal financial aid earned:

- Completed Days: 24
- Total days: 117
- Percentage earned: 20.5%

Amount of federal financial aid earned:

- Percentage earned - 20.5%
- Aid awarded - $5,040
- Aid earned - $1,033.20

Amount of federal aid to be returned:

- Aid awarded: $5,040
- Aid earned: $1,033.20
- Unearned aid to be returned to the Department of Education by HCN - $4,006.80

Unusual Enrollment History (UEH)

The U.S. Department of Education has established regulations to prevent fraud and abuse in the Federal Student Aid program by identifying students with unusual enrollment histories. Some students who have an unusual enrollment history have legitimate reasons for their enrollment at multiple institutions. However, such an enrollment history requires HCN to review the student's file in order to determine future federal financial aid eligibility. If selected by the Department of Education, this must be resolved before he/she will be eligible to receive financial aid.

Definition of UEH

The specific pattern the Department of Education uses to select students includes those students who have received a Federal Pell Grant and/or Federal Loans at multiple institutions during the past four academic years. Once the Department of Education indicates that a student has an unusual enrollment history, the Office of Financial Aid must review the academic history prior to determining federal financial aid eligibility for that student. Students with an UEH will be identified through coding on the FAFSA® Submission Summary (FSS).

UEH Appeal Process and What Will be Required

If selected, the student will be notified of the requirements associated with the process. The student is required to have earned academic credit at every institution where he/she received a Federal Pell Grant or Federal Direct Subsidized/Unsubsidized loan while attending in those relevant academic years.

The HCN Office of Financial Aid will review the student's Unusual Enrollment History Form and his/her financial aid history at all previous institutions attended during the last four financial aid years (please ensure we have received all official/unofficial transcripts for those schools) and verify that academic credit was received at each institution during the relevant years.

If the student failed to earn academic credit at any institution where he/she received a federal Pell Grant or Federal Direct Subsidized/Unsubsidized loan during the relevant award years, he/she will need to provide a statement explaining the circumstance for credit not earned along with any relevant documentation using the Unusual Enrollment History Form.

The results of the appeal will be emailed to the student's Hondros College of Nursing email account (or personal email account from his/her FAFSA® if the student does not have a college email account). These decisions are final and are not appealable to the Department of Education. Regaining Federal Student Aid Eligibility Students that have been denied federal student aid based on an Unusual Enrollment History Appeal have the ability to regain financial aid eligibility by successfully completing one quarter at Hondros College of Nursing with a 2.0 or better GPA. Upon successful completion of one quarter, the student may submit another Unusual Enrollment Appeal.

Regaining Federal Student Aid Eligibility

Students that have been denied Federal Student Aid based on an Unusual Enrollment History Appeal have the ability to regain financial aid eligibility by successfully completing one quarter at Hondros College of Nursing with a 2.0 or better GPA. Upon successful completion of one quarter, the student may submit another Unusual Enrollment Appeal.

FSA Penalties for Law Violations

Currently incarcerated individuals have limited eligibility for federal student aid. Applicants who are incarcerated and students who become incarcerated must report this information to the Campus Executive Director.

Notice of Federal Student Financial Aid Penalties for Drug Law Violations

Disclosure Requirement: Made available to students and families in print or other medium HEOA Sec. 488(g): as amended.

HEA Sec. 485 (20 U.S.C. 1092): added HEA Sec. 485(k)
HEOA amendments effective August 14, 2008
FR notice (CFR 668.40)

A federal or state drug conviction may impact a student's access to financial aid funds. To learn more about situations affecting federal student aid eligibility please visit the Federal Student Aid website at https://studentaid.gov/help-center/answers/article/convictions-

eligibility-for-federal-student-aid-after-release .

For information concerning eligibility for students with criminal convictions please visit the Federal Student Aid website at https://studentaid.gov/understand-aid/eligibility/requirements/criminal-convictions .

The chart below illustrates the period of ineligibility for federal financial aid programs. Please note that eligibility is dependent upon the nature of the conviction and the number of prior offenses.

Possession of Illegal Drugs		Sale of Illegal Drugs
1st Offense	1 year from date of conviction	2 years from date of conviction
2nd Offense	2 years from date of conviction	Indefinite Period
3+ Offenses	Indefinite Period	Indefinite Period

Pursuant to federal law, a conviction for the sale of drugs includes convictions for conspiring to sell drugs. Moreover, those students convicted of both selling and possessing illegal drugs will be subject to ineligibility for the longer period as prescribed under the circumstances.

A student regains eligibility the day after the period of ineligibility ends or when the student successfully completes a qualified drug rehabilitation program. Further drug convictions will make the student ineligible again for federal financial aid programs.

Students denied eligibility for an indefinite period can regain it only after successfully completing a rehabilitation program as described below. Furthermore, eligibility can be regained if a conviction is reversed, set aside, or removed from the student's record so that fewer than two convictions for the sale or three convictions for the possession of illegal drugs remain on the student's record. In such cases, the nature and dates of the remaining convictions will determine when the student regains eligibility. It is the student's responsibility to certify to the College that a qualified drug rehabilitation program has been completed.

For purposes of financial aid eligibility, a qualified drug rehabilitation program must include at least two unannounced drug tests and must satisfy at least one of the following requirements:

- Be qualified to receive funds directly or indirectly from a federal, state, or local government program.
- Be qualified to receive payment directly or indirectly from a federally or state licensed insurance company.
- Be administered or recognized by a federal, state, or local government agency or court.
- Be administered or recognized by a federally or state-licensed hospital, health clinic, or medical doctor.

For more information regarding illegal drug convictions and financial aid eligibility, please visit the Frequently Asked Question section of the Free Application for Federal Student Aid (FAFSA) website https://studentaid.gov/h/apply-for-aid/fafsa

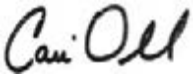
About

Institutional Overview

Message from the Provost

Welcome, and thank you for choosing to pursue your education with us at Rasmussen University part of American Public University System ("Rasmussen"). We see the potential within you and are honored to be your partner on this journey—from your first assignment to becoming the confident professional you are meant to be.



For more than 125 years, Rasmussen has been grounded in a legacy of opportunity, one that continues to guide who we are and how we serve our students today. We believe a person-centered, career-focused education has the power not only to transform individual lives, but to create lasting impact for families and communities. That belief remains at the heart of everything we do.

Your education is designed to prepare you to succeed in your chosen field and to make a meaningful difference in the world around you. Through real-world learning experiences, you will build the knowledge, skills and confidence needed to transition seamlessly from student to professional.

You are not alone in this journey. As a Rasmussen student, you are supported by a dedicated community—library resources, experienced faculty, peer tutors, personal student advisors, career services and more—all committed to helping you reach your goals. Together, we are focused on preparing workforce-ready graduates who can meet the evolving needs of the communities they serve.

Welcome to Rasmussen University part of American Public University System. Your future is full of opportunity, and we can't wait to see the impact you create.

Sincerely,

Dr. Carrie Daninhirsch
Provost
Rasmussen University part of American Public University System

Mission & Purposes

Mission

Rasmussen University part of American Public University System ("Rasmussen"), grounded in *integrity*, is committed to enriching our *communities* by providing *innovative*, *career-ready* higher learning and outstanding healthcare education.

Our students are at the heart of our mission.

Inspired by their dreams, we foster an *inclusive* environment that promotes *lifelong learning* and empowers every student to achieve their highest potential.

Purposes

To accomplish our mission, Rasmussen established these purposes:

1. Student Support and Service to Communities: Rasmussen demonstrates commitment to the public good by providing career-focused education and support for our students that strengthens our communities. We serve our communities by preparing students through student life and student services, supporting our alumni, and meeting the needs of employers and other constituents.

2. Innovation and Integrity: Rasmussen encourages innovative approaches to meeting the needs of our faculty, staff, and students. Innovations in the application of technology in our classrooms and improvements to policies and procedures are implemented with integrity. The university ensures its conduct is responsible and ethical in character.

3. Teaching and Assessment of Student Learning: Rasmussen prepares our faculty and staff to guide students through their programs of study in preparation for their careers by promoting transferable skills and lifelong learning. The university continuously improves the quality of instruction and educational outcomes based on the assessment of student learning.

4. Civic Engagement and Social Responsibility: Rasmussen addresses issues of concern and areas of need for our students, staff, and faculty. We intend to be welcoming through fair and respectful treatment and by valuing the perspectives of others.

Leadership & Administration

Executive Leadership

- Mark Arnold, MBA – President
- Dr. Carrie Daninhirsch, Ed.D – Provost
- Dwayne Bertotto, BA – Senior Vice President and Chief Operating Officer
- John Blackburn, BA – Vice President, Finance
- Dr. Brooks Doherty, Ed.D – Vice President, Chief Student Experience Officer
- Lori Kruizenga, JD – Vice President and Associate General Counsel
- Alex Olesen, JD – Vice President, Human Resources

Academic Leadership

- Lamont Allen, BA – Vice President, Office of Student Affairs and Dean of Students
- Robert Knops, MS – Vice President, Curriculum and Learning Experience
- Lynne Croteau, EdD – Associate Vice President, Business, Technology and Design
- Rikkisha Gilmore-Byrd, DrPH, PC, CHES, NBC-HWC – Associate Vice President, Education, Social Sciences and General Education
- Karen Guty, DNP, RN, CNE – Associate Vice President, Nursing Instruction and Operations
- Kailyn Helget, MS – Associate Vice President, Faculty Excellence
- Linda Kennedy, MBA, RHIA – Associate Vice President, Health Sciences
- Matthew Segaard, PhD – Associate Vice President, Assessment and Institutional Research

- Shawn Ulwelling, MEd – Associate Vice President, Accreditation and Regulatory
- Didi Abbate, PhD, MSN-Ed, MBA, RN – Director, Nursing Curriculum and Online Programming
- Mariam Case, DNP, RN – Area Dean of Nursing
- Marcia Donaldson, MSN, RN – Area Dean of Nursing and Administrator
- Kimberly Korneck, DNP, RN – Area Dean of Nursing
- Kate Lindley, MSN, RN, CHSOS, CHSE – National Simulation Director
- Heather Ann Smith, MSN, RN – Area Dean of Nursing and Administrator
- Kara Walls, DNP, MSN, APRN, CPNP-PC – Director, Nursing Student Outcomes
- Juliana Klocek, MBA – Registrar

Operations and Student Services

- Lori Jonason, BS — Vice President, Central Student Operations
- Morgan Meyer Jensen, BS — Vice President, Workforce Solutions
- Chris Phillips, BA — Vice President, Campus Operations
- Lisa Riley, MS — Vice President, Online Operations
- Staceyann Sinclair Jibbison, MA — Vice President, Campus Operations
- Chris Springer, BA — Vice President, Campus Operations
- Iman Johnson, BS — Associate Vice President, Student Financial Aid
- Tony Possley, BA — Associate Vice President, Student Experience and Persistence
- Kevin Roberts, MBA — Associate Vice President, Online Operations
- Josh Turner, MBA — Associate Vice President, Admissions and Training
- Molly Andersen, BJ — Director, Public Relations

Academic Administration

- Kristi Reese, MA, MBA – Associate Vice President, Strategic Execution
- Ashley Cobb, PhD – Dean, School of Business
- Christopher Roe, MBA – Dean, School of Business
- Rodney Crater, MS, MA – Dean, School of Technology and School of Design
- Mary Muhs, EdD – Dean, School of Education
- Etta Steed, DM – Dean, School of Justice Studies and School of Human Services
- Robert Neuteboom, PhD –Dean, School of General Education
- Bentley Jackson, MA – Law Enforcement Coordinator
- Shana DiBenedetto, PhD, R.T.(R)(ARRT) – Dean, School of Health Sciences
- Jessica Martinez, MHA, CMA – Dean, School of Health Sciences
- Krista Vylasek, MHS, CST – Dean, School of Health Sciences
- Diane Nemitz, MA – Senior Compliance Officer, National Disability Services Coordinator
- Tracy Tepley, MS – Assistant Dean of Students and Title IX Coordinator; Accommodations Officer
- Kate Zak, BS – Assistant Dean of Students and Deputy Title IX Coordinator

Nursing Academic Administration

- Kathleen Kump, DNP, MSN, MHSA, APRN, CWOCN, FNP – Dean of RN-BSN Nursing
- Erik Costea, MSN, RN – Nursing Academic Program Director - Bachelor Degree Nursing

- Ronni Points, MSN, RN – Nursing Academic Program Director - Associate Degree Nursing
- Deanna Wolfskeil, MSN, RN – Nursing Academic Program Director - Practical Nursing
- Jennifer Vendt, DNP, APRN, CPNP-PC, PHC, CNE – Dean of Online Nursing
- Jodi Dampeer-Moore, EdD, MSN, RN – Post-Licensure Clinical Practicum and MSN Track Coordinator
- Michelle McClave, EdD, MSN, RN – Nursing Curriculum Coordinator - Graduate
- Jennifer Anthony, PhD, MSN, RN, CNEcl – Director, Nursing Student Success

FLORIDA

University Policies & Information

Personal Records & Identity

Legal Name Change Policy

Students who wish to officially change their legal name with Rasmussen University part of American Public University System ("Rasmussen") will address that with the Student Records Department through the Rasmussen Student Portal in the Student Account Center. Individuals will need to submit evidence of current identification with the legal name change visible: government-issued photo identification and the name change document (i.e., a marriage certificate, divorce decree, or court document reflecting the name change).

Preferred Name Policy

At Rasmussen University part of American Public University System ("Rasmussen"), creating an inclusive environment for our diverse student body is a priority. We recognize that some students prefer to be identified by a first name other than their legal name. All Rasmussen potential students and students have the option to use a first name different than their legal name on certain University records. Any student may choose to identify a preferred first name, also known as their lived name, in addition to their legal name (as listed on the driver’s license, Social Security card, passport, etc.) The University will display the preferred name to the University community where feasible and appropriate and make a good faith effort to update records, documents and systems accordingly. This procedure applies to those students who wish to use a preferred name on campus.

The student is free to determine the preferred name they want to be known by, regardless of whether they have legally changed their name.

The University reserves the right to remove a preferred name if it is used inappropriately, including but not limited to, avoiding a legal obligation or for the purpose of misrepresentation.

The legal name will continue to be used in university-related systems, business processes, and documents such as reporting, financial aid, transcripts, payroll and tax documents, and other records where use of legal first name is required by law or Rasmussen policy.

A student who indicates a preferred name will see it used whenever possible in campus systems and documents, with the exception of cases where the student’s legal name is required by law. Legal first and last names can only be changed with documentation of a legal name change.

A student may update their preferred name at any time through the Rasmussen Student Portal, within the Account Center Preferred Name and Pronoun Update tab. The preferred name will be the default name printed on quarterly academic achievement awards, as well as the diploma. A student may change the default to their legal name prior to the last date of each quarter for which the awards are calculated.

***Please note:** When providing your name, it is important to consider situations in which you will be using your preferred name, and decide if your first name will need to be consistent on all records and forms of ID. For example, when searching for a job, which name will you be

using on your resume and in all interviews? Remember that your legal name will appear on your transcript, financial aid documents, visa documents, and W-2 forms. It is important to know that you may change your preferred name back to your legal name for any reason.

Places Where Preferred Name Will Appear
Once the Registrar's Office makes the updates, our university will then make every effort to update our many independent systems across the university to reflect your preferred name where possible. Generally, you can expect to see your preferred name in the following places:

- Rasmussen Classroom IT Support (IT Support System)
- Learning Management System
- Class rosters
- Grade Reports / Degree Progress Audit
- Quarterly Deans & Honors Awards and Credential Awards
- Commencement programs
- Diplomas
- University marketing materials where a student has consented to have their name identified (student may choose the name to be used)
- Directory listings (telephone, online, hardcopy)
- Co-curricular rosters (athletic rosters, student organization membership, etc. and related reporting)

Places Where Legal Name Will Appear

- Network login
- Email display of name
- Enrollment Acceptance communications
- Financial Aid and Tuition Billing
- Official and unofficial transcripts
- Enrollment verification
- Accounts payable & student refund checks
- Paychecks & paystubs
- Required information reporting to the IRS (W2, 1098T, 1042S, etc.)
- Certain official forms or correspondence from the University (financial aid awards, new hire forms, etc.)
- Disciplinary records, including Safety & Security reports
- Federal immigration documents
- Official correspondence/reporting with external entities

Pronoun Policy

Pronouns are used in place of people's names. Chosen pronouns are used to respect the way people identify and to avoid making assumptions about people's identities. A chosen pronoun is the pronoun that an individual would like others to use when talking to or about that individual. Some people prefer others to use a gender-neutral or gender-inclusive pronoun when talking to or about them. A student does not have to report a chosen pronoun. A chosen pronoun is not the same as gender. Gender information will continue to be collected at the time of enrollment and may be updated at any time through the Rasmussen University part of American Public University System ("Rasmussen") Student Portal within the Account Center Student Change of Information tab. A student may also update their pronoun at any time through the Rasmussen Student Portal within the Account Center Preferred Name and Pronoun Update tab.

Student Location Policy

The state in which a student is located is determined from their address in Rasmussen University part of American Public University System (Rasmussen) student information system. The student information system is populated with the address from the student's application at the time of initial enrollment. A student's address may be updated at any time by the student (via the Student Portal) or by

Rasmussen personnel acting at the student's request. Relocation to another state after enrollment may adversely impact the student's ability to complete the program.

Resources

Consortium Agreement

Rasmussen University part of American Public University System ("Rasmussen") has signed consortium agreements among all Rasmussen campuses.

Course requirements for programs may be completed at any of the campus locations, as the schools have common ownership and common courses, and students will have the flexibility to take courses from all locations as they choose. Students who attend a class at a location other than their home campus (primary attendance location) will have their total tuition and fees charged by their home campus. All financial aid will be awarded and disbursed from the home campus. The home campus monitors satisfactory progress.

A copy of the consortium agreement is kept on file at each campus. Students have the right to review and acknowledge the agreement prior to taking courses at other campuses.

Interlibrary Loan Policy

The Rasmussen University part of American Public University System Library is committed to providing high quality and timely information services to Rasmussen patrons (defined as current students, faculty, and staff) in accordance with our mission of student support and academic excellence.

Definition: Interlibrary loan is a process by which Rasmussen Library staff request materials not available in the Rasmussen Library collection from a lending partner to fulfill a patron's need. There is no cost to patrons for this service.

Eligibility: Current Rasmussen students, faculty, and staff are eligible to use the interlibrary loan service.

Submitting Requests: Requests can be submitted from within the library databases, or by using Rasmussen's Faculty Interlibrary Loan Request Form and Student Interlibrary Loan Form. Rasmussen reserves the right to cancel requests, particularly in situations that place undue strain on resources, such as an individual submitting a high volume of requests in one day. Prior to cancelling requests, a Rasmussen librarian will contact the requester to discuss effective search strategies and possible alternative resources that may be readily available within Rasmussen's Online Library.

Physical Items: While the library's interlibrary loan service is focused on providing digital copies, requests for physical items will be processed for items that are deemed necessary for the completion of original scholarly work by Rasmussen graduate students or faculty. Examples of original scholarly work include Doctor of Nursing Practice (DNP) projects and faculty-led research studies.

Renewal requests for physical items will be processed; however, renewals are granted for physical items at the discretion of the owning library. Any fees incurred by the library for overdue or lost materials will be assessed to the patron through the Business Office. Rasmussen reserves the right to withhold the release of academic information, and other records, pending settlement of any amount due to the University.

Copyright and CONTU adherence

a. The library recognizes and makes a good-faith effort to abide by the copyright law of the United States (title 17, United States Code). If a patron makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

b. Borrowing data will be reviewed at the end of each calendar year for compliance with Copyright and CONTU guidelines.

c. To adhere to CONTU guidelines and to meet the needs of the Rasmussen community, the library will consider subscribing to serials with a demonstrated need

Library and Learning Resources Policy

Rasmussen University part of American Public University System (Rasmussen) Library team, in accordance with the mission of the University, is rooted in a tradition of student support and driven by a desire for academic excellence. They are passionate about empowering the university community and cultivating lifelong learners who are prepared to thrive in a diverse and digital society.

In support of this mission we:

- Extend our resources and services to all students and employees of the University;
- Empower students to access information independently in the changing world of technology;
- Support faculty by providing professional development and instructional partnerships;
- Engage in responsive collection development by collaborating with faculty to select resources; and
- Provide direction and recommendations to help guide our users to the resources and online tools that will work best for their learning.

A. Borrowing Materials: General
The following persons are permitted to check out materials owned by our library system:

- Rasmussen students and alumni in good financial standing with the University
- Rasmussen faculty and staff in good standing with the library
- Consortia patrons in good standing with the library

A patron in good standing with the library is defined as a person who has no overdue items and owes no fees toward damaged or lost items. A library user is responsible for any items checked out in his or her name. Rasmussen retains the right to deny borrowing privileges to any person in violation of this or any other library policy.

B. Loan Periods
Loan periods vary depending on the database and content. E-books from the databases can be checked out and used offline for up to seven calendar days. Digital materials are loaned for 21 calendar days from the Cloud Library and may be renewed up to two times if there are no outstanding holds on the material. Library materials must be returned to the library on or before the end of the loan period; if they are not returned by the user, then the system will automatically recall the material.

C. Fees and Restriction of Borrower Privileges
Users will receive a reminder two days in advance of an item’s due date.

Following the grace period (5 days for circulating items; 10 hours for special materials), items are considered overdue and borrower privileges will be restricted until items are returned or fees are paid for lost materials.

After 30 days past the end of the grace period, the material is considered lost. The library reserves the right to charge for replacement costs. Replacement costs are assessed per each individual item. The library will charge $55.00, or the cost of replacing the item plus a $5.00 processing fee.

In the event that a library material is returned damaged, the borrower will be assessed a fee to repair or replace the damaged item. In the event that an irreplaceable item is damaged, the library will assess a $55.00 fee.

Rasmussen cannot override fines incurred at other libraries, including fines for Interlibrary Loan items lost or returned late.

Library fees are assessed through the Department of Student Financial Services. Rasmussen reserves the right to withhold the release of academic information, and other records, pending settlement of any amount due to the University.

Student Support

We're Here to See You Through

We're here, right now, to help you find the best approach to whatever is challenging you. We've helped thousands before you—and yet we know you're unique. Let's work together on this.

Student Portal

Your direct path to find courses, message your instructors, schedule library consults, connect with peer tutors and educators, view your account and more.

Academic Advisor

Your personal guide, assisting you with course scheduling, financial aid and learning resources.

Support Services Include:

- Library research consultations
- Peer tutors and educators
- Writing lab
- Tech support (Classroom IT Support)
- Career guidance
- Student Account Center

You Have What It Takes. But You Don't Have to Do It Alone.

Student Conduct, Rights & Safety

Conduct and Dismissal Policy

Students are expected to conduct themselves with the same standards of behavior as are expected in the workplace and in the community at large. The University reserves the right to suspend or dismiss any students whose conduct is detrimental to the educational environment. A student dismissed from the University because of misconduct may not reenroll. Conduct/Dismissal guidelines for School of Nursing students or students enrolled in select School of Health Sciences programs can be found in each programmatic handbook provided at programmatic orientation. This includes, but is not limited to, conduct:

- By students, faculty, or staff that is detrimental within the classroom environment.
- That interferes with the well-being of the fellow students or faculty and staff members.
- That causes damage to the appearance or structure of the University facility or its equipment.
- By students who deliberately falsify, alter, invent student records, or engage in other activities to gain an unfair advantage.
- By students who otherwise display conduct detrimental to their own academic progress or ultimate success in the field for which they are being educated.
- Florida Campus Students: Florida Campus students and personnel are expected to abide by the Safety in Private Spaces Act. Should an individual be found in violation of this Act, and refuse to depart when asked to do so by Rasmussen University part of American Public University System (Rasmussen) personnel, then law enforcement will be notified. All students and personnel have the right to file a complaint with the Attorney General alleging that the institution has failed to meet the minimum requirements for restrooms and changing facilities if they so determine.

Students, employees, and guests using Rasmussen networks to access the internet are prohibited from viewing inappropriate material or visiting sites which have been identified as facilitating the violation of copyright/intellectual property protections or other suspicious/illegal

activity. Prohibited material could include pornographic images, illegal file sharing programs (such as the illegal downloading and sharing of music), or other violations of the American Public University System Acceptable Use of Information Technology Resources Policy. Violations will result in the loss of network use privileges and possibly other penalties, up to and including dismissal.

Dress Code

Rasmussen University part of American Public University System (Rasmussen) encourages students to dress as if they were going to work and to start acquiring a wardrobe suitable for employment after graduation.

Several programs, including those in our School of Nursing and our School of Health Sciences, have stringent dress codes and professional appearance requirements. Standards are specified in the applicable program handbooks. In some cases, failure to meet the required standard may impact a student's ability to participate in an externship, practicum or clinical experience, and may ultimately impact the student's grade. Please consult the handbook specific to your program or see your Program Coordinator/Director or Dean of Nursing/Nurse Administrator for details.

Drug Testing Policy

Students or learners enrolled in any academic program or registered for any non-degree seeking training may be required to submit to drug testing throughout enrollment or registration as a condition of placement at a clinical, practicum, externship, professional practice experience, internship, field work, job shadowing or field trip site, collectively referred to as "Experiential Learning Site" for the purpose of this policy. Students and learners may also be subjected to reasonable suspicion testing and/or post-accident testing as determined by Rasmussen University part of American Public University System (Rasmussen) or any Experiential Learning Site at which the student or learner is placed. Potential students who have a signed enrollment agreement who require drug testing in preparation for a first-quarter practicum or clinical experience in any program requiring a drug test are also covered under this policy and will agree to the terms and conditions of the drug testing process as part of placing the order through the vendor. Drug testing results are not a condition of acceptance into a program; however, the results may preclude a student from participating fully in the program and may cause administrative withdrawal from the program prior to acceptance to the program. All costs associated with drug testing will be the sole responsibility of the student or learner.

The drug test may include a test for any or all of the following substances: alcohol, amphetamines, barbiturates, benzodiazepines, cannabinoids, cocaine, fentanyl analogues, MDA, MDMA, meperidine, methadone, methaqualone, opiates, oxycodone, phencyclidine, propoxyphene, and any other substance identified by an Experiential Learning Site for placement.

Passing a drug test for the purpose of continued enrollment or registration is determined by Rasmussen, in its sole discretion. Passing a drug test for the purpose of Experiential Learning Site placement is determined by the Experiential Learning Site at which placement is sought. In the event that a student or learner may remain enrolled or registered, but is unable to be placed in an Experiential Learning Site, then Rasmussen will make a reasonable effort to find an alternative site that will accept the student or learner. However, if an alternative site cannot be identified that will accept the student or learner, then the student or learner will be withheld from attending activities at Experiential Learning Sites, which may lead to adverse consequences under attendance policies, course failure, and/or an inability to complete the program or training. Rasmussen reserves the right to share any student's or learner's drug test results with an Experiential Learning Site at which placement is being sought to allow the Experiential Learning Site to determine whether placement will be accepted based on the drug test results.

Academic personnel at each campus will determine a deadline for drug test order placement based on the circumstances that require testing. A student or learner who refuses to test or who does not meet the testing deadlines as outlined by academic personnel may be withheld from attending activities at Experiential Learning Sites, which may lead to adverse consequences under attendance policies, course failure, and/or an inability to complete the program or training.

A negative-clear result allows a student or learner to remain enrolled or registered in Rasmussen programs or trainings.

A negative-dilute result does not allow a student or learner to attend activities at Experiential Learning Sites. Students or learners with a negative-dilute result will be required to retest at their own cost, if the student or learner desires to attend activities at Experiential Learning

Sites. A negative-dilute result on the retest allows a student to remain enrolled or registered in Rasmussen programs or trainings. However, the student or learner accepts the risk that placement at an Experiential Learning Site with two negative-dilute results may not be possible consistent with paragraph four of this policy. A student or learner who chooses not to retest must be withheld from attending activities at Experiential Learning Sites, which may lead to adverse consequences under attendance policies, course failure, and/or an inability to complete the program or training.

Prior to releasing a positive or positive-dilute result, the drug testing vendor will submit the result to a medical review officer ("MRO"). Students whose results are released for medical review will have an opportunity to present documentation or information to the MRO regarding any prescribed medication they are taking.

If the MRO is satisfied by the documentation that is presented, then the drug test will be released to Rasmussen as a negative-clear result. If the MRO is not satisfied by the documentation that is presented, then the drug test will be released to Rasmussen as a positive result. If the student does not respond to the MRO's communication attempts, then the results will be released to Rasmussen as a positive result.

A positive or positive-dilute drug test that is positive for alcohol allows a student or learner to remain enrolled or registered in Rasmussen programs or trainings. However, the student or learner accepts the risk that placement at an Experiential Learning Site may not be possible consistent with paragraph four of this policy.

A positive or positive-dilute drug test that is positive for marijuana for a student or learner enrolled or registered in a program or training at an Illinois or Minnesota campus allows a student or learner to remain enrolled or registered in Rasmussen programs or trainings in Illinois or Minnesota. However, the student or learner accepts the risk that placement at an Experiential Learning Site may not be possible consistent with paragraph four of this policy.

A positive or positive-dilute drug test that is positive for marijuana for a student or learner enrolled or registered in a program or training at a Florida or North Dakota campus allows a student or learner to remain enrolled or registered in Rasmussen programs or trainings at Florida or North Dakota campuses if the student or learner is able to provide documented proof of a current legal prescription or registration for medicinal marijuana issued under the medicinal marijuana law of the state. However, the student or learner accepts the risk that placement at an Experiential Learning Site may not be possible consistent with paragraph four of this policy.

A positive or positive-dilute drug test that is positive for marijuana for a student or learner enrolled or registered in a program or training at a Kansas or Wisconsin campus will cause the student or learner to be administratively withdrawn from the University.

A positive or positive-dilute drug test that is positive for any tested substance other than alcohol or marijuana will cause the student or learner to be administratively withdrawn from the University.

A student or learner who has been administratively withdrawn from the University under this policy is responsible for any and all tuition and fees billed and any loans utilized throughout enrollment or registration in the program or training.

A student or learner who has been administratively withdrawn from the University under this policy is not eligible for reentry to the University unless the reentry process is completed. To gain the ability to attempt the reentry process, the former student or learner must identify a state-licensed drug abuse treatment facility and undergo a drug abuse treatment assessment.

If the assessment determines that the former student or learner is eligible for treatment, then the former student or learner must complete the recommended drug abuse treatment program and the treatment program must release the former student or learner indicating that the former student or learner is mentally and physically able to pursue an educational program of study. The former student or learner must then undergo a drug test through Rasmussen and receive a result that allows the former student or learner to be enrolled or registered in Rasmussen programs or trainings as defined in this policy.

If the assessment determines that the former student or learner is not eligible for treatment, then the former student or learner must identify a community-based drug abuse education program and seek approval from Rasmussen whether it will meet the conditions for reentry. If Rasmussen approves the education program, then the former student or learner must complete the education program and provide documentation of completion to Rasmussen. The former student or learner must then undergo a drug test through Rasmussen and receive a result that allows the former student or learner to be enrolled or registered in Rasmussen programs or trainings as defined in this policy.

Rasmussen reserves the right in its sole discretion to determine if a former student or learner is eligible to attempt the reentry process. A former student or learner who gains the ability to attempt the reentry process is subject to all other reentry policies and procedures.

Grievance Policy

Rasmussen University part of American Public University System (Rasmussen) recognizes the rights of individuals affiliated with the University to receive due process under the policies and practices that govern the University, and thus, individuals may submit a complaint through the impartial procedures of grievance as defined in these policies.

For the purposes of these policies, the following terms are defined:

- Complaint: An expressed feeling of dissatisfaction held by an individual regarding an action taken by the University or by members of the University community.
- Student Complainant: A current, former, or prospective student who has or had a direct connection with the University.
- Public Complainant: A member of the community who has or had a direct connection with the University or an indirect connection through a student or Rasmussen employee.

Not all complaints rise to the level of a grievance unless specific allegations warrant the need to use the following grievance procedures to resolve the complaint. Complaints that do not include the specific allegations that make the concern eligible to be processed under the following grievance procedure should be directly addressed with the individual and/or department that oversees the area of concern.

A grievance is a complaint that alleges the University failed to properly apply a Rasmussen policy, procedure, and/or standard practice. Disagreement with the outcome of a properly applied University policy, procedure, and/or standard practice does not constitute a grievance.

No retaliatory action may be made by the University or any of its representatives against those who have a complaint or submit a grievance, participate in the resolution process, or are the subject of the matter. The University will investigate and attempt to resolve each grievance made under these policies and any associated allegations of retaliation.

In compliance with Minn. Stat. § 136A.65, subd. 4(13), [https://www.revisor.mn.gov/statutes/cite/136a.65] no grievance initiated under this policy with an allegation(s) of school actions or conduct that would be covered under Minn. Stat. § 136A.672 [https://www.revisor.mn.gov/statutes/cite/136A.672] will be resolved with a nondisclosure agreement or other contract restricting a complainant's ability to disclose information.

Grievance Procedure

Failure to follow the grievance procedure, including missed deadlines or failure to meet the definition of a grievance, may result in the submitted grievance being denied for review.

1. **Informal Resolution**
   The complainant is encouraged to first attempt to resolve the issue informally and directly with the individual or entity responsible for the concern, wherein safe and feasible.

2. **Grievance Submission**
   If the issue is not resolved informally, the complainant may submit a grievance by completing the Grievance Form within ten (10) business days of the complaint or the conclusion of the informal resolution. The link to the grievance form can be found at https://guides.rasmussen.edu/disputeresolutionpolicies.

   The following process will apply:
   The Campus/Online Executive Director will review the submitted grievance form to determine whether the complaint constitutes a grievance as defined within this policy. The Campus/Online Executive Director will provide a response within three (3) business days, indicating whether the complaint is accepted for review as a grievance or dismissed because it does not meet the definition of a grievance as defined in this policy.

For submissions accepted as grievances, the Campus/Online Executive Director will have fifteen (15) business days from the date submitted to conduct a thorough review and render a written determination to the grievance.

3. **Grievance Appeal**
   The complainant may only appeal the grievance determination of a Campus/Online Executive Director for the following reasons:

   - New evidence is available that was not available at the time of the grievance was submitted, and the said evidence may affect the outcome of the grievance determination.
   - The grievance determination was disproportionate to the findings.
   - The Campus/Online Executive Director had a conflict of interest, bias, or retaliatory behavior that affected the outcome.

   To appeal, the complainant must complete the University Grievance Appeal Form within ten (10) business days of receiving the determination. The link to the appeal form can be found at https://guides.rasmussen.edu/disputeresolutionpolicies. The University Grievance Officer will have thirty (30) business days from receipt of the appeal to either grant or deny the appeal, or to request additional information from the complainant. The decision of the University Grievance Officer is final.

   To appeal, the complainant must complete the University Grievance Appeal Form within ten (10) business days of receiving the determination. The link to the appeal form can be found at https://guides.rasmussen.edu/disputeresolutionpolicies. The University Grievance Officer will have thirty (30) business days from receipt of the appeal to either grant or deny the appeal, or to request additional information from the complainant. The decision of the University Grievance Officer is final.

A record of each grievance and grievance appeal determination, including its nature and disposition, shall be maintained for all programs by the University.

Tobacco Use Policy

Smoking and tobacco use is prohibited at all facilities owned, leased, and/or controlled by Rasmussen University, including campuses, office buildings and grounds. This includes, but is not limited to common work areas, classrooms, labs, elevators, hallways, restrooms, employee lounges, student lounges, library, parking lots, plazas, courtyards, entrance and exit ways, and any other areas of the campus grounds. This policy applies to all faculty, staff, students, and visitors.

This policy does not apply to areas of multi-tenant buildings that the proprietor has designated a public area for smoking. Similarly, this policy does not apply to offsite events controlled or sponsored by the University where site management has designated an area for smoking.

For purposes of this policy, “tobacco use” means the personal use or consumption of any tobacco product, whether lit or not, including the use and display of an electronic cigarette or other device intended to simulate smoking. Prohibited tobacco products include smokeless tobacco, snuff, chewing tobacco, smokeless pouches, or any other form of loose-leaf, smokeless tobacco; and the use of unlit cigarettes, cigars, and pipe tobacco. Smoking is defined as inhaling, exhaling, burning or carrying in hand any lit tobacco product, including cigarettes, cigars, pipe tobacco, and any other tobacco products.

Personal possession of tobacco products inside a pocket, handbag, or other storage container where the product is not visible is allowed.

Anyone found to be in violation of the Tobacco Use Policy will be subject to discipline in accordance with the applicable conduct and discipline policy. Visitors may be asked to leave the premises.

Weapons Policy

Rasmussen University part of American Public University System (Rasmussen) prohibits the possession of weapons of any kind inside campus buildings. Prohibited items include, but are not limited to, firearms, BB/pellet guns, slingshots, paint guns, arrows, swords and knives other than cooking utensils and utility/pocket knives with a blade length of 3 inches or less. Prohibited items include weapons that are loaded or unloaded, functioning or non-functioning, and anything that could be perceived as a weapon, including toys and weapons

used for decorative, display, and/or simulation purposes. This policy applies to all staff, faculty, students, and visitors with the exception of licensed peace officers and law enforcement/security agents as allowed by applicable statute. The approved storage and use of weapons for training purposes as part of a School of Justice Studies program is permitted. This policy includes both campus buildings and off-site events sponsored and controlled by the University including graduation ceremonies, internships, and clinical sites. This policy does not include Rasmussen parking lots, where weapons are allowed to be stored in private vehicles unless prohibited by a separate parking facility owner or operator. Rasmussen policy defers to agency/site-specific rules regarding School of Justice Studies training facilities.

Transcripts

A transcript is a complete and unabridged copy of all academic work attempted while enrolled at the academic unit, except for transfer credit taken elsewhere. Transfer and test credits accepted toward a degree or program are recorded on the academic record. However, the transfer and test grades earned are not displayed on the transcript and are not calculated into Grade Point Average (GPA). Course and grade information contained on your transcript is released only upon your written consent or as required by any applicable law.

Current and former students who require an official transcript must order them through National Student Clearinghouse, a secure 24/7 online order system at www.getmytranscript.com. Once a request is submitted through the National Student Clearinghouse website, the transcript requests are processed within five to seven business days. Students may request that their transcripts be sent electronically to the recipient, or they may be delivered by first class mail. Mailed transcripts are sent standard first-class postage and may take up to 10 days to be delivered by the postal service.

Current and former students may access and download an unofficial transcript through the Student Portal at no charge as long as their account remains active.

Accounting

Certificate

Fully online program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program learn to manage accounts receivable and accounts payable. They learn to prepare tax returns and financial statements and use computer applications proficiently. They know financial and managerial accounting concepts as related to the business environment. Graduates value the ability to effectively communicate in a variety of situations, in the workplace, and in their communities.

Typical Career Paths

- Accounting Clerk
- Bookkeeper

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen University part of American Public University System ("Rasmussen") does not pre-screen for

enrollment in this program. Any prospective student must consider their history, lifestyle and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field.

Careers Disclosure: This program does not meet the educational requirements for licensure as a Certified Public Accountant (CPA) in any state.

Additional Information

This program is not designed to prepare graduates for any state-issued professional license or certification. This Accounting program does not meet all educational prerequisites for licensure as a Certified Public Accountant (CPA) in any state. For further information on professional licensing requirements, please contact the appropriate board or agency in your state of residence.

Early Childhood Education

Certificate

Fully online program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program know child development and apply best practices to their work in the early childhood field. They value the ability to effectively communicate in a variety of situations, in the workplace, and in their communities. This program contains coursework aligned with the high-quality standards of the National Association for the Education of Young Children (NAEYC) and the Council for Professional Recognition (Child Development Associate (CDA) Credential).

Typical Career Paths

- Early Childhood Teacher's Aide
- Childcare Worker

Careers Disclosure: The Early Childhood Education programs at Rasmussen University part of American Public University System ("Rasmussen") are not designed to meet, and do not meet, the educational requirements for licensure to teach in public preschools, or kindergarten, elementary, or secondary schools in any state. A bachelor's degree from a state-approved college or university and a state teaching license are typically required to work as a teacher in a public school, and in private school settings. The Rasmussen Early Childhood Education programs are not approved by any state agency that licenses teachers. States, municipalities, districts, or individual schools may have more stringent licensure requirements and other standards. Childcare facilities and the states in which they are located establish qualifications for staff that work with children, and often implement guidelines regarding age, education, experience, background, and professional development. Before enrolling, it is important to understand all of the licensure eligibility standards for a desired career by consulting the appropriate state and school/facility requirements.

The Child Development Associate (CDA) Credential from the Council for Professional Recognition may be required for some career opportunities. Rasmussen partners with the Council for Professional Recognition, and its Early Childhood Education Certificate program contains the following courses, which provide the educational prerequisites for the CDA Credential: **EEC1202** Early Childhood Education Curriculum and Instruction; **EEC1700** Foundations of Child Development; and **EEC1735** Health, Safety, and Nutrition/CDA Application. Additional CDA Credential eligibility requirements apply. Please consult the CDA eligibility requirements of the Council for Professional Recognition for further details.

Additional Information

This program has not been approved by any state professional licensing body, and this program is not intended to lead to any state-issued professional license. For further information on professional licensing requirements, please contact the appropriate board or agency in your state of residence.

The Early Childhood Education programs contain coursework aligned with the requirements for the Gateways Credentials, which are awarded and recognized by the Illinois Department of Human Services (IDHS) Bureau of Child Care and Development. Other eligibility requirements apply; please verify your eligibility against all Gateways Credentials requirements.

In addition to meeting all other acceptance requirements, applicants must successfully pass a background check through Rasmussen's chosen third-party vendor. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Healthcare

THIS PROGRAM IS NOT AVAILABLE IN NORTH DAKOTA

Certificate

Fully online program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program understand basic medical knowledge and skills for careers in the healthcare field. They know medical terminology, anatomy, pathology, and basic concepts of healthcare practice, procedures, and health information management. They value the ability to impact the patient experience through effective communication, maintaining patient confidentiality, and ethical and professional behavior in the healthcare environment.

Typical Career Paths

Excluding Illinois campuses:

- Medical Clerk, Assistant, Coordinator, Agent, Specialist
- Medical Secretary, Administrative Assistant, Receptionist
- Scheduler

Illinois Campuses Only:

- Medical Services Technician
- Medical Registration or Receptionist

Additional Information

This program is not designed to prepare graduates for any state-issued professional license or certification and has not been approved by any state professional licensing agency.

In addition to meeting all other acceptance requirements, applicants must successfully pass a background check through Rasmussen University part of American Public University System ("Rasmussen")'s chosen third-party vendor. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Enrollment Requirements

Applicants are eligible to enroll in the Healthcare Certificate program and are not required to take the **E102** Pathways to Patient Care Seminar when one of the following applies:

1. The applicant's desired program is the Medical Assisting Diploma program but does not meet the Acceptance Requirements of already having completed at least 8 eligible credits of designated coursework that apply to the Medical Assisting Diploma program and meets all the requirements of Satisfactory Academic Progress in the most recently attended program of enrollment.
2. The applicant is enrolled through Rasmussen University Online and either does not have a School of Nursing and School of Health Sciences Entrance Exam score, or the applicant's exam score is insufficient to enroll in a different program.

1. The Healthcare Certificate program is a laddered credential when a student is enrolled in the Healthcare Associate-Healthcare Administration or Health Sciences Associate-Healthcare program. Only students enrolling through a residential campus in these Associate programs and who have a qualifying score on the School of Nursing and School of Health Sciences Entrance Exam are required to take the E102 Pathways to Patient Care Seminar course. The E102 course must be taken in the student's first or second term of enrollment, and the School of Nursing and School of Health Sciences Entrance Exam must be attempted by the end of the course. Students have one opportunity to attempt the E102 course, regardless of grade earned (SX/UX/UXD/WX).
2. Illinois Campuses: Students enrolling through Illinois campuses must take E242 Career Development (2 credits) and HIM2133 Revenue Cycle and Billing (4 credits) instead of HSA1146 Technology Today for Medical Administration (3 credits) and HSA2918 Healthcare Administrative Office Procedures (3 credits).
3. Elective Course requirements will be fulfilled with coursework determined by Rasmussen University as appropriate for the program of enrollment. Course selections are either 4 credit hours or 5 credit hours.

Information Technology Project Management

Certificate

Fully online program

Objective

Graduates of this program will be able to apply and synthesize real-world concepts and skills related to information technology. Graduates will be prepared to utilize skills related to information technology, systems analysis, and project management. Courses are project-based and simulate real-world experience with relevant software applications and hands-on labs. Students benefit learning from highly qualified faculty who have practical, in-field experience. Graduates are able to document procedures and comply with relevant policies, regulation standards, and ethical practices while also being able to communicate effectively, think critically, and act ethically in a variety of professional contexts. This program is aligned to industry relevant skills that are sought most by employers, which provides graduates an edge as they enter the career field.

Typical Career Paths

- Network Administrator
- Network Analyst
- Information Technology Manager

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen University part of American Public University System ("Rasmussen") does not pre-screen for enrollment in this program. Any prospective student must consider their history, lifestyle and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field.

Additional Information

The University will reimburse students to sit for up to three recommended certification exams. Reimbursements will be made only once per certification exam. Students are responsible for paying for any additional attempts.

Acceptance Requirements

To be considered for admission, applicants must provide transcripts from an accredited institution of higher learning as recognized by the U.S. Department of Education or the Council for Higher Education Accreditation (CHEA) that demonstrates one of the following:

a. A conferred associate's or bachelor's degree in a related field, as listed below

b. A conferred associate's or bachelor's degree in an unrelated field

c. Completion of at least 60 quarter credits or 40 semester credits of college-level coursework with a grade of C- or higher

Lower-level prerequisite course requirements will be waived for students with a conferred Associate's degree or higher from the following approved field-related programs:

- Information Technology
- Information Technology Management
- Information Systems
- Information Systems Management
- Computer Information Systems
- Computer Information Technology
- Management of Information Systems

Students with an unrelated Associate's degree or higher, or at least 60 eligible quarter credits, may be considered for this program as specified below:

- Students may be required to take additional lower-level prerequisite courses when equivalent courses have not been completed within the past three (3) years. Prerequisite courses a student may be required to complete include **CIS1538C** Hardware and Software I, **CIS1648C** Hardware and Software II, **CNT1244C** Introduction to Networks, and **CTS2511** Excel. The Excel course requirement is not subject to a time limit.

Lower-level prerequisite courses of this program are NOT eligible for participation in Title IV federal student aid programs.

Information Technology Support

Certificate

Fully online program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program will be able to explain real-world concepts and apply skills related to information technology. Graduates will be prepared to utilize skills related to business environment, communication, collaboration, hardware, software, end-user support, and networking. Graduates will be able to troubleshoot and resolve issues with desktops, laptops, mobile devices, and other computing technologies. In addition, graduates will be prepared to provide quality customer and end-user technical support while employing resolution strategies and industry best practices. Graduates will provide value to their organization by being able to communicate effectively, think critically, and act ethically while working as part of a team. Graduates understand the importance of lifelong learning, transferable skills, and staying relevant with emerging technology and trends. This program is aligned to industry relevant skills and certifications that are sought most by employers. All coursework completed in this certificate program would apply to the Rasmussen University part of American Public University System ("Rasmussen") Information Technology Associate Degree program.

Typical Career Paths

- Deskside Support Technician
- Helpdesk/Service Desk Support Specialist
- Field Service Technician
- End User Support Specialist

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen does not pre-screen for enrollment in this program. Any prospective student must consider their history, lifestyle and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field.

Additional Information

The University will reimburse students to sit for up to three recommended certification exams. Reimbursements will be made only once per certification exam. Students are responsible for paying for any additional attempts.

Developmental Education Courses

Code	Title	Quarter Credits
B080	Reading and Writing Strategies	4
B087	Practical Math	4

Developmental Education courses, when required, do not count toward total program credits, and are not calculated in GPA. Students must demonstrate mastery of the subject matter in Developmental Education courses through a Rasmussen entrance placement exam, approved exemption based on previously completed coursework, or by passing Developmental Education courses.

Law Enforcement Academic

Certificate

Fully online program

Objective

Graduates of this program know the history and development of the criminal justice system and the role of law enforcement in the system. They understand the legal process from arrest to the courts and through the corrections system. They can apply critical thinking to issues including policing, criminal law and procedure, documentation, and legal code for law enforcement. Graduates value the ability to effectively communicate in a variety of situations in the workplace and in their communities. Upon completing this program, passing a physical fitness test, and completing additional required practical skills coursework, graduates will be eligible to take the Minnesota Peace Officer licensing exam.

Typical Career Paths

- Police Officer
- Deputy Sheriff
- State Trooper
- Transportation Security Screener
- Security Officer
- Conservation Officer

Additional Information

The Law Enforcement Academic Certificate is only offered in Minnesota.

This program is not designed to prepare graduates for any state-issued professional license or certification.

The Law Enforcement Academic Certificate provides academic coursework required by the Minnesota Peace Officer Standards and Training Board (MN POST) for persons who seek employment in Minnesota as a peace officer. Additional coursework may be necessary before becoming eligible to sit for the MN Peace Officer Licensing Exam. Graduates of this program will need to successfully complete additional training, practical/skills, and fitness standards before becoming eligible to sit for the MN Peace Officer Licensing Exam. Graduates of this program have NOT met all MN POST requirements for employment in Minnesota as a peace officer. Graduates will need to complete skills training as part of another Rasmussen University part of American Public University System ("Rasmussen") Law Enforcement program or at another institution to be eligible to sit for the MN Peace Officer Licensing Exam.

Acceptance Requirements

Admission into the Law Enforcement Academic Certificate program requires applicants to have earned an Associate's or Bachelor's degree (including General Education courses equivalent to those in the Law Enforcement AAS) from a regionally accredited institution. Applicants are also required to interview with an Admissions Representative and complete a Rasmussen placement test as part of the admissions process.

Eligibility for admission to the Law Enforcement programs requires completion of the following steps:

1. Applicants must achieve a score on the University Entrance Placement examination acceptable for admission into the University at a level that does not require Developmental Education coursework. Alternatively, the applicant must provide a college transcript indicating a grade of C- or higher in college-level English and/or Mathematics.
2. Applicant and Admissions Representative to complete the following:
   a. Information session
   b. Certified driving record documentation
   c. Criminal history record documentation
   d. Two-page written autobiography
   e. Health physical
   f. Psychological evaluation
3. Once the applicant file is complete, the Admissions Representative may schedule a face-to-face interview between the applicant and Program Coordinator/Director. Applicants must then:
   a. Complete an application.
   b. Provide official college transcripts. Official transcripts must be received by the University no later than the sixth business day of the first quarter of enrollment in a Law Enforcement program.
   c. Successfully pass a criminal background check through Rasmussen's chosen third-party vender and also submit to a Minnesota Bureau of Criminal Apprehension background check.
   d. Complete any additional program-specific requirements specified at the time of enrollment.

Upon completing the application process, the completed files will be reviewed by the acceptance committee. Students accepted into their program will receive written communication from the University. Applicants must also attend programmatic orientation as well as general orientation or risk being removed from the cohort.

Medical Administrative Assistant

Certificate

Fully online program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program understand the administrative procedures of medical offices in a variety of healthcare settings. They know medical terminology, anatomy, pathology, and basic concepts of administrative procedures and health information management. Graduates can perform medical records management, scheduling, insurance verification and billing, and general medical office administrative procedures. They value the ability to impact the patient experience through effective communication, maintaining patient confidentiality, and ethical and professional behavior in the healthcare environment.

Typical Career Paths

- Medical Administrative Assistant/Secretary
- Medical Coder/Biller
- Medical Receptionist
- Health Unit Coordinator

Additional Information

This program is not designed to prepare graduates for any state-issued professional license or certification and has not been approved by any state professional licensing agency.

In addition to meeting all other acceptance requirements, applicants must successfully pass a background check through Rasmussen University part of American Public University System ("Rasmussen")'s chosen third-party vendor. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Medical Billing and Coding

Certificate

Fully online program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program are prepared as entry-level professionals in revenue cycle functions, including medical coding and billing, data entry, patient access, insurance reimbursement, and compliance with health information privacy, security, and reporting requirements. Students know how to code healthcare data using ICD and CPT coding principles and understand how these skills contribute to other areas in the healthcare facility. They learn to navigate electronic, paper, and hybrid health records and obtain the information necessary to correctly code medical information and perform billing functions. They know medical terminology, anatomy, pathophysiology and pharmacology, basic computer skills, and the use of industry-relevant medical coding software. Graduates value the importance of confidentiality of patient information, effective communication, teamwork, and ethical and professional behavior. They are prepared to work in a variety of healthcare-related settings, including hospitals, physician practices, insurance companies, billing companies, government agencies, long-term care, home health, rehabilitation, behavioral health, and skilled nursing facilities.

Typical Career Paths

- Medical Biller
- Medical Coder
- Medical Insurance Claims Clerk / Specialist
- Medical Collections Specialist
- Patient Services Representative / Navigator
- Patient Access Representative
- Patient Registrar
- Medical Records Clerk

Additional Information

This program is not designed to prepare graduates for any state-issued professional license or certification. Graduates of this program may take the Certified Coding Associate (CCA®) certification exam offered by the American Health Information Management Association (AHIMA®). AHIMA® requires only a high school diploma (or equivalent) to sit for the CCA® exam but recommends completion of a coding training program or six months of coding experience. Further details are available at https://www.ahima.org/certification/CCA.

In addition to meeting all other admissions requirements, applicants must successfully pass a background check through Rasmussen University part of American Public University System ("Rasmussen")'s chosen third-party vendor. An additional background check may also be required during active enrollment prior to practicum or clinical placement depending on site requirements. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Network Support

Certificate

Fully online program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program will be able to explain the basics of information technology, including systems analysis, network analysis, and routing. Courses are project-based and simulate real-world experience with relevant applications and hands-on labs. Graduates will understand how to troubleshoot computer and network problems with server, desktop, laptop, mobile devices, and other computing technologies. Graduates will be prepared to provide quality customer and end-user technical support while employing resolution strategies and industry best practices. Graduates understand the importance of lifelong learning, transferable skills, and staying relevant with emerging technology and trends. This program is aligned to industry relevant skills and certifications that are sought most by employers. All coursework completed in this certificate program would apply to the Rasmussen University part of American Public University System ("Rasmussen") Network Systems Administration Associate Degree program.

Typical Career Paths

- Network Administrator
- Systems/Network Analyst
- Information Security Specialist
- Network Technician
- Network and Operations Support Specialist

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen does not pre-screen for enrollment in this program. Paralegal

Certificate

Fully online program

Objective

Graduates of this program are prepared for various careers within the field of law. They will be able to carry out key paralegal functions and responsibilities encompassing research, writing, communication, legal analysis, office management, and preparation of legal documents on various areas of law. They can provide services in all areas of the legal system, such as courts, law firms, and government agencies under the supervision of an attorney. Graduates are able to ethically communicate and interact with professionals and clients on all levels with a forward-thinking, interdisciplinary approach that utilizes emerging technology. Graduates value written and interpersonal

communication, critical thinking and problem solving, information and financial literacy, and the significance of diversity awareness skills in academic and workplace situations.

Typical Career Paths

- Paralegal
- Legal Secretary
- Legal Assistant
- Court Administrative Assistant
- Court Clerk
- File Clerk

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen University part of American Public University System ("Rasmussen") does not pre-screen for enrollment in this program. Any prospective student must consider their history, lifestyle and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field.

Additional Information

This program is not designed to prepare graduates for any professional certifications or state-issued licenses.

Acceptance Requirements

Admission into the Paralegal Certificate program requires candidates to have earned an associate's degree or higher from an accredited institution of higher learning as recognized by the U.S. Department of Education or the Council for Higher Education Accreditation (CHEA). To be deemed eligible for consideration for admission, entrants must provide an official or unofficial transcript from the institution that awarded the degree for transcript evaluation. Official transcripts must be received by the University no later than the sixth business day of the first quarter of enrollment in the Paralegal Certificate program in order to be accepted into the program.

Pharmacy Technician

Certificate

Fully online program[1]

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program understand the theory of pharmacy practice and are able to perform pharmacy tasks including receiving, interpreting, entering, and filling prescriptions. Graduates have been trained to use software programs to manage and process medications, and to understand medical terminology, medical law and ethics, patient confidentiality, and pharmacy math. They value honesty and integrity, feel compassion for patients, and are able to effectively communicate in a variety of situations.

Typical Career Paths

- Retail Pharmacy
- Clinical Pharmacy

Additional Information

The Pharmacy Technician Certificate and Healthcare Associate's Degree – Pharmacy Technician Specialization meets or exceeds the educational requirements for professional licensure or certification in the states as displayed below. Not all states require licensure or certification for this profession. "Meets" means that the program meets the educational requirements for professional licensure or certification or that there is no license or certification. "Does Not Meet" means that the programs do not meet the educational requirements for professional licensure or certification and prospective students located in these states cannot enroll in these programs. "Undetermined" means that Rasmussen University part of American Public University System ("Rasmussen") makes no determination whether this program meets the educational requirements for professional licensure and prospective students located in these states cannot enroll in this program.

- Meets: AK, AL, AR, AZ, CA, CO, CT, DC, DE, FL, GA, HI, IA, ID, IL, IN, KS, KY, LA, MD, ME, MI, MN, MO, MS, MT, NC, NE, NH, NJ, NM, NY, OK, OR, PA, RI, SC, SD, TN, TX, VT, WI, WY
- Does Not Meet: MA, ND, NV, OH, UT, VA, WA, WV
- Undetermined: American Samoa, Guam, Northern Marianas Islands, Puerto Rico, U.S. Virgin Islands

Each state determines its own requirements for licensure or certification as a pharmacy technician. In many states, the minimum educational requirement is a high school diploma or equivalent, but employers may value educational attainment beyond the high school level. Other eligibility requirements may apply, including experience working in a pharmacy and passing a board-approved licensure examination. Please check with the board of pharmacy or equivalent agency in your state for further details as requirements may change at any time.

Any course with a practicum component at a hospital or clinical site may require the student to complete the full three-injection series of the Hepatitis B immunization and all other program-required immunizations prior to beginning the experience at the site.

The Pharmacy Technician Certificate is a Pharmacy Technician Certification Board (PTCB)-Recognized Education/Training program for technicians seeking to earn their PTCB Certified Pharmacy Technician (CPhT) credential. Pharmacy Technician students convicted of non-drug-related felonies may not be eligible to sit for the Pharmacy Technician Certification Board (PTCB) exam. Pharmacy Technician students convicted of drug- or pharmacy-related felonies are not eligible to sit for the PTCB exam. Other requirements apply; graduation from this program does not guarantee qualification for the CPhT credential.

In addition to meeting all other acceptance requirements, applicants must successfully pass a background check through Rasmussen's chosen third-party vendor. An additional background check may also be required during active enrollment prior to practicum or clinical placement depending on site requirements. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Early Childhood Education

Diploma

Fully online program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program have acquired the knowledge and skills to work with young children (birth through age 8) and their families. Graduates will be equipped to support children's learning in a variety of entry-level roles and settings. This program contains coursework aligned with the high-quality standards of the National Association for the Education of Young Children (NAEYC) and the Council for Professional Recognition (Child Development Associate (CDA) Credential).

Typical Career Paths

- Early Childhood Teacher (in private childcare settings)
- Teacher's Assistant
- Early Childhood Special Education Assistant

Careers Disclosure: The Early Childhood Education programs at Rasmussen University part of American Public University System ("Rasmussen") are not designed to meet, and do not meet, the educational requirements for licensure to teach in public preschools, or kindergarten, elementary, or secondary schools in any state. A bachelor's degree from a state-approved college or university and a state teaching license are typically required to work as a teacher in a public school, and in private school settings. The Rasmussen Early Childhood Education programs are not approved by any state agency that licenses teachers. States, municipalities, districts, or individual schools may have more stringent licensure requirements and other standards. Childcare facilities and the states in which they are located establish qualifications for staff that work with children, and often implement guidelines regarding age, education, experience, background, and professional development. Before enrolling, it is important to understand all of the licensure eligibility standards for a desired career by consulting the appropriate state and school/facility requirements.

The Child Development Associate (CDA) Credential from the Council for Professional Recognition may be required for some career opportunities. Rasmussen partners with the Council for Professional Recognition, and its Early Childhood Education Certificate program contains the following courses, which provide the educational prerequisites for the CDA Credential: **EEC1202** Early Childhood Education

Curriculum and Instruction; **EEC1700** Foundations of Child Development; and **EEC1735** Health, Safety, and Nutrition/CDA Application. Additional CDA Credential eligibility requirements apply. Please consult the CDA eligibility requirements of the Council for Professional Recognition for further details.

Additional Information

This program has not been approved by any state professional licensing body, and this program is not intended to lead to any state - issued professional license. For further information on professional licensing requirements, please contact the appropriate board or agency in your state of residence.

The Early Childhood Education programs contain coursework aligned with the requirements for the Gateways Credentials, which are awarded and recognized by the Illinois Department of Human Services (IDHS) Bureau of Child Care and Development. Other eligibility requirements apply; please verify your eligibility against all Gateways Credentials requirements.

In addition to meeting all other acceptance requirements, applicants must successfully pass a background check through Rasmussen's chosen third-party vendor. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Medical Assisting

Diploma

This program contains online, residential and blended courses

Offered:

- In Illinois at the Aurora/Naperville, Rockford, and Romeoville/Joliet campuses
- In Florida at the Central Pasco, Fort Myers, Ocala, and Tampa/Brandon campuses
- In Minnesota at the Bloomington, Eagan, Hennepin/Anoka, and Mankato campuses

Knowledge Credit Self-Directed Assessment Available

Objective

The objectives of this program are to prepare students to become valuable members of a healthcare team by supporting and assisting providers in delivering effective and efficient quality healthcare services, and to prepare students who are proficient in cognitive (knowledge), psychomotor (skills), and affective (behavioral) learning behaviors for entry-level medical assistant positions. Graduates of the program will value critical thinking, effective communication, diversity awareness skills, and medical ethics as they pertain to the medical assisting career.

Typical Career Paths

- Medical Assistant
- Medical Office Administrative Assistant

Additional Information

The Medical Assisting Diploma program at the Central Pasco, Fort Myers, Ocala, and Tampa/Brandon campuses in Florida; the Aurora/Naperville (with an ABHES approved separate education center in Mokena/Tinley Park), Rockford, and Romeoville/Joliet campuses in Illinois; and the Bloomington, Eagan, Hennepin/Anoka, and Mankato campuses in Minnesota; is accredited by the Accrediting Bureau of Health Education Schools (ABHES). Accrediting Bureau of Health Education Schools, 6116 Executive Blvd., Suite 730, North Bethesda, MD 20852, (301) 291-7550.

Graduates of the Medical Assisting Diploma program offered at campuses listed in the ABHES accreditation statement above meet the educational requirements to sit for the Certified Medical Assistant (CMA) certification through the Certifying Board of the American Association of Medical Assistants (AAMA). Graduates of the Medical Assisting Diploma meet the educational requirements to sit for the Registered Medical Assistant (RMA) certification awarded by the American Medical Technologists (AMT). The Medical Assisting Diploma is not designed to prepare graduates for any other professional certifications or licenses.

Each state determines its own requirements for licensure or certification as a medical assistant. Not all states require licensure or certification for this profession. In many states, the minimum educational requirement is a high school diploma or equivalent, but employers may value educational attainment beyond the high school level. Other eligibility requirements may apply, including experience working in an allied health setting. For states listed as “Meets” below, the program meets the educational requirements for professional licensure or certification or there is no license or certification. For states listed as “Undetermined” below, Rasmussen University part of American Public University System ("Rasmussen") makes no determination whether this program meets the educational requirements for professional licensure and prospective students located in these states cannot enroll in this program. Other licensure eligibility requirements may apply; please verify your eligibility against applicable rules, which may change at any time.

- Meets: MN, WI, ND, SD, IA, FL, GA, AL, IL, IN, KY, MO
- Undetermined: AK, AR, AZ, CA, CO, CT, DC, DE, HI, ID, KS, LA, MA, MD, ME, MI, MS, MT, NC, NE, NH, NJ, NM, NV, NY, OH, OK, OR, PA, RI, SC, TN, TX, UT, VA, VT, WA, WV, WY, Puerto Rico, American Samoa, Guam, Northern Marianas Islands, U.S. Virgin Islands

Each state determines its own requirements for licensure or certification as a medical assistant. In many states, the minimum educational requirement is a high school diploma or equivalent, but employers may value educational attainment beyond the high school level. Other eligibility requirements may apply, including experience working in an allied health setting. Please check with state agencies in your state for further details as requirements may change at any time.

All Medical Assisting students are required to attend the Rasmussen Externship meeting conducted by the Program Coordinator as well as a site orientation (if required by the site) prior to being eligible to begin the externship.

This program requires specific immunizations prior to professional practice experience. Medical Assisting students must receive the first injection of the Hepatitis B immunization series by the end of week two in the Fundamentals in Clinical Techniques course. Prior to the student beginning their externship, the full three-injection series of the Hepatitis B immunization and all other program required immunizations must be completed.

Medical Assisting students must successfully complete all Medical Assisting competencies before they will be eligible for graduation.

This program contains online, residential and blended courses.

Acceptance Requirements

Applicants to the Medical Assisting Diploma program must have passed at least 8 credits or more of designated coursework applicable to the Medical Assisting Diploma program, prior to acceptance to the Medical Assisting Diploma program. The credits may either be transferred to the Medical Assisting Diploma program, following the Rasmussen transfer policy, or be completed at Rasmussen. Students meeting all other acceptance requirements and coming from an employer based medical assisting apprenticeship program may be exempt from the eight-credit coursework requirement.

At the end of the quarter in which the student has passed 8 credits or more of designated coursework and meets all the requirements of Satisfactory Academic Progress in the most recently attended program of enrollment, the student may request to transfer to the Medical Assisting Diploma program. All Medical Assisting Diploma acceptance requirements must be met to transfer. The student's Academic Advisor will assist the student in completing the program transfer.

In addition to meeting all other acceptance requirements, Florida and Illinois campus applicants must successfully pass a background check through Rasmussen's chosen third-party vendor. In addition to meeting all other acceptance requirements, Minnesota campus applicants at every campus except the Hennepin/Anoka campus must successfully pass a background check through the Minnesota Department of Human Services. In addition to meeting all other acceptance requirements, Hennepin/Anoka, MN, campus applicants to this program must successfully pass two background checks—one through Rasmussen's chosen third-party vendor and one through the Minnesota Department of Human Services. An additional background check may also be required during active enrollment prior to practicum or clinical placement depending on site requirements. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Developmental Education Courses

Code	Title	Quarter Credits
B080	Reading and Writing Strategies	4
B087	Practical Math	4

Developmental Education courses, when required, do not count toward total program credits, and are not calculated in GPA. Students must demonstrate mastery of the subject matter in Developmental Education courses through a Rasmussen entrance placement exam, approved exemption based on previously completed coursework, or by passing Developmental Education courses.

Practical Nursing

Diploma

Offered in Florida at the Central Pasco, Fort Myers, Ocala[1], and Tampa/Brandon campuses

Knowledge Credit Self-Directed Assessment available

Objective

The Practical Nursing program at Rasmussen University part of American Public University System ("Rasmussen") prepares graduates to provide safe, ethical, holistic, and compassionate client-centered care for diverse individuals. Integrated authentic learning experiences include the application of knowledge within the appropriate scope of practice. Students experience innovative curriculum which promotes lifelong learning through seamless academic progression, engaging care of self, and developing a spirit of inquiry. The contemporary, outcomes-based, laddered curricular framework aligns to the Quality and Safety Education for Nursing (QSEN) Competencies and the National League for Nursing (NLN) Education Competencies. Graduates are academically prepared for the National Council of State Boards of Nursing NCLEX-PN© examination.

Typical Career Paths

- Hospitals
- Long-Term Care Facilities
- Assisted Living Centers
- Rehabilitation Centers
- Outpatient/Ambulatory Care Centers
- Home Health Care Services
- Clinics
- Physician’s Offices

Program Accreditation

The Practical Nursing program at Rasmussen University part of American Public University System at the:

- Central Pasco campus, located in Odessa, Florida, is accredited by the ACEN. The most recent accreditation decision made by the ACEN Board of Commissioners for this Practical Nursing program is Continuing Accreditation.

Accreditation Commission for Education in Nursing (ACEN), 3390 Peachtree Road NE, Suite 1400, Atlanta, GA 30326, 404-975-5000. View the public information disclosed by the ACEN regarding this program at https://www.acenursing.org/search-programs.

Additional Information

The Practical Nursing Diploma contains both online and residential courses and is designed to meet the educational requirement to apply for licensure as a Licensed Practical Nurse (LPN) in Florida. While this program is only offered at select campuses, it has been determined that this program meets the educational requirements for licensure as an LPN or equivalent in additional states as displayed below. “Meets” means that the program meets the educational requirements for professional licensure. “Undetermined” means that Rasmussen makes no determination whether this program meets the educational requirements for professional licensure and prospective students located in these states cannot enroll in this program. Other licensure eligibility requirements may apply; please verify your eligibility against applicable rules, which may change at any time.

- Meets: FL, MN, ND, GA, IA, SD, WI
- Undetermined: AK, AL, AR, AZ, CA, CO, CT, DC, DE, HI, ID, IL, IN, KS, KY, LA, MA, MD, ME, MI, MO, MS, MT, NC, NE, NH, NJ, NM, NV, NY, OH, OK, OR, PA, RI, SC, TN, TX, UT, VA, VT, WA, WV, WY, Puerto Rico, American Samoa, Guam, Northern Marianas Islands, U.S. Virgin Islands

Applicants to this program must meet program-specific admissions requirements, in addition to all general Rasmussen admissions requirements. Please see the application procedures for this program under Academic Information and University Policies.

Students enrolled in this program who fail or withdraw from a core Nursing course must successfully repeat that same course in the next quarter the course is offered in order to progress in this program. Additionally, in order to take a course that lists a prerequisite, the student must have successfully completed the prerequisite course prior to registering for the post-requisite course. A student who drops, withdraws, or fails a prerequisite course will be withdrawn from any future courses that classify that course as a prerequisite; for additional information, see the Course Descriptions section.

To graduate from this program, students must complete all required NUR and PRN coursework with a grade of C or better, achieve all required skill competencies, and satisfactorily complete all required clinical learning experiences.

Acceptance Requirements

Entrants must complete the following steps in order to be deemed eligible for admission:

1. Applicants pursuing admittance into the Practical Nursing program must meet one of the following requirements to be deemed eligible for Admission:
   a. Achieve a score on the School of Nursing and School of Health Sciences Entrance Exam acceptable for admission:
      i. HESI® Admission Assessment – A Cumulative Score of 65% or higher. The Cumulative Score must include Reading Comprehension, Vocabulary & General Knowledge, Basic Math Skills, and Anatomy & Physiology exams, or
      ii. TEAS Admission Assessment – A Total Score of 55% or higher.
   b. ACT score of 18 or higher, completed within five years.
   c. SAT score of 980 or higher, completed within five years.
   d. Conferred bachelor’s degree or higher with a minimum GPA of 2.25 from a United States (U.S.) accredited institution of higher learning as recognized by the U.S. Department of Education or by the Council for Higher Education Accreditation (CHEA). The official transcript showing the conferred degree must be received by the University no later than the sixth business day of the first quarter of enrollment, or the student will be withdrawn.

2. In addition to the Application, Enrollment and Acceptance Requirements, entrants who have successfully completed the School of Nursing Entrance Exam must complete the following programmatic specific Acceptance Requirements:
   - Health physical and proof of immunizations in accordance with the School of Nursing Student Handbook
   - Criminal background screening
   - The entrant will be required to have current Basic Life Saving and Cardiopulmonary Resuscitation Certification with Defibrillator. A valid certification is defined in the School of Nursing Undergraduate Student Handbook.
   - The School of Nursing Orientation.
   - Any additional program-specific requirements as specified at the time of enrollment.
   - Entrants with prior college credits will receive a transcript evaluation during the admissions process.

Entrants will receive written communication from the University confirming acceptance once all acceptance requirements have been met.

In addition to meeting all other acceptance requirements, Florida campus applicants must successfully pass two background checks: one through Rasmussen's chosen third-party vendor, and one meeting the Florida statutory definition of a Level 2 background check. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Accounting

Associate of Applied Science Degree

Fully online program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this degree program learn to manage accounts receivable and accounts payable. They learn to prepare tax returns and financial statements and use computer applications proficiently. They know financial and managerial accounting concepts as related to the business environment. Graduates value written and interpersonal communication, critical thinking and problem solving, information and financial literacy, and the significance of diversity awareness skills in academic and workplace situations.

Typical Career Paths

- Accounting Clerk
- Auditing Clerk
- Bookkeeper
- Bank Teller
- Account Management Trainee

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen University part of American Public University System ("Rasmussen") does not pre-screen for enrollment in this program. Any prospective student must consider their history, lifestyle and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field.

Careers Disclosure: This program does not meet the educational requirements for licensure as a Certified Public Accountant (CPA) in any state.

Additional Information

This program is not designed to prepare graduates for any state-issued professional license or certification. This Accounting program does not meet all educational prerequisites for licensure as a Certified Public Accountant (CPA) in any state. For further information on professional licensing requirements, please contact the appropriate board or agency in your state of residence.

Criminal Justice

Associate of Applied Science Degree

Fully online program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program know the history and development of the criminal justice system and its effect on society. They understand how the legal process works from law enforcement to the courts and through the corrections system. They can apply critical thinking to issues in criminal justice such as law enforcement, corrections, security, juvenile justice, and domestic violence. Graduates value written and interpersonal communication, critical thinking and problem solving, information and financial literacy, and the significance of diversity awareness skills in academic and workplace situations.

Typical Career Paths

- Court Clerk
- Security Officer
- Corrections / Law Enforcement careers in some jurisdictions

Additional training and other requirements may apply to careers in this field. Please read the Careers Disclosure.

Careers Disclosure: Each federal, state, or local agency determines its own requirements for licensure of law enforcement careers and may change these requirements at any time. Licensed law enforcement careers include police officer, corrections officer, parole officer, crime scene investigator, and other positions. Minimum educational standards for licensure in these careers range from a high school diploma to a college degree and can vary widely (even within the same state). Some agencies require graduation from an agency-approved academic program or training academy. This program is NOT a training academy or approved program with any federal, state, or local agency. Other non-academic requirements are also required for licensure, which may include additional training, experience,

graduation from an academy, physical fitness standards, background checks (certain results are often disqualifying), and other requirements. Before enrolling, it is important to understand whether licensure is required for a desired career by consulting the appropriate federal, state, or local agency requirements.

Additional Information

This program is not designed to meet the educational requirements for professional licensure or certification in any state. For example, this program does not meet the standards established by the Minnesota Peace Officer Standards and Training (POST) Board for persons who seek employment as a peace officer in Minnesota. For further information on professional licensing requirements, please contact the appropriate board or agency in your state of residence. Additional education, training, experience, and/or other eligibility criteria may apply.

In addition to meeting all other acceptance requirements, applicants must successfully pass a background check through Rasmussen University part of American Public University System ("Rasmussen")'s chosen third-party vendor. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Early Childhood Education

Associate of Applied Science Degree

Fully online program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program know child development and apply best practices to their work in the early childhood field. They understand developmentally appropriate practices, positive guidance, partnering with parents, and observation and assessment of young children. They can plan and implement activities, materials and interactions that promote children's healthy development while supporting a safe environment. Graduates value written and interpersonal communication, critical thinking and problem solving, information and financial literacy, and the significance of diversity awareness skills in academic and workplace situations. Students are prepared to apply for the Child Development Associate (CDA) credential from the Council for Professional Recognition.

Typical Career Paths

- Early Childhood Teacher (in private childcare settings)
- Teacher's Assistant
- Early Childhood Special Education Assistant
- Head Start Teacher

Careers Disclosure: The Early Childhood Education programs at Rasmussen University part of American Public University System ("Rasmussen") are not designed to meet, and do not meet, the educational requirements for licensure to teach in public preschools, or kindergarten, elementary, or secondary schools in any state. A bachelor's degree from a state-approved college or university and a state teaching license are typically required to work as a teacher in a public school, and in private school settings. The Rasmussen Early Childhood Education programs are not approved by any state agency that licenses teachers. States, municipalities, districts, or individual schools may have more stringent licensure requirements and other standards. Childcare facilities and the states in which they are located

establish qualifications for staff that work with children, and often implement guidelines regarding age, education, experience, background, and professional development. Before enrolling, it is important to understand all of the licensure eligibility standards for a desired career by consulting the appropriate state and school/facility requirements.

The Child Development Associate (CDA) Credential from the Council for Professional Recognition may be required for some career opportunities. Rasmussen partners with the Council for Professional Recognition, and its Early Childhood Education Certificate program contains the following courses, which provide the educational prerequisites for the CDA Credential: **EEC1202** Early Childhood Education Curriculum and Instruction; **EEC1700** Foundations of Child Development; and **EEC1735** Health, Safety, and Nutrition/CDA Application. Additional CDA Credential eligibility requirements apply. Please consult the CDA eligibility requirements of the Council for Professional Recognition for further details.

Additional Information

This program has not been approved by any state professional licensing body, and this program is not intended to lead to any state - issued professional license. For further information on professional licensing requirements, please contact the appropriate board or agency in your state of residence.

The Early Childhood Education programs contain coursework aligned with the requirements for the Gateways Credentials, which are awarded and recognized by the Illinois Department of Human Services (IDHS) Bureau of Child Care and Development. Other eligibility requirements apply; please verify your eligibility against all Gateways Credentials requirements.

In addition to meeting all other acceptance requirements, applicants must successfully pass a background check through Rasmussen's chosen third-party vendor. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Graphic Design

Associate of Applied Science Degree

Fully online program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program will learn the skills and knowledge to analyze and create unique visual solutions to real world communication problems. Emulating real-world experiences, students will explore key elements of graphic design, including color theory, typography, composition, and image creation and editing. Graduates will apply basic design principles and theories using best practices in creating unique and effective visual content. The program curriculum is aligned with industry-standard processes and software tools, providing our students with the foundational skills for success in their design career. Graduates of this program will be prepared to work in a variety of industries, including specialized design services, marketing and advertising, employment services, print and publication design, and cable, television, and film production.

Typical Career Paths

- Graphic Designer
- Visual Designer
- Graphic Artist
- Production Artist
- Junior Graphic Designer
- Design Specialist
- Visual Information Specialist
- Graphic Specialist
- Creative Graphics Designer
- Digital Designer
- Print Designer
- Motion Graphic Designer
- Visual Media Producer
- Marketing Coordinator/Specialist
- Web Designer
- Video Editor

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen University part of American Public University System ("Rasmussen") does not pre-screen for enrollment in this program. Any prospective student must consider their history, lifestyle and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field.

Health Information Technician

Associate of Applied Science Degree

Fully online program[1]

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program understand the requirements of a health information professional as a member of the healthcare team, within a variety of healthcare-related settings and organizations. Students analyze and apply technologies, including electronic health record applications and core health information competencies related to understanding and utilizing health information throughout its life cycle. Emphasis is placed on data structure and content; healthcare statistical preparation; data analytics, use, and reporting; revenue cycle management; medical coding and billing, information protection; privacy, confidentiality, and security; health law; and compliance, technology, and information interoperability. Graduates know fundamental management, leadership, and teamwork skills and can demonstrate ethical professional behavior in a workplace setting through simulated activities and during professional practice experiences. Graduates have computer application skills, math statistics foundation, basic human anatomy, medical terminology, and pathophysiology and pharmacology as a foundation to the competencies needed by a health information professional. Graduates value written and interpersonal communication, critical thinking and problem solving, diversity awareness skills, and information and digital literacy. They are prepared to work in a variety of healthcare-related settings, including hospitals, physician practices, insurance companies, billing companies, government agencies, long-term care, home health, rehabilitation, behavioral health, skilled nursing facilities, health information consulting companies, and health information technology vendors.

Typical Career Paths

- Health Information Technician
- Health Information Data Collection and Analysis Specialist
- Medical Coder / Biller-Analyst / Auditor
- Electronic Health Records Specialist
- Compliance Auditor / Specialist
- Patient Care Coordinator
- Release of Information Specialist
- Revenue Cycle Reimbursement Specialist

Program Accreditation

The Health Information Management accreditor of Rasmussen University part of American Public University System is the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM). The University's accreditation for the Associate degree in Health Information Technician has been reaffirmed through 2030. All inquiries about the program's accreditation status should be directed by mail to CAHIIM, 200 East Randolph Street, Suite 5100, Chicago, IL, 60601; by phone at (312) 235-3255; or by email at info@cahiim.org.

Additional Information

Graduates of the CAHIIM-accredited Health Information Technician Associate's Degree program meet the educational requirements to sit for the American Health Information Management Association (AHIMA®) Registered Health Information Technician (RHIT®) certification exam. This program is not designed to prepare graduates for any other professional licenses or certifications.

This program may require specific immunizations prior to professional practice experience.

In addition to meeting all other admissions requirements, applicants must successfully pass a background check through Rasmussen University part of American Public University System ("Rasmussen")'s chosen third-party vendor. An additional background check may

also be required during active enrollment prior to practicum or clinical placement depending on site requirements. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Health Sciences - Healthcare Specialization

THIS PROGRAM IS AVALABLE ONLY IN ILLINOIS

Associate of Applied Science Degree

Fully online program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program know and can apply a combination of real-world technical skills and general education concepts, and have learned to serve as valuable members of a healthcare team. Depending on the career track, graduates may choose from a variety of employment options involving healthcare administration, patient care, or related healthcare situations. Graduates understand and value critical thinking and problem solving, written and interpersonal communication, customer service, diversity awareness skills, and medical ethics, as these concepts relate to the healthcare industry and the community.

Typical Career Paths

- Medical Services Technician
- Medical Registration or Receptionist

Additional Information

This program is not designed to prepare graduates for any state-issued professional license or certification and has not been approved by any state professional licensing agency.

In addition to meeting all other acceptance requirements, applicants must successfully pass a background check through Rasmussen University part of American Public University System ("Rasmussen")'s chosen third-party vendor. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Enrollment Requirements

Students who have a qualifying score on the School of Nursing and School of Health Sciences Entrance Exam are eligible to enroll in this program through a residential campus in Illinois. The minimum qualifying HESI® Admission Assessment Cumulative Score is 55%, and must include Reading Comprehension, Vocabulary & General Knowledge, Basic Math Skills, and Anatomy & Physiology exams. The minimum qualifying TEAS Admission Assessment Total Score is 41.3%. Students who do not have a qualifying HESI® or TEAS score are eligible to enroll in the Healthcare Associate's Degree–Healthcare Administration Specialization program version through Rasmussen University Online, which does not require a School of Nursing and School of Health Sciences Entrance Exam score.

1. Only students intending to transfer into a program with a School of Nursing and School of Health Sciences Entrance Exam entrance requirement, and who have not yet achieved the minimum score required for the intended program, are required to take the E102 Pathways to Patient Care Seminar. Students must attempt the School of Nursing and School of Health Sciences Entrance Exam as a prerequisite to the E102 Pathways to Patient Care Seminar course. The E102 Pathways to Patient Care Seminar must be taken in the student's first or second term of enrollment, and the School of Nursing and School of Health Sciences Entrance Exam must be attempted by the end of the course. Students have one opportunity to attempt E102 Pathways to Patient Care Seminar, regardless of grade earned (SX/UX/UXD/WX). Passing the E102 Pathways to Patient Care Seminar does not guarantee acceptance to any other program, or the ability to program change into another program the subsequent quarter. Acceptance into another program is dependent upon meeting all acceptance requirements of the program.
2. Elective Course requirements will be fulfilled with coursework determined by Rasmussen University as appropriate for the program of enrollment. Course selections are either 4 credit hours or 5 credit hours.

Health Sciences - Medical Assisting Specialization

Associate of Applied Science Degree

This program contains online, residential and blended courses

Offered:

- In Illinois at the Aurora/Naperville, Rockford, and Romeoville/Joliet campuses

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program know and can apply a combination of real-world technical skills and general education concepts, and have learned to serve as valuable members of a healthcare team. Depending on the career track, graduates may choose from a variety of employment options involving healthcare administration, patient care, or related healthcare situations. Graduates understand and value critical thinking and problem solving, written and interpersonal communication, customer service, diversity awareness skills, and medical ethics, as these concepts relate to the healthcare industry and the community.

Typical Career Paths

- Medical Assistant
- Medical Office Administrative Assistant

Additional Information

The Health Sciences Associate's Degree – Medical Assisting Specialization is not intended to prepare graduates for any professional certification, including but not limited to the following: Certified Medical Assistant (CMA) certification through the Certifying Board of the American Association of Medical Assistants (AAMA), Registered Medical Assistant (RMA) certification awarded by the American Medical Technologists (AMT), Certified Clinical Medical Assistant (CCMA) certification from the National Healthcareer Association (NHA), or the National Certified Medical Assistant (NCMA) certification offered through the National Center for Competency Testing (NCCT).

Any course with a practicum component at a hospital or clinical site may require the student to complete the full three-injection series of the Hepatitis B immunization and all other program-required immunizations prior to beginning the experience at the site.

Acceptance Requirements

Current students who are enrolled in the Medical Assisting Diploma program may concurrently enroll in the residential version of the Health Sciences Associate's Degree-Medical Assisting specialization program. Students must successfully complete all diploma program coursework to earn an Associate's Degree with Medical Assisting Specialization.
Students who have graduated from a Medical Assisting Diploma program from an accredited institution, including Rasmussen University part of American Public University System ("Rasmussen"), are eligible to enroll in the fully online version of the Healthcare Associate of Applied Science-Medical Assisting specialization program through Rasmussen University Online.
In addition to meeting all other acceptance requirements, applicants must successfully pass a background check through Rasmussen's chosen third-party vendor. An additional background check may also be required during active enrollment prior to practicum or clinical placement depending on site requirements. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Healthcare - Healthcare Administration Specialization

Associate of Science Degree in Florida

Associate of Applied Science Degree in Kansas, Minnesota and North Dakota, and when enrolled through Rasmussen University Online

This program is not available in Illinois

Fully online program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program know and can apply a combination of real-world technical skills and general education concepts, and have learned to serve as valuable members of a healthcare team. Depending on the career track, graduates may choose from a variety of employment options involving healthcare administration, patient care, or related healthcare situations. Graduates understand and value critical thinking and problem solving, written and interpersonal communication, customer service, diversity awareness skills, and medical ethics, as these concepts relate to the healthcare industry and the community.

Typical Career Paths

- Medical Office (Assistant) Manager, Administrator, or Coordinator
- Medical Secretary, Administrative Assistant, or Receptionist

- Patient Care Manager

Additional Information

This program is not designed to prepare graduates for any state-issued professional license or certification and has not been approved by any state professional licensing agency.
In addition to meeting all other acceptance requirements, applicants must successfully pass a background check through Rasmussen University part of American Public University System ("Rasmussen")'s chosen third-party vendor. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Enrollment Requirements

Students are eligible to enroll in this program through a residential campus in Florida, Kansas, Minnesota, and North Dakota when one of the following is met:

1. Student has a qualifying score on the School of Nursing and School of Health Sciences Entrance Exam. A minimum qualifying HESI® Admission Assessment Cumulative Score of 55% is required and must include Reading Comprehension, Vocabulary & General Knowledge, Basic Math Skills, and Anatomy & Physiology exams. The minimum qualifying TEAS Admission Assessment Total Score is 41.3%.
2. Student is exempt from the School of Nursing and School of Health Sciences Entrance Exam based on already having earned a conferred bachelor's degree or higher with a minimum GPA of 2.25 from a United States-accredited institution of higher learning. This option is only available when a Nursing cohort is full and the student can take General Education courses while enrolled in this program that will apply to their desired Nursing program. The official transcript showing the conferred degree must be received by the University no later than the sixth business day of the first quarter of enrollment, or the student will be withdrawn.

Students who do not meet one of the above requirements are eligible to enroll in the Healthcare Associate's Degree–Healthcare Administration Specialization program version through Rasmussen University Online, which does not require a School of Nursing and School of Health Sciences Entrance Exam score.

Fully online program

Offered:

- In Florida at the Central Pasco, Fort Myers, Ocala, and Tampa/Brandon campuses
- In Minnesota at the Bloomington, Eagan, Hennepin/Anoka, and Mankato campuses

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program know and can apply a combination of real-world technical skills and general education concepts, and have learned to serve as valuable members of a healthcare team. Depending on the career track, graduates may choose from a variety of employment options involving healthcare administration, patient care, or related healthcare situations. Graduates understand and value critical thinking and problem solving, written and interpersonal communication, customer service, diversity awareness skills, and medical ethics, as these concepts relate to the healthcare industry and the community.

Typical Career Paths

- Medical Assistant
- Medical Office Administrative Assistant

Additional Information

The Healthcare Associate’s Degree – Medical Assisting Specialization is not intended to prepare graduates for any professional certification, including but not limited to the following: Certified Medical Assistant (CMA) certification through the Certifying Board of the American Association of Medical Assistants (AAMA), Registered Medical Assistant (RMA) certification awarded by the American Medical Technologists (AMT), Certified Clinical Medical Assistant (CCMA) certification from the National Healthcareer Association (NHA), or the National Certified Medical Assistant (NCMA) certification offered through the National Center for Competency Testing (NCCT).

Acceptance Requirements

Current students who are enrolled in the Medical Assisting Diploma program may concurrently enroll in the residential version of the Healthcare Associate’s Degree Medical Assisting specialization program. Students must successfully complete all diploma program coursework to earn an Associate’s Degree with Medical Assisting Specialization.

Students who have graduated from a Medical Assisting Diploma program from an accredited institution, including Rasmussen University part of American Public University System ("Rasmussen"), are eligible to enroll in the fully online version of this program through Rasmussen University Online.

In addition to meeting all other acceptance requirements, applicants must successfully pass a background check through Rasmussen’s chosen third-party vendor. An additional background check may also be required during active enrollment prior to practicum or clinical placement depending on site requirements. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Healthcare - Pharmacy Technician Specialization

Associate of Applied Science Degree

Fully online program[1]

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program know and can apply a combination of real-world technical skills and general education concepts, and have learned to serve as valuable members of a healthcare team. Depending on the career track, graduates may choose from a variety of employment options involving healthcare administration, patient care, or related healthcare situations. Graduates understand and value critical thinking and problem solving, written and interpersonal communication, customer service, diversity awareness skills, and medical ethics, as these concepts relate to the healthcare industry and the community.

Typical Career Paths

- Retail Pharmacy
- Clinical Pharmacy

Additional Information

The Pharmacy Technician Certificate and Healthcare Associate's Degree – Pharmacy Technician Specialization meets or exceeds the educational requirements for professional licensure or certification in the states as displayed below. Not all states require licensure or certification for this profession. "Meets" means that the program meets the educational requirements for professional licensure or certification or that there is no license or certification. "Does Not Meet" means that the programs do not meet the educational requirements for professional licensure or certification and prospective students located in these states cannot enroll in these programs. "Undetermined" means that Rasmussen University part of American Public University System ("Rasmussen") makes no determination whether this program meets the educational requirements for professional licensure and prospective students located in these states cannot enroll in this program.

- Meets: AK, AL, AR, AZ, CA, CO, CT, DC, DE, FL, GA, HI, IA, ID, IL, IN, KS, KY, LA, MD, ME, MI, MN, MO, MS, MT, NC, NE, NH, NJ, NM, NY, OK, OR, PA, RI, SC, SD, TN, TX, VT, WI, WY
- Does Not Meet: MA, ND, NV, OH, UT, VA, WA, WV
- Undetermined: American Samoa, Guam, Northern Marianas Islands, Puerto Rico, U.S. Virgin Islands

Each state determines its own requirements for licensure or certification as a pharmacy technician. In many states, the minimum educational requirement is a high school diploma or equivalent, but employers may value educational attainment beyond the high school level. Other eligibility requirements may apply, including experience working in a pharmacy and passing a board-approved licensure examination. Please check with the board of pharmacy or equivalent agency in your state for further details as requirements may change at any time.

Any course with a practicum component at a hospital or clinical site may require the student to complete the full three-injection series of the Hepatitis B immunization and all other program-required immunizations prior to beginning the experience at the site.

The Pharmacy Technician Certificate is a Pharmacy Technician Certification Board (PTCB)-Recognized Education/Training program for technicians seeking to earn their PTCB Certified Pharmacy Technician (CPhT) credential. Pharmacy Technician students convicted of non-drug-related felonies may not be eligible to sit for the Pharmacy Technician Certification Board (PTCB) exam. Pharmacy Technician students convicted of drug- or pharmacy-related felonies are not eligible to sit for the PTCB exam. Other requirements apply; graduation from this program does not guarantee qualification for the CPhT credential.

In addition to meeting all other admissions requirements, applicants must successfully pass a background check through Rasmussen's chosen third-party vendor. An additional background check may also be required during active enrollment prior to practicum or clinical placement depending on site requirements. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they

choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

+Self-directed assessment available; see Self-Directed Assessments for details.

1. Minnesota residents must take PTN2873 Pharmacy Retail Practicum (2 credits) which includes a required on-site experience, instead of PTN2915 Pharmacy Virtual Practicum. Registration as a Pharmacy Technician is required by the Minnesota Board of Pharmacy in order to participate in the practicum experience. Registration must be completed by Week 1 or placement may be delayed. Rasmussen University will provide a one-time reimbursement to students for the registration fee.

Human Resources and Organizational Leadership

Associate of Applied Science Degree

Fully online program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program know fundamental concepts in leadership, human resources, management, marketing, and business ethics. They understand how human resources impact the workplace and can apply critical thinking to issues related to organizations, employment law, compensation, training, and employee development. They can demonstrate management skills including planning and decision-making, organizing, controlling, and leading employees. They can interpret basic financial data and perform basic accounting skills. They can use computer applications for the business environment. Graduates value written and interpersonal communication, critical thinking and problem solving, information and financial literacy, and the significance of diversity awareness skills in academic and workplace situations.

Typical Career Paths

- Human Resource Generalist
- Training and Development Specialist
- Job Analysis/Recruiting Specialist

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen University part of American Public University System ("Rasmussen") does not pre-screen for enrollment in this program. Any prospective student must consider their history, lifestyle and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field.

Additional Information

This program is not designed to prepare graduates for any state-issued professional license or certification and has not been approved by any state professional licensing agency.

Human Services

Associate of Science Degree

Fully online program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program know basic concepts of psychology, sociology, counseling, crisis intervention, case management, community and service networking, assessment, and documentation. They understand how human services work from an individual, organizational, and community perspective. They can apply critical thinking to issues in human services such as education, training and self-development, facilitation of services, advocacy, organizational participation, and community living skills and supports. Graduates value written and interpersonal communication, critical thinking and problem solving, information and financial literacy, and the significance of diversity awareness skills in academic and workplace situations.

Typical Career Paths

- Community Service Assistant
- Social Service Specialist
- Human Service Assistant
- Advocate
- Program Assistant

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen University part of American Public University System ("Rasmussen") does not pre-screen for enrollment in this program. Any prospective student must consider their history, lifestyle and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field.

Careers Disclosure: This program is not designed to meet, and does not meet, the educational requirements for professional licensure as a therapist, counselor, social worker, psychologist, or other similar licensed careers, in any state.

Additional Information

This program is not designed to prepare graduates for any state-issued professional license or certification, and has not been approved by any state professional licensing agency. For further information on professional licensing requirements, please contact the appropriate board or agency in your state of residence.

Information Technology

Associate of Science Degree

Fully online program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program will be able to explain real-world concepts and apply skills related to information technology. Graduates will be prepared to utilize skills related to business environment, communication, collaboration, hardware, software, and networking. Graduates will be able to troubleshoot and resolve issues with desktops, laptops, mobile devices, and other computing technologies. In addition, graduates will be prepared to provide quality customer and end□user technical support while employing resolution strategies and industry best practices. Graduates will provide value to their organization by supporting project management tasks and working as part of a team. Graduates understand the importance of lifelong learning, transferable skills, and staying relevant with emerging technology and trends. This program is aligned to industry relevant skills and certifications that are sought most by employers.

Typical Career Paths

- Deskside Support Technician
- Helpdesk/Service Desk Support Specialist
- Field Service Technician
- End User Support Specialist

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen University part of American Public University System ("Rasmussen") does not pre-screen for enrollment in this program. Any prospective student must consider their history, lifestyle and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field.

Additional Information

The University will reimburse students to sit for up to three recommended certification exams. Reimbursements will be made only once per certification exam. Students are responsible for paying for any additional attempts.

Law Enforcement

Associate of Applied Science Degree

Offered only in Minnesota at the Eagan campus

Residential Law Enforcement skills training courses are at the HERO Training Center

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program know the history and development of the criminal justice system and the role of law enforcement in the system. They understand the legal process from arrest to the courts, and through the corrections system. They understand the policy and practice of traffic enforcement, firearms use, defensive tactics, investigations, and pursuit driving, and can perform skills in each area. Graduates value written and interpersonal communication, critical thinking and problem solving, information and financial literacy, and diversity awareness skills and their significance in academic and workplace situations. Upon completing this program, passing a physical fitness test, and completing additional required first responder training, graduates will be eligible to take the Minnesota Peace Officer Licensing Exam.

Typical Career Paths

- Police Officer
- Deputy Sheriff

- Conservation Officer
- State Trooper
- Alcohol Law Enforcement Agent
- Security Officer

Additional Information

The Law Enforcement Associate’s Degree meets the educational standards established by the Minnesota Peace Officer Standards and Training Board (MN POST) for persons who intend to seek employment in Minnesota as a peace officer. Upon completing this program, passing a physical fitness test, and completing additional required first responder training, graduates will be eligible to take the Minnesota Peace Officer Licensing Exam. The Law Enforcement Associate’s Degree contains both online and residential courses and is designed to lead to law enforcement careers in Minnesota. This program does not meet standards of states other than Minnesota. Additional training and education may be required for licensure in other states. This program is only open to residents of Minnesota, or those willing to sign an attestation of their intent to seek employment in Minnesota as a peace officer.

Students enrolled in this program are required to complete an officially recognized first-aid course in First Responder, Emergency Medical Technician (EMT), or Emergency Medical Responder (EMR). In addition to all other MN POST eligibility requirements, students must provide the Rasmussen University part of American Public University System ("Rasmussen") Law Enforcement POST Coordinator with a copy of their required first-aid certification (e.g., a photocopy of their first responder card) in order to become eligible to sit for the MN Peace Officer Licensing Exam.

Acceptance Requirements

Students may be deemed eligible for Admission to the Law Enforcement program and begin the Skills portion of the program if one of the two requirements below have been met:

1. Applicant is eligible to sit for the Military Reciprocity Examination by the MN POST Board due to prior military law enforcement experience. Applicant is eligible for admission upon receipt of a current signed verification letter sent directly to Rasmussen from the MN POST Board.
2. Rasmussen has received a verification letter from a certified MN POST-approved institution, for which Rasmussen has an articulation agreement. The verification letter must be signed by the school’s PPOE Program Coordinator and indicate that the applicant is eligible to begin the Skills component.

Applicants are required to meet all admission requirements for the Law Enforcement programs.

Eligibility for admission to the Law Enforcement programs requires completion of the following steps:

1. Applicants must achieve a score on the University Entrance Placement examination acceptable for admission into the University at a level that does not require Developmental Education coursework. Alternatively, the applicant must provide a college transcript indicating a grade of C- or higher in college-level English and/or Mathematics.
2. Applicant and Admissions Representative to complete the following:
    1. Information session
    2. Certified driving record documentation
    3. Criminal history record documentation
    4. Two-page written autobiography
    5. Health physical
    6. Psychological evaluation
3. Once the applicant file is complete, the Admissions Representative may schedule a face-to-face interview between the applicant and Program Coordinator/Director. Applicants must then:
    1. Complete an application.

2. Provide official college transcripts. Official transcripts must be received by the University no later than the sixth business day of the first quarter of enrollment in a Law Enforcement program.
3. Successfully pass a criminal background check through Rasmussen's chosen third-party vendor and also submit to a Minnesota Bureau of Criminal Apprehension background check.
4. Complete any additional program-specific requirements specified at the time of enrollment.

Upon completing the application process, the completed files will be reviewed by the acceptance committee. Students accepted into their program will receive written communication from the University. Applicants must also attend programmatic orientation as well as general orientation or risk being removed from the cohort.

Marketing

Associate of Applied Science Degree

Fully online program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program understand fundamental concepts in marketing and business management. They can demonstrate marketing and management skills including planning and decision-making, organizing, controlling, and leading employees. Students will be able to use computer applications for the business environment. Graduates value written and interpersonal communication, critical thinking and problem solving, information and financial literacy, and the significance of diversity awareness skills in academic and workplace situations.

Typical Career Paths

- Marketing Coordinator
- Marketing Specialist
- E-Commerce Specialist

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen University part of American Public University System ("Rasmussen") does not pre-screen for enrollment in this program. Any prospective student must consider their history, lifestyle and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field.

Developmental Education Courses

Code	Title	Quarter Credits
B080	Reading and Writing Strategies	4
B087	Practical Math	4

Developmental Education courses, when required, do not count toward total program credits, and are not calculated in GPA. Students must demonstrate mastery of the subject matter in Developmental Education courses through a Rasmussen entrance placement exam, approved exemption based on previously completed coursework, or by passing Developmental Education courses.

Medical Laboratory Technician

Associate of Applied Science Degree

This program contains online, residential and blended courses

Offered in Minnesota at the Eagan campus only

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program know medical terminology, anatomy, and safety standards and practices. They can operate and maintain equipment in the medical laboratory, collect and analyze specimen samples for diagnosis, and assist members of the healthcare team in delivering service to patients. Graduates value critical thinking and problem solving, written and interpersonal communication, diversity-awareness skills, information and financial literacy, safety and confidentiality of patients and other technicians in the laboratory, and ethical and professional behavior. Students do not have to pass any external certifications or licensure examinations to receive the associate's degree.

Typical Career Paths

- Medical Laboratory Technician

Program Accreditation

Graduation from a campus with programmatic accreditation is a requirement to meet the educational requirements to sit for the American Society for Clinical Pathology (ASCP) Board of Certification exam. The ASCP credential may be required for state professional licensure or certification. Other eligibility requirements may apply to state and national licenses and certifications; please verify your eligibility against applicable rules, which may change at any time.

The Medical Laboratory Technician program at the Eagan campus is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS), 5600 North River Road, Suite 720, Rosemont, IL 60018. Phone: 773-714-8880 Fax: 773-714-8886.

Additional Information

The Medical Laboratory Technician Associate's Degree contains both online and residential courses and is designed to lead to careers in Minnesota and Wisconsin, where there are no state-issued professional licenses or certifications for medical laboratory technicians. While this program is only offered at selected campuses in those states, determinations regarding professional licensure or certification have been made for other states as displayed below. "Meets" means that the program meets the educational requirements for professional licensure or certification or that there is no license or certification. "Undetermined" means that Rasmussen University part of American Public University System ("Rasmussen") makes no determination whether this program meets the educational requirements for professional licensure and prospective students located in these states cannot enroll in this program.

- Meets: MN, IA, ND, SD, WI
- Undetermined: AK, AL, AR, AZ, CA, CO, CT, DC, DE, FL, GA, HI, ID, IL, IN, KS, KY, LA, MA, MD, ME, MI, MO, MS, MT, NC, NE, NH, NJ, NM, NV, NY, OH, OK, OR, PA, RI, SC, TN, TX, UT, VA, VT, WA, WV, WY, Puerto Rico, American Samoa, Guam, Northern Marianas Islands, U.S. Virgin Islands

Applicants to this program must meet program-specific admissions requirements, in addition to all general Rasmussen admissions requirements. Please see the application procedures for this program under Academic Information and University Policies.

This program requires specific immunizations prior to professional practice experience.

Acceptance Requirements

Applicants must complete the following steps to be considered for admission:

1. Applicants pursuing admittance into the Medical Laboratory Technician program must meet one of the following requirements to be deemed eligible for Admission:

    a. Achieve a score on the School of Nursing and School of Health Sciences Entrance Exam acceptable for admission per the School of Nursing and School of Health Sciences Entrance Exam Policy:

    - i) HESI® Admission Assessment, a Cumulative Score of 65% or higher. The Cumulative Score must include Reading Comprehension, Vocabulary & General Knowledge, Basic Math Skills, and Anatomy & Physiology exams, or
    - ii) TEAS Admission Assessment, a Total Score of 48.5% or higher.

b. Conferred associate's degree or higher in a health sciences-related program from a United States (U.S.) accredited institution of higher learning as recognized by the U.S. Department of Education or by the Council for Higher Education Accreditation (CHEA) with a cumulative GPA of 2.0 or higher and awarded within five (5) calendar years of the date the student starts in the program.

c. Completion of at least 20 quarter credits of college-level health sciences, natural sciences or math coursework completed at a United States (U.S.) accredited institution of higher learning as recognized by the U.S. Department of Education or by the Council for Higher Education Accreditation (CHEA) within five (5) calendar years of the date the student starts in the program. One Composition or Communication course may be applied to meet this requirement. A grade of C or higher in each course is required.

   The University must receive official transcripts showing either a conferred degree in a health sciences-related program or completion of a minimum of 20 quarter credits of eligible coursework no later than the sixth business day of the first quarter of enrollment or the student will be withdrawn.

2. Complete the following prior to being deemed eligible for consideration for admission:

- Application and enrollment agreement
- Background screening
- Any additional program specific requirements as specified at the time of enrollment

A health physical may be required and completed within the six months prior to internship/practicum as specified by the clinical facility.
Current students in other programs wishing to transfer into a course of study requiring the admissions standards outlined above will be required to meet one of the acceptance requirements outlined in number one above plus any additional acceptance requirements.
Once the applicant file is complete, the University will schedule an interview between the applicant and Program Coordinator/Director. Students accepted into their program will receive written communication from the University. The University may choose two additional applicants as alternates to join the program if another applicant is deemed ineligible or decides not to begin classes. These two alternates must complete all the necessary steps for admission. Alternates will be guaranteed the opportunity for enrollment into the next cohort provided they remain eligible for admission. Students must attend programmatic orientation as well as general orientation or risk being removed from the cohort.
In addition to meeting all other acceptance requirements, Minnesota campus applicants to this program must successfully pass two background checks - one through Rasmussen's chosen third-party vendor and one through the Minnesota Department of Human Services. An additional background check may also be required during active enrollment prior to practicum or clinical placement depending on site requirements. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Network Systems Administration

Associate of Science Degree

Fully online program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program will be able to explain the basics of information technology, including the networking ecosystem and cyber security. Courses are project-based and simulate real-world experience with relevant applications and hands-on labs. Graduates will understand how to troubleshoot computer and network problems with server, desktop, laptop, mobile devices, and other computing technologies. Graduates will be able to develop a plan for mitigating risk and disaster preparedness related to computers and networks. In addition, graduates will be prepared to provide quality end-user technical support while employing resolution strategies and industry best practices. Graduates understand the importance of lifelong learning, transferable skills, and staying relevant with emerging technology and trends. This program is aligned to industry-relevant skills and certifications that are sought most by employers.

Typical Career Paths

- Network Administrator
- Systems/Network Analyst
- Information Security Specialist
- Network Technician
- Network and Operations Support Specialist

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen University part of American Public University System ("Rasmussen") does not pre-screen for enrollment in this program. Any prospective student must consider their history, lifestyle and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field.

Additional Information

The University will reimburse students to sit for up to three recommended certification exams. Reimbursements will be made only once per certification exam. Students are responsible for paying for any additional attempts.

Paralegal

Associate of Applied Science Degree

Fully online program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program are prepared for various careers within the field of law. They will be able to carry out key paralegal functions and responsibilities encompassing research, writing, communication, legal analysis, office management, and preparation of legal documents on various areas of law. They can provide services in all areas of the legal system, such as courts, law firms, and government agencies under the supervision of an attorney. Graduates are able to ethically communicate and interact with professionals and clients on all levels with a forward-thinking, interdisciplinary approach that utilizes emerging technology. Graduates value written and interpersonal communication, critical thinking and problem solving, information and financial literacy, and the significance of diversity awareness skills in academic and workplace situations.

Typical Career Paths

- Paralegal
- Legal Secretary
- Legal Assistant
- Court Administrative Assistant
- Court Clerk
- File Clerk

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Physical Therapist Assistant

Associate of Science Degree in Florida

Associate of Applied Science Degree in Minnesota

This program contains online, residential and blended courses

Offered:

- In Florida at the Ocala campus
- In Minnesota at Hennepin/Anoka campus

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of the Physical Therapist Assistant (PTA) Associate's Degree program know and can apply general education concepts and clinical technical skills in order to serve as a valuable member of a healthcare team. These individuals will demonstrate evidence-based care within the scope of practice of a PTA. Graduates will understand and value the therapeutic alliance between the patient/client and therapist, critical thinking and problem solving, communication, clinical decision-making, and diversity-awareness as these concepts relate to modern patient management.

Typical Career Paths

- Physical Therapist Assistant

Program Accreditation

Graduation from a Physical Therapist Assistant education program accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE), 3030 Potomac Ave., Suite 100 Alexandria, VA 22305-3085; 703-706-3245; accreditation@apta.org is necessary for eligibility to sit for the licensure examination, which is required in all states.

The Physical Therapist Assistant Program at Rasmussen University part of American Public University System – Hennepin/Anoka is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE), 3030 Potomac Ave., Suite 100, Alexandria, Virginia 22305-3085; telephone: 703-706-3245; email: accreditation@apta.org ; website: http://www.capteonline.org . To contact the program/institution directly, please call 763-496-6022 or email Laura.Miele@rasmussen.edu .

The Physical Therapist Assistant Program at Rasmussen University part of American Public University System - Ocala is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE), 3030 Potomac Ave., Suite 100, Alexandria, Virginia 22305-3085; telephone: 703-706-3245; email: accreditation@apta.org ; website: http://www.capteonline.org . To contact the program/institution directly, please call 352-291-8570 or email Kelly.Reed1@rasmussen.edu .

Additional Information

The Physical Therapist Assistant Associate's Degree program is only offered at the Ocala campus in Florida and the Hennepin/Anoka campus in Minnesota.

The Physical Therapist Assistant Associate's Degree contains both online and residential courses and is designed to lead to careers in Florida and Minnesota. While this program is only offered at selected campuses in those states, determinations regarding professional licensure or certification have been made for other states as displayed below. "Meets" means that the program meets the educational requirements for professional licensure or certification, or that there is no license or certification. "Undetermined" means that Rasmussen University part of American Public University System ("Rasmussen") makes no determination whether this program meets the educational requirements for professional licensure and prospective students located in these states cannot enroll in this program.

- Meets: MN, WI, ND, SD, IA, FL, GA, AL
- Undetermined: AK, AR, AZ, CA, CO, CT, DC, DE, HI, ID, IL, IN, KS, KY, LA, MA, MD, ME, MI, MO, MS, MT, NC, NE, NH, NJ, NM, NV, NY, OH, OK, OR, PA, RI, SC, TN, TX, UT, VA, VT, WA, WV, WY, Puerto Rico, American Samoa, Guam, Northern Marianas Islands, U.S. Virgin Islands

Acceptance Requirements

1. Applicants pursuing admittance into the Physical Therapist Assistant (PTA) program must meet one of the following requirements to be deemed eligible for Admission:
   a. Achieve a score on the School of Nursing and School of Health Sciences Entrance Exam acceptable for admission per the School of Nursing and School of Health Sciences Entrance Exam policy:
      i. HESI® Admission Assessment, a Cumulative Score of 75% or higher and an 80% or higher English Language Composite score. The Cumulative Score must include Reading Comprehension, Vocabulary & General Knowledge, Basic Math Skills, and Anatomy & Physiology exams, or
      ii. TEAS Admission Assessment, a Total Score of 65% or higher.
   b. Conferred associate's degree or higher in Exercise Science or Kinesiology from a United States (U.S.) accredited institution of higher learning as recognized by the U.S. Department of Education or by the Council for Higher Education Accreditation (CHEA) with a cumulative GPA of 2.25 or higher and awarded within five (5) calendar years of the date the student starts in the program.
   c. Conferred associate's degree or higher in a health sciences-related program that includes a Human Anatomy and Physiology course series with labs that covers all body systems from an accredited United States (U.S.) institution of higher learning as recognized by the U.S. Department of Education or by the Council for Higher Education Accreditation (CHEA) with a cumulative GPA of 2.25 or higher and awarded within five (5) calendar years of the date the student starts in the program.
   d. Completion of at least 20 quarter credits of college-level coursework in the areas of Human Anatomy & Physiology, Algebra, Statistics, Physics, Medical Terminology, Kinesiology, or Exercise Science from a United States (U.S.) accredited institution of higher learning as recognized by the U.S. Department of Education or by the Council for Higher Education Accreditation (CHEA) and completed within five (5) calendar years of the date the student starts in the program. A Psychology or Composition course may be substituted for one of the above courses. A grade of C+ or higher in each course is required.
   e. Completion of METC Physical Therapy Program that awards 63 or more credits into this program via the Military Block Transfer for Physical Therapist Assistant Associate's Degree Policy.

   The University must receive official transcripts proving completion of B, C, D or E as identified above no later than the sixth business day of the first quarter of enrollment or the student will be withdrawn.
2. Complete the following prior to being deemed eligible for consideration for admission:
   - Application and enrollment agreement
   - Background screening
   - Any additional program-specific requirements as specified at the time of enrollment

This program requires specific immunizations prior to professional practice experience, which are listed in the program handbook. A health physical may be required and completed within the six months prior to internship/practicum as specified by the clinical facility.

Current students in other programs wishing to transfer into a course of study requiring the admissions standards outlined above will be required to meet one of the acceptance requirements outlined in number one above plus any additional acceptance requirements.

Once the applicant file is complete, the University will schedule an interview between the applicant and Program Coordinator/Director.

Students accepted into their program will receive written communication from the University. The University may choose two additional applicants as alternates to join the program if another applicant is deemed ineligible or decides not to begin classes. These two alternates

must complete all necessary steps for admission. Alternates will be guaranteed the opportunity for enrollment into the next cohort provided they remain eligible for admission. Students must attend programmatic orientation as well as general orientation or risk being removed from the cohort.

In addition to meeting all other admissions requirements, Florida campus applicants must successfully pass two background checks — one through Rasmussen's chosen third-party vendor and one meeting the Florida statutory definition of a Level 2 background check. In addition to meeting all other admissions requirements, Minnesota campus applicants must successfully pass two background checks — one through Rasmussen's chosen third-party vendor and one through the Minnesota Department of Human Services. An additional background check may also be required during active enrollment prior to practicum or clinical placement depending on site requirements. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Professional Nursing

Associate of Applied Science Degree

Offered:

- In Illinois at the Aurora/Naperville[1], Mokena/Tinley Park[1], Rockford[1], and Romeoville/Joliet campuses
- In Kansas at the Overland Park and Topeka[2] campuses
- In Minnesota at the Mankato, Moorhead, and St. Cloud campuses
- Not offered in North Dakota

Knowledge Credit Self-Directed Assessment available

Objective

The objective of this program is to provide the knowledge, clinical skills, nursing values, and experience necessary for an entry-level professional nursing position; and in turn facilitate competency in the core components of professional nursing: professional behavior, communication, assessment, clinical decision-making, caring interventions, teaching and learning, collaboration, and managing care. This program is designed to prepare the graduate to utilize and apply the nursing process (assessment, diagnosis, planning, intervention, and evaluation) to provide care across the life span and in diverse settings within the healthcare continuum. Upon graduating from this program, the graduate will have met the educational prerequisites to sit for the National Council Licensure Examination for Registered Nurses (NCLEX- RN®).

Typical Career Paths

- Hospitals
- Clinics
- Rehabilitation Centers
- Long-Term Care Facilities

Program Accreditation

The Professional Nursing Associate program at Rasmussen University part of American Public University System at the:

- Mankato campus, located in Mankato, Minnesota, is accredited by the ACEN. The most recent accreditation decision made by the ACEN Board of Commissioners for this associate nursing program is Continuing Accreditation.
- Moorhead campus, located in Moorhead, Minnesota, is accredited by the ACEN. The most recent accreditation decision made by the ACEN Board of Commissioners for this associate nursing program is Continuing Accreditation.
- Overland Park campus (with an off-campus instructional site in Topeka), located in Overland Park, Kansas, is accredited by the ACEN. The most recent accreditation decision made by the ACEN Board of Commissioners for this associate nursing program is Continuing Accreditation.
- Romeoville campus (with off-campus instructional sites in Aurora, Mokena, and Rockford), located in Romeoville, Illinois, is accredited by the ACEN. The most recent accreditation decision made by the ACEN Board of Commissioners for this associate nursing program is Initial Accreditation.
- St. Cloud campus, located in St. Cloud, Minnesota, is accredited by the ACEN. The most recent accreditation decision made by the ACEN Board of Commissioners for this associate nursing program is Continuing Accreditation.

Accreditation Commission for Education in Nursing (ACEN), 3390 Peachtree Road NE, Suite 1400, Atlanta, GA 30326, 404-975-5000. View the public information disclosed by the ACEN regarding these programs at https://www.acenursing.org/search-programs.

Additional Information

The Professional Nursing Associate's Degree contains both online and residential courses and is designed to meet the educational requirement to apply for licensure as a Registered Nurse (RN) in Kansas, Illinois, and Minnesota. While this program is only offered at select campuses in those states, it has been determined that this program meets the educational requirements for licensure as an RN in additional states as displayed below. "Meets" means that the program meets the educational requirements for professional licensure. "Undetermined" means that Rasmussen University part of American Public University System ("Rasmussen") makes no determination whether this program meets the educational requirements for professional licensure and prospective students located in these states cannot enroll in this program. Other licensure eligibility requirements may apply; please verify your eligibility against applicable rules, which may change at any time.

- Meets: FL, IL, KS, MN, AL, GA, IN, IA, MO, MT, ND, SD, WI
- Undetermined: AK, AR, AZ, CA, CO, CT, DC, DE, HI, ID, KY, LA, MA, MD, ME, MI, MS, NC, NE, NH, NJ, NM, NV, NY, OH, OK, OR, PA, RI, SC, TN, TX, UT, VA, VT, WA, WV, WY, Puerto Rico, American Samoa, Guam, Northern Marianas Islands, U.S. Virgin Islands

Applicants to this program must meet program-specific admissions requirements in addition to all general Rasmussen admissions requirements. Please see the application procedures for this program under Academic Information and University Policies.

Students enrolled in this program who fail or withdraw from a core Nursing course must successfully repeat that same course in the next quarter the course is offered in order to progress in this program. Additionally, in order to take a course that lists a prerequisite, the student must have successfully completed the prerequisite course prior to registering for the post-requisite course. A student who drops, withdraws, or fails a prerequisite course will be withdrawn from any future courses that classify that course as a prerequisite; for additional information, see the Course Descriptions section.

To graduate from this program, students must complete all required NUR coursework with a grade of C or better, achieve all required skill competencies, and satisfactorily complete all required clinical learning experiences.

LPN-RN Bridge

Students who hold a current, unencumbered Practical Nursing license (LPN/LVN) will receive credit for **NUR1055** Introduction to Nursing (4 credits), **NUR2243** Professional Nursing Skills I (3 credits), and **NUR2356** Multidimensional Care I (5 credits) in the Professional Nursing Associate's Degree program. Rasmussen defines a current, unencumbered license as a license that is unexpired and has not been reprimanded, stipulated, suspended, revoked, or has any current or prior disciplinary action regardless of current ability to practice. The student's license will be reviewed, and if the criteria are met, the course requirements will be waived and the grades will be posted on the student's transcript as Course Waiver (CW). Students may also transfer in up to 42 credits of applicable General Education coursework previously completed with a grade of C- or higher. Graduates of the Rasmussen Practical Nursing Diploma program will have eight (8) General Education credits fulfilled based on **ENC1101** English Composition and **MAT1222** Algebra completed in the Diploma program. Students must pass all remaining coursework in the Professional Nursing Associate's Degree program to earn this degree.

Acceptance Requirements

Entrants must complete the following steps in order to be deemed eligible for admission:

1. Applicants pursuing admittance into the Professional Nursing program must meet one of the following requirements to be deemed eligible for Admission:
   a. Current, unencumbered Practical Nursing License or Vocational Nursing License.
   b. Achieve a score on the School of Nursing and School of Health Sciences Entrance Exam acceptable for admission:
      i. HESI® Admission Assessment – A Cumulative Score of 70% or higher. The Cumulative Score must include Reading Comprehension, Vocabulary & General Knowledge, Basic Math Skills, and Anatomy & Physiology exams, or
      ii. TEAS Admission Assessment – A Total Score of 62% or higher for all campuses, except Illinois campuses, which require a Total Score of 68% or higher and a Reading score of 68% or higher.

c. ACT score of 19 or higher, completed within five years.

d. SAT score of 1030 or higher, completed within five years.

e. Conferred bachelor's degree or higher with a minimum GPA of 2.25 from a United States (U.S.) accredited institution of higher learning as recognized by the U.S. Department of Education or by the Council for Higher Education Accreditation (CHEA). The official transcript showing the conferred degree must be received by the University no later than the sixth business day of the first quarter of enrollment, or the student will be withdrawn.

2. In addition to the Application, Enrollment and Acceptance Requirements, entrants who have successfully completed the School of Nursing Entrance Exam must complete the following programmatic specific Acceptance Requirements:
   - Health physical and proof of immunizations in accordance with the School of Nursing Student Handbook.
   - Criminal background screening.
   - The entrant will be required to have current Basic Life Saving and Cardiopulmonary Resuscitation Certification with Defibrillator. A valid certification is defined in the School of Nursing Undergraduate Student Handbook.
   - The School of Nursing Orientation.
   - Any additional program-specific requirements as specified at the time of enrollment.
   - Entrants with prior college credits will receive a transcript evaluation during the admissions process.

Entrants will receive written communication from the University confirming acceptance once all acceptance requirements have been met.

In addition to meeting all other acceptance requirements, Illinois and Kansas campus applicants must successfully pass a background check through Rasmussen's chosen third-party vendor. At Illinois campuses, an additional background check may also be required during active enrollment prior to practicum or clinical placement depending on site requirements. In addition to meeting all other acceptance requirements, Minnesota applicants enrolled through Mankato must successfully pass a background check through the Minnesota Department of Human Services. In addition to meeting all other acceptance requirements, Minnesota applicants enrolled through Moorhead or St. Cloud must successfully pass two background checks: one through Rasmussen's chosen third-party vendor, and one through the Minnesota Department of Human Services. An additional background check may also be required during active enrollment prior to practicum or clinical placement depending on site requirements. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

1. The Aurora/Naperville, IL, Mokena/Tinley Park, IL and Rockford, IL campuses are off-campus instructional sites of the Romeoville/Joliet, IL, program.
2. The Topeka, KS, campus is an off-campus instructional site of the Overland Park, KS, program.

Professional Nursing

Associate of Science Degree

Offered in Florida at the Central Pasco, Fort Myers, North Orlando[1], Ocala[2], and Tampa/Brandon campuses

Knowledge Credit Self-Directed Assessment Available

Objective

The objective of this program is to provide the knowledge, clinical skills, nursing values, and experience necessary for an entry-level professional nursing position; and in turn facilitate competency in the core components of professional nursing: professional behavior, communication, assessment, clinical decision-making, caring interventions, teaching and learning, collaboration, and managing care. This program is designed to prepare the graduate to utilize and apply the nursing process (assessment, diagnosis, planning, intervention, and evaluation) to provide care across the life span and in diverse settings within the healthcare continuum. Upon graduating from this program, the graduate will have met the educational prerequisites to sit for the National Council Licensure Examination for Registered Nurses (NCLEX- RN®).

Typical Career Paths

- Hospitals
- Clinics
- Rehabilitation Centers
- Long-Term Care Facilities

Program Accreditation

The Professional Nursing Associate program at Rasmussen University part of American Public University System at the:

- Central Pasco campus, located in Odessa, Florida, is accredited by the ACEN. The most recent accreditation decision made by the ACEN Board of Commissioners for this associate nursing program is Continuing Accreditation.
- Fort Myers campus, located in Fort Myers, Florida, is accredited by the ACEN. The most recent accreditation decision made by the ACEN Board of Commissioners for this associate nursing program is Continuing Accreditation.
- Ocala campus (with a satellite in North Orlando and Orlando), located in Ocala, Florida, is accredited by the ACEN. The most recent accreditation decision made by the ACEN Board of Commissioners for this associate nursing program is Continuing Accreditation.
- Tampa/Brandon campus, located in Tampa, Florida, is accredited by the ACEN. The most recent accreditation decision made by the ACEN Board of Commissioners for this associate nursing program is Continuing Accreditation.

Accreditation Commission for Education in Nursing (ACEN), 3390 Peachtree Road NE, Suite 1400, Atlanta, GA 30326, 404-975-5000. View the public information disclosed by the ACEN regarding these programs at https://www.acenursing.org/search-programs.

1. The North Orlando, FL campus is a satellite of the Ocala, FL program.
2. Some students enrolled through the Ocala campus may attend a portion of their classes at the Orlando location at 8541 Southpark Circle, Orlando, Florida 32819.

Radiologic Technology

Associate of Science Degree in Florida

Associate of Applied Science Degree in Minnesota

This program contains online, residential and blended courses

Offered:

- In Florida at the Central Pasco, Fort Myers, and Ocala campuses
- In Minnesota at Eagan campus

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program know basic concepts of anatomy and physiology, medical imaging, radiation production, and radiation safety. Graduates of the program will implement proper patient care techniques, operate radiographic equipment, position body parts, and follow radiation safety standards. Graduates can provide quality diagnostic medical imaging at a variety of clinical settings through the use of standard X-ray, mobile X-ray, and fluoroscopic technologies. They value critical thinking, communication, diverse perspectives, technology and information literacy, and patient safety and care.

Typical Career Paths

- Radiologic Technologist

Program Accreditation

The following Radiologic Technology Associate Degree programs at Rasmussen University part of American Public University System are accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT):

- Eagan campus in Minnesota was granted reaccreditation in 2021 for a period of eight years.
- Fort Myers campus in Florida was granted reaccreditation in 2024 for a period of eight years.
- Ocala campus in Florida was granted reaccreditation in 2023 for a period of eight years.

The Radiologic Technology Associate degree program at the Central Pasco, Florida campus is not programmatically accredited. The Radiologic Technology Associate degree program at Rasmussen University part of American Public University System's Central Pasco campus is seeking programmatic accreditation through the Joint Review Committee on Education in Radiologic Technology.

Joint Review Committee on Education in Radiologic Technology, 20 North Wacker Drive, Suite 2850, Chicago, Illinois 60606-3182, Mail@jrcert.org, 312-704-5300.

Additional Information

The Radiologic Technology Associate's Degree contains both online and residential courses and is designed to lead to careers in Florida and Minnesota. While this program is only offered at selected campuses in those states, determinations regarding professional licensure

or certification have been made for other states as displayed below. “Meets” means that the program meets the educational requirements for professional licensure or certification or that there is no license or certification. “Undetermined” means that Rasmussen University part of American Public University System ("Rasmussen") makes no determination whether this program meets the educational requirements for professional licensure and prospective students located in these states cannot enroll in this program.

- Meets: MN, WI, ND, SD, IA, FL, GA, AL
- Undetermined: AK, AR, AZ, CA, CO, CT, DC, DE, HI, ID, IL, IN, KS, KY, LA, MA, MD, ME, MI, MO, MS, MT, NC, NE, NH, NJ, NM, NV, NY, OH, OK, OR, PA, RI, SC, TN, TX, UT, VA, VT, WA, WV, WY, Puerto Rico, American Samoa, Guam, Northern Marianas Islands, U.S. Virgin Islands

This program meets the educational requirements to apply for certification through the American Registry of Radiologic Technologists (ARRT). ARRT certification may be required for state professional licensure or certification. Other eligibility requirements may apply to state and national licenses and certifications; please verify your eligibility against applicable rules, which may change at any time.

This program may require specific immunizations prior to professional practice experience.

Acceptance Requirements

Applicants must complete the following steps to be considered for admission:

1. Applicants pursuing admittance into the Radiologic Technology program must meet one of the following requirements to be deemed eligible for Admission:

   a. Achieve a score on the School of Nursing and School of Health Sciences Entrance Exam acceptable for admission per the School of Nursing and School of Health Sciences Entrance Exam policy:

      i. HESI® Admission Assessment, a Cumulative Score of 65% or higher. The Cumulative Score must include Reading Comprehension, Vocabulary & General Knowledge, Basic Math Skills, and Anatomy & Physiology exams

      ii. TEAS Admission Assessment, a Total Score of 48.5% or higher

   b. Conferred associate’s degree or higher in a health sciences-related program from a United States (U.S.) accredited institution of higher learning as recognized by the U.S. Department of Education or by the Council for Higher Education Accreditation (CHEA) with a cumulative GPA of 2.0 or higher and awarded within five (5) calendar years of the date the student starts in the program

   c. Completion of at least 20 quarter credits of college-level health sciences, natural sciences or math coursework completed at a United States (U.S.) accredited institution of higher learning as recognized by the U.S. Department of Education or by the Council for Higher Education Accreditation (CHEA) within five (5) calendar years of the date the student starts in the program. One Composition or Communication course may be applied to meet this requirement. A grade of C or higher in each course is required.

      The University must receive official transcripts showing either a conferred degree in a health sciences-related program or completion of a minimum of 20 quarter credits of eligible coursework no later than the sixth business day of the first quarter of enrollment or the student will be withdrawn.

2. Complete the following prior to being deemed eligible for consideration for admission:

   - Application and enrollment agreement
   - Background screening
   - Any additional program specific requirements as specified at the time of enrollment

A health physical may be required and completed within the six months prior to internship/practicum as specified by the clinical facility.

Current students in other programs wishing to transfer into a course of study requiring the admissions standards outlined above will be required to meet one of the acceptance requirements outlined in number one above plus any additional acceptance requirements.

Once the applicant file is complete, the University will schedule an interview between the applicant and Program Coordinator/Director.

This program has an enrollment capacity limit. Students accepted into their program will receive written communication from the University. The University may choose two additional applicants as alternates to join the program if another applicant is deemed ineligible or decides not to begin classes. These two alternates must complete all the necessary steps for admission. Alternates will be guaranteed the opportunity for enrollment into the next cohort provided they remain eligible for admission. Students must attend programmatic orientation as well as general orientation or risk being removed from the cohort.

In addition to meeting all other acceptance requirements, Florida campus applicants must successfully pass two background checks—one through Rasmussen's chosen third-party vendor, and one meeting the Florida statutory definition of a Level 2 background check.

An additional background check may also be required during active enrollment prior to practicum or clinical placement depending on site requirements. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Software Application Development

Associate of Science Degree

Fully online program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program will be prepared to produce software that meets functional and business requirements. They will apply design and analysis methodologies to model business-oriented programming solutions, understand the importance of industry best practice methods and techniques for completing tasks throughout the software development process, and use industrial strength programming languages, tools, and techniques to create software applications, web-based solutions, and database-driven software systems. Students benefit from highly qualified faculty who have practical, in-field experience. Graduates value written and interpersonal communication, critical thinking and problem solving, information and financial literacy, and diversity awareness skills and their significance in academic and workplace situations.

Typical Career Paths

- Applications Developer
- Computer Systems Analyst
- Programmer Analyst
- Software Developer
- Web Developer
- Web Programmer

Data Analytics Specialization

- Business Intelligence Developer
- Data Analyst
- Data Quality Analyst
- Programmer Analyst
- Computer Systems Analyst
- Software Developer
- Web Analytics Analyst

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen University part of American Public University System ("Rasmussen") does not pre-screen for enrollment in this program. Any prospective student must consider their history, lifestyle and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field.

Additional Information

The University will reimburse students to sit for up to three recommended certification exams. Reimbursements will be made only once per certification exam. Students are responsible for paying for any additional attempts.

Developmental Education Courses

Code	Title	Quarter Credits
B080	Reading and Writing Strategies	4
B087	Practical Math	4

Developmental Education courses, when required, do not count toward total program credits, and are not calculated in GPA. Students must demonstrate mastery of the subject matter in Developmental Education courses through a Rasmussen entrance placement exam, approved exemption based on previously completed coursework, or by passing Developmental Education courses.

Surgical Technologist

Associate of Science Degree in Florida

Associate of Applied Science Degree in Illinois and Minnesota

This program contains online, residential and blended courses

Offered:

- In Florida at the Central Pasco campus
- In Illinois at the Rockford campus
- In Illinois at the Romeoville/Joliet campus
- In Minnesota at the Hennepin/Anoka campus

Knowledge Credit Self-Directed Assessment Available

Objective

The goal of this program is to prepare competent entry-level surgical technologists in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains. Graduates of this program know basic concepts of anatomy and physiology, pathology, microbiology, and pharmacology. They understand operating room design, surgical equipment and instrumentation, safety standards, and asepsis and sterile techniques. Graduates can prepare, clean, and restock operating rooms; use and maintain surgical equipment; perform scrub and circulator duties in a number of surgical specialties; and contribute to pre- and post-operative patient care. They value critical thinking, communication, diverse perspectives, technology and information literacy, and patient and safety care.

Typical Career Paths

- Surgical Technologist

Program Accreditation

The Surgical Technologist Associate's Degree program at the Hennepin/Anoka, Minnesota campus; the Central Pasco, Florida, campus; and the Rockford and Romeoville/Joliet, Illinois, campuses is accredited by the Commission on Accreditation of Allied Health Education

Programs (CAAHEP.org) on the recommendation of the Accreditation Review Council on Education in Surgical Technology and Surgical Assisting (ARC/STSA). Commission on Accreditation of Allied Health Education Programs (CAAHEP), 9355 113th Street N., #7709, Seminole, FL 33775-7709, 727-210-2350, caahep.org.

Additional Information

Applicants to this program must meet program-specific admissions requirements, in addition to all general Rasmussen University part of American Public University System ("Rasmussen") admissions requirements. Please see the application procedures for this program under Academic Information and University Policies.

The Surgical Technologist Associate's Degree contains both online and residential courses and is designed to lead to careers in Florida, Illinois, Minnesota, and Wisconsin. While this program is only offered at selected campuses in those states, determinations regarding professional licensure or certification have been made for other states as displayed below. "Meets" means that the program meets the educational requirements for professional licensure or certification or that there is no license or certification. "Undetermined" means that Rasmussen makes no determination whether this program meets the educational requirements for professional licensure and prospective students located in these states cannot enroll in this program.

- Meets: FL, IL, MN, ND, AL, GA, IA, IN, KY, MO, SD, WI
- Undetermined: AK, AR, AZ, CA, CO, CT, DC, DE, HI, ID, KS, LA, MA, MD, ME, MI, MS, MT, NC, NE, NH, NJ, NM, NV, NY, OH, OK, OR, PA, RI, SC, TN, TX, UT, VA, VT, WA, WV, WY, Puerto Rico, American Samoa, Guam, Northern Marianas Islands, U.S. Virgin Islands

Graduation from a campus with programmatic accreditation is a requirement to sit for the Certified Surgical Technologist ("CST") certification through the National Board of Surgical Technology and Surgical Assisting (NBSTSA). The CST certification may be required for state professional licensure or certification. Other eligibility requirements may apply to state and national licenses and certifications; please verify your eligibility against applicable rules, which may change at any time.

This program requires specific immunizations prior to professional practice experience.

Acceptance Requirements

Applicants must complete the following steps to be considered for admission:

1. Applicants pursuing admittance into the Surgical Technologist program must meet one of the following requirements to be deemed eligible for Admission:

   a. Achieve a score on the School of Nursing and School of Health Sciences Entrance Exam acceptable for admission per the School of Nursing and School of Health Sciences Entrance Exam policy:

      i. HESI® Admission Assessment, a Cumulative Score of 65% or higher. The Cumulative Score must include Reading Comprehension, Vocabulary & General Knowledge, Basic Math Skills, and Anatomy & Physiology exams, or

      ii. TEAS Admission Assessment, a Total Score of 48.5% or higher.

   b. Conferred associate's degree or higher in a health sciences-related program from a United States (U.S.) accredited institution of higher learning as recognized by the U.S. Department of Education or by the Council for Higher Education Accreditation (CHEA) with a cumulative GPA of 2.0 or higher and awarded within five (5) calendar years of the date the student starts in the program.

   c. Completion of at least 20 quarter credits of college-level health sciences, natural sciences or math coursework completed at a United States (U.S.) accredited institution of higher learning as recognized by the U.S. Department of Education or by the Council for Higher Education Accreditation (CHEA) within five (5) calendar years of the date the student starts in the program. One Composition or Communication course may be applied to meet this requirement. A grade of C or higher in each course is required.

   Rasmussen University must receive official transcripts showing either a conferred degree in a health sciences-related program or completion of a minimum of 20 quarter credits of eligible coursework no later than the sixth business day of the first quarter of enrollment or the student will be withdrawn.

2. Complete the following prior to being deemed eligible for consideration for admission:

- Application and enrollment agreement
- Background screening
- Any additional program specific requirements as specified at the time of enrollment

A health physical may be required and completed within the six months prior to internship/practicum as specified by the clinical facility.

Current students in other programs wishing to transfer into a course of study requiring the admissions standards outlined above will be required to meet one of the acceptance requirements outlined in number one above plus any additional acceptance requirements.

Once the applicant file is complete, the University will schedule an interview between the applicant and Program Coordinator/Director.

Students accepted into their program will receive written communication from the University. The University may choose two additional applicants as alternates to join the program if another applicant is deemed ineligible or decides not to begin classes. These two alternates must complete all the necessary steps for admission. Alternates will be guaranteed the opportunity for enrollment into the next cohort provided they remain eligible for admission. Students must attend programmatic orientation as well as general orientation or risk being removed from the cohort.

In addition to meeting all other acceptance requirements, Illinois campus applicants must successfully pass a background check through Rasmussen's chosen third-party vendor. In addition to meeting all other acceptance requirements, Florida campus applicants must successfully pass two background checks—one through Rasmussen's chosen third-party vendor, and one meeting the Florida statutory definition of a Level 2 background check. In addition to meeting all other admissions requirements, Minnesota campus applicants must successfully pass two background checks—one through Rasmussen's chosen third-party vendor, and one through the Minnesota Department of Human Services. An additional background check may also be required during active enrollment prior to practicum or clinical placement depending on site requirements. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Accounting

Bachelor of Science Degree

Fully online program

Empowered Learning Competency-Based Education Program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program know the accounting processes and cycles of professional accounting firms, businesses, and government agencies. They can manage accounts receivable, accounts payable, and payroll, and can also prepare tax returns, prepare and analyze financial statements, and use computer applications proficiently. They can perform advanced accounting tasks pertaining to taxes, auditing, fraud examination, and international accounting. They can apply, analyze, synthesize, and evaluate facts and theories; locate, evaluate, and integrate appropriate primary and secondary sources; integrate their ideas with the ideas of others to create new knowledge; recognize and address complex ethical situations; communicate effectively in a variety of scenarios; and operate effectively within a continually changing environment. Graduates value communication, critical thinking and problem solving, scientific and information literacy, financial literacy, diversity awareness, knowledge creation skills, and the need to incorporate them in meaningful ways.

Typical Career Paths

- Accountant
- Managerial Accountant
- Financial Analyst
- Auditor
- Accounts Payable
- Cost Accountant
- Accounts Receivable

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen University part of American Public University System ("Rasmussen") does not pre-screen for enrollment in this program. Any prospective student must consider their history, lifestyle and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field.

Careers Disclosure: This program is not designed to prepare graduates for any state-issued professional license or certification. This program does not meet all educational prerequisites for licensure as a Certified Public Accountant (CPA) in any state. Each state determines its own requirements for licensure as a Certified Public Accountant (CPA). In addition to other requirements, most states require a bachelor’s degree and no fewer than 225 quarter credits (150 semester credits) of university coursework, specific in-field experience, and passage of the CPA licensing exam. Additional examination eligibility and licensure requirements exist. Please consult with your state’s board of accountancy or equivalent oversight agency for further details, as requirements may change at any time. This program has not been approved by any state board of accountancy or other professional licensing agency.

Additional Information

This program is not designed to prepare graduates for any state-issued professional license or certification. This Accounting program does not meet all educational prerequisites for licensure as a Certified Public Accountant (CPA) in any state. For further information on professional licensing requirements, please contact the appropriate board or agency in your state of residence.

The coursework in this program is aligned with the standards of the Institute of Management Accountants (IMA) and meets the academic requirements to sit for the Certified Management Accounting (CMA) exam. Additional requirements, such as work experience in a

management accounting role, may be required to sit for the CMA exam. Please consult the IMA for any further details as requirements may change at any time.

A student enrolled in an associate degree program through Rasmussen University Online may dual enroll in this Bachelor's degree program when enrolled in the final 12 credits needed to complete their enrolled associate's degree program, and all program acceptance requirements are met. The student may be scheduled to complete Associate program course requirements before taking Bachelor-level courses. The student will graduate from their enrolled associate degree program only when all course requirements specific to that program have been completed. Students who choose this option to dual enroll cannot complete the final 12 credits in the associate degree as self-directed assessments (SDA). Students enrolled in a Rasmussen Certificate or Diploma program are not eligible to dual enroll in this Bachelor's degree program. Students enrolled in a residential program through a campus are not eligible to dual enroll in this program.

Acceptance Requirements

This is a bachelor-completer program. To be considered for admission, applicants must provide transcripts from an accredited institution of higher learning as recognized by the U.S. Department of Education or the Council for Higher Education Accreditation (CHEA) that demonstrates one of the following:

a. A conferred Associate's Degree in Accounting
b. A conferred associate's or bachelor's degree in an unrelated field
c. Completion of at least 60 quarter credits or 40 semester credits of college-level coursework with a grade of C- or higher in each course

Students who transfer a conferred Associate's Degree in Accounting will receive a block transfer of 90 lower-level quarter credits. Students with a conferred associate's or bachelor's degree in an unrelated field, or at least 60 eligible quarter credits, may be considered for this program as specified below:

- Students may be required to take additional lower-level prerequisite courses when equivalent courses have not been completed. Prerequisite courses a student may be required to complete include: **ACG1022** Financial Accounting I and **ACG1033** Financial Accounting II.
- In addition, the students will have their transcripts evaluated on a course-by-course basis to determine whether any upper-level credits will also apply to their program. Eligible transfer credits will be applied to their program at the appropriate level.

Students who have fewer than 90 transferable lower-level quarter credits will be required to take additional lower-level coursework. The additional coursework will be determined by Rasmussen based upon a predetermined elective pool appropriate for the program of enrollment.

Master's-Level Course Substitutions

Eligible students enrolled in this program may elect to substitute specific master's-level courses for certain bachelor's-level courses as displayed on the table below. See the Eligibility to Substitute Master's-Level Course While Enrolled in a Bachelor's Degree Program Policy for more information.

Bachelor's-Level Course	Master's-Level Course Substitution*
MAN4720 Strategic Management	**MAN6720** Applied Strategic Planning

*Master's courses are 11-weeks in length and are solely offered as competency-based education (CBE) courses.

Bachelor of Science in Nursing - Second Degree Accelerated BSN (A-BSN) entrance option

Bachelor of Science Degree

Second Degree Accelerated BSN (A-BSN)

Offered:

- In Florida at the Central Pasco, Fort Myers, North Orlando[1], Ocala[1], and Tampa/Brandon campuses.
- In Kansas at the Overland Park and Topeka[2] campuses.

- In Minnesota at the Bloomington, Eagan[3], Hennepin/Anoka[3], Mankato[3], and St. Cloud[3] campuses.
- In North Dakota at the Fargo campus.

Objective

This program prepares the graduate as a nurse adhering to the American Nurses Association (ANA) Scope and Standards of Practice and Code of Ethics. Students develop a professional identity as advocates, leaders, and innovators grounded in a sense of inquiry and commitment to lifelong learning. Knowledge provided by a liberal education, integrated with nursing principles, serves as a foundation for the development of clinical reasoning, scaffolding into the application of clinical judgment and evidence-based practice. Graduates are prepared to collaborate with interprofessional teams and promote excellence through cost-effective, accessible, multidimensional care in a rapidly changing, multicultural, global environment. Emphasis is placed on the promotion, maintenance, and restoration of health as graduates prepare to practice among communities of interest. The innovative, outcomes-based, laddered curricular framework aligns with the Quality and Safety Education for Nursing (QSEN) Competencies, National League for Nursing (NLN) Education Competencies, and American Association of Colleges of Nursing's (AACN) The Essentials: Core Competencies for Professional Nursing Education. The program is differentiated by relevant, contemporary curricular design and innovative courses, including the choice of nursing electives. Prelicensure graduates are academically prepared for the National Council of State Boards of Nursing NCLEX-RN® examination. Passing the NCLEX-RN exam is one of the requirements for obtaining licensure as a registered nurse.

Typical Career Paths

- Hospitals
- Nursing Education
- Administration
- Clinical Practice
- Nursing Leadership

Program Accreditation

The baccalaureate degree program in nursing at Rasmussen University part of American Public University System is accredited by the Commission on Collegiate Nursing Education (CCNE), 655 K Street NW, Suite 750, Washington, DC 20001, 202-887-6791. http://www.ccneaccreditation.org.

Additional Information

The Standard Entrance A-BSN and Second Degree A-BSN entrance options of the Bachelor of Science in Nursing program (A-BSN entrance options) contain both online and residential courses and are designed to meet the educational requirement to apply for licensure as a Registered Nurse (RN) in Florida, Kansas, Minnesota, and North Dakota. While the A-BSN entrance options are residential and only offered at select campuses in those states, it has been determined that they meet the educational requirements for licensure as an RN in additional states as displayed below. "Meets" means that the A-BSN entrance options meet the educational requirements for professional licensure. "Undetermined" means that Rasmussen University part of American Public University System ("Rasmussen") makes no determination whether this program meets the educational requirements for professional licensure and prospective students located in these states cannot enroll in this program. Other licensure eligibility requirements may apply; please verify your eligibility against applicable rules, which may change at any time.

- Meets: FL, IL, KS, MN, ND, AL, GA, IN, IA, MO, MT, SD, WI
- Undetermined: AK, AR, AZ, CA, CO, CT, DC, DE, HI, ID, KY, LA, MA, MD, ME, MI, MS, NC, NE, NH, NJ, NM, NV, NY, OH, OK, OR, PA, RI, SC, TN, TX, UT, VA, VT, WA, WV, WY, Puerto Rico, American Samoa, Guam, Northern Marianas Islands, U.S. Virgin Islands

Students may only be registered in core nursing courses once they have completed all General Education course requirements of the block transfer, either through transfer of credit or completion of General Education courses at Rasmussen. Students who are in their final quarter of completing their General Education course requirements and have completed both Human Anatomy and Physiology I and II, may be scheduled for their first Nursing courses according to the approved program course sequence in order to be eligible for financial aid or to attain full-time status.

Students enrolled in this program who fail or withdraw from a core Nursing course must successfully repeat that same course in the next quarter the course is offered in order to progress in this program. Additionally, in order to take a course that lists a prerequisite, the student must have successfully completed the prerequisite course prior to registering for the post-requisite course. A student who drops, withdraws, or fails a prerequisite course will be withdrawn from any future courses that classify that course as a prerequisite; for additional information, see the Course Descriptions section.

To graduate in this program, students must complete all required NUR coursework with a grade of C or better, achieve all required skill competencies, and satisfactorily complete all required clinical experiences.

This program may require specific immunizations prior to professional practice experience.

LPN–RN Bridge

Students who hold a current, unencumbered Practical Nursing license (LPN/LVN) will receive credit for **NUR1055** Introduction to Nursing (4 credits), **NUR2243** Professional Nursing Skills I (3 credits), and **NUR2356** Multidimensional Care I (5 credits) in the Bachelor of Science in Nursing Degree program. Rasmussen defines a current, unencumbered license as a license that is unexpired and has not been reprimanded, stipulated, suspended, revoked, or has any current or prior disciplinary action regardless of current ability to practice. The student's license will be reviewed, and if the criteria are met, the course requirements will be waived and the grades will be posted on the student's transcript as a Course Waiver (CW). Students may also transfer in up to 74 credits in successfully completed applicable General Education coursework. Students must pass all remaining coursework in the Bachelor of Science in Nursing Degree program to earn this degree.

Acceptance Requirements

A student is eligible to enroll in the Second Degree A-BSN entrance option of the Bachelor of Science in Nursing program when a bachelor's degree has been awarded from an accredited institution of higher learning as recognized by the U.S. Department of Education or the Council for Higher Education (CHEA). Entrants must complete the following steps to be deemed eligible for admission:

1. Applicants pursuing admittance into the Bachelor of Science in Nursing program must meet one of the following requirements to be deemed eligible for Admission:
   a. Current, unencumbered Practical Nursing License or Vocational Nursing License.
   b. Achieve a score on the School of Nursing and School of Health Sciences Entrance Exam acceptable for admission:
      i. HESI® Admission Assessment – A Cumulative Score of 75% or higher. The Cumulative Score must include Reading Comprehension, Vocabulary & General Knowledge, Basic Math Skills, and Anatomy & Physiology exams, or
      ii. TEAS Admission Assessment – A Total Score of 72% or higher.
   c. ACT score of 20 or higher, completed within five years.
   d. SAT score of 1100 or higher, completed within five years.
   e. Conferred bachelor's degree or higher with a minimum GPA of 2.25 from a United States (U.S.) accredited institution of higher learning as recognized by the U.S. Department of Education or by the Council for Higher Education Accreditation (CHEA). The official transcript showing the conferred degree must be received by the University no later than the sixth business day of the first quarter of enrollment, or the student will be withdrawn.
2. In addition to the Application, Enrollment and Acceptance Requirements, entrants who have successfully completed the School of Nursing Entrance Exam must complete the following programmatic specific Acceptance Requirements:
   - Provide official or unofficial transcript from institution that awarded bachelor's degree for transcript evaluation during the admission process. Official transcripts must be received by the University no later than the sixth business day of the first quarter of enrollment or the student will be withdrawn.
   - Health physical and proof of immunizations in accordance with the School of Nursing Undergraduate Student Handbook
   - Criminal background screening
   - Current Basic Life Saving and Cardiopulmonary Resuscitation Certification with Defibrillator. A valid certification is defined in the School of Nursing Undergraduate Student Handbook.
   - The School of Nursing Orientation
   - Any additional program-specific requirements as specified at the time of enrollment

- Former nursing students in good standing with the School of Nursing who have not been enrolled for more than 12 months must successfully repeat the School of Nursing Entrance Exam to be deemed eligible for re-enrollment into the nursing program through a consultation with the Dean of Nursing/Nurse Administrator.

Entrants will receive written communication from the University confirming acceptance once all acceptance requirements have been met.

In addition to meeting all other acceptance requirements, Kansas campus applicants must successfully pass a background check through Rasmussen's chosen third-party vendor. In addition to meeting all other acceptance requirements, Florida campus applicants must successfully pass two background checks: one through Rasmussen's chosen third-party vendor, and one meeting the Florida statutory definition of a Level 2 background check. In addition to meeting all other acceptance requirements, Minnesota campus applicants must successfully pass two background checks: one through Rasmussen's chosen third-party vendor and one through the Minnesota Department of Human Services. In addition to meeting all other acceptance requirements, applicants enrolled through the Fargo, ND campus must successfully pass two background checks: one through Rasmussen's chosen third-party vendor, and one through the Minnesota Department of Human Services. An additional background check may also be required during active enrollment prior to practicum or clinical placement depending on site requirements. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Program Accreditation

The baccalaureate degree program in nursing at Rasmussen University part of American Public University System is accredited by the Commission on Collegiate Nursing Education (CCNE), 655 K Street NW, Suite 750, Washington, DC 20001, 202-887-6791. http://www.ccneaccreditation.org .

Additional Information

The BSN Standard Entrance and Second Degree A-BSN entrance options of the Bachelor of Science in Nursing program (A-BSN entrance options) contain both online and residential courses and are designed to meet the educational requirement to apply for licensure as a Registered Nurse (RN) in Florida, Kansas, Minnesota, and North Dakota. While the A-BSN entrance options are residential and only offered at select campuses in those states, it has been determined that they meet the educational requirements for licensure as an RN in additional states as displayed below. "Meets" means that the A-BSN entrance options meet the educational requirements for professional licensure. "Undetermined" means that Rasmussen University part of American Public University System ("Rasmussen") makes no determination whether this program meets the educational requirements for professional licensure and prospective students located in these states cannot enroll in this program. Other licensure eligibility requirements may apply; please verify your eligibility against applicable rules, which may change at any time.

- Meets: FL, IL, KS, MN, ND, AL, GA, IN, IA, MO, MT, SD, WI
- Undetermined: AK, AR, AZ, CA, CO, CT, DC, DE, HI, ID, KY, LA, MA, MD, ME, MI, MS, NC, NE, NH, NJ, NM, NV, NY, OH, OK, OR, PA, RI, SC, TN, TX, UT, VA, VT, WA, WV, WY, Puerto Rico, American Samoa, Guam, Northern Marianas Islands, U.S. Virgin Islands

Students may only be registered in core nursing courses once they have completed all General Education course requirements, either through transfer of credit or completion of General Education courses at Rasmussen. Students who are in their final quarter of completing their General Education course requirements and have completed both Human Anatomy and Physiology I and II, may be scheduled for their first Nursing courses according to the approved program course sequence in order to be eligible for financial aid or to attain full-time status.

Students enrolled in this program who fail or withdraw from a core Nursing course must successfully repeat that same course in the next quarter the course is offered in order to progress in this program. Additionally, in order to take a course that lists a prerequisite, the student must have successfully completed the prerequisite course prior to registering for the post-requisite course. A student who drops, withdraws, or fails a prerequisite course will be withdrawn from any future courses that classify that course as a prerequisite; for additional information, see the Course Descriptions section.

To graduate in this program, students must complete all required NUR coursework with a grade of C or better, achieve all required skill competencies, and satisfactorily complete all required clinical experiences.

This program may require specific immunizations prior to professional practice experience.

LPN-RN Bridge

Students who hold a current, unencumbered Practical Nursing license (LPN/LVN) will receive credit for **NUR1055** Introduction to Nursing (4 credits), **NUR2243** Professional Nursing Skills I (3 credits), and **NUR2356** Multidimensional Care I (5 credits) in the Bachelor of Science in Nursing Degree program. Rasmussen defines a current, unencumbered license as a license that is unexpired and has not been reprimanded, stipulated, suspended, revoked, or has any current or prior disciplinary action regardless of current ability to practice. The student's license will be reviewed, and if the criteria are met, the course requirements will be waived and the grades will be posted on the student's transcript as Course Waiver (CW). Students may also transfer in up to 74 credits of applicable General Education coursework previously completed with a grade of C- or higher. Graduates of the Rasmussen Practical Nursing Diploma program will have eight (8) General Education credits fulfilled based on **ENC1101** English Composition and **MAT1222** Algebra completed in the Diploma program. Students must pass all remaining coursework in the Bachelor of Science in Nursing Degree program to earn this degree.

Acceptance Requirements

A student is eligible to enroll in the Standard Entrance option of the Bachelor of Science in Nursing degree program when they have not yet attended college, have taken college-level courses but do not have a degree, have an associate's degree, or have an advanced degree but do not have a Bachelor's degree. Entrants must complete the following steps in order to be deemed eligible for admission:

1. Applicants pursuing admittance into the Bachelor of Science in Nursing program must meet one of the following requirements to be deemed eligible for Admission:
   a. Current, unencumbered Practical Nursing License or Vocational Nursing License.
   b. Achieve a score on the School of Nursing and School of Health Sciences Entrance Exam acceptable for admission:
      i. HESI® Admission Assessment – A Cumulative Score of 75% or higher. The Cumulative Score must include Reading Comprehension, Vocabulary & General Knowledge, Basic Math Skills, and Anatomy & Physiology exams, or
      ii. TEAS Admission Assessment – A Total Score of 72% or higher.
   c. ACT score of 20 or higher, completed within five years.
   d. SAT score of 1100 or higher, completed within five years.
   e. Conferred bachelor's degree or higher with a minimum GPA of 2.25 from a United States (U.S.) accredited institution of higher learning as recognized by the U.S. Department of Education or by the Council for Higher Education Accreditation (CHEA). The official transcript showing the conferred degree must be received by the University no later than the sixth business day of the first quarter of enrollment, or the student will be withdrawn.
2. In addition to the Application, Enrollment and Acceptance Requirements, entrants who have successfully completed the School of Nursing Entrance Exam must complete the following programmatic specific Acceptance Requirements:
   - Health physical and proof of immunizations in accordance with the School of Nursing Undergraduate Student Handbook
   - Criminal background screening
   - Current Basic Life Saving and Cardiopulmonary Resuscitation Certification with Defibrillator. A valid certification is defined in the School of Nursing Undergraduate Student Handbook.
   - The School of Nursing Orientation
   - Any additional program-specific requirements as specified at the time of enrollment
   - Entrants with prior college credits will receive a transcript evaluation during the admissions process

Entrants will receive written communication from the University confirming acceptance once all acceptance requirements have been met.

In addition to meeting all other acceptance requirements, Kansas campus applicants must successfully pass a background check through Rasmussen's chosen third-party vendor. In addition to meeting all other acceptance requirements, Florida campus applicants must successfully pass two background checks: one through Rasmussen's chosen third-party vendor, and one meeting the Florida statutory definition of a Level 2 background check. In addition to meeting all other acceptance requirements, Minnesota campus applicants must successfully pass two background checks: one through Rasmussen's chosen third-party vendor and one through the Minnesota Department of Human Services. In addition to meeting all other acceptance requirements, applicants enrolled through the Fargo, ND campus must successfully pass two background checks: one through Rasmussen's chosen third-party vendor, and one through the Minnesota Department of Human Services. An additional background check may also be required during active enrollment prior to practicum or clinical placement depending on site requirements. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

NUR3907 Scholarly Communication in Nursing	

*Master's courses are 11-weeks in length and are solely offered as competency-based education (CBE) courses. Master's courses may not transfer into all master's degrees. Master's degrees may not be offered in all states and may not be offered in the same states in which bachelor's degrees are offered.

---

1. The North Orlando campus is a satellite of the Ocala, FL program; and some students enrolled through the Ocala campus may attend a portion of their classes at the Orlando location at 8541 Southpark Circle, Orlando, Florida 32819.
2. The Topeka campus is a satellite of the Overland Park, KS, program.
3. The Eagan, Hennepin/Anoka, Mankato, and St. Cloud campuses are satellites of the Bloomington, MN, program.

Bachelor of Science in Nursing - RN to BSN entrance option

Bachelor of Science Degree

Fully online program

Empowered Learning Competency-Based Education Program

All courses in this program are competency-based education (CBE) courses

Knowledge Credit Self-Directed Assessment Available

ⓘ

Returning Students - August 2026 Start

For the August 12, 2026 start date only, enrollment is open only to students who were previously enrolled in the Bachelor of Science in Nursing – RN to BSN option. Previously enrolled students will enroll in the program curriculum in the 2025-2026 Rasmussen Catalog, including tuition applicable to that catalog. The 2025-2026 catalog is available in the Archive section of the Rasmussen Course Catalog webpage. View the 2025-2026 Catalog.

New and reentering students in the Bachelor of Science in Nursing – RN to BSN option who enroll in this program for the October 5, 2026 start date and later will enroll in the curriculum listed in the 2026-2027 American Public University System Catalog.

Objective

This program prepares graduates for professional nursing practice as baccalaureate-prepared nurses grounded in person-centered care, clinical judgment, ethical practice, quality and safety, and a commitment to lifelong learning. Built on a prior registered nursing educational foundation, the curriculum strengthens students' professional identity and advances competencies in evidence-based practice, communication, healthcare technologies and informatics, systems thinking, and leadership. Graduates are prepared to collaborate with interprofessional teams; use data, evidence, and improvement science to enhance outcomes; advocate for equitable, accessible, and cost-effective care; and respond to the health needs of individuals, families, communities, and populations in a dynamic healthcare environment. The curriculum is designed in alignment with contemporary professional nursing standards, including the AACN Essentials, and reflects expectations for quality, safety, population health, and practice readiness in today's healthcare systems.

Typical Career Paths

- Hospitals
- Clinical Practice
- Administration
- Nursing Education
- Nursing Leadership

Program Accreditation

The baccalaureate degree program in nursing at Rasmussen University part of American Public University System is accredited by the Commission on Collegiate Nursing Education (CCNE), 655 K Street NW, Suite 750, Washington, DC 20001, 202-887-6791. http://www.ccneaccreditation.org.

Additional Information

This online program is not available to residents of all states. Please speak with an Admissions Representative to determine your eligibility for enrollment.

The RN to BSN is a post-RN licensure program and is not designed to prepare graduates for any advanced practice or other state-issued nursing license.

Acceptance Requirements

- Applicants must hold a current, unencumbered Registered Nurse (RN) license issued by a board of nursing in the U.S from the state where the clinical hours will be completed. Rasmussen University part of American Public University System ("Rasmussen") defines a current, unencumbered license as a license that is unexpired and has not been reprimanded, stipulated, suspended, revoked, or has any current or prior disciplinary action, regardless of current ability to practice. When the applicant holds more than one current RN license, all current RN licenses must be unencumbered. The student is required to maintain a current, unencumbered RN license throughout the duration of the program. Failure to maintain a current, unencumbered license throughout the duration of the program will result in administrative withdrawal from the University.
- Applicants to this program are exempt from the Entrance Placement Exam requirements.
- Applicants provide official or unofficial transcript from the institution that conferred their associate's degree in nursing for transcript evaluation during the admission process. Official transcripts for each institution from which transfer credit will be awarded must be received by the University no later than the sixth business day of the first quarter of enrollment or the student will be withdrawn.
- In addition to meeting all other admissions requirements, applicants to this program must successfully complete and pass a criminal background check through Rasmussen’s chosen third-party vendor. An additional and different background check may also be required during active enrollment prior to practicum or clinical placement depending on site requirements. An additional background check may include components that are different than those originally checked at the time of admissions. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.
- Additional program-specific requirements may be specified at the time of enrollment.
- Accepted applicants must complete the Rasmussen online orientation.
- Applicants will receive written communication from the University confirming acceptance once all admissions requirements have been met, including attendance at programmatic orientation.
- Drug testing, proof of current immunizations and screenings, and proof of current CPR certification are not entrance requirements for this program. However, Rasmussen will require proof of current immunizations and proof of current CPR certification 14 days prior to the first day of the quarter of the professional practice experience to remain enrolled in the practicum course. Some practicum sites may have additional requirements such as drug screening, proof of health insurance, photo ID, etc., prior to placement in the

professional practice experience. The student is responsible for complying with and paying for any health examinations, immunizations, and drug tests required by the Rasmussen or the practicum site.

Credit Articulation

Applicants for the Rasmussen RN to BSN program may be awarded up to a maximum of 110 lower-level proficiency transfer credits.

- Applicants who have graduated from an Associate's Degree in Nursing, and who satisfy all program admission requirements will be awarded an articulation transfer equivalent to 102 lower-level credits toward this program. An additional eight (8) lower-level General Education elective credits may be awarded when additional coursework was completed that was not part of the conferred Associate's degree in Nursing.

- Applicants without an Associate's Degree in Nursing who satisfy all program admission requirements will be awarded an articulation transfer of 68 credits in transfer to this program based on licensure, and up to 42 additional transfer credits may be awarded based on previously completed applicable lower-division General Education coursework with a grade of C- or higher.
- If incoming lower-division General Education credits total fewer than 42 credits, up to eight credits will be required to be completed through self-directed assessments from a designated pool.
- Lower-division General Education credits not transferred must be completed either prior to enrolling or during the first 18 months of enrollment.

The following self-directed assessments reflect the designated pool to select from to fulfill the eight-credit requirement. These must be completed no later than 18 months from starting the program and prior to beginning the last quarter in which the student is scheduled to graduate. The quarter of expected graduation is determined by the graduation date as it appears in the Rasmussen Student Portal.

- Communicating in Your Profession (Communication)
- Introduction to Communication (Communication)
- Art Appreciation (Humanities)
- Ethics Around the Globe (Humanities)
- Humanities (Humanities)
- Introduction to Critical Thinking (Humanities)
- Essential Statistics and Analytics (Math)
- Perspectives on Society (Social Sciences)
- Principles of Economics (Social Sciences)

Up to 24 additional upper-level proficiency transfer credits may be awarded applicable to upper-level General Education course requirements. A maximum of 134 transfer credits may be awarded for this program. A student must achieve a documented total of 180 credits (110 Lower Division and 70 Upper Division) in order to graduate from the BSN program.

General Education Course Waiver Credit for Applicable Work Experience

Students enrolled in the Bachelor of Science in Nursing – RN to BSN option may be eligible to have up to 28 General Education credit hours waived based on verified work experience. Students who have at least six (6) months of full-time employment or at least twelve (12) months of part-time employment in a position that requires licensure as a registered nurse and wish to request Course Waiver credit will be required to have their employer complete and sign an Employer Verification for RN to BSN Program form, which will be provided to the student by their Admissions Representative or Academic Advisor. The student is responsible for submitting all required documentation no later than Friday of their thirteenth week of enrollment in their first academic quarter in this program for course waivers to be considered. Upon verification of eligibility, Rasmussen may waive up to 28 upper-level general education elective credits and lower-level unrestricted general education elective credits. The Inferential Statistics and Analytics course requirement is not eligible for this course waiver.

Business Management

Bachelor of Science Degree

Fully online program

Empowered Learning Competency-Based Education Program

All courses in this program are competency-based education (CBE) courses

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates from this program are strategic business partners, consultants, and leaders in organizations. They understand a variety of concepts and their applicability to business, including accounting, finance, digital marketing, operations, management and leadership, organizational behavior, law and ethics, business intelligence, and business analytics. They are effective organizational practitioners who are able to problem solve and collaborate, as well as synthesize and implement evidence-based strategies. Additionally, they understand

project management, data-driven decision-making, critical thinking, and professional communications. Graduates value financial and information literacy and diversity awareness and are informed decision-makers both within their organization and their professional field.

Typical Career Paths

- Banking/Finance
- Marketing/Sales
- Customer Service
- Operations
- Healthcare Administration
- Project Management
- Human Resources
- Supply Chain
- Logistics/Manufacturing

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen University part of American Public University System ("Rasmussen") does not pre-screen for enrollment in this program. Any prospective student must consider their history, lifestyle and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field.

Additional Information

A student enrolled in an associate degree program through Rasmussen University Online may dual enroll in this Bachelor's degree program when enrolled in the final 12 credits needed to complete their enrolled associate's degree program, and all program acceptance requirements are met. The student may be scheduled to complete Associate program course requirements before taking Bachelor-level courses. The student will graduate from their enrolled associate degree program only when all course requirements specific to that program have been completed. Students who choose this option to dual enroll cannot complete the final 12 credits in the associate degree as self-directed assessments (SDA). Students enrolled in a Rasmussen Certificate or Diploma program are not eligible to dual enroll in this Bachelor's degree program. Students enrolled in a residential program through a campus are not eligible to dual enroll in this program.

Acceptance Requirements

This is a bachelor-completer program. To be considered for admission, applicants must provide transcripts from an accredited institution of higher learning as recognized by the U.S. Department of Education or the Council for Higher Education Accreditation (CHEA) that demonstrates one of the following:

a. A conferred associate's or bachelor's degree

b. Completion of at least 60 quarter credits or 40 semester credits of college-level coursework with a grade of C- or higher in each course

Students who transfer a conferred associate's or bachelor's degree will receive a block transfer of 90 lower-level quarter credits. In addition, the students will have their transcripts evaluated on a course-by-course basis to determine whether any upper-level credits will also apply to their program. Eligible transfer credits will be applied to their program at the appropriate level.
Students who have fewer than 90 transferable lower-level quarter credits will be required to take additional lower-level coursework. The additional coursework will be determined by Rasmussen based upon a predetermined elective pool appropriate for the program of enrollment.

Degree Requirements Summary

Computer Science

Bachelor of Science Degree

Fully online program

Empowered Learning Competency-Based Education Program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program learn how to design, develop, and deploy information systems that leverage cloud computing, mobile technology, and web analytics. Students develop mastery of business concepts, programming languages, distributed database utilization, and end-to-end information security practices. They can analyze and evaluate business problems, design and illustrate technical

solutions, code and deploy distributed software applications, and then test and integrate the information system into day-to-day business operations. Graduates apply communication skills, critical thinking, problem solving, project management principles and diversity awareness.

Typical Career Paths

- Software Developer
- Mobile Software Developer
- Software Application Developer
- Mobile Software Engineer
- Mobile Developer
- Cloud Application Engineer

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen University part of American Public University System ("Rasmussen") does not pre-screen for enrollment in this program. Any prospective student must consider their history, lifestyle and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field.

Additional Information

The University will reimburse students to sit for up to three recommended certification exams. Reimbursements will be made only once per certification exam. Students are responsible for paying for any additional attempts.

A student enrolled in an associate degree program through Rasmussen University Online may dual enroll in this Bachelor's degree program when enrolled in the final 12 credits needed to complete their enrolled associate's degree program, and all program acceptance requirements are met. The student may be scheduled to complete Associate program course requirements before taking Bachelor-level courses. The student will graduate from their enrolled associate degree program only when all course requirements specific to that program have been completed. Students who choose this option to dual enroll cannot complete the final 12 credits in the associate degree as self-directed assessments (SDA). Students enrolled in a Rasmussen Certificate or Diploma program are not eligible to dual enroll in this Bachelor's degree program. Students enrolled in a residential program through a campus are not eligible to dual enroll in this program.

Acceptance Requirements

This is a bachelor-completer program. To be considered for admission, applicants must provide transcripts from an accredited institution of higher learning as recognized by the U. S. Department of Education or the Council for Higher Education Accreditation (CHEA) that demonstrates one of the following:

a. A conferred associate's or bachelor's degree in a related field, as listed below

b. A conferred associate's or bachelor's degree in an unrelated field

c. Completion of at least 60 quarter credits or 40 semester credits of college-level coursework with a grade of C- or higher in each course

Students who transfer a conferred associate's or bachelor's degree from the following approved field-related programs will receive a block transfer of 90 lower-level quarter credits:

- Software Engineer
- Programmer Analyst
- Software Applications Developer
- Software Developer
- Java Developer
- Computer Programmer
- Computer Scientist
- Quality Assurance Tester

- Project Manager

Students with an unrelated associate's or bachelor's degree, or at least 60 eligible quarter credits, may be considered for this program as specified below:

- Students may be required to take additional lower-level prerequisite courses when equivalent courses have not been completed within the past three (3) years. Prerequisite courses a student may be required to complete include: **CGS1820C** Introduction to HTML, **CNT1020C** Networking Fundamentals for Programmers, **COP2268C** Java Programming and **COP1532C** Database Fundamentals for Programmers.
- In addition, the students will have their transcripts evaluated on a course-by-course basis to determine whether any upper-level credits will also apply to their program. Eligible transfer credits will be applied to their program at the appropriate level.

Students who have fewer than 90 transferable lower-level quarter credits will be required to take additional lower-level coursework. The additional coursework will be determined by Rasmussen based upon a predetermined elective pool appropriate for the program of enrollment.

Criminal Justice Leadership and Management

Bachelor of Science Degree

Fully online program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program know the theory and practice of criminal justice law, procedures, research methods, and leadership. They understand concepts of criminal behavior, crime prevention, and diversity in the justice system. Graduates can apply, analyze, synthesize, and evaluate facts and theories pertaining to criminal justice; locate, evaluate, and integrate appropriate primary and secondary sources; effectively communicate ideas through speaking and writing; recognize and address complex ethical situations; and operate effectively within a continually changing environment. Graduates value communication, critical thinking and problem solving, scientific and information literacy, financial literacy, diversity awareness, and knowledge-creation skills and the need to incorporate them in meaningful ways.

Typical Career Paths

- Crime Victims Advocate
- Security Manager
- Corporate Security Supervisor
- Corrections / Law Enforcement careers in some jurisdictions

Additional training and other requirements may apply to careers in this field. Please read the Careers Disclosure.

Careers Disclosure: Each federal, state, or local agency determines its own requirements for licensure of law enforcement careers and may change these requirements at any time. Licensed law enforcement careers include police officer, corrections officer, parole officer, crime scene investigator, and other positions. Minimum educational standards for licensure in these careers range from a high school diploma to a university degree and can vary widely (even within the same state). Some agencies require graduation from an agency-approved academic program or training academy. This program is NOT a training academy or approved program with any federal, state, or local agency. Other non-academic requirements are also required for licensure, which may include additional training, experience, graduation from an academy, physical fitness standards, background checks (certain results are often disqualifying), and other requirements. Before enrolling, it is important to understand whether licensure is required for a desired career by consulting the appropriate federal, state, or local agency requirements.

Additional Information

This program is not designed to meet the educational requirements for professional licensure or certification in any state. For example, this program does not meet the standards established by the Minnesota Peace Officer Standards and Training (POST) Board for persons

who seek employment as a peace officer in Minnesota. For further information on professional licensing requirements, please contact the appropriate board or agency in your state of residence. Additional education, training, experience, and/or other eligibility criteria may apply.

A student enrolled in an associate degree program through Rasmussen University part of American Public University System ("Rasmussen") University Online may dual enroll in this Bachelor's degree program when enrolled in the final 12 credits needed to complete their enrolled associate's degree program, and all program acceptance requirements are met. The student may be scheduled to complete Associate program course requirements before taking Bachelor-level courses. The student will graduate from their enrolled associate degree program only when all course requirements specific to that program have been completed. Students who choose this option to dual enroll cannot complete the final 12 credits in the associate degree as self-directed assessments (SDA). Students enrolled in a Rasmussen Certificate or Diploma program are not eligible to dual enroll in this Bachelor's degree program. Students enrolled in a residential program through a campus are not eligible to dual enroll in this program.

Acceptance Requirements

This is a bachelor-completer program. To be considered for admission, applicants must provide transcripts from an accredited institution of higher learning as recognized by the U. S. Department of Education or the Council for Higher Education Accreditation (CHEA) that demonstrates one of the following:

a. A conferred associate's or bachelor's degree in a related field, as listed below

b. A conferred associate's or bachelor's degree in an unrelated field

c. Completion of at least 60 quarter credits or 40 semester credits of college-level coursework with a grade of C- or higher in each course

Students who transfer a conferred associate's or bachelor's degree from the following approved field-related programs will receive a block transfer of 90 lower-level quarter credits:

- Corrections
- Criminal Justice
- Emergency Management
- Justice Administration
- Justice Management
- Law Enforcement
- Public Safety
- Law Enforcement Academic Certificate and Law Enforcement Skills Certificate programs offered by Rasmussen

Students with an unrelated associate's or bachelor's degree, or at least 60 eligible quarter credits, may be considered for this program as specified below:

- Students may be required to take additional lower-level prerequisite courses when equivalent courses have not been completed. Prerequisite courses a student may be required to complete include: **CCJ1000** Introduction to Criminal Justice and either **CJL1381** Criminal Law and Procedures: Crime and the Courtroom or **CJL1747** Applied Criminal Procedures.
- In addition, the students will have their transcripts evaluated on a course-by-course basis to determine whether any upper-level credits will also apply to their program. Eligible transfer credits will be applied to their program at the appropriate level.

Students who have fewer than 90 transferable lower-level quarter credits will be required to take additional lower-level coursework. The additional coursework will be determined by Rasmussen based upon a predetermined elective pool appropriate for the program of enrollment.

In addition to meeting all other acceptance requirements, applicants must successfully pass a background check through Rasmussen's chosen third-party vendor. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Cyber Security

Bachelor of Science Degree

Fully online program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates will be exposed to ethical and professional cyber security standards for business operations, administration, and report writing. Graduates of this program will also be able to address current and future cyber security challenges, such as risk management, security awareness, business continuity, and the collection and preservation of digital evidence, with a strong foundation of cyber security

principles. The curriculum emphasizes a comprehensive understanding of the forensic tools and techniques used to investigate and analyze network-related incidents and digital devices. Courses are project-based and simulate real-world experience with relevant software applications and hands-on labs. Students benefit by learning from highly qualified faculty who have practical, in-field experience. Graduates are able to document procedures and comply with relevant policies, regulation standards, and ethical practices. Graduates understand the importance of lifelong learning, transferable skills, and staying current with emerging technology and trends. Graduates will be able to communicate effectively, think critically, and act ethically in a variety of professional contexts. This program is aligned to industry-relevant skills and certifications that are sought most by employers, which provides graduates an edge as they enter the career field.

Typical Career Paths

- Information Assurance Analyst
- Information Security Analyst
- Information Security Manager
- Information Systems Security Analyst
- Information Technology Security Analyst

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen University part of American Public University System ("Rasmussen") does not pre-screen for enrollment in this program. Any prospective student must consider their history, lifestyle and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field.

Additional Information

The University will reimburse students to sit for up to three recommended certification exams. Reimbursements will be made only once per certification exam. Students are responsible for paying for any additional attempts.

A student enrolled in an associate degree program through Rasmussen University Online may dual enroll in this Bachelor’s degree program when enrolled in the final 12 credits needed to complete their enrolled associate’s degree program, and all program acceptance requirements are met. The student may be scheduled to complete Associate program course requirements before taking Bachelor-level courses. The student will graduate from their enrolled associate degree program only when all course requirements specific to that program have been completed. Students who choose this option to dual enroll cannot complete the final 12 credits in the associate degree as self-directed assessments (SDA). Students enrolled in a Rasmussen Certificate or Diploma program are not eligible to dual enroll in this Bachelor’s degree program. Students enrolled in a residential program through a campus are not eligible to dual enroll in this program.

Acceptance Requirements

This is a bachelor-completer program. To be considered for admission, applicants must provide transcripts from an accredited institution of higher learning as recognized by the U. S. Department of Education or the Council for Higher Education Accreditation (CHEA) that demonstrates one of the following:

a. A conferred associate’s or bachelor’s degree in a related field, as listed below

b. A conferred associate’s or bachelor’s degree in an unrelated field

c. Completion of at least 60 quarter credits or 40 semester credits of college-level coursework with a grade of C- or higher in each course

Students who transfer a conferred associate’s or bachelor’s degree from the following approved field-related programs will receive a block transfer of 90 lower-level quarter credits:

- Network Systems Administration
- Networking Technology
- Computer Network Systems
- Computer Network Administration
- Network Security

- Network Administration and Security

Students with an unrelated associate's or bachelor's degree, or at least 60 eligible quarter credits, may be considered for this program as specified below:

- Students may be required to take additional lower-level prerequisite courses when equivalent courses have not been completed within the past three (3) years. Prerequisite courses a student may be required to complete include: **CET2522C** Cisco Network Routing and Switching, **CIS2647C** Windows Directory Services, **CNT1244C** Introduction to Networks, and **ISM2321** Managing Information Security.
- In addition, the students will have their transcripts evaluated on a course-by-course basis to determine whether any upper-level credits will also apply to their program. Eligible transfer credits will be applied to their program at the appropriate level.

Students who have fewer than 90 transferable lower-level quarter credits will be required to take additional lower-level coursework. The additional coursework will be determined by Rasmussen based upon a predetermined elective pool appropriate for the program of enrollment.

Data Analytics

Bachelor of Science Degree

Fully online program

Knowledge Credit Self-Directed Assessment Available

Objective

This program provides students with hands-on experience, which allows them to apply knowledge and skills related to the complete data analysis life cycle. Courses are project based and simulate real-world experience with relevant software applications and databases. Students benefit from learning from highly qualified faculty who have practical, in-field experience. Graduates will understand how to explore and apply data analytics principles, such as management, environments, platforms, scripting, software, data quality, data analysis, and visualization. This program's curriculum is aligned to industry-standard analytics and software tools that gives an advantage to our graduates as they enter the career field. Authentic, real-world scenario assessments allow students to further apply industry-relevant knowledge and skills. Graduates are prepared to communicate actionable insights to stakeholders through data analysis and visualization.

Typical Career Paths

- Business Intelligence Developer
- Systems Engineer
- Data Analyst
- Systems Software Developer
- Data Quality Analyst
- Web Analytics Analyst
- Junior Data Analyst

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen University part of American Public University System ("Rasmussen") does not pre-screen for enrollment in this program. Any prospective student must consider their history, lifestyle and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field.

Early Childhood Education Leadership

Bachelor of Science Degree

Fully online program

Empowered Learning Competency-Based Education Program

Knowledge Credit Self-Directed Assessment Available

Objective

The Early Childhood Education Bachelor's Degree is a non-licensure, online program that builds on the foundations of early childhood education principles while preparing graduates with in-demand leadership skills. Graduates of this program will be prepared to enrich their careers by gaining a deeper knowledge in early childhood development while acquiring the leadership and administration skills necessary to pursue leadership positions in the field of early childhood education. Based on national standards and designed in partnership with industry leaders, this program will prepare graduates with the knowledge and skills to pursue a leadership career path in the field of early childhood education and development.

This program is not intended to lead to licensure or certification to teach in the public school sector.

Typical Career Paths

- Early Childhood Teacher (in private childcare settings)
- Teacher's Assistant

- Early Childhood Special Education Assistant
- Head Start Teacher

Careers Disclosure: The Early Childhood Education programs at Rasmussen University part of American Public University System ("Rasmussen") are not designed to meet, and do not meet, the educational requirements for licensure to teach in public preschools, or kindergarten, elementary, or secondary schools in any state. A bachelor's degree from a state-approved college or university and a state teaching license are typically required to work as a teacher in a public school, and in private school settings. The Rasmussen Early Childhood Education programs are not approved by any state agency that licenses teachers. States, municipalities, districts, or individual schools may have more stringent licensure requirements and other standards. Childcare facilities and the states in which they are located establish qualifications for staff that work with children, and often implement guidelines regarding age, education, experience, background, and professional development. Before enrolling, it is important to understand all of the licensure eligibility standards for a desired career by consulting the appropriate state and school/facility requirements.

The Child Development Associate (CDA) Credential from the Council for Professional Recognition may be required for some career opportunities. Rasmussen partners with the Council for Professional Recognition, and its Early Childhood Education Certificate program contains the following courses, which provide the educational prerequisites for the CDA Credential: **EEC1202** Early Childhood Education Curriculum and Instruction; **EEC1700** Foundations of Child Development; and **EEC1735** Health, Safety, and Nutrition/CDA Application. Additional CDA Credential eligibility requirements apply. Please consult the CDA eligibility requirements of the Council for Professional Recognition for further details.

Additional Information

This program has not been approved by any state professional licensing body, and this program is not intended to lead to any state-issued professional license. For further information on professional licensing requirements, please contact the appropriate board or agency in your state of residence.

The Early Childhood Education program contains coursework aligned with the requirements for the Gateways Credentials, which are awarded and recognized by the Illinois Department of Human Services (IDHS) Bureau of Child Care and Development. Other eligibility requirements apply; please verify your eligibility against all Gateways Credentials requirements.

A student enrolled in an associate degree program through Rasmussen University Online may dual enroll in this Bachelor's degree program when enrolled in the final 12 credits needed to complete their enrolled associate's degree program, and all program acceptance requirements are met. The student may be scheduled to complete Associate program course requirements before taking Bachelor-level courses. The student will graduate from their enrolled associate degree program only when all course requirements specific to that program have been completed. Students who choose this option to dual enroll cannot complete the final 12 credits in the associate degree as self-directed assessments (SDA). Students enrolled in a Rasmussen Certificate or Diploma program are not eligible to dual enroll in this Bachelor's degree program. Students enrolled in a residential program through a campus are not eligible to dual enroll in this program.

Acceptance Requirements

This is a bachelor-completer program. To be considered for admission, applicants must provide transcripts from an accredited institution of higher learning as recognized by the U. S. Department of Education or the Council for Higher Education Accreditation (CHEA) that demonstrates one of the following:

a. A conferred associate's or bachelor's degree in a related field, as listed below

b. A conferred associate's or bachelor's degree in an unrelated field

c. Completion of at least 60 quarter credits or 40 semester credits of college-level coursework with a grade of C- or higher in each course

Students who transfer a conferred Associate's or Bachelor's degree from the following approved field-related programs will receive a block transfer of 90 lower-level quarter credits:

- Early Childhood Education
- Human Services
- Early Childhood Development
- Education Foundations

- Early Care and Education
- Child Care
- Child and Family Studies
- Education and Youth Studies
- Child Life Specialist/Assistant
- Para-Educator
- Child Psychology
- Early Childhood Studies
- Early Childhood and Youth Development
- Elementary Education
- Child Development/Child Growth and Development
- Associate of Art Degrees with a concentration in Education

Students with an unrelated associate's or bachelor's degree, or at least 60 eligible quarter credits, may be considered for this program as specified below:

- Students may be required to take additional lower-level prerequisite courses when equivalent courses have not been completed. Prerequisite courses a student may be required to complete include: **EEC1700** Foundations of Child Development and **EEC1202** Early Childhood Education Curriculum and Instruction.
- In addition, the students will have their transcripts evaluated on a course-by-course basis to determine whether any upper-level credits will also apply to their program. Eligible transfer credits will be applied to their program at the appropriate level.

Students who have fewer than 90 transferable lower-level quarter credits will be required to take additional lower-level coursework. The additional coursework will be determined by Rasmussen based upon a predetermined elective pool appropriate for the program of enrollment.

In addition to meeting all other acceptance requirements, applicants must successfully pass a background check through Rasmussen's chosen third-party vendor. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

EEC4005	Advanced Principles and Perspectives of Child Development	4

Students enrolled in the Child Development Specialization are not eligible to take competency-based education (CBE) courses.

Finance

Bachelor of Science Degree

Fully online program

Empowered Learning Competency-Based Education Program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this degree program strive to make an impact and create value for their stakeholders in their role as financial experts. The curriculum is designed to challenge the students to perform financial calculations, think critically, and communicate their reasoning to a diverse audience. Students will learn concepts in personal financial management to identify techniques that affect personal goals and decisions. By evaluating various forms of portfolio theory, they explore risks and construct an efficient portfolio. Students will be able to apply, analyze, synthesize, and evaluate facts and theories; skillfully locate, assess, and integrate data sources; blend their ideas with those of others to create new knowledge; recognize and address intricate ethical situations; communicate thoughtfully within a continually changing environment. Graduates value critical thinking, communication, diverse perspectives, technology and information literacy, leadership, integrity, and lifelong learning.

Typical Career Paths

- Financial Analyst
- Financial Manager
- Budget Analyst

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen University part of American Public University System ("Rasmussen") does not pre-screen for enrollment in this program. Any prospective student must consider their history, lifestyle and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field.

Additional Information

This program is not designed to prepare graduates for any state-issued professional license or certification and has not been approved by any state professional licensing agency.

A student enrolled in an associate degree program through Rasmussen University Online may dual enroll in this Bachelor's degree program when enrolled in the final 12 credits needed to complete their enrolled associate's degree program, and all program acceptance requirements are met. The student may be scheduled to complete Associate program course requirements before taking Bachelor-level courses. The student will graduate from their enrolled associate degree program only when all course requirements specific to that program have been completed. Students who choose this option to dual enroll cannot complete the final 12 credits in the associate degree as self-directed assessments (SDA). Students enrolled in a Rasmussen Certificate or Diploma program are not eligible to dual enroll in this Bachelor's degree program. Students enrolled in a residential program through a campus are not eligible to dual enroll in this program.

Acceptance Requirements

This is a bachelor-completer program. To be considered for admission, applicants must provide transcripts from an accredited institution of higher learning as recognized by the U.S. Department of Education or the Council for Higher Education Accreditation (CHEA) that demonstrates one of the following:

a. A conferred associate's or bachelor's degree

b. Completion of at least 60 quarter credits or 40 semester credits of college-level coursework with a grade of C- or higher in each course

Students with a conferred associate's or bachelor's degree, or at least 60 eligible quarter credits, may be considered for this program as specified below:

- Students may be required to take additional lower-level prerequisite courses when equivalent courses have not been completed. Prerequisite courses a student may be required to complete include: **ACG2209** Principles of Financial Accounting for Managers, **CTS2511** Excel, and either **FIN1000** Principles of Finance or **FIN1202** Financial Markets and Institutions.

- In addition, the students will have their transcripts evaluated on a course-by-course basis to determine whether any upper-level credits will also apply to their program. Eligible transfer credits will be applied to their program at the appropriate level.

Students who have fewer than 90 transferable lower-level quarter credits will be required to take additional lower-level coursework. The additional coursework will be determined by Rasmussen based upon a predetermined elective pool appropriate for the program of enrollment.

Eligible students enrolled in this program may elect to substitute specific master's-level courses for certain bachelor's-level courses as displayed on the table below. See the Eligibility to Substitute Master's-Level Course While Enrolled in a Bachelor's Degree Program Policy for more information.

Bachelor's-Level Course	Master's-Level Course Substitution*
MAN4720 Strategic Management	**MAN6720** Applied Strategic Planning

*Master's courses are 11-weeks in length and are solely offered as competency-based education (CBE) courses.

Graphic Design

Bachelor of Science Degree

Fully online program

Empowered Learning Competency-Based Education Program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of the Rasmussen University part of American Public University System ("Rasmussen") Graphic Design Bachelor's Degree will be able to conceptualize, design, and critique design solutions to complex visual problems. Students will progress through an in-depth study of the predominant theories of design and interactivity, including branding, user experience, and critical creative thinking. Students will also explore emerging technologies used in meeting complex visual communication needs. They will create and combine multiple forms of media with a high level of mastery and with a deep understanding of the audience and the context of the design problems. Authentic, multi-disciplinary, project-based assessments with advanced techniques in industry-standard software prepare graduates for business environments as professional designers. Graduates of this program will be prepared to work in a variety of industries, including specialized design services, marketing and advertising, employment services, print and publication design, and cable, television, and film production.

Typical Career Paths

- Motion Designer
- Motion Graphics Artist
- User Interface (UI) Designer
- User Experience (UX) Designer
- Graphic Designer
- Visual Designer
- Graphic Artist
- Production Artist
- Junior Graphic Designer
- Design Specialist
- Visual Information Specialist
- Graphic Specialist
- Creative Graphics Designer
- Digital Designer
- Print Designer

- Motion Graphic Designer
- Visual Media Producer
- Marketing Coordinator/Specialist
- Web Designer
- Video Editor
- Multimedia Designer

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen does not pre-screen for enrollment in this program. Any prospective student must consider their history, lifestyle and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field.

Additional Information

A student enrolled in an associate degree program through Rasmussen University Online may dual enroll in this Bachelor's degree program when enrolled in the final 12 credits needed to complete their enrolled associate's degree program, and all program acceptance requirements are met. The student may be scheduled to complete Associate program course requirements before taking Bachelor-level courses. The student will graduate from their enrolled associate degree program only when all course requirements specific to that program have been completed. Students who choose this option to dual enroll cannot complete the final 12 credits in the associate degree as self-directed assessments (SDA). Students enrolled in a Rasmussen Certificate or Diploma program are not eligible to dual enroll in this Bachelor's degree program. Students enrolled in a residential program through a campus are not eligible to dual enroll in this program.

Acceptance Requirements

This is a bachelor-completer program. To be considered for admission, applicants must provide transcripts from an accredited institution of higher learning as recognized by the U. S. Department of Education or the Council for Higher Education Accreditation (CHEA) that demonstrates one of the following:

a. A conferred associate's or bachelor's degree in a related field, as listed below

b. A conferred associate's or bachelor's degree in an unrelated field

c. Completion of at least 60 quarter credits or 40 semester credits of college-level coursework with a grade of C- or higher in each course

Students who transfer a conferred associate's or bachelor's degree from the following approved field-related programs will receive a block transfer of 91 lower-level quarter credits:

- Graphic Design, Graphic Arts, or Graphic Communications
- Multimedia Design or Multimedia Technologies
- Digital Design, Digital Communication, or Digital Arts
- Visual Design or Visual Communication Design
- Interactive Design
- Computer Graphics or Computer Graphics Design
- Art/Fine Arts with a concentration in Graphic Design
- Marketing Communication with a concentration in Graphic Design

Students with an unrelated associate's or bachelor's degree, or at least 60 eligible quarter credits, may be considered for this program as specified below:

- Students may be required to take additional lower-level prerequisite courses when equivalent courses have not been completed within the past five (5) years. Prerequisite courses a student may be required to complete include: **GRA1000C** Graphic Design Tools and Techniques, **GRA1206C** Typography, **GRA1600C** Color Theories and Applications, and **GRA1700C** Elements and Principles of Graphic Design.
- In addition, the students will have their transcripts evaluated on a course-by-course basis to determine whether any upper-level credits will also apply to their program. Eligible transfer credits will be applied to their program at the appropriate level.

Students who have fewer than 91 transferable lower-level quarter credits will be required to take additional lower-level coursework. The additional coursework will be determined by Rasmussen based upon a predetermined elective pool appropriate for the program of enrollment.

Health and Wellness

Bachelor of Science Degree

Fully online program

Empowered Learning Competency-Based Education Program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program understand the importance of planning, implementing, and evaluating health and wellness programs in diverse settings. Students acquire critical thinking skills by applying what they have learned and determining the best course of action for the population being served. Skills gained within the program empower students to advocate for and educate patients, families, and communities on wellness topics through application-based learning.

Typical Career Paths

- Wellness Coach
- Wellness Program Coordinator
- Program Administrator
- Community Health Admissions Advisor
- Community Health Promoter
- Supervisory Healthcare Administrator
- Health and Social Service Manager
- Mental Health Admissions Advisor

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. *Master's courses are 11 weeks in length and are solely offered as competency-based education (CBE) courses. Master's courses may not transfer into all master's degrees. Master's degrees may not be offered in all states and may not be offered in the same states in which bachelor's degrees are offered. The Master of Public Health is not available in CA, CT, IL, NY, or RI.

Health Information Management

Bachelor of Science Degree

Fully online program[1]

Empowered Learning Competency-Based Education Program

All courses in this program are competency-based education (CBE) courses

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program are prepared for entry-level management and leadership roles in the health information and healthcare industry profession in a variety of healthcare-related settings and organizations. Students develop organizational management and ethical leadership skills and are able to analyze, evaluate, and recommend polices and technologies, including electronic health record

applications and health information competencies related to overseeing, managing, and utilizing health information throughout its life cycle. Emphasis is placed on information governance; data structure and content; healthcare statistical preparation and presentation; data analytics, use, and reporting; revenue cycle management; information protection; privacy, confidentiality, and security; health law; and compliance, technology, and information interoperability. Graduates will be able to communicate with all organizational levels, including clinical, financial, and administrative, that utilize health information in operations and decision-making. They will demonstrate competence in the use of tools and strategies to lead projects and interdisciplinary teams, leveraging skills in strategic planning, human resources, financial, and change management to achieve objectives. Graduates are prepared to work in a variety of healthcare-related settings, including hospitals, physician practices, insurance companies, billing companies, government agencies, long-term care, home health, rehabilitation, behavioral health, skilled nursing facilities, health information consulting companies, and health information technology vendors.

Typical Career Paths

- Health Information Services Manager
- Privacy Officer
- Health Information Applications and EHR Implementation Specialist
- Clinical / Healthcare Informatics Analyst / Specialist
- Compliance Officer / Auditor
- Revenue Cycle Reimbursement Manager
- Health Information Management Specialist
- Clinical Documentation Specialist

Program Accreditation

The Health Information Management accreditor of Rasmussen University part of American Public University System is the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM). The University's accreditation for the Baccalaureate degree in Health Information Management has been reaffirmed through 2030. All inquiries about the program's accreditation status should be directed by mail to CAHIIM, 200 East Randolph Street, Suite 5100, Chicago, IL, 60601; by phone at 312-235-3255; or by email at info@cahiim.org.

Additional Information

This program is not available online to residents of some states. Please speak with an Admissions Representative to determine your eligibility for enrollment.

Graduates of the CAHIIM-accredited Health Information Management Bachelor Degree program meet the educational requirements to sit for the American Health Information Management Association (AHIMA®) Registered Health Information Administrator (RHIA®) exam.

This program is not designed to prepare graduates for any other professional licenses or certifications.

This program requires specific immunizations prior to professional practice experience.

Acceptance Requirements

This is a bachelor-completer program. To be considered for admission, applicants must provide transcripts from an accredited institution of higher learning as recognized by the U. S. Department of Education or the Council for Higher Education Accreditation (CHEA) that demonstrates one of the following:

a. A conferred Associate's Degree in Health Information Technology/Management from a CAHIIM-accredited program earned within five (5) calendar years of the date the student starts in the program.
b. A conferred Associate's Degree in Health Information Technology/Management earned more than five (5) calendar years of the date the student starts in the program from a CAHIIM-accredited program, has documented work experience in the health information industry within five (5) calendar years of the date the student starts in the program and has been approved by the Program Coordinator.
c. A conferred associate's degree earned within five (5) calendar years of the date the student starts in the program and maintains a current RHIT® credential.
d. A conferred associate's degree earned more than five (5) calendar years from the date the student starts in the program, maintains a current RHIT® credential, has documented work experience in the health information industry within five (5) calendar years from the date the student starts in the program and has been approved by the Program Coordinator.

Students will receive a block transfer of 90 lower-level quarter credits. In addition, the students will have their transcripts evaluated on a course-by-course basis to determine whether any upper-level credits will also apply to their program.

In addition to meeting all other acceptance requirements, applicants must successfully pass a background check through Rasmussen University part of American Public University System ("Rasmussen")'s chosen third-party vendor. An additional background check may also be required during active enrollment prior to practicum or clinical placement depending on site requirements. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Healthcare Management

Bachelor of Science Degree

Fully online program

Empowered Learning Competency-Based Education Program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program will be skilled in quality assurance, healthcare regulations and policies, program planning and project management, population management, analytics and decision-making, and leadership within diverse healthcare settings. This program encompasses an interactive and rich learning environment that integrates collaborative experience, experiential learning through the capstone, scenario-based simulations, and hands-on learning. This program prepares graduates for a career as a health services manager. It is differentiated from others in that it emphasizes authentic assessment of critical skills within healthcare management. It brings together professionals who have clinical and/or non-clinical experiences.

Typical Career Paths

- Healthcare Manager
- Healthcare Administrator
- Hospital Director of Admitting
- Clinic Manager
- Assistant Administrator
- Nursing Home Administrator

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen University part of American Public University System ("Rasmussen") does not pre-screen for enrollment in this program. Any prospective student must consider their history, lifestyle and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field.

Additional Information

This program is not designed to prepare graduates for any state-issued professional license or certification and has not been approved by any state professional licensing agency.

A student enrolled in an associate degree program through Rasmussen University Online may dual enroll in this Bachelor's degree program when enrolled in the final 12 credits needed to complete their enrolled associate's degree program, and all program acceptance requirements are met. The student may be scheduled to complete Associate program course requirements before taking Bachelor-level courses. The student will graduate from their enrolled associate degree program only when all course requirements specific to that program have been completed. Students who choose this option to dual enroll cannot complete the final 12 credits in the associate degree as self-directed assessments (SDA). Students enrolled in a Rasmussen Certificate or Diploma program are not eligible to dual enroll in this Bachelor's degree program. Students enrolled in a residential program through a campus are not eligible to dual enroll in this program.

Acceptance Requirements

This is a bachelor-completer program. To be considered for admission, applicants must provide transcripts from an accredited institution of higher learning as recognized by the U.S. Department of Education or the Council for Higher Education Accreditation (CHEA) that demonstrates one of the following:

a. A conferred associate's or bachelor's degree

b. Completion of at least 60 quarter credits or 40 semester credits of college-level coursework with a grade of C- or higher in each course

Students who transfer a conferred associate's or bachelor's degree will receive a block transfer of 90 lower-level quarter credits. In addition, the students will have their transcripts evaluated on a course-by-course basis to determine whether any upper-level credits will also apply to their program. Eligible transfer credits will be applied to their program at the appropriate level.
Students who have fewer than 90 transferable lower-level quarter credits will be required to take additional lower-level coursework. The additional coursework will be determined by Rasmussen based upon a predetermined elective pool appropriate for the program of enrollment.

Human Resources and Organizational Leadership

Bachelor of Science Degree

Fully online program

Empowered Learning Competency-Based Education Program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program know concepts in organizational leadership, human resources, marketing, and business ethics. They understand the theoretical framework of leadership, human resource management principles, and how to apply the concepts in the workplace. They have a knowledge base of the following: employment law, ethics and decision-making, risk management, recruitment and selection of employees, diversity, international human resources, change management, compensation and benefits, employee development, and performance management. They can apply, analyze, synthesize, and evaluate facts and theories; locate, evaluate, and integrate appropriate primary and secondary sources; integrate their ideas with the ideas of others to create new knowledge; recognize and address complex ethical situations; communicate effectively in a variety of scenarios; and operate effectively within a continually changing global environment. Graduates value communication, critical thinking and problem solving, scientific and information literacy, financial literacy, diversity awareness, and knowledge-creation skills and the need to incorporate them in meaningful ways.

Typical Career Paths

- Human Resources Manager
- Benefits Coordinator
- Compensation and Benefits Manager
- Compensation and Benefits Analyst
- Training and Development Manager
- Human Resource Generalist
- Personnel Recruiter
- Human Resource Director
- Training and Development Specialist

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen University part of American Public University System ("Rasmussen") does not pre-screen for enrollment in this program. Any prospective student must consider their history, lifestyle and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field.

Additional Information

The coursework in this program is aligned with the standards of the Society for Human Resource Management (SHRM), and meets the academic requirements to sit for the SHRM Certified Professional (SHRM-CP) exam. Additional requirements, such as work experience in an HR role, may be required to sit for the SHRM-CP exam.

The coursework in this program is aligned with the standards of the Human Resources Certification Institute (HRCI), and meets the academic requirements to sit for the HRCI Associates Professional in Human Resources (aPHR), the Professional in Human Resources (PHR), or the Senior Professional in Human Resources (SPHR) exam. Additional requirements, such as work experience in an HR role, may be required to sit for the PHR or SPHR exams.

A student enrolled in an associate degree program through Rasmussen University Online may dual enroll in this Bachelor’s degree program when enrolled in the final 12 credits needed to complete their enrolled associate’s degree program, and all program acceptance requirements are met. The student may be scheduled to complete Associate program course requirements before taking Bachelor-level courses. The student will graduate from their enrolled associate degree program only when all course requirements specific to that program have been completed. Students who choose this option to dual enroll cannot complete the final 12 credits in the associate degree as self-directed assessments (SDA). Students enrolled in a Rasmussen Certificate or Diploma program are not eligible to dual enroll in this Bachelor’s degree program. Students enrolled in a residential program through a campus are not eligible to dual enroll in this program.

Acceptance Requirements

This is a bachelor-completer program. To be considered for admission, applicants must provide transcripts from an accredited institution of higher learning as recognized by the U.S. Department of Education or the Council for Higher Education Accreditation (CHEA) that demonstrates one of the following:

a. A conferred associate's or bachelor's degree
b. Completion of at least 60 quarter credits or 40 semester credits of college-level coursework with a grade of C- or higher in each course

Students who transfer a conferred associate's or bachelor's degree will receive a block transfer of 91 lower-level quarter credits. In addition, the students will have their transcripts evaluated on a course-by-course basis to determine whether any upper-level credits will also apply to their program. Eligible transfer credits will be applied to their program at the appropriate level.
Students who have fewer than 91 transferable lower-level quarter credits will be required to take additional lower-level coursework. The additional coursework will be determined by Rasmussen based upon a predetermined elective pool appropriate for the program of enrollment.

Degree Requirements Summary

MAN4240 Organizational Behavior Analysis	**LDR5200** Organizational Behavior and Leadership

*Master's courses are 11-weeks in length and are solely offered as competency-base education (CBE) courses.

Human Services

Bachelor of Science Degree

Fully online program

Knowledge Credit Self-Directed Assessment Available

Objective

This non-licensure, online program prepares students for the helping professions, serving diverse populations, and contributing to local and global communities. Designed with input from industry experts, the program is designed to meet the needs of today's human services professionals by providing experiential learning opportunities to immerse students in the multidisciplinary field of human services. By the end of the program, students will be able to adapt theoretical approaches for intervention and treatment to address client needs; serve as ethical and professional leaders in the human services profession; affect change to meet the needs of diverse populations from a local to global level; empower individuals to develop the skills to improve the quality of their lives and communities; and communicate in a clear, concise, and objective manner across multiple modalities to exemplify quality service. Graduates value written and interpersonal communication, critical thinking and problem solving, information and financial literacy, and the significance of diversity awareness skills in academic and workplace situations.

Typical Career Paths

- Child and Youth Services Worker
- Adult Services Worker
- Residential Services Worker
- Community Services and Outreach Manager
- Family Support Worker
- Human Services Administrator

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen University part of American Public University System ("Rasmussen") does not pre-screen for enrollment in this program. Any prospective student must consider their history, lifestyle and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field.

Careers Disclosure: This program is not designed to meet, and does not meet, the educational requirements for professional licensure as a therapist, counselor, social worker, psychologist, or other similar licensed careers, in any state.

Additional Information

This program is not designed to prepare graduates for any state-issued professional license or certification, and has not been approved by any state professional licensing agency. For further information on professional licensing requirements, please contact the appropriate board or agency in your state of residence.

A student enrolled in an associate degree program through Rasmussen University Online may dual enroll in this Bachelor's degree program when enrolled in the final 12 credits needed to complete their enrolled associate's degree program, and all program acceptance requirements are met. The student may be scheduled to complete Associate program course requirements before taking Bachelor-level courses. The student will graduate from their enrolled associate degree program only when all course requirements specific to that program have been completed. Students who choose this option to dual enroll cannot complete the final 12 credits in the associate degree as self-directed assessments (SDA). Students enrolled in a Rasmussen Certificate or Diploma program are not eligible to dual enroll in this Bachelor's degree program. Students enrolled in a residential program through a campus are not eligible to dual enroll in this program.

Acceptance Requirements

This is a bachelor-completer program. To be considered for admission, applicants must provide transcripts from an accredited institution of higher learning as recognized by the U. S. Department of Education or the Council for Higher Education Accreditation (CHEA) that demonstrates one of the following:

a. A conferred associate's or bachelor's degree in a related field, as listed below

b. A conferred associate's or bachelor's degree in an unrelated field

c. Completion of at least 60 quarter credits or 40 semester credits of college-level coursework with a grade of C- or higher in each course

Students who transfer a conferred associate's or bachelor's degree from the following approved field-related programs will receive a block transfer of 90 lower-level quarter credits:

- Human Services
- Child and Family Studies
- Child Life Specialist/Assistant
- Child Psychology
- Early Care and Education
- Early Childhood Education
- Early Childhood Studies
- Early Childhood and Youth Development

- Education and Youth Studies
- Para-Educator
- Criminal Justice

Students with an unrelated associate's or bachelor's degree, or at least 60 eligible quarter credits, maybe considered for this program as specified below:

- Students may be required to take additional lower-level prerequisite courses when equivalent courses have not been completed. Prerequisite courses a student may be required to complete include: **PSY1012** General Psychology and **SYG1000** Introduction to Sociology.
- In addition, the students will have their transcripts evaluated on a course-by course basis to determine whether any upper-level credits will also apply to their program. Eligible transfer creditswill be applied to their program at the appropriate level.

Students who have fewer than 90 transferable lower-level quarter credits will be required to take additional lower-level coursework. The additional coursework will be determined by Rasmussen based upon a predetermined elective pool appropriate for the program of enrollment.

Information Technology Management

Bachelor of Science Degree

Fully online program

Empowered Learning Competency-Based Education Program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of the Rasmussen University part of American Public University System ("Rasmussen") Information Technology Management Bachelor's degree program will be able to apply and synthesize real-world concepts and skills related to information technology. Graduates will be prepared to utilize skills related to information technology, business administration, design infrastructure, systems analysis, project management, implementation, deployment, and organizational support. Courses are project-based and simulate real-world experience with relevant software applications and hands-on labs. Students benefit learning from highly qualified faculty who have practical, in-field experience. Graduates are able to document procedures and comply with relevant policies, regulation standards, and ethical practices. Graduates understand the importance of lifelong learning, transferable skills, and staying current with emerging technology and trends. Graduates will be able to communicate effectively, think critically, and act ethically in a variety of professional contexts. This program is aligned to industry relevant skills and certifications that are sought most by employers, which provides graduates an edge as they enter the career field.

Typical Career Paths

- Network Administrator
- Network Analyst
- Information Technology Manager

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen does not pre-screen for enrollment in this program. Any prospective student must consider their history, lifestyle and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field.

Additional Information

The University will reimburse students to sit for up to three recommended certification exams. Reimbursements will be made only once per certification exam. Students are responsible for paying for any additional attempts.

A student enrolled in an associate degree program through Rasmussen University Online may dual enroll in this Bachelor's degree program when enrolled in the final 12 credits needed to complete their enrolled associate's degree program, and all program acceptance requirements are met. The student may be scheduled to complete Associate program course requirements before taking Bachelor-level courses. The student will graduate from their enrolled associate degree program only when all course requirements specific to that program have been completed. Students who choose this option to dual enroll cannot complete the final 12 credits in the associate degree

as self-directed assessments (SDA). Students enrolled in a Rasmussen Certificate or Diploma program are not eligible to dual enroll in this Bachelor's degree program. Students enrolled in a residential program through a campus are not eligible to dual enroll in this program.

Acceptance Requirements

This is a bachelor-completer program. To be considered for admission, applicants must provide transcripts from an accredited institution of higher learning as recognized by the U. S. Department of Education or the Council for Higher Education Accreditation (CHEA) that demonstrates one of the following:

a. A conferred associate's or bachelor's degree in a related field, as listed below

b. A conferred associate's or bachelor's degree in an unrelated field

c. Completion of at least 60 quarter credits or 40 semester credits of college-level coursework with a grade of C- or higher in each course

Students who transfer a conferred associate's or bachelor's degree from the following approved field-related programs will receive a block transfer of 90 lower-level quarter credits:

- Information Technology
- Information Technology Management
- Information Systems
- Information Systems Management
- Computer Information Systems
- Computer Information Technology
- Management of Information Systems

Students with an unrelated associate's or bachelor's degree, or at least 60 eligible quarter credits, may be considered for this program as specified below:

- Students may be required to take additional lower-level prerequisite courses when equivalent courses have not been completed within the past three (3) years. Prerequisite courses a student may be required to complete include: **CIS1538C** Hardware and Software I, **CIS1648C** Hardware and Software II, **CNT1244C** Introduction to Networks, and **CTS2511** Excel. The Excel course requirement is not subject to a time limit.
- In addition, the students will have their transcripts evaluated on a course-by-course basis to determine whether any upper-level credits will also apply to their program. Eligible transfer credits will be applied to their program at the appropriate level.

Students who have fewer than 90 transferable lower-level quarter credits will be required to take additional lower-level coursework. The additional coursework will be determined by Rasmussen based upon a predetermined elective pool appropriate for the program of enrollment.

Marketing

Bachelor of Science Degree

Fully online program

Empowered Learning Competency-Based Education Program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program can apply concepts in marketing and business management in specialized areas, specifically Digital Marketing and Sales Management. Students will be able to demonstrate the ability to perform market research for effective advertising and corporate communications, all while demonstrating the highest standards of personal and professional ethics. Students will understand how to create and execute marketing strategies and plans that integrate digital marketing and traditional marketing techniques. Students will evaluate the roles of professional sales and sales management, and how these roles relate to marketing. Students will be able to apply, analyze, synthesize, and evaluate facts and theories; locate, evaluate, and integrate appropriate primary and secondary sources; integrate their ideas with the ideas of others to create new knowledge; recognize and address complex ethical situations; communicate effectively in a variety of scenarios; and operate effectively within a continually changing environment. Graduates will value innovation, communication, critical thinking and problem solving, scientific and information literacy, financial literacy, diversity awareness, business acumen, and knowledge creation skills. Graduates of the program will have the capability to incorporate these skills in meaningful ways.

Typical Career Paths

Digital Marketing Specialization:

- Marketing Manager
- Marketing Research Analyst
- Marketing Specialist
- Marketing Coordinator/Assistant
- Digital Content Manager
- Media Coordinator

Sales Management Specialization:

- Sales Manager
- Marketing Research Analyst
- Marketing Manager
- Marketing Specialist
- Event/Catering Coordinator
- Event/Catering Manager
- Product Manager
- Territory Manager

Supply Chain and Logistics Management

Bachelor of Science Degree

Fully online program

Empowered Learning Competency-Based Education Program

Knowledge Credit Self-Directed Assessment Available

Objective

Graduates of this program will learn in-demand skills and strategies in the areas of global logistics, operations, materials management, supply chain, and decision-making. Graduates will be prepared to lead the flow of goods with skills and methodologies valued by employers, including management of systems, process improvement, sustainability, and advanced technologies. Graduates will support their future employers through leadership, cross-functional collaboration, research, problem resolution, and forecasting. Faculty in the Supply Chain and Logistics Management program will provide an experiential learning environment that advances theory to practical application, ensuring graduates are career-ready and prepared for a modern global economy.

Typical Career Paths

- Logistician
- Logistics Manager
- Logistics Analyst
- Logistics Engineer
- Supply Chain Analyst
- Supply Chain Manager
- Operations Manager

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Empowered Learning Competency-Based Education Program

All courses in this program are competency-based education (CBE) courses

Objective

Graduates of this program can apply concepts in Healthcare Administration in their professional partnerships. Graduates will be able to demonstrate the ability to become healthcare leaders by developing strategic plans for organizational change in alignment with socioeconomics, market forces, and trends. Graduates will evaluate the impacts of financial information, healthcare technology systems, and operational processes on patient care and business outcomes. Graduates will value innovation, communication, diverse perspectives, technology and information literacy, financial literacy, and population health management. Graduates of the program will have the capability to incorporate these skills in impactful ways.

Typical Career Paths

- Hospital Administrator
- Clinical Director
- Health Services Manager
- Practice Manager

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen University part of American Public University System ("Rasmussen") does not pre-screen for enrollment in this program. Any prospective student must consider their history, lifestyle and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field.

Additional Information

This program has not been approved by any state professional licensing body, and this program is not intended to lead to any state-issued professional license. For further information on professional licensing requirements, please contact the appropriate board or agency in your state of residence.

Acceptance Requirements

To be considered for admission, applicants must submit an official transcript from an accredited institution of higher learning as recognized by the U. S. Department of Education or the Council for Higher Education Accreditation (CHEA) documenting:

a. A conferred bachelor's degree with a cumulative GPA of 2.50 (no rounding) or higher or

b. A conferred graduate-level certificate, master's degree, or doctoral degree.

Applicants with a bachelor's degree GPA of 2.0 (no rounding) to 2.49 may request an exception to the minimum 2.50 cumulative GPA requirement through the submission of a personal statement in the form of a written essay. Instructions and a scoring rubric for submitting a request for an exception may be obtained from the Admissions Representative. The scoring of the committee will be final.

Degree Requirements Summary

Total Master's Degree Credits	48

Core Courses

Graduate Division

Code	Title	Quarter Credits

Master of Human Resources Management

Master of Human Resources Management (MHRM)

Fully online program

Empowered Learning Competency-Based Education Program

All courses in this program are competency-based education (CBE) courses

Objective

Graduates of this program can apply concepts in Human Resources Management and Organizational Leadership in their professional partnerships. Students will be able to demonstrate the ability to become strategic partners, consultants, and leaders in the field by developing organizational strategies; impact effective change management; positively influence organizational and individual behaviors across the global environment; and maintain legal and compliant practices, all while demonstrating the highest standards of personal and professional ethics. Students will evaluate the roles of Human Resources managers and Organizational Leaders, and how they relate to business strategies. Students will apply, analyze, synthesize, and evaluate facts and theories; integrate appropriate primary and secondary sources; integrate their ideas with the ideas of others to create new knowledge; recognize and address complex ethical situations; communicate effectively in a variety of scenarios; and operate successfully within a continually changing environment. Graduates will value innovation, communication, critical thinking and problem solving, scientific and information literacy, financial literacy, diversity awareness, business acumen, and knowledge creation skills. Graduates of the program will have the capability to incorporate these skills in meaningful ways.

Typical Career Paths

- Director/Manager of Human Resources
- Director of Leadership and Organizational Development
- Director of Compensation and Benefits
- Senior Human Resources Professional or Manager
- Human Resources Consultant
- Director of Training and Development

Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer. Rasmussen University part of American Public University System ("Rasmussen") does not pre-screen for enrollment in this program. Any prospective student must consider their history, lifestyle and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field.

Additional Information

The MHRM program curriculum is fully aligned with the Society for Human Resource Management (SHRM) HR Curriculum Guidebook and academically prepares you to sit for the SHRM-CP and SHRM-SCP exams. In addition, the program academically prepares you to sit for the Professional in Human Resources (PHR) and Senior Professional Human Resources (SPHR) certifications offered by the HR Certification Institute (HRCI).
Additional requirements, such as work experience in an HR role, may be required to sit for the PHR or SPHR exams.

Acceptance Requirements

To be considered for admission, applicants must submit an official transcript from an accredited institution of higher learning as recognized by the U. S. Department of Education or the Council for Higher Education Accreditation (CHEA) documenting:

- A conferred bachelor’s degree with a cumulative GPA of 2.50 (no rounding) or higher or
- A conferred graduate-level certificate, master’s degree, or doctoral degree.

Applicants with a bachelor’s degree GPA of 2.0 (no rounding) to 2.49 may request an exception to the minimum 2.50 cumulative GPA requirement through the submission of a personal statement in the form of a written essay. Master of Public Health

Master of Public Health (MPH)

Fully online program[1]

Empowered Learning Competency-Based Education Program

All courses in this program are competency-based education (CBE) courses

Objective

Graduates of the Master of Public Health (MPH) program obtain practical and theoretical experience in the areas of public health, health informatics and analytics, epidemiology and research methods, environmental health and risk management, public health policy and administration, and population health management. Graduates learn about public health trends, including ways to address local and global healthcare disparities using critical-thinking and evidence-based practices. The diverse and innovative curriculum prepare graduates to meet their career objectives.

Typical Career Paths

- Public Health Agencies at State, Local, and Federal Levels
- Government Public Health Agencies
- Healthcare Providers and Organizations
- Public Safety Agencies
- Human Service and Charity Organizations
- Education and Youth Development Organizations
- Education Institutions
- Recreation and Arts-Related Organizations
- Economic and Philanthropic Organizations
- Environmental Agencies and Organizations

Additional Information

This program is not designed to prepare graduates for any state-issued professional license or certification and has not been approved by any state professional licensing agency. For further information on professional licensing requirements, please contact the appropriate board or agency in your state of residence.

Acceptance Requirements

To be considered for admission, applicants must submit an official transcript from an accredited institution of higher learning as recognized by the U. S. Department of Education or the Council for Higher Education Accreditation (CHEA) documenting:

a. A conferred bachelor's degree with a cumulative GPA of 2.50 (no rounding) or higher or

b. A conferred graduate-level certificate, master's degree, or doctoral degree.

Applicants with a bachelor's degree GPA of 2.0 (no rounding) to 2.49 may request an exception to the minimum 2.50 cumulative GPA requirement through the submission of a personal statement in the form of a written essay. Instructions and a scoring rubric for submitting a request for an exception may be obtained from the Admissions Representative. The scoring of the committee will be final.

In addition to meeting all other entrance requirements, applicants must successfully pass a background check through Rasmussen University part of American Public University System ("Rasmussen")'s chosen third-party vendor. An additional background check may also be required during active enrollment prior to practicum or clinical placement depending on site requirements. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Master of Science in Nursing - Professional Specializations

Master of Science Degree (MSN)

Fully online program

Empowered Learning Competency-Based Education Program

All courses in this program are competency-based education (CBE) courses

Objective

Graduates of this program are prepared for socially just, culturally responsive, advanced nursing practice and to serve as ethical, safe, holistic, and innovative leaders of healthcare. As leaders in nursing, program graduates are prepared to navigate and integrate services across the connected healthcare system as part of an interprofessional collaborative team to promote excellence through cost-effective, accessible care in a rapidly changing, multicultural, global environment. They possess the knowledge and skills required to provide high-quality care, understand industry driven outcomes, and initiate change through leadership and innovation. Graduates develop a professional identity as master's-prepared nurses grounded in a sense of inquiry and committed to lifelong learning while embracing the core values of the nursing profession.

Typical Career Paths

Healthcare Technology, Simulation, and Informatics Specialization:

- Chief Nursing Informatics Officer
- Director of Clinical Informatics
- Clinical Analyst
- Nursing / Clinical Informatics Specialist
- Clinical Educator
- Simulation Education Specialist
- Simulation Coordinator or Technologist
- Director of Innovation
- Innovation Specialist

Nursing Education Specialization:

- Faculty Role
- Leadership Position in an Academic Setting
- Staff Development
- Director of Education

Nursing Leadership and Administration Specialization:

- Chief Nursing Officer
- Director of Nursing
- Nurse Manager
- Nurse Administrator
- Health Policy Strategist
- Nurse Executive
- Nurse Compliance Inspector

Program Accreditation

The master's degree program in nursing at Rasmussen University part of American Public University System is accredited by the Commission on Collegiate Nursing Education (CCNE), 655 K Street NW, Suite 750, Washington, DC 20001, 202-887-6791. http://www.ccneaccreditation.org.

Additional Information

This program and its specializations are not available to residents of all states. Please speak with an Admissions Representative to determine your eligibility for enrollment.

These specializations have not been approved by any state professional licensing body. They are not designed to prepare graduates for any advanced practice nursing license or other state-issued license, including but not limited to the following: Nurse Practitioner (NP), Advanced Practice Nurse (APN), Advanced Practice Registered Nurse (APRN), and Certified Registered Nurse Anesthetist (CRNA). For information on professional licensing requirements, please contact the appropriate board or agency in your state of residence.

Master of Science in Nursing students must demonstrate successful completion of a college-level Statistics course as a prerequisite or corequisite to **NGR5013** and **NGR5101**. When this requirement needs to be completed, the student may complete either **STA1625** Essential Statistics and Analytics or **STA3215** Inferential Statistics and Analytics in a 5.5-week format by either (1) concurrently enrolling as an Individual Progress student their first quarter and completing the Statistics course while taking Nursing courses or (2) enrolling as an Individual Progress student and completing the Statistics course before taking Nursing courses. This course is not eligible for financial aid.

Acceptance Requirements

Applicants must submit an application packet containing:

- A completed program application form.
- A professional essay, as prescribed in the application packet.
- Two professional recommendation forms.
- Applicants must hold a current, unencumbered RN or APRN license issued by a board of nursing in the U.S from the state where the clinical hours will be completed. Rasmussen University part of American Public University System ("Rasmussen") defines a current, unencumbered license as a license that is unexpired and has not been reprimanded, stipulated, suspended, revoked, or has any current or prior disciplinary action, regardless of current ability to practice. When the applicant holds more than one current RN or APRN license, all current licenses must be unencumbered. The student is required to maintain a current, unencumbered RN or APRN license throughout the duration of the program. Failure to maintain a current, unencumbered RN or APRN license throughout the duration of the program will result in administrative withdrawal from the University.
- Official transcript that reflects a Bachelor’s Degree in Nursing with a minimum GPA of 3.0 on a 4.0 scale.

  Applicants with a GPA of 2.8, no rounding, to 2.99 may request an exception to the minimum 3.00 cumulative GPA requirement through the submission of a personal statement in the form of a written essay. Instructions and a scoring rubric for submitting a request for an exception may be obtained from the Admissions Representative. The scoring of the committee will be final.
- When a completed application is submitted, it will be reviewed by the MSN Program Director.

  Applicants who have had their application packet approved must complete the following prior to being deemed eligible for entrance into the program:

  - Rasmussen application and enrollment agreement
  - Complete and pass a criminal background check through Rasmussen’s chosen third-party vendor
  - Any additional program-specific requirements as specified at the time of enrollment

  Entrants will receive written communication from the University confirming acceptance once all acceptance requirements have been met.

  Accepted applicants must complete the Rasmussen Experiential Online Orientation and the School of Nursing Orientation.

Drug testing, proof of current immunizations and screenings, and proof of current CPR certification are not entrance requirements for this program. However, Rasmussen will require proof of current immunizations and proof of current CPR certification 14 days prior to the first day of the quarter of the professional practice experience to remain enrolled in the practicum course. Some practicum sites may have additional requirements such as drug screening, proof of health insurance, photo ID, etc., prior to placement in the professional practice experience. The student is responsible for complying with and paying for any health examinations, immunizations, and drug tests required by the Rasmussen or the practicum site.

In addition to meeting all other admissions requirements, applicants to this program must successfully complete and pass a criminal background check through Rasmussen's chosen third-party vendor. An additional and different background check may also be required during active enrollment prior to practicum or clinical placement depending on site requirements. An additional background check may include components that are different than those originally checked at the time of admissions. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Program Accreditation

The master's degree program in nursing at Rasmussen University part of American Public University System is accredited by the Commission on Collegiate Nursing Education (CCNE), 655 K Street NW, Suite 750, Washington, DC 20001, 202-887-6791. http://www.ccneaccreditation.org.

Additional Information

This program and its specializations are not available to residents of all states. Please speak with an Admissions Representative to determine your eligibility for enrollment.

MSN students must demonstrate successful completion of a college-level Statistics course as a prerequisite or corequisite to **NGR5013** and **NGR5101**. When this requirement needs to be completed, the student may complete either **STA1625** Essential Statistics and Analytics or **STA3215** Inferential Statistics and Analytics in a 5.5-week format by either (1) concurrently enrolling as an Individual Progress student their first quarter and completing the Statistics course while taking Nursing courses or (2) enrolling as an Individual Progress student and completing the Statistics course before taking Nursing courses. This course is not eligible for financial aid.

These program specializations are designed to prepare graduates to apply for an advanced practice nursing license, as well as eligibility to write the associated national certification examination, which may be required by individual state boards of nursing for advanced practice licensure. These specializations have been approved by the Minnesota State Board of Nursing. For further information on professional licensing requirements, please contact the appropriate board or agency in your state of residence.

Determinations regarding professional licensure or certification have been made for all states and territories as displayed below. “Meets” means that the program meets the educational requirements for professional licensure or certification, or that there is no license or certification. “Does Not Meet” means that the program does not meet the educational requirements for professional licensure or certification. “Undetermined” means that Rasmussen University part of American Public University System ("Rasmussen") was unable to

determine, after reasonable efforts, whether the program meets the educational requirements for professional licensure. Other licensure requirements may apply; please verify your eligibility against applicable rules, which can change at any time.

- Meets: AK, AR, AZ, CA, CO, CT, DC, DE, FL, GA, Guam, HI, IA, IL, IN, KY, MA, ME, MI, MN, MO, MS, MT, NC, ND, NE, NH, NJ, NM, Northern Marianas Islands, NV, NY, OH, OK, OR, RI, SC, SD, TN, TX, UT, VA, VT, WA, WI, WV, WY
- Does Not Meet: AL, ID, KS, LA, MD, PA
- Undetermined: American Samoa, Puerto Rico, U.S. Virgin Islands

Prior to beginning Practicum courses, this program requires a one-weekend on-campus Pre-Clinical Immersive Experience.

Acceptance Requirements

Applicants must submit an application packet containing:

- A completed program application form.
- A professional essay, as prescribed in the application packet.
- Two professional recommendation forms.
- Applicants must hold a current, unencumbered RN or APRN license issued by a board of nursing in the U.S from the state where the clinical hours will be completed. Rasmussen defines a current, unencumbered license as a license that is unexpired and has not been reprimanded, stipulated, suspended, revoked, or has any current or prior disciplinary action, regardless of current ability to practice. When the applicant holds more than one current RN or APRN license, all current licenses must be unencumbered. The student is required to maintain a current, unencumbered RN or APRN license throughout the duration of the program. Failure to maintain a current, unencumbered RN or APRN license throughout the duration of the program will result in administrative withdrawal from the University.
- Official transcript that reflects a Bachelor’s Degree in Nursing with a minimum GPA of 3.0 on a 4.0 scale.

  Applicants with a GPA of 2.8, no rounding, to 2.99 may request an exception to the minimum 3.00 cumulative GPA requirement through the submission of a personal statement in the form of a written essay. Instructions and a scoring rubric for submitting a request for an exception may be obtained from the Admissions Representative. The scoring of the committee will be final.

When a completed application is submitted, it will be reviewed by the MSN Program Director.

Applicants who have had their application packet approved must complete the following prior to being deemed eligible for entrance into the program:

- Rasmussen application and enrollment agreement
- Complete and pass a criminal background check through Rasmussen’s chosen third-party vendor
- Any additional program-specific requirements as specified at the time of enrollment

Entrants will receive written communication from the University confirming acceptance once all acceptance requirements have been met.

Accepted applicants must complete the Rasmussen Experiential Online Orientation and the School of Nursing Orientation.

Drug testing, proof of current immunizations and screenings, and proof of current CPR certification are not entrance requirements for this program. However, Rasmussen will require proof of current immunizations and proof of current CPR certification 14 days prior to the first day of the quarter of the professional practice experience to remain enrolled in the practicum course. Some practicum sites may have additional requirements such as drug screening, proof of health insurance, photo ID, etc., prior to placement in the professional practice experience. The student is responsible for complying with and paying for any health examinations, immunizations, and drug tests required by the Rasmussen or the practicum site.

In addition to meeting all other admissions requirements, applicants to this program must successfully complete and pass a criminal background check through Rasmussen’s chosen third-party vendor. An additional and different background check may also be required during active enrollment prior to practicum or clinical placement depending on site requirements. An additional background check may include components that are different than those originally checked at the time of admissions. Any prospective student must also consider

their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Post-Graduate Certificates

School of Nursing

- Nursing – Professional
- Nursing – Nurse Practitioner

Nursing

Post-Graduate Certificate

Fully online program

Empowered Learning Competency-Based Education Program

All courses in these programs are competency-based education (CBE) courses

Objective

Post-Graduate Certificate - Healthcare Technology, Simulation, and Informatics

Students who complete this program are prepared to evaluate health technology to determine current and future healthcare innovations, integrate simulation-based education into various settings, and examine the design and application of healthcare information systems. They possess the knowledge and skills to evaluate usability, functionality, and sustainability for the end-user of healthcare technology and innovations. This advanced knowledge prepares students to examine interoperability for ethical, secure information sharing, and design simulation experiences integrating principles of best practice, and evaluate connected healthcare for healthcare consumers and healthcare team members.

Post-Graduate Certificate - Nursing Education

Students who complete this program are prepared to function in the role of the nurse educator within a variety of settings. The students are equipped with the knowledge and skills to foster positive learning environments, uphold academic standards, develop reliable and valid tools for evaluation and participate in curriculum design and course development. The post-graduate certificate program provides opportunities to explore current trends and impact the future of nursing education.

Post-Graduate Certificate - Nursing Leadership and Administration

Students who complete this program are prepared to integrate meaningful communication into partnerships focused on the patient experience. This post-graduate certificate provides students with the knowledge and skills to advocate for a diverse, resilient workforce, manage resources to sustain healthcare outcomes, and develop a vision to guide change and pursue innovation. They are prepared to navigate complex healthcare environments using evidence, business principles, and self-reflection to guide challenging, multifaceted decisions.

Typical Career Paths

Nursing Education Specialization

- Faculty Role
- Leadership Position in an Academic Setting
- Staff Development
- Director of Education

Nursing Leadership and Administration Specialization

- Chief Nursing Officer
- Director of Nursing
- Nurse Manager
- Nurse Administrator
- Health Policy Strategist
- Nurse Executive
- Nurse Compliance Inspector

Additional Information

These programs are not available to residents of all states. Please speak with an Admissions Representative to determine your eligibility for enrollment.

These Post-Graduate Certificate programs have not been approved by any state professional licensing body. They are not designed to prepare graduates for any advanced practice nursing license or other state-issued license, including but not limited to the following: Nurse Practitioner (NP), Advanced Practice Nurse (APN), Advanced Practice Registered Nurse (APRN), and Certified Registered Nurse

Anesthetist (CRNA). For information on professional licensing requirements, please contact the appropriate board or agency in your state of residence.

Acceptance Requirements

Applicants must submit an application packet containing:

- A completed program application form.
- A professional essay, as prescribed in the application packet.
- Two professional recommendation forms.
- A current curriculum vitae or resume.
- Applicants must hold a current, unencumbered RN or APRN license issued by a board of nursing in the U.S from the state where the clinical hours will be completed. Rasmussen University part of American Public University System ("Rasmussen") defines a current, unencumbered license as a license that is unexpired and has not been reprimanded, stipulated, suspended, revoked, or has any current or prior disciplinary action, regardless of current ability to practice. When the applicant holds more than one current RN or APRN license, all current licenses must be unencumbered. The student is required to maintain a current, unencumbered RN or APRN license throughout the duration of the program. Failure to maintain a current, unencumbered RN or APRN license throughout the duration of the program will result in administrative withdrawal from the University.
- Official transcript that reflects a Master’s or Doctoral degree in Nursing from an accredited nursing program with a minimum GPA of 3.0 on a 4.0 scale.

  Applicants with a GPA of 2.8, no rounding, to 2.99 may request an exception to the minimum 3.00 cumulative GPA requirement through the submission of a personal statement in the form of a written essay. Instructions and a scoring rubric for submitting a request for an exception may be obtained from the Admissions Representative. The scoring of the committee will be final.

When a completed application is submitted, it will be reviewed by the Dean of Post-Licensure Nursing. Once the Dean of Post-Licensure Nursing approves the application packet the following will be required:

- Rasmussen application and enrollment agreement.
- Complete and pass a criminal background check through Rasmussen’s chosen third-party vendor.
- Any additional program-specific requirements as specified at the time of enrollment.

Approved applicants will receive a communication from the University confirming acceptance once all acceptance requirements have been met.

Accepted applicants must complete an online orientation course and will attend a Graduate Nursing Orientation and receive a Graduate Nursing Program Handbook.

Drug testing, proof of current immunizations and screenings, and proof of current CPR certification are not entrance requirements for this program. However, Rasmussen will require proof of current immunizations and proof of current CPR certification 14 days prior to the first day of the quarter of the professional practice experience to remain enrolled in the practicum course. Some practicum sites may have additional requirements such as drug screening, proof of health insurance, photo ID, etc., prior to placement in the professional practice experience. The student is responsible for complying with and paying for any health examinations, immunizations, and drug tests required by the Rasmussen or the practicum site.

In addition to meeting all other admissions requirements, applicants to this program must successfully complete and pass a criminal background check through Rasmussen’s chosen third-party vendor. An additional and different background check may also be required during active enrollment prior to practicum or clinical placement depending on site requirements. An additional background check may include components that are different than those originally checked at the time of admissions. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited

to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Program Requirements Summary

Total Post-Graduate Certificate Credits	16

Choose One of the Following Post-Graduate Certificate Programs

Nursing - Nurse Practitioner

Post-Graduate Certificate

Fully online program

Empowered Learning Competency-Based Education Program

All courses in this program are competency-based education (CBE) courses

Objective

Students who complete the Post-Graduate Certificate – Nurse Practitioner program are prepared to provide socially just, culturally responsive, advanced nursing practice and to serve as ethical, safe, holistic and innovative leaders of healthcare. As advanced practice nurses, they are prepared to navigate and integrate services across the connected healthcare system as part of an interprofessional collaborative team to promote excellence through cost-effective, accessible healthcare in a rapidly changing, multicultural, global environment. They possess the knowledge and skills required to provide high-quality care, understand industry-driven outcomes and initiate change through leadership and innovation.

Typical Career Paths

- Emergency Departments
- Clinics
- Private Practice
- Schools
- Academia

Additional typical career paths for Adult Gerontology Primary Care, Family and Pediatric Primary Care specializations

- Telehealth Services
- Nurse-Managed Health Centers
- Home Health Care
- Community Health Centers
- Mental and Behavioral Health Services

Additional typical career paths for Psychiatric Mental Health specialization

- Hospitals
- Behavioral Health Facilities

Program Accreditation

The Post-Graduate APRN Certificate program at Rasmussen University part of American Public University System is accredited by the Commission on Collegiate Nursing Education (CCNE), 655 K Street NW, Suite 750, Washington, DC 20001, 202-887-6791. http://www.ccneaccreditation.org.

Additional Information

This program is not available to residents of all states. Please speak with an Admissions Representative to determine your eligibility for enrollment.

This Post-Graduate Certificate program is designed to prepare graduates to apply for an advanced practice nursing license, as well as eligibility to write the associated national certification examination, which may be required by individual state boards of nursing for advanced practice licensure. This program has been approved by the Minnesota State Board of Nursing. For further information on professional licensing requirements, please contact the appropriate board or agency in your state of residence.

Determinations regarding professional licensure or certification have been made for all states and territories as displayed below. “Meets” means that the program meets the educational requirements for professional licensure or certification, or that there is no license or certification. “Does Not Meet” means that the program does not meet the educational requirements for professional licensure or certification. “Undetermined” means that Rasmussen University part of American Public University System ("Rasmussen") was unable to determine, after reasonable efforts, whether the program meets the educational requirements for professional licensure. Other licensure requirements may apply; please verify your eligibility against applicable rules, which can change at any time.

- Meets: AK, AR, AZ, CA, CO, CT, DC, DE, FL, GA, Guam, HI, IA, IL, IN, KY, MA, ME, MI, MN, MO, MS, MT, NC, ND, NE, NH, NJ, NM, Northern Marianas Islands, NV, NY, OH, OK, OR, RI, SC, SD, TN, TX, UT, VA, VT, WA, WI, WV, WY
- Does Not Meet: AL, ID, KS, LA, MD, PA
- Undetermined: American Samoa, Puerto Rico, U.S. Virgin Islands

Prior to beginning Practicum courses, this program requires a one-weekend on-campus Pre-Clinical Immersive Experience.

Acceptance Requirements

Applicants must submit an application packet containing:

- A completed program application form.
- A professional essay, as prescribed in the application packet.

- Two professional recommendation forms.
- A current curriculum vitae or resume.
- Applicants must hold a current, unencumbered RN or APRN license issued by a board of nursing in the U.S from the state where the clinical hours will be completed. Rasmussen defines a current, unencumbered license as a license that is unexpired and has not been reprimanded, stipulated, suspended, revoked, or has any current or prior disciplinary action, regardless of current ability to practice. When the applicant holds more than one current RN or APRN license, all current licenses must be unencumbered. The student is required to maintain a current, unencumbered RN or APRN license throughout the duration of the program. Failure to maintain a current, unencumbered RN or APRN license throughout the duration of the program will result in administrative withdrawal from the University.
- Official transcript that reflects a Master's or Doctoral degree in Nursing from an accredited nursing program with a minimum GPA of 3.0 on a 4.0 scale.

  Applicants with a GPA of 2.8 (no rounding) to 2.99 may request an exception to the minimum 3.00 cumulative GPA requirement through the submission of a personal statement in the form of a written essay. Instructions and a scoring rubric for submitting a request for an exception may be obtained from the Admissions Representative. The scoring of the committee will be final.

When a completed application is submitted, it will be reviewed by the Dean of Post-Licensure Nursing. In addition to determining program entrance acceptance, the applicant's transcript will be reviewed to determine whether the student will need to take Nurse Practitioner Core courses as part of the Certificate program or if one or more of these course requirements may be fulfilled with transfer credit.

Once the Dean of Post-Licensure Nursing approves the application packet the following will be required:

- Rasmussen application and enrollment agreement.
- Complete and pass a criminal background check through Rasmussen's chosen third-party vendor.
- Any additional program-specific requirements as specified at the time of enrollment.

Approved applicants will receive a communication from the University confirming acceptance once all acceptance requirements have been met.

Accepted applicants must complete an online orientation course and will attend a Graduate Nursing Orientation and receive a Graduate Nursing Program Handbook.

In addition to meeting all other admissions requirements, applicants to this program must successfully complete and pass a criminal background check through Rasmussen's chosen third-party vendor. An additional and different background check may also be required during active enrollment prior to practicum or clinical placement depending on site requirements. An additional background check may include components that are different than those originally checked at the time of admissions. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

Drug testing, proof of current immunizations, and proof of current CPR certification are not entrance or acceptance requirements for this program. However, students must submit proof of current immunizations, TB testing and standard non-employee requirements to pass the clinical prerequisite course. Based on specialization, the clinical prerequisite course is **NGR6650** Advanced Primary Care of the Adult and Older Adult II, **NGR6234** Reproductive Health of the Family, **NGR6350** Advanced Primary Care of the Pediatric Patient II or **NGR6502** Psychiatric Mental Health Treatment Modalities. Certain clinical sites may also require drug screening, proof of current CPR certification, and/or additional background studies prior to professional practice experience. The student is responsible for complying with and paying for any health examinations, immunizations, and drug tests required by the practicum site and providing proof upon request.

Doctoral Degrees

School of Nursing

- Doctor of Nursing Practice

Doctor of Nursing Practice

Doctor of Nursing Practice (DNP)

Fully online program

Empowered Learning Competency-Based Education Program

All courses in this program are competency-based education (CBE) courses

Objective

Graduates of the Doctor of Nursing Practice program are prepared for advanced nursing practice within the complex, multi-tiered global healthcare environment, serving as collaborative leaders, change agents, role models, and mentors within interprofessional teams. Students develop advanced knowledge and skills necessary to translate evidence into practice, impact organizations and systems, and apply evidence-based practice to improve healthcare outcomes of individuals, families, and populations. Guided by expert faculty and a supportive culture, students complete a culminating DNP Project grounded in implementation science and reflective of the dynamic healthcare environment. Students will select a specialization in either Executive Leadership or Public Health and Policy.

Typical Career Paths

- Chief Nursing Officer

- Director of Nursing
- Nursing Administrator
- Director of Public Health or Policy

This program does NOT academically qualify graduates for advanced practice nursing licensed careers, including but not limited to the following:

- Nurse Practitioner
- Advanced Practice Nurse (APN)
- Advanced Practice Registered Nurse (APRN)
- Certified Registered Nurse Anesthetist (CRNA)

Program Accreditation

The Doctor of Nursing Practice program at Rasmussen University part of American Public University System is accredited by the Commission on Collegiate Nursing Education (CCNE), 655 K Street NW, Suite 750, Washington, DC 20001, 202-887-6791. http://www.ccneaccreditation.org.

Additional Information

This program is not available in all states.

This program is not designed to prepare graduates for any advanced practice nursing license or any other state-issued professional license or certification. This program has not been approved by any state professional licensing agency. For further information on professional licensing requirements, please contact the appropriate board or agency in your state of residence.

Acceptance Requirements

Applicants must submit an application packet containing:

- A completed program application form.
- A professional essay, as prescribed in the application packet.
- Two professional statements of recommendation.
- A current curriculum vitae or resume.
- Applicants must hold a current, unencumbered RN or APRN license issued by a board of nursing in the U.S from the state where the clinical hours will be completed. Rasmussen University part of American Public University System ("Rasmussen") defines a current, unencumbered license as a license that is unexpired and has not been reprimanded, stipulated, suspended, revoked, or has any current or prior disciplinary action, regardless of current ability to practice. When the applicant holds more than one current RN or APRN license, all current licenses must be unencumbered. The student is required to maintain a current, unencumbered RN or APRN license throughout the duration of the program. Failure to maintain a current, unencumbered RN or APRN license throughout the duration of the program will result in administrative withdrawal from the University.
- Official transcript with a minimum GPA of 3.0 that reflects either:

  1. A Master’s in Nursing degree from an accredited nursing program, or
  2. A baccalaureate degree in Nursing from an accredited program (CCNE, ACEN, or CNEA) and a Master’s degree in a related field.

  There is no appeal process available to request waiver of requirement.

- All applicants must provide a letter of attestation reflecting the total number of post-baccalaureate practicum hours earned. The signed attestation must be on the university letterhead where the post-baccalaureate clinical hours were obtained.
- Complete a virtual interview with the Dean of Nursing for DNP and MSN

When a completed application is submitted, it will be reviewed by the Dean of Nursing for DNP and MSN.

In addition to determining program entrance acceptance, the review will determine the number of total clinical/practicum hours earned at the post-baccalaureate level that will apply to the program. This will determine the remaining practicum course hours required to complete the program.

Once the Dean of Nursing for DNP and MSN approves the application packet and determines the number of practicum course hours required to complete the program, the following will be required:

- A Rasmussen application and enrollment agreement
- A criminal background screening
- Any additional program specific requirements as specified at the time of enrollment

Approved applicants will receive a communication from Rasmussen confirming acceptance.

Accepted applicants must complete an online orientation course and will attend a Doctor of Nursing Practice Orientation and receive a Graduate Nursing Program Handbook.

Drug testing, proof of current immunizations and screenings, and proof of current CPR certification are not entrance requirements for this program. However, Rasmussen will require proof of current immunizations and proof of current CPR certification 14 days prior to the first day of the quarter of the professional practice experience to remain enrolled in the practicum course. Some practicum sites may have additional requirements such as drug screening, proof of health insurance, photo ID, etc., prior to placement in the professional practice experience. The student is responsible for complying with and paying for any health examinations, immunizations, and drug tests required by the Rasmussen or the practicum site.

In addition to meeting all other acceptance requirements, applicants to this program must successfully complete and pass a criminal background check through Rasmussen's chosen third-party vendor. An additional and different background check may also be required during active enrollment prior to practicum or clinical placement depending on site requirements. An additional background check may include components that are different than those originally checked at the time of admissions. Any prospective student must also consider their history, lifestyle, and future actions before enrolling in this program, and carefully consider whether their actions may prevent them from attaining employment in the field they choose to pursue. Additional requirements, such as industry-specific training may be required to obtain employment in this field. Applicants for careers in this field may be subject to pre-employment screenings such as, but not limited to, criminal background checks, and drug/or alcohol testing. Employment decisions, including whether to require background checks and other tests, are made at the discretion of the employer.

1. In addition to meeting all other program requirements (including completion of all core and specialization coursework), students must demonstrate a minimum of 1,000 hours of post-baccalaureate practice experiences in order to graduate from the Doctor of Nursing Practice program. This requirement may be met through the combination of any of the following:
    1. Practice experience completed prior to enrollment into the DNP program, as recognized by Rasmussen.
    2. Completion of clinical hours that are part of courses taken while enrolled in this program;
    3. Completion of DNP program Practicum courses NGR7910LL, NGR7920LL, and/or NGR7930LL. Each Practicum course ranges from 1 credit to 5 credits. Students who are required to complete Practicum credits choose how they want to be scheduled amongst each of the three Practicum areas (Leadership, Healthcare Information and Systems Technology, and Population and Global Health).
2. All specialization courses are comprised of both online lecture hours and clinical hours. Refer to the course description for additional information.

Course Descriptions

Course Descriptions

Overview

Florida's Statewide Course Numbering System

Courses in this catalog are identified by prefixes and numbers that were assigned by Florida's Statewide Course Numbering System (SCNS). This numbering system is used by all public postsecondary institutions in Florida and by participating nonpublic institutions. The major purpose of this system is to facilitate the transfer of courses between participating institutions. Students and administrators can use the online SCNS to obtain course descriptions and specific information about course transfer between participating Florida institutions. This information is at the SCNS website at http://flscns.fldoe.org.

Each participating institution controls the title, credit, and content of its own courses and recommends the first digit of the course number to indicate the level at which students normally take the course. Course prefixes and the last three digits of the course numbers are assigned by members of faculty discipline committees appointed for that purpose by the Florida Department of Education in Tallahassee. Individuals nominated to serve on these committees are selected to maintain a representative balance as to type of institution and discipline field or specialization.

The course prefix and each digit in the course number have a meaning in the SCNS. The listing of prefixes and associated courses is referred to as the "SCNS taxonomy." Descriptions of the content of courses are referred to as "statewide course profiles."

Example of Course Identifier

Prefix	Level Code (first digit)	Century Digit (second digit)	Decade Digit (third digit)	Unit Digit (fourth digit)	Lab Code
ENC	1	1	0	1	
English Composition	Lower (Freshman) Level at this institution	Freshman Composition	Freshman Composition Skills	Freshman Composition Skills 1	No Lab Component in this course

General Rule for Course Equivalencies

Equivalent courses at different institutions are identified by the same prefixes and same last three digits of the course number and are guaranteed to be transferable between participating institutions that offer the course, with a few exceptions, as listed below in *Exceptions to the General Rule for Equivalency.*

For example, a freshman composition skills course is offered by 84 different public and nonpublic postsecondary institutions. Each institution uses "ENC_101" to identify its freshman composition skills course. The level code is the first digit and represents the year in which students normally take the course at a specific institution. In the SCNS taxonomy, "ENC" means "English Composition," the century digit "1" represents "Freshman Composition," the decade digit "0" represents "Freshman Composition Skills," and the unit digit "1" represents "Freshman Composition Skills I."

In the sciences and certain other areas, a "C" or "L" after the course number is known as a lab indicator. The "C" represents a combined lecture and laboratory course that meets in the same place at the same time. The "L" represents a laboratory course or the laboratory part of a course that has the same prefix and course number but meets at a different time or place.

Transfer of any successfully completed course from one participating institution to another is guaranteed in cases where the course to be transferred is equivalent to one offered by the receiving institution. Equivalencies are established by the same prefix and last three digits and comparable faculty credentials at both institutions. For example, ENC1101 is offered at a community college. The same course is offered at a state university as ENC2101. A student who has successfully completed ENC1101 at a Florida University System institution is guaranteed to receive transfer credit for ENC2101 at the state university if the student transfers. The student cannot be required to take ENC2101 again since ENC1101 is equivalent to ENC2101. Transfer credit must be awarded for successfully completed equivalent courses and used by the receiving institution to determine satisfaction of requirements by transfer students on the same basis as credit awarded to the native students. It is the prerogative of the receiving institution, however, to offer transfer credit for courses successfully completed that have not been designated as equivalent. NOTE: Credit generated at institutions on the quarter- term system may not transfer the equivalent number of credits to institutions on the semester-term system. For example, 4.0 quarter hours often transfers as 2.67 semester hours.

The Course Prefix

The course prefix is a three-letter designator for a major division of an academic discipline, subject matter area, or subcategory of knowledge. The prefix is not intended to identify the department in which a course is offered. Rather, the content of a course determines the assigned prefix to identify the course.

Authority for Acceptance of Equivalent Courses

Section 1007.24(7), Florida Statutes, states: Any student who transfers among postsecondary institutions that are fully accredited by a regional or national accrediting agency recognized by the United States Department of Education and that participate in the statewide course numbering system shall be awarded credit by the receiving institution for courses satisfactorily completed by the student at the previous institutions. Credit shall be awarded if the courses are judged by the appropriate statewide course numbering system faculty committees representing school districts, public postsecondary educational institutions, and participating nonpublic postsecondary educational institutions to be academically equivalent to courses offered at the receiving institution, including equivalency of faculty credentials, regardless of the public or nonpublic control of the previous institution. The Department of Education shall ensure that credits to be accepted by a receiving institution are generated in courses for which the faculty possess credentials that are comparable to those required by the accrediting association of the receiving institution. The award of credit may be limited to courses that are entered in the statewide course numbering system. Credits awarded pursuant to this subsection shall satisfy institutional requirements on the same basis as credits awarded to native students.

Exceptions to the General Rule for Equivalency

Since the initial implementation of the SCNS, specific disciplines or types of courses have been excepted from the guarantee of transfer for equivalent courses. These include courses that must be evaluated individually or courses in which the student must be evaluated for mastery of skill and technique. The following courses are exceptions to the general rule for course equivalencies and may not transfer. Transferability is at the discretion of the receiving institution.

1. Courses not offered by the receiving institution.
2. For courses at non-regionally accredited institutions, courses offered prior to the established transfer date of the course in question.
3. Courses in the 900-999 series are not automatically transferable, and must be evaluated individually. These include such courses as Special Topics, Internships, Apprenticeships, Practica, Study Abroad, Theses, and Dissertations.
4. Applied academics for adult education courses.
5. Graduate courses.
6. Internships, apprenticeships, practica, clinical experiences, and study abroad courses with numbers other than those ranging from 900-999.
7. Applied courses in the performing arts (Art, Dance, Interior Design, Music, and Theatre) and skills courses in Criminal Justice (Academy Certificate courses) are not guaranteed as transferable. These courses need evidence of achievement (e.g., portfolio, audition, interview, etc.).

Courses at Non-Regionally Accredited Institutions

The SCNS makes available on its home page (http://flscns.fldoe.org) a report entitled "Courses at Nonregionally Accredited Institutions" that contains a comprehensive listing of all nonpublic institution courses in the SCNS inventory, as well as each course's transfer level and transfer effective date. This report is updated monthly.

Questions about the SCNS and appeals regarding course credit transfer decisions should be directed to the Campus Executive Director or to the Florida Department of Education, Office of K-20 Articulation, 325 West Gaines Street, Room 1232, Tallahassee, Florida 32399-0400. Special reports and technical information may be requested by calling the SCNS office at (850) 245-0427 or at http://flscns.fldoe.org.

Rasmussen University part of American Public University System Course Numbering System

Those courses offered by the University that are not part of the Florida Statewide Course Numbering System are identified by a unique six-character code.

Program Length

A Rasmussen University student enrolled in 11-week traditional quarters is considered full time when they are taking 12 or more credits per quarter. While a student is considered part time when the student is taking less than 12 credits per quarter, a part-time student typically takes an average of 8 credits per quarter. To calculate program length, the University divides the total program credits by 12 for full-time students and 8 credits for part-time students.

A student enrolled in a graduate degree program is considered full time when they are taking a minimum of 8 credits per quarter and part time at 4 credits. To calculate the length of a graduate program, the University divides the total program credits by 8.

Credit Definition

Credit Hour – The unit by which Rasmussen University measures its coursework. The number of credit hours assigned to a course usually reflects the combination of class, laboratory, and/or internship hours required in the course. Rasmussen University follows the quarter system, and awards one credit for each 10 clock hours of lecture, 20 clock hours of laboratory, or 30 clock hours of internship, externship, or practicum contained in a quarter, or the equivalent in directed study. Students are expected to complete at least two hours of out-of-class preparation and completion of assignments for each hour they spend in class.

Clock Hour – Equal to 50 minutes of instruction.

Prerequisites and Corequisites

In order to take a course that lists a prerequisite, the student must have successfully completed the prerequisite course prior to registering for the post-requisite course. A student who drops, withdraws, or fails a prerequisite course will be withdrawn from any future courses that classify that course as a prerequisite.

A course that lists a corequisite must be taken concurrently with the corequisite course in the same quarter for 11-week courses or the same term for 5.5-week courses. In the case of a course with multiple components (i.e., L/LL suffix) identified as a corequisite, the courses must be taken simultaneously as they are considered a single course in the assignment of final grades.

A course listed as a pre- or corequisite must either be previously completed with a passing grade or taken concurrently with the course listing the pre- or corequisite.

Prerequisites and corequisites may be waived in unusual circumstances only with the approval of the Dean or Associate Vice President. It is the responsibility of students for knowing and adhering to pre- and corequisite requirements.

ACG Accounting

ACG1022 Financial Accounting I

40 hours, 4 credits

This course introduces accounting concepts and their business relationships. The accounting cycle is covered, focusing on general journal transactions and financial statements for service and merchandising businesses. Other topics covered include inventory valuation methods, bank reconciliation, and internal control concepts.

ACG1033 Financial Accounting II

40 hours, 4 credits

Financial Accounting II will expand on the concepts in Financial Accounting I. The corporate accounting concepts covered include treatment of fixed assets and receivables, issuing and investing in debt and equity securities, financial and cash flow analysis, and decision making. The course emphasizes financial statement analysis for corporations.

Prerequisite: **ACG1022**

ACG2062C Computer Focused Principles

40 hours, 3 credits

This course is designed to teach students to accomplish common accounting functions through the use of the computer. Students will learn to maintain accounting records on a computer, input and process information and produce standard accounting reports. This course covers common accounting functions such as maintaining accounts receivable, accounts payable, and general ledgers.

Prerequisite: **ACG1022**; or **ACG2209**

ACG2209 Principles of Financial Accounting for Managers

40 hours, 4 credits

This course introduces financial and managerial accounting concepts as they relate to decision making by business managers. A comprehensive study of the financial statements, internal controls, and cost-volume profit analysis is the focus of this course. Students will also prepare a master budget with individual budget components for a company.

ACG2680 Financial Investigation

40 hours, 4 credits

This course introduces students to the field of fraud examination, including how fraud occurs and is detected within financial statements as well as strategies for prevention. Students will analyze common motivations that lead to fraudulent financial reporting. This course will also discuss corporate ethics and laws related to financial reporting.

Prerequisite: **ACG1033**

ACG2930 Accounting Capstone

20 hours, 2 credits

This course will be a synthesis of the accounting, business, and General Education courses offered in the Accounting Associate’s Degree program. A study of emerging issues and timely topics in financial accounting, professional ethics, and transferable skills necessary for the success of an accounting graduate, and accounting careers will be discussed. This course focuses on research, case analysis, and interpersonal communication and class presentations.

Prerequisite: Expected to be the final lower-level core course completed

ACG3080 Managerial Accounting Theory and Practice

40 hours, 4 credits

This course provides a survey of the theory and application of managerial accounting principles. Topics include cost behaviors, production cost methods, data processing, economic analysis, budgeting, and management and financial control.

Finance Bachelor's Degree Only - Prerequisites: **ACG2209**; **CTS2511**

ACG3085 Advanced Auditing Concepts and Standards

40 hours, 4 credits

This course includes a study of auditing standards and procedures and an integration of professional ethics within the accounting discipline. Emphasis is placed on analytical thinking, evaluation of business risks, internal control practices and a thorough study of Sarbanes-Oxley and other relevant laws and regulations as they relate to publicly traded companies.

ACG3205 Risk Management for Accountants

40 hours, 4 credits

This course will cover topics such as culture and appetite, risk categorization, risk strategy, risk evaluation, enterprise risk management, audit functions, treatment, reporting, and decision-making.

Prerequisites: **ACG3080**; **ACG3085**

ACG3246 Intermediate Financial Accounting I

40 hours, 4 credits

This course provides an overview of the conceptual accounting framework and accounting principles. Topics include applying accounting elements that impact the financial reporting of revenue, expenses, current assets, long-term assets, intangible assets, and other assets. Students will learn how to prepare and present complex components of the income statement and balance sheet. Additionally, students will gain knowledge of generally accepted accounting principles to prepare financial reporting information that impacts internal and external stakeholders.

Prerequisite: **ACG1033**

ACG3256 Intermediate Financial Accounting II

40 hours, 4 credits

This course focuses on presenting the liability and equity financial reporting elements found on the balance sheet. This course also explores recent accounting guidance related to revenue and expense recognition, liability presentation on the balance sheet, and the preparation of the statement of cash flows. Students will also have opportunities to apply the concepts of financial accounting and reporting standards by constructing financial statements such as the income statement, balance sheet, and statement of cash flows.

Prerequisite: **ACG3246**

ACG3357 Accounting for Business Managers

40 hours, 4 credits

This course provides a review of accounting objectives and their relation to business, as well as a survey of the theory and application of managerial accounting principles. Topics include cost behaviors, production cost methods, data processing, economic analysis, budgeting, and management and financial control.

ACG3481 Cost Accounting

40 hours, 4 credits

This course introduces cost concepts and behaviors, including cost analysis for decision making and fundamentals of cost management. Other topics covered include the study of manufacturing cost accounts and reports, job order costing, and processing costing.

ACG4402 Accounting Information Systems

40 hours, 4 credits

This course introduces students to the fundamental concepts, technologies, and applications of Accounting Information Systems (AIS). Students will explore topics including the conceptual foundations of AIS, data analytics in accounting, information management, risk and control systems, ERP integration, and AIS development life cycles.

ACG4619 Corporate and International Accounting

40 hours, 4 credits

Corporate and International Accounting builds on intermediate financial reporting concepts and explores advanced financial principles, processes, and procedures related to interim and segment reporting, leases, and taxes. The development and challenges concerning international accounting standards are also studied. Further, this course focuses on mergers and acquisitions and foreign currency translations as they relate to corporate reporting and financial decision-making.

Prerequisites: **ACG3246**; **ACG3256**

ACG4724 Career Planning for Professionals

30 hours, 3 credits

This course is the study of career planning for professionals. It places focus on planning for your career after your degree. Topics covered will be interviewing, setting career goals and objectives, options for professional certification, and continuing education. This course will prepare students for choosing what path is best for them to take after graduation and how to navigate that path.

ACG4885 Bachelor's Accounting Capstone

30 hours, 3 credits

This course will be a synthesis of the accounting, business, and General Education courses offered in the Accounting BS Degree program. A study of emerging issues and timely topics in financial accounting, professional ethics, and transferable skills necessary for the success of an accounting graduate. This course focuses on research, case analysis, interpersonal communication, and class presentation.

Prerequisite: Expected to be the final upper-level core course completed

ACG5500 Accounting for Business Analysis

40 hours, 4 credits

This course provides an overview of accounting and financial statements used in the decision-making process. Students will interpret various accounting and financial statements to analyze an organization's financial performance and develop investment forecasts. This course equips students with accounting and financial strategies to evaluate how decisions impact the financial position of the organization.

ADV Advertising

ADV3100C Brand Development

60 hours, 4 credits

In this course, students will explore the practical and emotional connections to a brand in regard to the overall communication strategy. Students will develop strategies to connect the identity or experience of a product or service to a target market, from the design of visual elements to shaping the customer experience. Students will also examine various methods of tracking and evaluating brand effectiveness.

Prerequisite: **GRA3200C**

AMH American History

AMH2030 United States History: 1900 to the Present

40 hours, 4 credits

This course provides an overview of the history of the United States from the 20th century to the present day. The political, social, and economic aspects of this time will be explored amid a variety of human cultures, values, and perspectives within the United States.

AMH3304 Visions of America Since 1945

40 hours, 4 credits

Since the end of World War II, popular culture has become an especially significant aspect of American history and an important element in many of our lives. Consequently, this course will explore the ways in which popular culture has represented and mediated conflicts and tensions post-World War II. Through this lens, issues of gender and family relationships, as well as class and racial politics, will be discussed. The dual role of television as a reflective and manipulative force in the new suburban family and the role Hollywood films played in the popular culture will be examined.

AML American Literature

AML3041 American Literature

40 hours, 4 credits

This course surveys authors, genres, and movements in American literature from 1865 to the present, including representative works of realism, naturalism, modernism, and post-modernism/post- structuralism. Students will engage in critical readings of exemplary literary texts from a diverse group of authors that have influenced American literature since the Civil War. Students will analyze how these works of literature exemplify particular historical moments in U.S. history, as well as how they communicate pertinent cultural issues such as gender, race, ethnicity, class, religion, sexual identity, community, region, and nation. In their study of the broad range of American fiction, poetry, and drama since 1865, students will analyze literary, aesthetic, and critical developments.

Prerequisites: **ENC1101**; **LIT2000**

APA Applied Accounting

APA1500 Payroll Accounting

40 hours, 4 credits

This course is designed to equip individuals with the knowledge and skills to manage payroll processes, including calculating wages, deductions, and taxes, while ensuring compliance with relevant regulations.

Prerequisite: **ACG1022**

ART Art

ART1200C Sketching for Designers

40 hours, 3 credits

Students in this course will develop fundamental sketching skills as they relate to graphic design. The course will progress from basic shapes and contour lines to gesture and perspective drawing. Developing observation skills for line, form, light, shadow, and detail will be emphasized. Students will also learn how to both give and receive design critiques.

ART1204 Art Appreciation

40 hours, 4 credits

Students will examine the historical, social, and technological factors that contribute to understanding the function and meaning of art in this course. Using a global and thematic approach, students will be introduced to the basic elements of art, while learning about a full range of media used to make art, as well as the fundamental concepts of art criticism. Western and non-Western art is represented, with a strong emphasis on a global perspective in relation to culture, communication, politics, and economics.

ART3477 Art in the World and the Workplace

40 hours, 4 credits

The course explores the roles of music, poetry, prose, and visual art in our modern workplace and home lives. Topics include the benefits of art in the home, community, and workplace. These include creativity, focus, happiness, networking opportunities, curiosity, idea-generation, reduction of stress, and increase of morale. The course is an historical perspective of the role and application of art, up to and including the 21st century.

AST Astronomy

AST2002 Introduction to Astronomy

40 hours, 4 credits

Examines astronomical phenomena and concepts, including the solar system, stars and galaxies, planetary motions, atoms and radiation, and the origin and evolution of the universe.

B Developmental Education

B080 Reading and Writing Strategies

40 hours, 4 credits

This course develops students' reading and writing skills in preparation for college-level coursework. Through review of grammar, punctuation, and the writing process, students will enhance their ability to compose sentences, paragraphs, and short essays. The study of active-reading strategies will provide students with the tools necessary for comprehending collegiate-level texts.

Prerequisite: Placement determined by Rasmussen University entrance placement exam score

B087 Practical Math

40 hours, 4 credits

Practical mathematics deals with numerical literacy (making sense of numbers), statistical literacy (making decisions with probabilities), data visualization (interpreting graphs and understanding percentages), and analytical reasoning (understanding basic algebra), and applications to real-world word problems in algebra and statistics. This course covers topics in problem solving and number theory.

Prerequisite: Placement determined by Rasmussen University entrance placement exam score

BSC Biological Sciences

BSC2093C Human Anatomy and Physiology I

60 hours, 5 credits

In this course, students will begin their study of the structure and function of the human body. They will examine topics including basic chemistry and cell biology, tissues, and the body's integumentary, skeletal, muscular, nervous, and sensory systems. They will also learn and apply medical terminology. Students will complete laboratory exercises coordinated with course content, including microscopic observation, experimentation, study of anatomical models, and dissection activities.

Pre- or corequisite: **PHA1500**; otherwise, None

BSC2094C Human Anatomy and Physiology II

60 hours, 5 credits

In this course, students will continue their study of human anatomy and physiology that began in Human Anatomy and Physiology I. They will examine the circulatory, immune and lymphatic, respiratory, digestive, urinary, endocrine, and reproductive systems. Students will complete laboratory exercises coordinated with course content, including microscopic observation, experimentation, study of anatomical models, and dissection activities.

Prerequisite: **BSC2093C**

BUL Business Law

BUL2241 Business Law

40 hours, 4 credits

This course presents fundamental principles of law applicable to business transactions. The course relates to areas of legal environment of business and sales contracts. Principles of law that apply to government, regulations, commercial paper, property, bailments, agency, and business organizations are addressed.

BUL3266 Business Law and Finance

40 hours, 4 credits

In this course, students will learn the fundamentals of law applicable to business transactions, the types of business organizations, property laws, wills, trusts, estate planning, bankruptcy, creditor and debtor relationships, commercial paper, securities regulation, contracts, and other areas of the Uniform Commercial Code and business law. Students will analyze how these concepts and principles impact financial managers and financial analysts.

BUL4060 Business Law and Ethical Behavior

30 hours, 3 credits

This course reviews fundamental principles of law applicable to business transactions, and provides an overview of ethical concerns that arise in the world of business. Students will apply the basic principles of contract law, partnerships, and agency relationships to business activities. Public and private law are addressed. Critical thinking and ethical analysis are key areas of focus throughout the course.

CCJ Criminology and Criminal Justice

CCJ1000 Introduction to Criminal Justice

40 hours, 4 credits

This is an introductory course designed to provide foundational knowledge of the criminal justice system. The course explores the different components of the criminal justice system and the role of professionals involved with emphasis on professional communications. It examines the sources and the purposes of law as an effort to regulate behavior in an organized society. Topics include elements of a criminal offense, the function and purpose of law enforcement, the structure of the judicial system, and the steps of a criminal case from investigation to conviction and appeal. It also examines the purposes and types of punishments and unique aspects of the juvenile justice system.

CCJ1153 Criminology: Motives for Criminal Deviance

40 hours, 4 credits

This course examines the social and behavioral issues involved in the study of crime as a social phenomenon. Included is an explanation of what crime is, what causes crime, and the various techniques for measuring the amounts and characteristics of crime and criminals.

CCJ1382 Field Communications in Criminal Justice

20 hours, 2 credits

This course emphasizes the skills of both oral and written communication with emphasis on writing formats used by justice professionals. Students will acquire the skills necessary to effectively communicate within diverse communities.

Prerequisite: **CCJ1000**

CCJ2170 Practical Psychology for the Criminal Justice Professional

40 hours, 4 credits

This course explains how principles of psychology relate to the criminal justice field. It explores emotional intelligence as it relates to the criminal justice professional and those impacted by the system. This course describes the strategies of professionals to manage stress and identify biases that may impact decision making. It explains how psychology supports better responses to witnesses and victims, and how psychological approaches are used to manage and treat correctional populations.

Prerequisites: **CCJ1000**; **PSY1012**

CCJ2685 Domestic Violence

40 hours, 4 credits

This course examines violence in the family, social and legal relations within families, theories and solutions on family violence, survivors and the consequences of victimization, legal responses, the role of the police, when law enforcement responds, recognizing child abuse, recognizing elder abuse, associated crimes and stalking, and domestic homicide.

Prerequisite: **CCJ1000**

CCJ2930 Contemporary Issues in Criminal Justice Capstone

40 hours, 4 credits

This course is designed to measure understanding of the history of the U.S. criminal justice system, the principles of criminal law, the evolution of law enforcement, the structure of the court and correctional systems, and the elements of the juvenile justice system. It provides opportunities to demonstrate mastery of related concepts and skills.

Prerequisites: **CCJ1000**; Expected to be the final lower-level core course completed

CCJ3362 Communication Strategies for Criminal Justice Professionals

50 hours, 5 credits

This course allows opportunities to learn about best practices in communication within the criminal justice field. This includes de-escalation techniques, crisis intervention and conflict resolution skills. This course includes the analysis of the impact of the mainstream and social media on the criminal justice system.

CCJ3500 Applied Criminology

40 hours, 4 credits

This course analyzes the predominant criminological theories and then evaluates how these theories are utilized in the three criminal justice subsystems: law enforcement, courts, and corrections. This course provides opportunities to demonstrate application of criminological theories to the policy, procedures, and practices within the criminal justice system.

Pre- or corequisite: **CCJ1000**

CCJ3667 Victims in Criminal Justice

40 hours, 4 credits

This course explores the importance of the victim in the criminal justice system's process. The victim's role in the criminal justice process, and movements and legislation regarding victims' impact on judicial proceedings are examined. A variety of crimes and types of victims are explored.

CCJ3695 Diversity and Special Populations in Criminal Justice

40 hours, 4 credits

This course provides historical and contemporary definitions of diverse and special populations within the criminal justice system. This course allows for the evaluation of programs, policies, and procedures utilized by each subsystem in working with these populations from an individual and multi- system approach. Finally, the course provides opportunities to evaluate emerging trends and practices in working with diverse and special populations within the field of criminal justice.

CCJ3700 Research Methods in Criminal Justice

40 hours, 4 credits

This course will explore the basic steps of conducting research. Students will explore the nature of research and the research techniques specific to the criminal justice field. Students will become familiar with research terminology and the ethics involved in various research designs. To complete the course, students will design and simulate their own research project.

CCJ4015 Values-Based Leadership in Criminal Justice

40 hours, 4 credits

This course will address some unique ethical challenges that leaders in criminal justice and related fields may confront. Topics of discussion and evaluation include delegation and abdication of duties; use of power, manipulation, and influence; discretion and responsibility to act; and the role of personal character in service professions.

CCJ4450 Criminal Justice Leadership and Management

40 hours, 4 credits

This course will familiarize students with common management theory and practice in criminal justice organizations. The application of management techniques to all areas of criminal justice will be explored, along with leadership and administration techniques and issues particular to criminal justice. Organizational philosophy, visioning, planning, and goal development will be examined.

CCJ4461 Evidence-Based Practices in Criminal Justice

40 hours, 4 credits

This course will examine the use of evidence-based practices in the criminal justice system. It provides opportunities to evaluate how law enforcement, the courts, and the correctional system have transitioned to data-driven policies, procedures, and practices. This course also examines how evidence-based practices support a multi-system approach in the criminal justice system.

CCJ4528 Fundamentals of CJ Supervision: What CJ Leaders Need to Know

40 hours, 4 credits

This course will examine important issues for leaders in every area of criminal justice, such as budgeting and funding sources in public service agencies; personnel recruitment, selection, hiring, promotion, employee motivation, conflict, coaching, and discipline.

CCJ4542 Criminal Justice Seminar

50 hours, 5 credits

This course provides students the opportunity to demonstrate mastery of the program objectives. Each objective will be explored in terms of relevance to the contemporary application of concepts and practices.

Prerequisites: **CCJ3700**; Intended to be taken in the student's final term

CCJ4617 Mental Health and Substance Abuse in Criminal Justice

40 hours, 4 credits

This course provides opportunities to evaluate and analyze the intersection of mental health and substance abuse and how together they impact the criminal justice system. This course examines unique responses from the perspective of law enforcement, the courts, and corrections. The importance of collaboration and multi-disciplinary approaches is also studied. This course provides opportunities to analyze emerging trends and challenges to addressing mental health and substance abuse issues in the criminal justice system.

CCJ4931 Critical Issues in Criminal Justice

40 hours, 4 credits

This course will examine critical issues of law enforcement, the courts, and corrections. The role of the media and their impact on the development of criminal justice policy is explored. The course provides an evaluation of societal efforts to address discriminatory practices in the criminal justice system.

CDA Computer Design/Architecture

CDA1202 Foundations of Software Design

40 hours, 3 credits

This course introduces students to software design and development principles. Students will examine Software Development Life Cycle (SDLC) methodologies and frameworks, as well as common architecture styles used in software systems. Emphasis is placed on applying design techniques and tools to create efficient, maintainable solutions. Students will classify logic structures and use them in program design and through practical exercises, they will develop flowcharts and pseudocode to plan modular, reusable components. The course also covers evaluation methods to ensure software designs are correct, complete, and aligned with requirements.

CDA1330C Operating Systems

60 hours, 4 credits

In this course, students learn how operating systems such as Windows, Linux, and the Mac OS X are fundamental components of all computing systems. This course explores how operating systems are responsible for managing the running processes as well as the sharing of system resources, such as the printers and storage over network infrastructures. The course provides an in-depth exploration of the design and implementation of modern operating systems. Topics include the evolution of operating systems, scheduling, paging, input/output devices, virtual memory, files, synchronization, and security.

Prerequisite: **CIS1648C**

CDA2725C Systems Analysis and Design

40 hours, 3 credits

This course covers analysis and design of information systems including networks, server environments, and business solutions. Students will be exposed to different projects that have complex systems and be asked to create analysis and design documents and diagrams. Improving the efficiency of systems will be a primary goal of this course.

Prerequisite: **CNT1244C**

CDA3315C Fundamentals of Enterprise Architecture

60 hours, 4 credits

This course is the study of business enterprise analysis, design, planning, and implementation. It places focus on working with stakeholders, modeling business data flows and interfaces, determining the information security risk for an organization, and re-engineering business processes. Topics include current software development methodologies, business process modeling, and enterprise information security methodologies. This course will prepare students to work with stakeholders to ensure that information technology is in alignment with the goals of the business.

Prerequisites: **COP1532C**; **QMB1311C**

CDA3515C Information Technology Systems Analysis

60 hours, 4 credits

The emphasis of this course is to define the problem, determine the requirements, and develop a team to support solving complex business problems. The systems analysis life cycle is presented as techniques for systematically developing a plan to resolve current-state challenges.

Pre- or corequisite: **CNT1244C**; or CompTIA Network+ certification

CDA3626C Information Technology Systems Design

60 hours, 4 credits

The main objective of this course is to take the business requirements and design effective IT solutions to fulfill those needs. A holistic approach to hardware and software integration is researched. The student is provided with methodologies for employing critical thinking skills to solve complex business problems.

Pre- or corequisite: **CDA3515C**

CDA4859C E-Commerce Development

60 hours, 4 credits

This course is the study of e-commerce development. The topics covered will include research, planning, and design; creation of an e-commerce site Front End; database design, creation, and the use of stored procedures; creation of an e-commerce site Back End; testing, deployment, and maintenance of a completed e-commerce site. This course will prepare students to gain substantial insights to the processes involved in creating optimal e-commerce web sites.

Prerequisites: **CEN3350C**; **CGS1820C**

CEN Computer Software Engineering

CEN1400 Mobile Application Development

40 hours, 3 credits

In this course, students will design and develop mobile applications using current technologies such as HTML, CSS, JavaScript, and jQuery Mobile. They will learn how to enhance mobile apps with lists, forms, grids, and panels, as well as how to implement widgets and web storage. After conducting thorough testing and assembling documentation, students will publish a web-based mobile application to a public site.

Prerequisite: **COP1801**

CEN3350C Software Engineering

60 hours, 4 credits

This course will help students understand key concepts related to software engineering practices and how to develop software applications. It will examine the different phases of the software development life cycles and equip students with tools to develop and capture application requirements, design, testing, deployment, and maintenance procedures. Students will also gain the knowledge about managing the whole software project considering constraints, budget, and resources. Students will gain knowledge about the different types of software projects with a special emphasis on the iterative and agile approaches.

CEN4071C Software Security

60 hours, 4 credits

This course covers the importance of implementing proper security within software solutions. Topics include data cryptography techniques, secure coding practices and techniques, application of software security to the software development life cycle, and the evaluation of software security compliance and industry standards. This course also covers web and mobile app security practices and techniques.

CEN4200C Malware Reverse Engineering

60 hours, 4 credits

This course provides students with tools and methodology to deduce the design of malware, to determine how something works, discover data used by malware, and to aid in the analysis of malware via disassembly and/or decompilation. The ability to understand malware of unknown origin or malware for which source code is unavailable is a critical skill within the cyber operations field. Use cases include malware analysis and auditing of closed-source software.

Prerequisite: **MAD3300**

CEN4614C Quality Assurance in Software Engineering

60 hours, 4 credits

This course is the study of quality assurance for software systems and applications. Topics covered will be configuration management; software testing products, processes, and techniques; defect management, tracking, and reporting; and industry standards related to software quality and information assurance. This course will prepare students for the activities that provide confidence to stakeholders that a software solution will fulfill its quality requirements.

CET Computer Engineering Technology

CET2522C Cisco Network Routing and Switching

40 hours, 3 credits

This course prepares students to work with routers and switches in a Local Area Network. Students will learn how to configure and troubleshoot Cisco switches and routers. Concepts in the course will include routing protocols like RIPv1, RIPv2, OSPF, VLANs and VLAN routing in both IPv4 and IPv6 networks, as well as DHCP, DNS, and NAT. This course will help prepare students to take the Cisco Certified Entry Network Technician (CCENT) Exam by using a variety of hands-on labs and simulations to understand router and switch configurations by emphasizing practical, real-world principles.

Prerequisite: **CNT1244C**

CET2660C Networking Security

40 hours, 3 credits

This course introduces students to general security concepts including authentication methods, cryptography basics, and common network attacks and how to safeguard against them. Students will learn to create secure communications for remote access, email, the Web, directory and file transfer, and wireless data. They will understand the concepts of physical security and disaster recovery. This course uses a combination of lectures, demonstrations, discussions, online assignments, and hands-on labs to reinforce the course materials.

Prerequisite: **CNT1244C**

CGS Computer General Studies

CGS1240 Computer Applications and Business Systems Concepts

40 hours, 3 credits

This course teaches students basic to advanced computer concepts and skills, including creating and modifying Word documents, designing databases, spreadsheet creation and analysis, using the internet and e-commerce tools, and creating presentations with enhanced features and web tools.

CGS1820C Introduction to HTML

40 hours, 3 credits

This course will introduce students to the basics of HTML. Students will learn the latest in HTML, conforming to XML, and recent HTML coding standards. The course is a step-by-step approach for learning how to create, format, and enhance a webpage using HTML.

CHM Chemistry

CHM1100C General Chemistry

50 hours, 4 credits

This course introduces students to the principles of chemistry with concepts and applications to understanding the world around us. Chemical topics covered in the course include basic chemical nomenclature, measurements, atomic theory, bonding, stoichiometry, states of matter, solutions, acids and bases, and basic chemical reactions. This course includes a virtual lab to practice and apply chemistry concepts.

CIS Computer Science & Information Systems

CIS1308 Logic and Troubleshooting

40 hours, 4 credits

This course provides students with a strong base of critical thinking and troubleshooting methodologies for assessing situations and applying logical reasoning to various scenarios. The materials contained within this course will assist in building the student's ability to form reasonable hypotheses for solving problems of a technical nature.

CIS1538C Hardware and Software I

60 hours, 4 credits

This course will introduce students to the installation, configuration, maintenance, and troubleshooting of end-user personal-computer hardware (including laptops and mobile devices) and the software used to support the hardware. Additional topics covered include the relationship between computer hardware and software, computer networks and peripherals, virus protection, and maintenance planning. Finally, students will learn about and conduct the responsibilities of a professional PC technician. To reinforce the materials in this course, the instructor will assign direct hands-on projects to be performed in a physical or remote lab setting. This course helps prepare students to take the first part of the A+ certification exam.

CIS1648C Hardware and Software II

60 hours, 4 credits

This course is a continuation of Hardware and Software I, which prepared students for the first part of the CompTIA A+ exam. This course will prepare students for the second part of the CompTIA A+ exam, focusing on operating systems, file management, security, and troubleshooting. Using the Windows operating system, students will learn how to set up printers, file sharing, and troubleshoot problems related to the same. Operating system security and methods to prevent intrusion will be discussed. Concepts of virtualization and other common operating systems will be introduced.

Prerequisite: **CIS1538C**

CIS1710C Administering Windows Server

60 hours, 4 credits

This course provides introductory coverage to implement, administer, and troubleshoot information systems that incorporate servers in a networked computing environment. In addition, this course will emphasize the use of proper server roles based on business requirements. This course uses a combination of lectures, demonstrations, discussions, online assignments, and hands-on labs to reinforce course materials.

Prerequisite: **CIS1648C**

CIS2647C Windows Directory Services

60 hours, 4 credits

In-depth coverage of the skills necessary to install, configure, and administer Network Directory service.

Prerequisite: **CIS1710C**

CIS2911 Information Technology Capstone

20 hours, 2 credits

The student gets to showcase the culmination of their skills in this capstone course. All areas of their learnings will be tested and applied through a project that is modeled on a real-world scenario. Management skills, project management, resource allocation, policies, and procedures are but a few of the skills that will be applied by the student to successfully complete this course. The intent of this course is to develop a portfolio-worthy project designed to demonstrate the knowledge of the student to improve their career standing within their current position or with a potential employer.

Prerequisite: Expected to be the final lower-level core course completed

CIS2960C Network Systems Administration Capstone

30 hours, 2 credits

This course summarizes key learning throughout the student's program. Students apply what they've learned by solving a real-world programming problem. This problem-solving exercise encompasses timelines, deadlines, team-building, and communication issues.

Prerequisite: Expected to be the final lower-level core course completed

CIS2990C Software Application Development Capstone

50 hours, 3 credits

In this course, students will apply what they have learned throughout the program to a real-world, business-oriented problem. The final project requires students to analyze a business case, design a solution, and implement that solution. This project integrates critical thinking, analysis, planning, and communication skills.

Prerequisite: Expected to be the final lower-level core course completed in the student's final quarter

CIS3086 Principles of Cyber Security

30 hours, 3 credits

This course introduces students to a detailed examination of a systems-wide perspective for cyber security. Students will be introduced to security strategic planning processes, which includes an examination of policies, procedures, and staffing functions necessary to organize and administrate ongoing security functions in an organization.

Prerequisite: **ISM2321**

CIS3139 Security Risk Assessment

40 hours, 4 credits

This course explores the elements of risk management essential to the business environment. This course will develop the rationale for risk-management strategies and examine the environments in which they operate. Students will learn, analyze, and evaluate approaches to measuring and managing risks in various business environments.

CIS3240C Security Controls

50 hours, 4 credits

This course develops basic understandings behind regular monitoring and reporting of business processes to guarantee data security. Topics include analyzing fundamental business processes, describing objectives behind trust service principles, creating security controls to meet trust service principle objectives, generating control test plans, designing monitoring techniques, and designing reporting techniques.

Prerequisites: **CNT3003**; **CNT3126**

CIS3332 Cyber Security Policy Analysis

40 hours, 4 credits

This course includes a discussion and assignments on security policies that can be used to help protect and maintain a network, such as acceptable use policy, password policy, email policy, and internet policy. Topics include organizational behavior and crisis management, cyber security policies, organizational change, and cyber security training.

Prerequisite: **CIS3086**

CIS3417 Regulatory and Legal Compliance

40 hours, 4 credits

This course provides an overview of the legal, institutional, and regulatory frameworks that businesses should put in place to address information security. This course identifies the laws, rules, and procedures for all individuals accessing and using an organization's IT assets and resources.

Prerequisite: **CIS3086**

CIS3550C Information Technology Business Administration

50 hours, 4 credits

Students completing the IT Business Administration course should be familiar with several business aspects of the IT organization and how it drives value for the organization at large. Several areas of business are covered from basic accounting principles, rudimentary management topics, and a survey of information technology hierarchy structures. Business ethics, hiring practices, and making sound financial decisions are described. The student will come away with a broad view of how the development and support of organizations co-exist and function within the larger organizational context.

CIS3574C Organizational Policy

40 hours, 3 credits

This course will allow students to learn and strengthen their understanding of organizational policies and frameworks. Students will apply these learned policies in complex business cases by coming up with innovated solutions to support what is required in today's workplace. Students will expand and collaborate with partners where needed and use these organizational policies to drive and transform the thinking in their organization when change is required.

CIS4005C IT Operations Management

40 hours, 4 credits

The purpose of the IT Operations Management course is to give students a numeric perspective on the IT department. Students will learn how to develop standard operating procedures, create support metrics, and apply these to the proper operation of the IT department. This course will also cover how to properly read and analyze network utilization reports and properly staff various IT departments based on proposed call volume and support needs. Utilization of helpdesk tracking tools and implementation of a tracking system will also be covered to ensure an IT department has the proper foundation to start metrics reporting.

Prerequisite: **ISM4470C**

CIS4028C Cryptography and Traffic Analysis

60 hours, 4 credits

This course covers how cryptanalysis theory can be used to address confidentiality, integrity, and availability (CIA) in an enterprise environment. This course also covers how enterprise organizations can decipher internal data communications for traffic analysis and reporting. Topics include private and public key cryptography, digital signatures, secret sharing, security protocols, formal methods for analyzing network security, electronic mail security, firewalls, intrusion detection, internet privacy, and public key infrastructures.

CIS4039 Auditing Information Technology Infrastructure

40 hours, 4 credits

This course covers the principles, approaches, and methodology in auditing information systems to ensure the processes and procedures are in compliance with pertinent laws and regulatory provisions, especially in the context of cyber security.

CIS4162C Enterprise Storage Management

60 hours, 4 credits

This course will cover various methods of data management. Students will learn to design and implement Storage Area Networks, Disk Arrays, and data backup. Students will cover topics such as data de-duplication, cloud backup, and managing both physical and virtual data backup environments. Topics also covered are maintaining both on-site and off-site data backups and creating a backup policy.

Prerequisite: **CNT3126**

CIS4189C Risk Management and Business Continuity

50 hours, 4 credits

This course covers how to properly analyze risks within an IT department. Topics covered are disaster recovery planning, business continuity planning, and how to create risk analysis documents for all applications assessing their long-term viability and backup solutions. Students will also perform business impact analysis to analyze key areas that are most vulnerable when a risk-based situation has occurred. Students will develop a disaster recovery plan and learn how to process and implement each phase of the plan they have developed.

CIS4222C Managing Security Awareness

50 hours, 4 credits

This course identifies key components of a security awareness program including continuous improvement strategies. This includes three major steps in the development of an IT security awareness and training program. Topics include designing the program, developing awareness strategies and training material, and implementing the security awareness program.

CIS4385C Computer Forensics

40 hours, 3 credits

This course examines computer literacy and criminal investigation legal issues regarding seizure and chain of custody, and technical issues in acquiring computer evidence. Popular file systems are examined. Reporting issues in the legal system are discussed.

Prerequisite: **CIS4028C**

CIS4412C Information Technology Security

60 hours, 4 credits

In this course, students examine the basic concepts of information systems security. Students strengthen their knowledge of IS security and learn various components required to ensure the system’s security around both hardware and software.

CIS4456 Hacker Techniques, Tools, and Applications

40 hours, 4 credits

This course is an introduction to hacking tools and incident handling. Areas of instruction include various tools and vulnerabilities of operating systems, software, and networks used by hackers to access unauthorized information. This course also addresses incident handling methods used when information security is compromised.

Prerequisite: **CIS4028C**

CIS4784C Big Data

60 hours, 4 credits

This course is the study of Big Data and its importance and application in today’s competitive markets. Big Data topics covered include infrastructural technologies, architectures, and processes to collect, store, process, analyze, and visualize huge amounts of data. This course will prepare students to begin developing software solutions that transform Big Data into actionable intelligence that informs business decisions.

Prerequisite: **COP3703C**

CIS4836C Web Analytics

60 hours, 4 credits

This course is the study of contemporary business analytics tools. It places a focus on determining the most appropriate product or technology for building data visualizations and dashboards. Topics include identifying analytical tools, highlighting various input and output data formats, identifying different types of data visualizations, and constructing business-oriented dashboards. This course will prepare students to be able to create data visualizations and dashboards based on provided business requirements.

Marketing Bachelor's Degree Only - Prerequisite: **MAR3128**

CIS4929C IT Management Capstone

60 hours, 4 credits

Covering all areas of the IT Management curriculum, this comprehensive project gives students a framework, based on real-world situations to exercise critical thinking, problem solving, leadership and project-management skills.

Prerequisite: Expected to be the final upper-level core course completed

CIS4955C Cyber Security Capstone

60 hours, 4 credits

This course includes a summative assessment project that covers all areas of the Cyber Security Bachelor's degree curriculum. This comprehensive project gives students a framework, based on real-world situations to exercise critical thinking, problem solving, leadership, and security skills. This course presents the student with a data breach scenario requiring completion of a Root Cause Analysis Report (RCA) along with an Incident Response Management Plan (IRP). This course also prepares a student for the System Security Certified Practitioner (SSCP) certification exam.

Prerequisite: Expected to be the final upper-level core course completed

CJC Corrections

CJC1000 Introduction to Corrections

40 hours, 4 credits

This course provides a general overview of U.S. corrections, jails and prisons, institutional procedures, and recent innovations in offender treatment. Students are introduced to correctional philosophies, practices, and procedures. The concepts of retribution and rehabilitation are examined.

Prerequisite: **CCJ1000**

CJC4600 Advanced Correctional Practices

40 hours, 4 credits

This course critically examines practices of the correctional system. This includes the applicable laws and challenges of corrections. This course also examines how the goals of sentencing are achieved and promote safety and behavior modification in institutional and community corrections. This course provides opportunities to defend the practices of the correctional system in reducing recidivism and promoting public safety.

CJE Law Enforcement

CJE1006 Policing in America

40 hours, 4 credits

Students will examine the theoretical underpinnings of police work in the United States, including its historical roots, its current status, and the trends that will shape its future. They will explore the problems and solutions facing citizens, patrol officers, administrators, and agencies. They will also cover contemporary practices such as community-oriented policing, problem-oriented policing, and directed patrol. In investigating these topics, students will develop skills in critical thinking and problem-solving.

Prerequisite: **CCJ1000**

CJE1233 Drugs and Crime

40 hours, 4 credits

The course will focus on the physical, psychological, and sociological aspects of drug and alcohol abuse. Treatment and prevention of chemical use and abuse will be explored. In addition, legislative and policy efforts to prevent and control drug manufacturing, sales, and use will be analyzed. Finally, the public health implications of drug use will be explored.

Prerequisite: **CCJ1000**

CJE1775 Special Populations: Law Enforcement Response

40 hours, 4 credits

This course will explore the role of law enforcement in serving special populations in our communities. It focuses on mental illness, substance abuse, and other disabilities. Students will examine law enforcement’s work with victims and explore cultural diversity in policing.

Prerequisite: **CJE1006**

CJE2172 Juvenile Justice: Delinquency, Dependency, and Diversion

40 hours, 4 credits

This course provides a comprehensive examination of the juvenile justice system through historical, legal, developmental, and sociological perspectives. Students will explore the system’s evolution, including landmark Supreme Court rulings and the philosophical underpinnings distinguishing juvenile from adult justice. The course investigates how developmental stages, family dynamics, and social environments contribute to youth behavior and justice involvement. Students will assess current policies and practices in addressing delinquency, status offenses, gang involvement, and victim-offender dynamics. Emphasizing a forward-thinking approach, the course culminates in the design of evidence-based, restorative, and collaborative interventions that aim to rehabilitate rather than punish, promoting long-term community well-being and youth reintegration.

Prerequisite: **CCJ1000**

CJE2422 Communication and Problem-Solving in Law Enforcement

40 hours, 4 credits

Students will explore the various communication and problem-solving skills required to be successful in law enforcement. They will examine effective interpersonal skills, written skills, and communication techniques appropriate for the incident or audience. Topics covered in this course are crisis intervention and crisis management techniques, the importance of effective listening, and interviewing skills. Students will demonstrate proper report writing skills as they prepare a variety of law enforcement-related documents and explore use of technology by law enforcement officers.

Prerequisite: **CJE1775**

CJE2566 Ethics and Psychology for Law Enforcement Professionals

30 hours, 3 credits

This course will examine the ethical dilemmas encountered by law enforcement professionals. Students will analyze the roles of discretion, bias, and professionalism in the field. The course will also examine sources and effects of stress in law enforcement and explore preparation for and management of stress.

Prerequisite: **CJL1381**

CJE2990 Capstone for Law Enforcement

20 hours, 2 credits

This course will focus on demonstrating mastery of the knowledge and skills needed for a successful law enforcement career. Students will evaluate criminal laws, procedures, and professional standards, and will reexamine learning about diverse community populations. Students will also review licensing requirements, and the application and hiring processes to prepare for their future career.

Prerequisite: Students must be enrolled in the Law Enforcement program and in their last or second to last quarter.

CJE4444 Crime Prevention

40 hours, 4 credits

This course will explore the goals and types of various crime-prevention strategies. Physical environments and crime, neighborhood crime prevention, the media, and crime displacement will be explored. The course will examine persons and conditions associated with high rates of deviance.

CJK Law Enforcement Skills

CJK2081 Traffic Enforcement: Managing Traffic Violators

40 hours, 3 credits

Students will learn the skills for legal, effective, and safe traffic enforcement on city streets and major thoroughfares. They will examine implications of traffic codes and relevant court decisions through practical application. They will explore criminal and drug interdiction strategies through effective traffic enforcement, and special considerations in impaired driver enforcement. They will learn to operate enforcement tools such as speed detection devices and alcohol sensory equipment. Students will examine the writing and articulation of enforcement decisions and potential court outcomes of enforcement actions.

Prerequisite: **CJE2566**; or enrolled in Certificate program

CJK2124 Firearms I: Fundamentals of Armed Police Response

40 hours, 2 credits

Students will learn the fundamental principles of marksmanship for firearms competency, and will progress to police-specific skills needed for proficiency in firearms use. They will practice the care and maintenance of firearms.

Prerequisite: **CJE2566**; or enrolled in Certificate

CJK2247 Firearms II: Tactics for Combat Gunfighting

40 hours, 2 credits

Students will build upon fundamental principles of marksmanship to gain firearms skills unique to law enforcement and officer survival. They will examine considerations related to use of force and deadly force, focusing on decision-making in force levels and articulation of force decisions. They will implement tactical considerations throughout training, including combat firearms skills and mental preparation for use of deadly force. Students will experience scenario-based and simulation training to help them synthesize shooting skills with proper use-of-force decisions in real-time situations.

Prerequisite: **CJK2124**

CJK2339 Use of Force I: From Empty Hands to TASERs

40 hours, 2 credits

Students will learn fundamental fighting principles, including technical and psychological aspects of physical combat. They will use tactical positioning, command presence, verbalization skills, and interpretation of body language in confrontational situations. Compliance and control techniques will be taught, ranging from empty-hand techniques, ground defense, and weapon retention to application of common police officer tools such as handcuffs, chemicals, batons, and electronic control devices. They will explore concepts of physical fitness and mental survival.

Prerequisite: **CJE2566**; or enrolled in Certificate program

CJK2406 Use of Force II: Winning Violent Confrontations

40 hours, 2 credits

Students will build on fundamental police defensive tactics to synthesize physical knowledge with use-of-force decision-making. They will learn decision-making skills in ambiguous use-of-force incidents, demonstrating their ability to assess situations, respond appropriately, apply reasonable force, and articulate their reasoning. They will use practical application exercises and scenario- based training to maximize training effects.

Prerequisite: **CJK2339**

CJK2563 Crime Scene Response: The Real CSI

60 hours, 3 credits

Students will examine the investigation processes for crime scenes and crashes. They will explore issues of scene security, evidence collection, handling and processing, and documentation. They will discuss legal issues of crime scene processing, and review basic investigation and reporting forms and the reporting requirements established by statute and policy.

Prerequisite: **CJE2566**; or enrolled in Certificate program

CJK2640 Minnesota Traffic Code

20 hours, 2 credits

Students will explore motor vehicle laws and statutes related to traffic enforcement in Minnesota. They will examine rules pertaining to driving, equipment, motor vehicle insurance, and driver licensing. They will identify unique circumstances and vehicles in traffic law, including commercial motor vehicles, implements of husbandry, boats, and all-terrain vehicles. Students will also review alcohol and drug impairments to driving, and enforcement of related laws.

Prerequisite: **CCJ1000**; or enrolled in Certificate program

CJK2724 Minnesota Criminal Code

20 hours, 2 credits

Students will examine Minnesota criminal code and related statutes to gain a thorough understanding of peace officer responsibilities under Minnesota law. They will review specific Minnesota crimes and their elements, levels of offense, and the proper handling of suspects involved in various crimes. Charging, defenses, and sentencing will also be explored.

Prerequisite: **CCJ1000**; or enrolled in Certificate program

CJK2881 Patrol Practicals: Handling Calls in Progress

80 hours, 4 credits

Students will synthesize learning from all areas of training. They will respond to realistic calls for service and apply their knowledge of law enforcement to achieve resolution of a variety of common policing scenarios. They will discuss fire, arson, and explosives response. They will learn principles of good judgment and decision-making, and will articulate their enforcement choices and the potential legal implications of each. Students will also learn fundamental driving principles for routine and high-speed pursuit driving, and will apply these principles in laboratory exercises. They will discuss the legal and policy aspects of police pursuits and effective call response.

Prerequisites: **CJK2081**; **CJK2124**; **CJK2339**; **CJK2563**; or enrolled in Certificate program

CJL Law and Process

CJL1381 Criminal Law and Procedures: Crime and the Courtroom

40 hours, 4 credits

This course introduces definitions and terminology of criminal law and procedural elements of prosecution of a criminal case. Students will examine prosecution of criminal cases in the federal and state court system. They will study crimes against persons, property, against public order, public health and safety, and defenses that may be raised in a criminal case. This course will prepare students to explore suspect's procedural rights at all steps of a criminal case.

Prerequisite: **CJE1006**

CJL1552 Introduction to Criminal Law

40 hours, 4 credits

This course examines substantive criminal law and elements of criminal behavior. Students will assess circumstances that may excuse criminal responsibility and common law principles. Students will also differentiate types of person and property crimes and examine crimes against the state and moral values.

Prerequisite: **CCJ1000**

CJL1747 Applied Criminal Procedures

40 hours, 4 credits

This course provides an examination of procedural requirements for the judicial processing of criminal offenders. The concepts of evidence sufficiency, standards of proof, and due process are explored. Students will examine the Bill of the Rights and its applicability to the criminal justice process.

Prerequisite: **CJL1552**

CJL3297 Constitutional Law

40 hours, 4 credits

This course challenges students to examine the complexities of the Bill of Rights and the application of those rights to the criminal justice system. The analysis of case studies will allow students to apply criminal law and procedure to fieldwork examination of criminal justice issues.

Prerequisite: **CJL1381**; or **CJL1747**

CNT Computer Networks

CNT1020C Networking Fundamentals for Programmers

40 hours, 3 credits

In this course, students will learn the basics of network architectures, the OSI model, common Internet protocols, and IP addressing. They will analyze network communications and transmissions and identify common distributed architectures such as peer-to-peer, client-server, and cloud computing and its deployment and service modules. Security strategies and protocols will be covered, as well as network connectivity issues and troubleshooting techniques.

CNT1244C Introduction to Networks

40 hours, 3 credits

This course introduces the foundation to understanding computer networks, including structure and function, components, and models of Local Area Networks (LAN), Wide Area Networks (WAN), and the internet. Students will learn the fundamentals of ethernet concepts like IP addressing, protocols, hardware, and network topologies. Students will learn basic configuration of network devices and apply basic troubleshooting techniques. A variety of hands-on activities and simulations will be used.

Pre- or corequisite: **CIS1648C**

CNT3003 Advanced Network Security

50 hours, 4 credits

This course offers an in-depth study of current network security technologies that help maximize investment in foundational network security strategies. This course also aligns to the Cisco CCNA certification objectives, covering protocols used to implement network security services, firewall security using ASA ACL and Modular Policy Framework, and on- and off-site secure communications protocols. In addition, this course takes an in-depth look at network defense concepts and techniques. Students will examine the tools, techniques, and technologies used in the securing of information assets. Topics covered include intrusion detection, virtual private networks (VPN), incident response strategies and planning, wireless network security, and securing data in a cloud.

Prerequisite: **CET2522C**; or CCENT certification

CNT3126 Advanced Networking

50 hours, 4 credits

This course offers an in-depth study of current networking technologies. Topics include OSI model, communication protocols, routing protocols, WAN architecture (ATM, VPN, MPLS, and hybrid networks), Wireless and QoS. Topics include enterprise network needs to deliver business objectives, layered security defense configuration, advanced routing technologies, threat intelligence platforms, hardening server operating systems, and business systems.

Prerequisite: **CNT1244C**; or MCSA Networking with Windows Server 2016 certification

CNT3229 Asset Management

30 hours, 3 credits

This course is designed to teach students best practices in inventory management. Topics include hardware and software audits, asset tracking systems, software licensing, and service contracts management.

Prerequisite: **CNT3348**

CNT3348 Infrastructure and Hardware

50 hours, 4 credits

This course covers hardware design and planning for medium-to large-scale data center operations. Topics include data center design (power, cooling, space planning), server racks, storage array systems, fiber channel, iSCSI, SAS, and SATA. Students will be able to design a data center for both operational efficiency (Green IT), and to provide adequate fault tolerance and capacity for anticipated growth.

Prerequisite: **CIS1648C** Hardware and Software II; or CompTIA A+ certification (both exams)

CNT3777 Virtualization

50 hours, 4 credits

This course offers an in-depth study of current virtualization technologies and discusses strategies and approaches for virtualization of servers, clients, and applications. Topics include vSwitch, distributed virtual switching (DVS), server-side vs. client-side desktop virtualization (SBC & VDI) and virtual appliances. Students will gain hands-on experience with deploying and managing virtual systems and applications.

Prerequisites: **CNT1244C**; **CNT3126**

CNT4283 Enterprise Application Support

40 hours, 4 credits

This course introduces students to the challenges of supporting complex enterprise applications like e-commerce and ERP systems. Topics include application architecture concepts (front-end, middleware, back-end, and client/server); working with application specialists; application performance monitoring (end-to-end); security, support and maintenance; and disaster recovery.

Prerequisite: **CIS4189C**

CNT4437 Service Management

40 hours, 4 credits

The topics of client service at the appropriate levels are covered. Service-level agreements (SLAs) and their financial implications are detailed so the student can help make informed decisions and priorities based on organizational needs.

COM Communication

COM1002 Introduction to Communication

40 hours, 4 credits

The course will introduce students to basic models and theories of the communication process. Students will learn about a variety of elements involved in communication. They will also explore how factors such as race, ethnicity, age, socioeconomic status, and gender influence communication. Students will focus on developing an awareness of the effects of various types of communication on themselves and others. They will also develop practical skills for improving their ability to communicate in personal, social, and professional contexts. Specific topics will include perception, self-concept, verbal and non-verbal communication, effective listening, and communicating in culturally diverse settings.

Prerequisite: Passing grade in Developmental Education coursework or placement determined by Rasmussen University entrance placement exam score

COM1388 Communicating in Your Profession

40 hours, 4 credits

This course teaches communication theory and skills for developing professional documents and oral presentations for audiences in diverse workplace communities and disciplines. To equip students to communicate effectively, this course emphasizes thinking and writing within global contexts, in collaborative situations, and in various electronic environments.

Prerequisite: Passing grade in Developmental Education coursework or placement determined by Rasmussen University entrance placement exam score

COM1865 Locating and Evaluating Information

20 hours, 2 credits

This course provides a broad overview of information literacy concepts by introducing skills for locating, evaluating, and ethically using a variety of resources for a specific purpose. The course begins with the information cycle and the production of information, followed by the identification of a topic and research question, and the selection, evaluation, and integration of sources into an annotated bibliography.

COM3278 Explorations of Human and Computer Languages

40 hours, 4 credits

In this non-computer programming course, students will explore the relationship, including similarities and differences, between human language and programming language. Students will synthesize these languages by exploring shared and unshared characteristics including meaning, logic, and how they are learned. Students will address real-life debates around programming languages and HTML, as well as imagine how programming languages and HTML may acts as a global lingua franca, or common language, in the future.

COP Computer Programming

COP1044C Introduction to Object-Oriented Programming

40 hours, 3 credits

This course will provide students with an understanding of the basic concepts of object-oriented programming including encapsulation, inheritance, and polymorphism. Students will explore the uses of classes, including attributes, behaviors, and the methods that can be applied to them. Programs will be developed and implemented utilizing object-oriented software for design modeling.

Prerequisite: **CDA1202**

COP1350C C++ Programming

60 hours, 4 credits

This course is designed to teach the student C++ programming utilizing object-oriented terminology. C++ expressions, decisions, and loops within the C++ realm are explored and practiced. This course ends with an analysis of functions and classes and how these elements are used in different programming projects.

Prerequisite: **COP1044C**

COP1532C Database Fundamentals for Programmers

40 hours, 3 credits

This course covers relational databases and their efficient design. The course will include the definition of tables and indexes, logical and physical design, the E-R model, and transaction management. The use of Structured Query Language (SQL) will be emphasized.

COP1801 JavaScript

40 hours, 3 credits

In this course, students learn how to effectively create webpages using the JavaScript programming language. Students will gain exposure to programming, debugging, and testing webpages created with this language. This course builds upon HTML principles.

Prerequisite: **CGS1820C**

COP2268C Java Programming

40 hours, 3 credits

Students will work with the Java programming language to learn about Java bytecode programs and how they are executed within a Java virtual machine. Students will study class libraries and gain an understanding of how they perform important computing tasks, how they interact with computer hardware and operating systems, and how they handle deficiencies encountered on computing platforms. Concepts such as graphical user interfaces, multimedia development, and web programming will be explored as well as the use of Java programming in the development of applications for mobile devices.

Software Application Development Associate’s Degree Only - Prerequisite: **COP1044C**

COP2350C Advanced C++ Programming

50 hours, 4 credits

This course is a continuation of C++ Programming. Topics that will be covered in this course include design analysis, inheritance, and the use of templates in programming. Students will examine input/ output issues as well as advanced topics in C++ programming, and a brief look at how C++ can start to be utilized in game programs is covered.

Prerequisite: **COP1350C**

COP2456C Microsoft C# Programming

40 hours, 3 credits

Students will work with the C# programming language and gain an understanding of how it can be used to handle important computing tasks. Concepts such as graphical user interfaces, multimedia development, and web programming will be explored.

Prerequisite: **COP1044C**

COP2570C Programming Data Structures

50 hours, 4 credits

This course is an introduction to data structures using C++. Topics to be covered include stacks, trees, and queues. Students will analyze and use recursion in their programs as well as analyze different sorting algorithms. Techniques for evaluating the correctness and efficiency of algorithms will also be covered.

Prerequisite: **COP2350C**

COP2664C Advanced Database Programming Techniques

40 hours, 3 credits

The course expands on topics that were introduced in Database Fundamentals for Programmers, adds new and advanced topics, and develops database programming skills utilizing a relational database. Topics to be covered include the use of database views, user-defined functions, stored procedures, triggers, and dynamic SQL. Students will utilize developer tools to improve database performance as well as improve the security and integrity of database applications.

Prerequisite: **COP1532C**

COP3000C Introduction to Computer Science

40 hours, 3 credits

This course is the study of Computer Science. The topics covered will be the evolution of Computer Science; the impact of Computer Science on society and business operations; an evaluation of the various specialties within the field of Computer Science; an overview of hardware and software technologies used in Computer Science; and security measures in Computer Science. This course will prepare students to understand what Computer Science is and how it relates to their everyday lives.

Prerequisite: This course should be taken in the student’s first quarter

COP3026C Programming Languages

60 hours, 4 credits

This course will serve as an introduction to foundational programming language concepts. Students will gain perspectives about the history of programming languages and learn about the traditional and new programming languages including mobile and web. Students will learn how to capture logic at a high level of abstraction and will learn how programming languages handle key programming constructs. The course will also help student understand the use syntax, semantics, and language parsing in programming languages.

COP3230C Operating Systems and Architectures

60 hours, 4 credits

This course introduces students to detailed aspects of operating systems and software architectures. Students will gain an understanding of thread and process management. The course will also provide students with a knowledge of memory and virtual storage management. Students will also learn how to convert software applications to n-tier software architecture. Students will review file system organization and physical storage management. The course will also focus on the security aspect of the operating system.

Prerequisite: **COP3805C**

COP3703C Database Systems

60 hours, 4 credits

This course will provide students with a fundamental overview of database design and operations. Students will learn about the different database types—relational and non-relational (NoSQL). Topics on database security and backup will be covered. Students will also learn to identify parts of a data integration pipeline for optimal configuration.

Prerequisite: **COP1532C**

COP3805C Advanced Java Programming

60 hours, 4 credits

This course gives students knowledge and experience using advanced concepts and programming tools in the Java programming language. Topics covered will include monitoring, database integration, and version control. Students will also be able to understand the design patterns and micro-services architecture.

Prerequisite: **COP2268C**

COP4970C Computer Science Bachelor Capstone

70 hours, 4 credits

In this course students will demonstrate all of the program competencies for the Computer Science program by creating a comprehensive solution that illustrates the concepts. This includes also demonstrating the course competencies inherent within the program competencies. Areas of coverage include concepts related to software design, software development, architecture, algorithms, data management, and information quality and security. Practical demonstration of these competencies will be implemented by using the industry-standard software development tools that were used previously within the program coursework.

Prerequisite: This course should be taken in the student's final quarter

COT Computing Theory

COT4530C Algorithm and Data Structure Analysis

60 hours, 4 credits

This course will cover the analysis of algorithms that can be used in different computer functions such as sorting, searching, string matching, and graph-theoretic algorithms. The course also covers different methods for effectively using data structures in computer applications. This is achieved through the analysis and estimation of the data structures and corresponding Big-O, Big Omega, and Big Theta run-time rates. The course will also cover analysis to determine in advance that no efficient algorithms exist for those classes of algorithms where no efficient algorithms exist. The theory of (NP-completeness) will be introduced and applied to these algorithms. The course will also include practical programming projects that empirically compare and contrast algorithm performance.

Prerequisite: **MAD3300**

CPO Comparative Politics

CPO4003 Comparative Politics

40 hours, 4 credits

This course will introduce students to the field of comparative politics by examining classification of political systems according to institutional and developmental characteristics. Causes and costs of political stability and instability will be explored. Comparison will be made between contemporary political institutions and processes in various countries.

CRW Creative Writing

CRW2001 Creative Writing

40 hours, 4 credits

This course will develop the student's talents in creative writing. Various forms of writing will be studied, such as short stories, poems, non-fiction, and excerpts from novels. Students will create poetry and other forms of creative writing while utilizing analysis of elements of fiction. Students will develop editorial skills to revise and improve their work.

Prerequisite: Passing grade in Developmental Education coursework or placement determined by Rasmussen University entrance placement exam score

CTS Computer Technology & Skills

CTS1884C Computer Technical Support

40 hours, 3 credits

This course will familiarize students with computer technical support operations that service an organization. Topics will include service-level agreements, the help desk and field support process, and the procedures and mechanics of issue capture, resolution, and metrics tracking. Students will have been exposed to many support models that the organization may employ for competitive advantage. Additionally, students will be grounded in fundamental terminology, policies, and procedures of the support organization.

CTS2321 Linux Administration

40 hours, 3 credits

This course is designed to introduce the Linux operating system. The students will learn to install, configure, maintain, administer, and use programming features of the Linux operating system. Students will learn how to download and install source applications from the internet, run Windows emulation, and apply Linux in the enterprise network system. This course uses a combination of reading, lecture, internet-based research, and lab work to reinforce the course materials. Further, this course helps prepare students to take an industry accepted Linux+ certification exam.

Prerequisite: **CDA1330C**

CTS2511 Excel

40 hours, 3 credits

This course is designed to investigate the applications and concepts available in Microsoft Excel. Students will be introduced to electronic spreadsheet features ranging from data input and manipulation to formulas, functions and charting. Students will also learn how to use Excel to conduct basic data analysis.

CTS3265C Introduction to Business Intelligence

40 hours, 4 credits

This course is the study of the skills and techniques for analyzing business performance data to provide support for business planning. It places focus on using query development, reporting, and analytical tools to help guide business decision-making. Topics include statistical analysis, basic database design, and business process modeling. This course will prepare students to utilize information to support decision-making.

CTS4557 Emerging Trends in Technology

30 hours, 3 credits

This course is the study of emerging technologies of computing innovation throughout the major industry sectors, and their impact on people, society, and business. Topics include the positive, negative, and unexpected impacts of emerging technologies on society and business, the challenges that disruptive technologies present, legal and ethical issues as a result of emerging trends in technology, and tools and techniques used to predict emerging trends.

CTS4623C Advanced Cloud Computing Technologies

60 hours, 4 credits

This course will provide students with an in-depth understanding of computing technologies and services for enterprise-level application deployment projects. The course will focus on practical aspects of cloud-based application architecture and deployment methodologies. Topics include application scalability principles, application performance and benchmarking tools, authentication and authorization security issues, cloud deployment platform selection criteria, asset cataloging and management, and other advanced cloud deployment topics.

Prerequisite: **CNT1020C**

DEP Developmental Psychology

DEP2004 Human Growth and Development

40 hours, 4 credits

This course consists of the study of the development of the individual throughout the complete lifespan from birth to death, including child, adolescent, and adult patterns of behavior with attention to physical, cognitive, emotional, and social development.

DIG Digital Design

DIG1280C Audio/Video Editing

40 hours, 3 credits

Students learn the theory and processes of audio/video editing using non-linear editing software. Exercises in production and post-production techniques will be applied for various delivery media. Students produce and edit a series of short videos for web and broadcast. Narrative and non-narrative forms are explored in audio and video. This course will provide training in a variety of industry-accepted Adobe design software.

Prerequisites: **GRA1800C**

DIG2300C Graphic Design in 3D

60 hours, 4 credits

This course introduces the elements and principles of visualizing and designing in 3D space. Students will gain practical experience with 3D software, including modeling, texturing, lighting, and rendering final images. Students will work on 3D design projects in a production setting as they explore the creative capabilities of 3D.

Pre- or corequisite: **PGY1300C**

DIG3150C Design Thinking

60 hours, 4 credits

This course is the study of the Design Thinking process and its power to solve complex problems. Topics covered include the breakdown and practice of the Design Thinking process, analysis and synthesis of insights, and the impact of creative design solutions for global and social issues. This course prepares students to solve current and future problems through design, with an awareness of their global and social impacts.

Prerequisite: **GRA1700C**

DIG4100C Strategic Design

60 hours, 4 credits

Students in this course will incorporate Design Thinking to develop a solution for an identified problem. Students will create and present the proposed solution and analyze its global and social impact. In addition, students will evaluate how the Design Thinking process benefits humanity.

Prerequisite: **GRA3100C**

DIG4200C 3D Design and Animation

60 hours, 4 credits

This course continues the exploration of 3D space, including creating images for advertising, marketing, and visualization within a 3D workflow. Students will construct complex objects using advanced modeling tools like nurbs and booleans, render images in high resolution, and create keyframe animations to communicate complex, time-based concepts or processes.

Prerequisite: **GRA4200C**

DIG4540C Digital Video Production

60 hours, 4 credits

This course will explore the organizational, technical, and creative aspects of professional-level video productions. Basic project management, shooting and production, and technical aspects of shot selection will be explored. Applying these processes and techniques will result in a final production with appropriate scene selection, sound production, video formatting, and professional- level video output.

Prerequisite: **GRA3600C**

DIG4800C Senior Design Portfolio

70 hours, 4 credits

Students will create an online portfolio representing their creative and technical accomplishments that highlight their potential for further professional development. The collected work will demonstrate a breadth of design solutions aimed at a diverse group of target markets. Students will polish their communication skills through discussing and presenting their work.

Prerequisite: Must be taken at the end of the program/last term

DIG4970C Senior Design Capstone

70 hours, 4 credits

This course further refines students' skills in Design Thinking, research and synthesis, design practice, and the user experience in preparation for a graphic design career. This course prepares designers to ideate and produce innovative advertising and marketing campaigns through the development of creative design strategies, using current and emerging technologies in solving complex design problems.

Prerequisite: Must be taken in student's last quarter

E Career Development

E102 Pathway to Patient Care Seminar

0 hours, 0 credits

This seminar course prepares students for completing the HESI® Admission Assessment exam and exploring career opportunities in healthcare. Students will learn skills to support effective studying and test-taking in the HESI® Admission Assessment exam in the areas of Reading Comprehension, Vocabulary and General Knowledge, Basic Math Skills, and Anatomy and Physiology.

Prerequisite: Student must have evidence on record with the University of a qualifying Cumulative HESI® Admission Assessment exam score that is within 24 months of the date the student starts in the program.

E242 Career Development

20 hours, 2 credits

In this course, students will study the personal and professional characteristics necessary to obtain and maintain employment. Students will assess their professional goals and research viable positions in their fields of study. The course includes an in-depth study of self-marketing approaches, resume writing, job interviewing techniques, and professionalism.

Prerequisite: Expected to be completed in the student’s second-to-last or final quarter of the applicable credential level

ECO Economics

ECO1000 Principles of Economics

40 hours, 4 credits

This course offers a broad overview of economic theory, history, and development. Philosophies, policies, and terms of market economies will be explored. This course includes microeconomics and macroeconomic concepts.

ECO3250 Managerial Economics

40 hours, 4 credits

This course is designed for students to gain an understanding of managerial economics. Students will delve into microeconomics by applying it to advanced business models. Managerial economics will be applied to business environments that affect production decisions and economic output.

ECO4223 Money and Banking

40 hours, 4 credits

This course is an examination of the structure and operations of our monetary systems. In this course, topics covered include the fundamentals of money and financial markets, commercial banking, and its regulation.

EEC Early Childhood Education

EEC1202 Early Childhood Education Curriculum and Instruction

40 hours, 4 credits

This course provides a foundation for establishing curriculum and instruction practices for children from birth to age 8. This course will connect developmentally appropriate practices (DAP) to developing young children's individual goals and curriculum to support learning across domains and content areas. Pedagogical methods and approaches for early childhood programming will be introduced. This course is aligned with the educational requirements of the CDA Credential issued by the Council for Professional Recognition.

EEC1700 Foundations of Child Development

40 hours, 4 credits

This course explores developmental domains, theories, and characteristics of children from birth to age 8. Students become familiar with the core considerations of developmentally appropriate practice and learning theories to support children throughout development. This course is aligned with the educational requirements for the CDA Credential issued by the Council for Professional Recognition.

EEC1735 Health, Safety, and Nutrition/CDA Application

40 hours, 4 credits

This course focuses on the standards and procedures governing safety, health, and nutrition practices in early childhood education. Students examine guidelines for establishing safe and healthy environments for children from birth to age 8. Students learn strategies for establishing appropriate nutrition, controlling illness, and addressing children's special health needs. This course is aligned with the educational requirements for the CDA Credential issued by the Council for Professional Recognition.

EEC1970 Early Childhood Education Exploration I: Knowledge

40 hours, 4 credits

This course is an introduction to early childhood education as a profession and practice. It explores the history, policies and standards for early childhood education programs. It introduces developmentally appropriate practices and developing relationships through positive communication and interactions.

EEC1971 Early Childhood Education Exploration II: Planning

40 hours, 4 credits

This course continues to focus on early childhood education as a profession and practice from the perspective of planning for the learning environment. It explores the early childhood education environment, schedule, routines, experiences, and learning activities. It continues the conversation on applying developmentally appropriate practices in early childhood programs.

Pre- or corequisite: **EEC1970**

EEC1972 Early Childhood Education Exploration III: Reflection

40 hours, 4 credits

This course focuses on early childhood education as a profession, exploring the development of professional and ethical relationships with children, families, and colleagues. It will introduce students to reflective practices, encouraging growth and development as professional educators. It will also explore national position statements and the professional standards for early childhood educators.

Pre- or corequisite: **EEC1971**

EEC2213 Language and Literacy Acquisition

40 hours, 4 credits

Students will explore how children develop language and literacy skills as both single and dual-language learners. Students will learn typical language and speech acquisition patterns, supportive practices for language acquisition, and how to support dual-language learners in group settings. Students will also explore how to promote the development of literacy skills and behaviors for our youngest children.

Prerequisite: **EEC1700**

EEC2225 Guiding Children's Behavior

40 hours, 4 credits

Students will explore using positive behavior guidance practices in the early childhood setting, emphasizing culturally responsive supports, trauma-sensitivity, and powerful interactions. Students will discuss how educators and adults can promote self-regulation and incorporate positive behavior practices into their everyday work with children's social-emotional development.

EEC2270 Introduction to English Language Learners

40 hours, 4 credits

Students will explore effective ways to support English language learners in our increasingly diverse population of young children and families. Students will consider language and speech development from both an English and dual-language learner perspective, as well as the promotion of supportive environments and activities. Additionally, students will consider how personal biases may influence interactions and behavior towards children and families of English language learners.

Prerequisite: **EEC1700**

EEC2271 Curriculum and Instruction for Children with Special Needs

40 hours, 4 credits

Students will explore strategies to adapt developmentally appropriate curriculum and collaborate with families and professionals to support developmental goals for children with special needs. Topics include creating inclusive learning environments, differentiating instruction, using assessment data to establish curriculum, and assessing the progress of children with special needs.

Prerequisite: **EEC1202**

EEC2272 The Inclusive Classroom

40 hours, 4 credits

Students will learn strategies for promoting and supporting an inclusive learning environment. Students will explore how inclusion occurs with children with physical and cognitive needs, dual-language learners, children from diverse cultures, economic backgrounds, and gender identity. Students will consider environmental and policy adaptations and explore how educators support the development of all young children in an inclusive early childhood setting.

Prerequisite: **EEC1700**

EEC2329 Parent Education and Support

40 hours, 4 credits

This course explores how educators employ supportive resources responsive to individual family needs. This course will examine how family education and resource allocation are informed by culture, experience, family structure, and socio-cultural changes in both home and early education settings.

Prerequisite: **EEC1700**

EEC2401 Dynamics of the Family

40 hours, 4 credits

This course will focus on a family’s influence on their child’s development and how early educators can support families with effective, responsive engagement practices. The course will explore how cultural, economic, and societal factors influence a family’s structure and systems, parenting preferences, values, and engagement in their child’s development and learning. Strategies for how educators can support a family’s success through communication, developmentally appropriate practices, ethics and active involvement in early childhood education programs will be explored.

EEC2403 Advocating for Children with Special Needs

40 hours, 4 credits

Students will explore types and components of advocacy, especially when supporting exceptional children and their families. Students will consider how to advocate for an individual child or family, a community or group of children or at a regional or national level. Students will examine their own perspectives and role in supporting and advocating for young children with exceptional needs and their families.

Prerequisite: **EEC1700**

EEC2500 Infant and Toddler Development

40 hours, 4 credits

In this course, students will explore the developmental continuum for children from birth to 3 years of age in the physical, cognitive, language, social and emotional domains. Theories regarding attachment and temperament will be discussed along with how those theories interact with development. Students will explore how development guides environmental, curriculum and care decisions in infant/toddler group childcare.

Prerequisite: **EEC1700**

EEC2613 Observation and Assessment in Early Childhood Education

40 hours, 4 credits

Students will explore the importance of observation, documentation, and assessment in early childhood education. Students will become familiar with a variety of assessments and formal and informal observation methods, documentation strategies, screening tools, and other appropriate resources for our youngest learners. Equitable and ethical considerations for implementing observation and assessment practices will also be addressed.

EEC2935 Summative Project for Early Childhood Education

20 hours, 2 credits

This course culminates a student's learning from throughout their early childhood education program. Students will assemble a cumulative philosophy to share their competence with the Transferable Skills in the areas of family engagement, observation and assessment, behavior guidance, culturally responsive practices, curriculum development, and advocacy in the early childhood education field.

Prerequisite: Expected to be the final lower-level core course completed

EEC3000 Early Childhood Education: Understanding Mental Health in the Early Years

40 hours, 4 credits

This course examines the impact of mental health issues on a child's well-being. Students will focus on attachment theory, brain development, and the importance of executive function on lifelong learning. This course will challenge students to explore the effects of economics, family structure, and the environment on a child's emotional and social development. Students will also be able to evaluate social support systems.

Prerequisite: **EEC1700**

EEC3005 Communication and Connections in Early Childhood Education

40 hours, 4 credits

This course examines the best formal and informal communication practices with families, colleagues, and professionals. This course will examine strategies for developing positive communication among families, colleagues, and communities within the early childhood setting. Students will learn specific tools to promote and enhance communication, resolve conflicts, and develop a team within the early childhood setting.

EEC3007 Organizational Management in Early Childhood Education

40 hours, 4 credits

This course provides a foundation for operational management of high-quality early childhood programs. Students will experience practical application related to policies, procedures, budgets, personnel management and planning in the context of establishing best practices for children and families. Students will assess strategies for continual program improvement, including licensing, accreditation, and quality rating assessments.

Prerequisite: **EEC3005**

EEC3011 Empowering Contemporary Families

40 hours, 4 credits

This course explores various types and structures of families. Students will explore how a program's role in supporting families has evolved and the major social issues contemporary families face. This course emphasizes resiliency by strengthening families through an anti-bias, family-centered approach to effective programming practices.

EEC3015 Observation and Assessment for Effective Curriculum Planning

40 hours, 4 credits

This course offers a structured approach to integrating observation and assessment into early childhood curriculum planning. It emphasizes the critical role of high-quality observation and assessment practices in supporting effective teaching. Students will learn how to document children's learning and use this information to design developmentally appropriate and engaging curriculum.

Prerequisite: **EEC1202**

EEC3020 Positive Behavior Guidance for Young Children

40 hours, 4 credits

This course is an advanced approach to positive behavior guidance in which students will examine environmental and interpersonal strategies that foster prosocial and equitable practices in early childhood education settings. This course also emphasizes how using positive interactions and relationships will support the development of executive function skills for children birth to age 8.

EEC3026 Technology and Developmentally Appropriate Practices

40 hours, 4 credits

In this course, students will explore technology use as a part of the world in which children, families, and early childhood professionals live. Students will explore how Universal Design for Learning Principles and developmentally Appropriate Practices relate to the use of technology in early childhood programs. Using the Department of Education's Guiding Principles for Use of Technology with Early Learners, students will explore how technology can be a tool for learning, can increase access to learning for all children, and can strengthen relationships. Students will also gain experience with technology tools integral to their future work in the virtual education world.

EEC3171 Beyond the Basics of Health, Safety and Nutrition

40 hours, 4 credits

This course is the study of child health, nutrition, and safety practices that support children's abilities to learn and grow. Topics include the connection between health, safety and nutrition practices, maltreatment of children and protective factors, the importance of healthy nutrition and implementing safe practices for play. This course will prepare students to recognize development as a continuum and to create and implement healthy and safe practices with all children.

EEC3220 Child Development Ages Birth–3

40 hours, 4 credits

This course is the study of child development from birth to 3. It focuses on the in-depth study of the learning domains including the cognitive, language, social-emotional, and physical domains. Topics include how child development theories apply, and the influences environmental factors, interactions, and relationships have on the development of children and across learning domains.

EEC3225 Child Development Ages 3–5

40 hours, 4 credits

This course is the study of children ages 3–5. It places focus on the student's previous knowledge of the growth and development patterns of children age birth–3 to build upon and explore the continuum across the cognitive, language, social-emotional, and physical domains in children age 3–5. Topics include how early child development theories apply; the influences environmental factors, interactions, and relationships have on the development of children; and learning across domains. This course will prepare students to identify the unique ways in which in children ages 3–5 learn.

Prerequisite: **EEC3220**

EEC3318 Intentional Teaching Practices

40 hours, 4 credits

This course is the study of how to use intentional teaching to support children's learning. It places a focus on implementing developmentally appropriate practices in early childhood programs, including differentiated instruction, children's approaches to play and learning, and intentional interactions. This course will prepare students to employ intentional teaching practices and planning in their early childhood programs.

EEC3407 Planning with a Purpose

40 hours, 4 credits

Students will explore how to be responsive to young children's learning pathways and the needs of each child by incorporating differentiated instruction and play as core teaching practices. Students will incorporate developmentally appropriate practices and evidence-based teaching strategies that reflect the principles of Universal Design for Learning and supporting all children ages birth to age 8.

Prerequisite: **EEC3318**

EEC3546 Supporting Professional Practices in ECE

40 hours, 4 credits

This course studies how to support professionalism in the early childhood field and focuses on practices that an ECE professional would engage in to increase their ability to provide high-quality services. Topics include advocacy, coaching and mentoring, reflective practices, and how to model professionalism within the ECE program and in the community. This course prepares students to locate and use resources to reach their professional goals.

EEC4000 Early Childhood Education: Environments and Play Theory

40 hours, 4 credits

This course will explore how play and the environment promote learning and development in young children. Strategies to enhance indoor and outdoor learning environments will be emphasized. Students will reflect on their practices as they evaluate a wide variety of learning environments and curriculum models. Using knowledge of child development, students will design learning environments that are respectful, supportive, and challenging.

EEC4005 Advanced Principles and Perspectives of Child Development

40 hours, 4 credits

This course is an advanced study in the theory and principles of child development. An evaluation of current educational practices as developmentally appropriate will challenge students to examine their own perspectives on how children learn. Focus will be on the primary years of development through in-depth exploration of gender roles, socialization, and cultural perspectives.

EEC4010 Early Childhood Language and Literacy Learning

40 hours, 4 credits

This course emphasizes best practices for promoting language and literacy development for children birth to age 8. Opportunities to apply knowledge of typical and dual language learning to create curriculum responsive to developmental needs will be addressed. Integrating assessment, early learning standards, and developmentally appropriate practices to support optimum child outcomes in language and literacy learning will be stressed.

EEC4015 Early Childhood Education: Diversity and Social Justice

40 hours, 4 credits

This course is an examination of diversity and social justice issues as related to high quality early childhood education for children ages birth to 8. It explores diversity, race, equity, and anti-bias perspectives both in society and working with young children and families. It explores the concepts of cultural competence and cultural humility as part of an anti-bias learning experience for young children.

EEC4022 Ethics and Leadership in ECE

40 hours, 4 credits

This course examines the characteristics of leadership in early childhood education through identification, self-reflection, and practice. Students will focus on ethical decision-making and leadership, including coaching and mentoring strategies, tackling challenges, and exploring a leader's impact on programs and their community.

Prerequisite: **EEC3007**

EEC4030 Supporting Exceptional Children and their Families

40 hours, 4 credits

This course is a comprehensive approach to supporting children with exceptional needs. Content will explore the importance of caring for all children with exceptional needs; including diagnosed and undiagnosed special needs, children who are gifted, neurodivergent, and dual-language learners. Supporting and advocating for the needs of children and their families will be addressed along with an exploration of the history, laws and provisions supporting children with special needs in group childcare and education settings.

EEC4485 Early Childhood Education Advocacy, Research and Policy

40 hours, 4 credits

This course explores trends in the early childhood education field. Students will examine current research and national, local and legislative policies. Students will analyze research and the effects on early childhood care and education. Advocacy strategies and skills will be explored as students set goals for future engagement in the early childhood education profession.

Prerequisite: Must be taken in the student's last or second-to-last term

EEC4910 Early Childhood Education Leadership Capstone

20 hours, 2 credits

This course is a synthesis of material from all ECE courses. Students will compile a professional philosophy demonstrating their competence as a leader in the early childhood education field and their proficiency with the transferable skills.

Prerequisite: Must be taken in the student's last term

EEX Education — Exceptional Child

EEX2010 The Exceptional Child

40 hours, 4 credits

This course explores the importance of inclusion in early childhood settings. Students will develop an understanding of the characteristics of exceptional child development, including psychological, sociological, and medical aspects of diagnosed disabilities, delays, and neurodivergence. Students will identify stakeholders influencing exceptional development and their roles as resources in support of the child and their families.

Prerequisite: **EEC1700**

ENC English Composition

ENC1101 English Composition

40 hours, 4 credits

This course is designed to guide students in understanding the writing process and developing their ability to write and express ideas in an organized, unified, and coherent manner. Students will produce college-level writing that reflects awareness of rhetorical strategies, writing purpose, student voice, and appropriate grammar, punctuation, and usage skills. Through reading, writing, discussion, research, and collaboration, students will practice effective writing and apply course concepts.

Prerequisite: Passing grade in Developmental Education coursework or placement determined by Rasmussen University entrance placement exam score

ENC1121 English Composition II

40 hours, 4 credits

This course builds on students' understanding of the writing process through an exploration of various writing strategies and research. Students will analyze readings and apply critical reading and writing skills. This course will develop argumentative writing and application of research.

Prerequisite: **ENC1101**

ENC3311 Advanced Composition

40 hours, 4 credits

This advanced writing course is intended to help students further develop and refine their writing, researching, and analytical skills through the application of these skills to various rhetorical situations. To achieve these goals, students will be expected to develop their ability to present their views in an organized, unified, and coherent manner to diverse audiences.

Prerequisite: **ENC1101**

EVR Environmental Studies

EVR3410 Human Uses of the Environment

40 hours, 4 credits

This course provides an in-depth exploration of the integrated relationship between human life and the surrounding environment. Topics that are interwoven throughout the course include principles of ecology as seen in the structure and function of the ecosystem; pollution of air, soil, and water resources; population explosion and the relationship of people, disease, and food production; and environmental controls necessary for survival.

FIL Film

FIL2000 Film Appreciation

40 hours, 4 credits

Students will study different elements, forms, techniques, and styles of film and will learn a critical approach to film and the motion picture industry. Students will critique films and filmmakers through various approaches and assessments that demonstrate analysis, interpretation, and evaluation skills as well as fostering a deeper appreciation and understanding of film as an art form.

FIN Finance

FIN1000 Principles of Finance

40 hours, 4 credits

This course is a study of financial institutions, investment options, and financial management. A broad study of the financial markets, the financial statements, time value of money concepts, capital structure, and breakeven analysis is the focus of this course. This course will provide students the opportunity to demonstrate application of corporate finance tools used in business.

FIN1202 Financial Markets and Institutions

40 hours, 4 credits

This course is the standard introduction to the banking profession, financial markets, and financial institutions. It touches on nearly every aspect of financial services, from the fundamentals of negotiable instruments to contemporary issues and developments within the industry.

FIN3247 Investments and Security Markets

40 hours, 4 credits

This course is the study of investments, securities, markets, and regulators. It places focus on understanding how various types of securities work as well as how to value the securities. Topics covered will be stocks, bonds, and derivatives. This course will prepare students for investment and securities analysis.

FIN3396 International Finance

40 hours, 4 credits

This course is the study of the global process by which the firm moves from a domestic to a multinational business orientation. It places focus on the global financial environment, foreign exchange markets and exposure, financing, and operations of the global firm. The course will prepare students to see finance from a global perspective.

Prerequisite: **FIN3434**

FIN3434 Applications in Corporate Finance

40 hours, 4 credits

This course is the study of the theories, principles, and applications of corporate finance. It emphasizes and integrates analytical frameworks with the decision-making process. Topics covered will be ratio analysis, time value of money, capital structure, capital budgeting, and net working capital management. This course will prepare students to apply appropriate quantitative methodologies to optimize shareholder value.

Prerequisite: **FIN1000**; or **FIN1202**

FIN3520 Concepts in Personal Financial Management

30 hours, 3 credits

This course is the study of concepts in personal financial management. It places focus on budgeting, credit, investments, insurance, and retirement planning. This course will prepare students for handling the major aspects of personal finances.

FIN4019 Financial Modeling

40 hours, 4 credits

This course is the study of finance focused on computational and implementational approach. Topics covered will be Excel, best modeling practices, basic finance, valuation, and simulation. Advanced topics such as regression and time-series analysis are also covered. The students will be prepared to build and understand models that are simple and easy for all stakeholders to understand.

Prerequisite: **GEB3020**

FIN4275 Exploration in Finance

40 hours, 4 credits

This course is a study of the exploration of financial planning. It places focus on all of the aspects that are required to become a certified financial planner. Topics covered will be budgeting, insurance, investing, estate planning, and life insurance. This course will prepare students academically for a career in financial planning.

FIN4372 Investment Portfolio Management

40 hours, 4 credits

This course is the study of investment portfolio management. It places focus on portfolio theory and assessing and mitigating portfolio risk. Topics covered will be market efficiency, risk, active and passive management, diversification, and asset allocation. This course will prepare students to be investment portfolio managers.

Prerequisite: **FIN3247**

FIN4489 Financial Decision Making and Risk Management

40 hours, 4 credits

This course provides a review of managerial finance concepts and their relation to business, as well as a survey of common analytical techniques and tools used to support decision-making. Topics include financial analysis, analysis tools, data visualization, budgeting, project modeling and analysis, project financing, benchmarking, key performance indicators, and risk mitigation.

FIN4970 Capstone for Finance

40 hours, 4 credits

The capstone course is the opportunity for students to demonstrate mastery of the knowledge and skills they have gained throughout the program. Students will be required to apply all their knowledge learned to review financial statements and make a sound financial decision.

Prerequisite: Expected to be the final upper-level core course completed

FIN6466 Financial Analysis and Decision-Making

40 hours, 4 credits

This course provides an overview of the financial decision-making process and strategies to ensure the organization allocates assets to maximize return while minimizing risk. Key concepts introduced include financial ethics, corporate finance, financial risk, cost of capital, and risk-reward benefits. Students will analyze financial statements and strategies, appraise organizational investments, and determine the financial sustainability of an organization.

Prerequisite: **ACG5500**

GEB General Business

GEB1011 Introduction to Business

40 hours, 4 credits

This course is a study of the characteristics and functions of business in a free enterprise environment and how business impacts the economy in which we live. Characteristics studied may include opportunities, organizations, management, marketing, analysis, and any other activities related to general ownership and operation.

GEB2444 Internet Business Models and E-Commerce

40 hours, 4 credits

This course is designed to introduce students to new models for the practice of business as it is affected by new technologies. From ethical issues related to customer privacy to the problems related to timely contract fulfillment, this course engages the student in analyzing the potentials and problems the internet offers. Topics covered include a survey of strategies and organizational models for new and existing businesses on the internet, the impact of e-commerce on customer relations (advertising, marketing, customer service), using information technologies for accounting, managing inventories and security, and designing strategies for keeping current with changes in the practice of e-business.

GEB2888 Introduction to Business Analysis and Intelligence

40 hours, 4 credits

This course will differentiate business intelligence and business analytics and how each function is important to the management of business operations. Students will analyze methods of data retrieval, discuss the importance of data mining and ethical business analysis, and explain business data findings and trends when making sound business decisions.

GEB2930 Business Capstone

20 hours, 2 credits

This course is designed to allow students to integrate the knowledge and skills gained in the Business Management Associate's Degree program. Through case analysis, class discussion, and supervised field experience, students will synthesize and demonstrate their understanding of core business concepts via the completion of a Capstone project.

Prerequisite: Expected to be the final lower-level core course completed

GEB3020 Advanced Principles of Financial Management

40 hours, 4 credits

This course is the study of advanced tools used in short- and long-term financial management. It emphasizes corporate valuation and financial planning. Topics covered will be derivatives, capital asset pricing model, risk management, securities, and asymmetric information in the financial market. This course will prepare students to leverage sophisticated quantitative management tools to strengthen a firm’s financial position.

GEB3124 Business Research and Analysis

40 hours, 4 credits

Students will develop research strategy and problem-solving skills used for business analysis. They will examine the use of qualitative and quantitative research methodology and develop professional writing skills for presenting research findings. They will experience using various research methods such as surveys, business research proposals, and dashboards.

GEB3275 Consumer Behavior

40 hours, 4 credits

In this course, students will learn about how consumers act and what factors influence those actions. Topics include the individual makeup of consumers, such as their personality or lifestyle, and the influencing factors around them, such as their peers or social expectations. Students will examine the consumer decision-making process and learn how businesses can utilize it in order to be more successful.

GEB3388 Winning Customer Service Strategies

40 hours, 4 credits

Motivating and empowering employees to provide outstanding customer service is critical to an entrepreneur’s success. This course teaches students the strategies, techniques, and tools for developing and sustaining long-term customer relationships. Cutting-edge customer relationship management tools will be explored, as well as how to create customers who are promoters of your brand.

GEB3422 Business Project Management

40 hours, 4 credits

This course provides students with the essential elements and foundational standards used to manage projects, programs, and portfolios in any organization. Students will develop project scope and scheduling skills as well as assess program bidding and proposal processes. They will evaluate the impact of scope definition, and explore how to manage teams, expectations, and project stakeholders.

GEB4220 Managing a Diverse Workforce

40 hours, 4 credits

This course examines diversity from a personal, group, organizational, national, and global perspective. Students will explore stereotypes of individuals within organizations, and they will study how these stereotypes affect people within the workplace. Students will also examine issues in conducting business and managing people within a global setting.

GEB4230 Website Development for Business

40 hours, 4 credits

In this course, students will become familiar with the technical knowledge of website development and publishing. Key areas include usability studies, information architecture design, and working with various technology tools to develop the website.

Prerequisite: **MAR3128**

GEB4505 Organizational Development

40 hours, 4 credits

In this course, students examine qualitative approaches, quantitative approaches, and process-based approaches to organizational development through the stories of professionals involved in organizational change. Students will critically examine the design, management, and control of organizational development programs.

GEB4513 Emerging Trends, Markets, and Technologies in Business

40 hours, 4 credits

This course focuses on emerging technology and trends in business, including cognitive intelligence and smart technologies. Additionally, students will be introduced to technologies related to the human experience and digital transactions, as well as the emerging trend of sustainable and renewable resources in business.

GEB5458 Corporate Responsibility and Sustainability

40 hours, 4 credits

This course provides an overview of corporate responsibility and sustainability strategies that enhance a company's competitive advantage. Students will study the impact of community involvement, sociological perspectives, ethics, compliance, and sustainability on an organization's competitive advantage. This course will also explore differentiating between internal and external stakeholders as well as how politics and government regulations and management of resources for sustainability can influence business decisions.

GEB6860 Master of Business Administration Capstone

40 hours, 4 credits

This course is designed for students to apply the knowledge they have learned throughout the Master of Business Administration program. Key areas of focus include value chain management, operations management, marketing, accounting and financial management, leadership, business intelligence and analytics, entrepreneurship, innovation, and change management as well as corporate responsibility and sustainability. This course is designed to be taken at the end of the program.

Prerequisite: Should be taken in the last term

GLY Geology

GLY1000 Introduction to Geology

40 hours, 4 credits

Examines basic geologic principles from a physical or historical perspective. Includes such topics as the formation of rocks and minerals; internal and external processes modifying the earth's surface and phenomena; and the evolutionary history of the earth, including its life forms, oceans, and atmosphere.

GRA Graphic Arts

GRA1000C Graphic Design Tools and Techniques

60 hours, 4 credits

Students will utilize industry standard design software in the creation of graphic design images. Basic tool functions and techniques in both raster and vector modes will be explored.

GRA1206C Typography

40 hours, 3 credits

This course is an introduction to the history, forms, and use of typefaces and letterforms in digital design. Basic typographic vocabulary and fundamentals are emphasized to develop a creative understanding of and technical competence in using type as both a visual aspect of design language and as a means to enhance communication. The student will use design software to produce major typographic projects for multiple forms of media.

Pre- or corequisite: **GRA1700C**

GRA1500C Graphic Design Trends and Movements

60 hours, 4 credits

Students in this course will gain an understanding of graphic design through the various movements and technological developments throughout history, with an examination of how graphic design fits into the human experience. This course focuses on the concepts of design in cultural and social movements, with a look toward future developments.

GRA1600C Color Theories and Applications

40 hours, 3 credits

This course introduces important concepts in color as they relate to emotion and perception. Graphic designers will learn to effectively communicate using hue, value, intensity, proportion, and placement in composition. Students will also learn how to use color in solving design problems.

Pre- or corequisite: **GRA1700C**

GRA1700C Elements and Principles of Graphic Design

60 hours, 4 credits

The fundamental elements and principles of graphic design will be explored and implemented in the creation of basic compositions. Concepts such as contrast, rhythm, and balance will be studied, while additional vector and graphic techniques are explored.

Prerequisite: **GRA1000C**

GRA1800C Layout Design

40 hours, 3 credits

This course expands upon the elements and principles of graphic design to create engaging compositions. Students will gain skills in visual problem solving with emphasis placed on the relationships between images and text. In addition to the functions of layout software, students will learn about visual structures that enhance communication.

Prerequisites: **GRA1206C**; **GRA1600C**

GRA1900C The Art and Business of Design

40 hours, 3 credits

This course will refine the design skills that students have to offer the marketplace. Students will be able to identify prospective clients and learn what clients expect from a graphic design professional. Projects will guide students in pricing design services and exploring essential legal issues that are relevant to the graphic design industry.

Prerequisite: **GRA1700C**

GRA2100C Design for Marketing

40 hours, 3 credits

This course introduces students to the concepts, activities, and analyses that comprise the marketing process, and graphic design's role within the process. Emphasis is placed on building practical skills in solving marketing problems within our culturally diverse, global society. Components of marketing and promotion are examined, and students will learn to evaluate and develop marketing and design briefs.

Prerequisite: **GRA1800C**

GRA2200C Responsive Web Design

60 hours, 4 credits

This course further develops HTML and CSS skills to create responsive Web designs. Students examine how layouts, typography, and images get presented in Web browsers while exploring Web accessibility guidelines and troubleshooting techniques. This course also introduces students to a mobile-first approach to Web design across multiple devices.

Prerequisite: **GRA2800C**

GRA2260C Graphics in Motion

60 hours, 4 credits

This course introduces students to motion graphics and their place in graphic design. Students use a variety of techniques to create basic animations that include keyframing, 2D imagery, typography, video, and audio. Students learn how to apply effects and blending modes to enhance their motion graphics projects. This course also prepares students for incorporating motion into graphic design projects.

Pre- or corequisite: **GRA1800C**

GRA2700C Graphic Design Campaigns

70 hours, 4 credits

This course focuses on the development of media campaigns for specific target markets. Students will develop campaign elements across multiple platforms, determine budget and production costs, and create a marketing communication strategy. Factors affecting consumer behavior within a target market will also be explored.

Prerequisite: Must be taken in student's last quarter

GRA2800C Web Design Fundamentals

40 hours, 3 credits

This course is an introduction to online interactivity. Students will plan, design, and publish online websites that incorporate text, images, animation, navigation, and other interactive elements using industry-standard software. Students will employ essential design principles using online interactive design tools and HTML and CSS for structure and styling in the creation of single and multi-page websites.

Prerequisite: **GRA1800C**

GRA2970C Graphic Design Portfolio

70 hours, 4 credits

This course prepares students for successful employment within the graphic design industry by helping them develop and refine their creative work in the development of a professional graphic design portfolio. Students will learn how to present themselves and their work professionally through the use of the internet, resumes, cover letters, portfolios, and job interviews.

Prerequisite: Must be taken at the end of the program/last term

GRA3005C Interactive Publishing

60 hours, 4 credits

This course focuses on the creation of interactive media from static content. Students explore the compatibility and limitations of various devices with elements of interactivity while designing documents appropriate for best practices in interactive media and engaging user experiences.

Prerequisite: **GRA3200C**

GRA3100C Contemporary and Emerging Design

60 hours, 4 credits

Students will analyze the abilities of cutting-edge design strategies and emerging technologies to influence society. In addition, they will study the role of ethics and responsibility in the design profession. Incorporating sustainable practices into design solutions will be emphasized.

Prerequisite: **GRA1600C**

GRA3150C Media Production Processes

40 hours, 3 credits

This course is a review of the digital composition of proper file formats and extensions for multiple design applications. Correct file resolution, rendering, saving, and exporting will be explored as they relate to final professional digital design output. An emphasis on final professional-level delivery will be explored.

Prerequisite: **GRA1000C**

GRA3200C Communicating with Typography

60 hours, 4 credits

This course is a deeper exploration of typography in the application of type for visual communication. Students will develop solutions for social and business communications with an awareness of global and multicultural challenges. Branding, marketing, and user experience will be explored through authentic projects.

Prerequisite: **GRA1206C**

GRA3300C Collateral Design

60 hours, 4 credits

This course focuses on the various design elements that comprise a comprehensive visual identity system for a business or organization. Students will design and present collateral pieces while also analyzing media and production costs of each. Multiple forms of media will be explored in the development of a final project and proposal that encompass various collateral media.

Prerequisite: **ADV3100C**

GRA3400C Design Business Strategies

40 hours, 3 credits

This course focuses on business concepts that designers must understand in order to execute successful solutions. Topics covered include brand features, benefits and values, budgeting and scheduling, business positioning, and client communication. This course will build a strategic foundation for creative development as well as business acumen.

Prerequisite: **GRA1700C**

GRA3600C Designing for the User Experience

60 hours, 4 credits

This course is the study of the user experience design process. It focuses on problem analysis, target audience research, empathy, and assessment methods. Students will use design to solve problems and create better experiences for end users. They will also communicate their design processes and the effectiveness of their solutions in a professional manner.

Prerequisite: **GRA3200C**

GRA4100C Advanced Image Editing

60 hours, 4 credits

This course focuses on advanced concepts and techniques for the creation of professional images in print, web, and digital media. Students will identify and apply creative solutions to visual challenges, as well as explore the ethical and legal issues of image editing, including copyright.

Prerequisite: **GRA1600C**

GRA4150C User Interface Design

60 hours, 4 credits

Students in this course will focus on the physical and technical elements of human-computer interaction as they relate to the design of effective navigation of a device or program. Concepts and theories around the design of “easy-to-use” graphical and audio user interfaces will be explored, from discoverability and predictability to cognitive load. Students will also learn about related attributes of interface design, including accessibility issues and user-testing.

Prerequisite: **GRA3600C**

GRA4200C Communicating with Motion Graphics

60 hours, 4 credits

This course focuses on using motion graphics to communicate complex messages. Students incorporate 2D and 3D imagery, text, video, and audio into projects and animate them with keyframes, expressions, and effects. Kinetic typography, motion tracking, and camera layers will be introduced. Students will develop these skills to create animated infographics and render them for multiple forms of media.

Prerequisite: **GRA3600C**

HIM Health Information Management

HIM1103 Coding Foundations

50 hours, 4 credits

This course provides students with an overview of the coding classification systems, use of code books, and hands-on experience with electronic encoders, in preparation for success in the ICD-CM, ICD-PCS, and Ambulatory Coding (CPT) courses. Students gain a fundamental understanding of the applications for the various coding classification systems along with billing and reimbursement practices within a variety of settings. Emphasis is placed on developing ethical coding and billing practices with the application of official coding guidelines and standards.

Pre- or corequisites: **HSC1531**; **PHA1500**

HIM1125 ICD-CM Coding

40 hours, 4 credits

This course provides in-depth study of the International Classification of Diseases-Clinical Modification (ICD-CM) using sample exercises and health records to develop skill and accuracy in assigning codes in inpatient, outpatient, and physician care settings. Students apply International Classification of Diseases-10-Procedure Coding System (ICD-10-CM) coding guidelines appropriate to the coding situation and learn diagnostic coding of all body systems. Students are introduced to industry-accepted sources for coding guidance. Practice in the use of coding and grouper software introduced in Coding Foundations further develops student skills with these tools. Students explore the use of ICD-10-CM codes in the billing and reimbursement functions with the opportunity to practice claim form completion.

Prerequisite: **HIM1103**
Pre- or corequisite: **HIM2224C**

HIM1126C ICD-PCS Coding

40 hours, 4 credits

This course provides an in-depth study of the International Classification of Diseases-10-Procedure Coding System (ICD-10-PCS) using exercises and health records to develop skill and accuracy in assigning codes in the inpatient setting. Students apply ICD-10-PCS coding guidelines supported by health record documentation. Students use encoders and identify appropriate online resources to help determine correct codes. Emphasis is placed on developing ethical coding and billing practices with the application of official guidelines for coding and reporting. Students explore the physician query process and the use of ICD-10-PCS codes in the billing and reimbursement functions with the opportunity to practice claim form completion.

Prerequisite: **HIM1103**
Pre- or corequisite: **HIM2224C**

HIM1257 Ambulatory Coding

40 hours, 4 credits

This course provides an in-depth study of the Healthcare Common Procedure Coding System (HCPCS) / Current Procedural Terminology (CPT) Coding System using exercises and health records to develop skill and accuracy in assigning codes for providers and outpatient services. Students apply coding guidelines supported by health record documentation. Students use encoders and identify appropriate online resources to help determine correct codes. Emphasis is placed on developing ethical coding and billing practices with the application of official guidelines for coding and reporting and the opportunity to practice claim form completion for physicians and outpatient services.

Prerequisite: **HIM1103**
Pre- or corequisite: **HIM2224C**

HIM1507 Medical Billing and Insurance

40 hours, 3 credits

In this course, students will develop knowledge of different components of medical insurance and billing. They will learn skills associated with claim form preparation, processing and submission in addition to an introduction to medical coding. Topics include medical insurance and billing tasks for healthcare systems, programs, and commercial insurance plans within healthcare environments.

Prerequisites: **HSA1022**; **HSC1531**; **PHA1500**

HIM2000 Introduction to Health Information Management

40 hours, 4 credits

This course introduces students to the field of health information management. Topics include health information roles, various healthcare providers, and the different clinical/organizational settings these professionals work in as well as health information service operational functions. This course explores the fundamental health information management concepts as well as the ability to identify health record content and format in various formats and based on external and internal regulations and accreditation standards. Data quality characteristics and data governance are introduced to students emphasizing the importance of data accuracy and integrity.

HIM2133 Revenue Cycle and Billing

40 hours, 4 credits

This course will prepare the student to understand the components of the revenue cycle and their interconnectivity. Students will be introduced to common third-party payers, insurance terminology, and medical billing. Plan options, payer requirements, and state and federal regulations relating to the revenue cycle will be examined. They will learn skills including claim form preparation and processing, and electronic claim submission and the management of these revenue cycle processes. The focus will be on accuracy of data collected and data processed for proper and timely payment.

Prerequisite: **HSC1531**

HIM2135 Revenue Cycle Management

40 hours, 4 credits

This course focuses on the revenue life cycle from initial patient contact through final reimbursement and auditing. Students are introduced to the services, job functions, and responsibilities involved in revenue cycle functions and management. Revenue cycle processes, including auditing and financial controls, are evaluated. A variety of reimbursement methodologies and payer plans are examined, and students have an opportunity to assess revenue cycle regulations and guidelines along with internal and external reporting requirements.

Prerequisites: **CGS1240**; **HIM2000**

HIM2224C Health Information Pathophysiology and Pharmacology

40 hours, 3 credits

This course focuses on the exploration of human pathophysiology and pharmacology, centering on specific disease processes in the human body, including the cause, diagnosis, and treatment of disease. Topics include drug classifications, drug actions, the most commonly prescribed drugs, and reference materials. This course further develops practice for health information students in identifying key information from the health record related to the diagnosis and treatment of disease in order to support correct coding and quality management of the medical record.

Prerequisite: **PHA1500**

HIM2410 Health Information Law and Ethics

40 hours, 4 credits

This course provides students a foundation in the United States legal system and healthcare laws, regulations, processes, and ethical considerations impacting health information. Topics include healthcare laws and regulations surrounding patient privacy and confidentiality, protected health information, release of information, fraud and abuse, and the legal health record. This course develops the student's ability to identify and respond to potential ethical dilemmas in health information management.

HIM2515 Management and Leadership in Health Information

40 hours, 4 credits

This course prepares students for the management of health information services and entry-level supervisory functions. Students are introduced to fundamental management and leadership principles and skills with application to health information departments and services. Topics covered include ethical standards of practice, human resource strategies, financial management processes, and the function of teams.

Prerequisite: **HIM2000**

HIM2589C Healthcare Statistics and Data Management

40 hours, 3 credits

This course introduces students to the study of the calculation of statistics for healthcare operations and the analysis and graphical presentation of data using statistical and data presentation and report generating tools. Students articulate health record documentation and reporting related to regulatory requirements, the basic concepts of managing data, and the principles of research used in healthcare. This course provides a foundation for students to continue to engage in applying health informatics concepts in the management of health information, including managing data within a database system, analyzing trends, and reporting data graphically to meet the needs of healthcare stakeholders.

Prerequisites: **CGS1240**; **STA1625**

HIM2624C Data Analytics and Informatics in Healthcare

40 hours, 3 credits

This course builds upon the foundation learned in the previous course on healthcare statistics and data analytics by providing more in-depth opportunities to manage data within a database and assess methodologies related to health information management to meet stakeholder needs, considering national standards for reporting and exchange of information. Topics focus on the evaluation of data to identify trends, formatting health data using various visual displays and presentation tools, and applying data governance principles to collect and manage data using database management tools. Students have the opportunity to explore the role of emerging technologies in healthcare and patient engagement.

Prerequisites: **CGS1240**; **HIM2000**; **HIM2589C**; **STA1625**

HIM2655C Healthcare Technologies

50 hours, 4 credits

This course focuses on the components of an electronic health record (EHR) and the elements of electronic health record planning, implementation, and ongoing use and management. Students are introduced to data dictionaries and the use of databases and reporting healthcare information. The history of EHRs, applicable EHR regulations and standards, and common challenges faced with EHR systems, including interoperability and security, are explored. Students are introduced to and have an opportunity to perform activities utilizing health information technology applications in capturing, utilizing, and securing health information, including patient engagement tools.

Prerequisite: **HIM2000**

HIM2944 Medical Billing and Coding Practicum

60 hours, 2 credits

This course provides practical application of previously acquired knowledge and skills through clinical case scenarios and sample medical records. Students demonstrate competence in determining the principal diagnosis and sequencing of multiple diagnoses and procedures for data collection and reimbursement. This course allows students to demonstrate skills in coding inpatient and outpatient records using coding books and encoder applications. Assessments include the application of official coding guidelines to ensure compliance with reporting and billing requirements, participation in clinical documentation improvements activities, preparation of physician queries, and assessment of final bill accuracy. Students explore the format and requirements related to external coding credentialing exams for the purpose of improving confidence and readiness if they choose to pursue a coding related credential.

Prerequisites: **HIM1125**; **HIM1257**
Pre- or corequisite: **HIM1126C**

HIM2945 Health Information Technician Professional Practice Experience

90 hours, 3 credits

This course allows students to gain professional practice experience in a health information technician role through a combination of 40 hours of externally supervised professional practice experience activities, including a project with a healthcare-related site and virtual and simulated experiences within the course. The experiences are designed to provide students the opportunity to have a variety of experiences and utilize healthcare-related technology in various health information services and healthcare work settings.

Prerequisites: Must have passed all other HIT associate courses; Must be completed in student’s final quarter

HIM2966 Health Information Technician Associate Capstone

30 hours, 3 credits

This course provides the opportunity for students to demonstrate mastery of the Health Information Technician programmatic student learning outcomes and competencies obtained throughout the program. Through a case study project, students demonstrate their ability to integrate theory, practical experience, and transferable skills learned throughout the program in real life-based assessment activities. Students have the opportunity for review in preparation for the AHIMA® RHIT® exam.

Prerequisites: Must have passed all other HIT associate courses; Must be completed in student’s final quarter

HIM3001 Information and Communication Technologies

40 hours, 4 credits

This course prepares students to evaluate technologies available to manage health information and communication, including hardware and software to ensure data collection, storage, analysis, and reporting of information. Students explore the systems development life cycle, take part in clinical informatics, identify standards for the health information exchange, and evaluate policies and strategies for use with healthcare technology.

Prerequisite: Program admission

HIM3202 Data, Information, and File Structures

60 hours, 4 credits

This lab-based course explores database concepts, including database creation, administration, and management as well as data integrity. Focus is on granular data in database design as well as database concepts and tools such as data dictionary, data modeling, data warehousing, and data mining. Students study the functionality of databases in healthcare, the importance of data compliance with government standards, and the usefulness of databases to meet stakeholder's needs.

Prerequisite: Program admission

HIM3304 Financial Management of Health Information Services

40 hours, 4 credits

This course explores the healthcare finance principles required to manage a health information department, service, or project. Students take part in a departmental operating, personnel, and capital budget process. Opportunities for the health information professional's role as well as external and internal influences on healthcare financial success are explored.

Prerequisite: Program admission

HIM3360 Health Data and Policy Management

40 hours, 4 credits

This course prepares students for the assessment and oversight of healthcare data and policy management in healthcare settings. Students evaluate various data standards and data management, compare stakeholders within the industry, and assess disaster recovery methods. Students learn how to evaluate health record content requirements, various classification systems, clinical vocabularies, and nomenclatures.

Prerequisite: Program admission

HIM3412 Project Management

40 hours, 4 credits

This course explores the application of general principles of project management and methodologies in healthcare. Focus is on the role of a project manager. Students learn to implement project management techniques and oversee and manage project planning activities and team members to facilitate team outcomes.

Prerequisite: Program admission

HIM3429 Health Law and Compliance

40 hours, 4 credits

This course prepares students to be knowledgeable in federal and state laws and regulations and regulatory agencies requirements impacting healthcare settings. Students have the opportunity to evaluate the components of healthcare compliance programs, monitor adherence, and identify and recommend strategies to mitigate risk.

Prerequisite: Program admission

HIM3515 Health Information Leadership and Management

40 hours, 4 credits

This course prepares students for leadership and management roles within a healthcare organization. Students identify and apply management skills needed to lead health information services in a variety of settings and participate in organization-wide activities. Topics explored include staff development and training, teamwork, presentation skills, change management strategies, performance measurement and improvement tools, and ethical decision-making.

Prerequisites: **HIM3304**; **HIM3810**

HIM3522 Electronic Health Record Application

70 hours, 4 credits

This lab-based course explores the technology and applications utilized in the electronic health record (EHR). Students examine the health information record life cycle and the electronic record workflow process. Projects are completed to simulate real-world activities that occur in the health information department and healthcare facility.

Prerequisite: Program admission

HIM3710 Advanced Quality Management in Healthcare

40 hours, 4 credits

This course examines the role of quality management in healthcare. Topics include quality management models, tools, and metrics used to assess healthcare performance. Emphasis is on the evaluation of these methods and tools in demonstrating the outcomes and effectiveness in improving patient care, quality of services, safety, reduction of risk, disease management processes, and utilization and resource management. Students explore the role and impact of governing and accrediting bodies on healthcare quality initiatives.

Prerequisite: Program admission

HIM3810 Human Resource Management in Health Information

40 hours, 4 credits

This course is the study of human resource principles in the management and supervision of human capital within various healthcare organization settings, including specific evaluation and application of human resources within and relating to health information management functions. Students are exposed to approaches, techniques, and future trends in the management of personnel in healthcare. This course includes a study of employment laws, workforce education and training, performance standards and evaluation, job analysis, labor analytics, benchmarking, trends and market analysis, wage and salary administration, human resource budget analysis, contract management, ergonomic principles, and cost-benefit analysis of human resource needs.

Prerequisite: Program admission

HIM3930C Healthcare Research and Statistics

60 hours, 4 credits

This course prepares students to perform statistical calculations and the analysis and presentation of statistical data related to healthcare, including population health. Topics covered include data collection, data interpretation, reporting, and presentation of descriptive statistics in patient care data studies. Students explore research methodologies and design used in healthcare-related research. Mathematical statistics concepts such as probability, normal distribution, predictive statistics, hypothesis formation, and measures of variation are included as well as the essential concept of data integrity.

Prerequisite: Program admission

HIM4121 Privacy and Security in Health Information

40 hours, 4 credits

This course provides an in-depth analysis of strategies relating to privacy and security in healthcare. Topics covered include organizational requirements under HIPAA pertaining to policies, procedures, release of information, and mandated reporting. Students learn how to safeguard patient information through various security measures, as well as the implications when a patient’s rights have been violated.

Prerequisite: Program admission

HIM4135 Advanced Revenue Cycle Management

40 hours, 4 credits

This course prepares students for the management of the interdisciplinary approach to revenue cycle management. Topics include healthcare reimbursement methodologies and models, reimbursement guidelines, regulatory requirements, and evaluation of diagnostic and procedure codes and groupings. Students evaluate the effectiveness of clinical documentation integrity programs and coding compliance plans through benchmarking and auditing.

Prerequisite: Program admission

HIM4515 Advanced Health Information Leadership and Management

40 hours, 4 credits

This course builds on the skills learned in Health Information Leadership and Management and prepares students to evaluate the management skills techniques and tools for management roles in a healthcare organization. Students leverage data-driven decision-making tools, examine behaviors that embrace cultural diversity, and have opportunities to analyze workflow process concepts, productivity, change management theories, and compliance to increase their range of management and leadership skills in preparation for a role in health information administration.

Prerequisite: **HIM3515**

HIM4624C Advanced Data Analytics and Informatics in Healthcare

60 hours, 4 credits

This lab-based course uses patient information and secondary data sources in the analysis and reporting of information to be used in healthcare-related decision-making. The course includes data analysis stages, information governance, and the management of information. Stakeholders of healthcare data analysis are explored. Additional concepts include the integrity, transformation, visualization, and exchange of data.

Prerequisite: **HIM3930C**

HIM4945 Professional Practice Experience in Health Information Management

90 hours, 3 credits

This course allows students to gain professional practice experience in a health information administrator role through a combination of 60 hours of externally supervised professional practice experience activities, including a project with a healthcare-related site and virtual and simulated experiences within the course. The experiences are designed to provide students with the opportunity to have a variety of experiences and utilize healthcare-related technology in various health information services and healthcare work settings.

Prerequisites: **HIM4515**; Must be completed in student’s final quarter
Corequisite: **HIM4966**

HIM4966 Health Information Management Capstone

30 hours, 3 credits

This course provides the opportunity for students to demonstrate mastery of the Health Information Management programmatic student learning outcomes and competencies obtained throughout the program. Through a case study project students demonstrate their ability to integrate theory, practical experience, and transferable skills learned thought the program in real-life- based assessment activities. Students have the opportunity to review in preparation for the AHIMA® RHIA® exam.

Prerequisites: Must have passed all other HIM bachelor courses; Must be completed in student’s final quarter
Corequisite: **HIM4945**

HSA Health Services Administration

HSA1022 Foundations of Medical Administration

40 hours, 4 credits

This course will explore the scope and dynamics of a career in medical administration and the skills necessary to be successful both in the Medical Administrative Assistant program and profession. This course will emphasize professionalism, communication, and medical terminology. The importance of maintaining patient privacy and handling patient situations ethically and professionally will be developed.

Pre- or corequisite: **HSC1531**

HSA1050 Customer Service in Healthcare

10 hours, 1 credits

This will prepare students to deliver outstanding customer service in a healthcare setting by providing them with an understanding of the factors that influence the perceptions of external and internal customers. Topics covered in this course include the psychology of patients, customer service in a diverse world, listening skills, and effective communication techniques.

HSA1146 Technology Today for Medical Administration

40 hours, 3 credits

In this course, students will learn how to utilize computer software to register patients, record accurate patient information, and enter insurance information into the Electronic Health Record (EHR). Topics will include managing code diagnoses and procedures for reimbursement using the tools in the EHR. Students will also learn the essential skills needed to work with the patient schedule by scheduling appointments, cancelling appointments, and tracking patients. This course will also cover patient privacy and data security.

Prerequisites : **HSA1022**; **HSC1531**

HSA1683 Exploring Healthcare Systems

30 hours, 3 credits

This course provides an overview of the core components of healthcare systems and how they may differ throughout the world. Topics include analyzing healthcare system components, health insurance, and cultural competency. Students will be able to apply knowledge and skills learned in this course towards their chosen field of study.

Prerequisite: **HSA1022**

HSA2117 US Healthcare Systems

40 hours, 4 credits

This course provides an overview of the United States healthcare system. The history of the evolution of healthcare will be explored, along with the role of local, state, and federal government in healthcare delivery. An introduction to a variety of provider models and service delivery systems found in both private and public healthcare facilities will be covered, including different types of healthcare facilities. The influence of reimbursement methodologies and finance on healthcare delivery will be explored.

HSA2264 Administrative Medical Assistant Practices

30 hours, 3 credits

The Administrative Medical Assistant course is designed to educate students on legal and ethical responsibilities, the importance of critical thinking, intrapersonal and communication skills, office policies, maintenance of office equipment, organization, confidentiality, insurance information, government issued policies and acts, documentation as well as functionality, and maintenance of paper and electronic medical records. Students will demonstrate competency of basic computer systems, applications, coding, documentation, legal and ethical responsibilities, customer-service skills as well as communication skills throughout the course in various structures such as exams, case scenarios, or hands-on demonstrations.

HSA2851 Practice and Professionalism in Healthcare

30 hours, 3 credits

In this course, students will practice and develop skills in professionalism specific to the healthcare field. Students will understand and identify the importance of patient support services and will analyze ways to provide comprehensive service to patients. Students will be able to identify methods for practicing effective customer service in medical environments including applying knowledge in confidentiality and health information privacy. Topics include examining possible opportunities for career advancement and growth within the field.

Prerequisites: **HSA1022**; Expected to be the final lower-level core course completed

HSA2918 Healthcare Administrative Office Procedures

30 hours, 3 credits

This course will provide an overview of the administrative tasks that occur in the front office of a medical facility. Topics covered include telephone skills, applications of the electronic health record (EHR), creating and maintaining medical records, and basic business and bookkeeping skills.

HSA3109 Foundations of Managed Care

40 hours, 4 credits

In this course, students will analyze controversial issues surrounding the managed-care delivery system, focusing on theory and the foundational concepts of managed care.

Prerequisite: **HSA3110**

HSA3110 Introduction to Healthcare Administration

40 hours, 4 credits

This course provides an exploration of the administrative principles and practices within healthcare organizations. Emphasis is placed on organization, structure, and operation of healthcare facilities. Management principles will be applied to case studies of healthcare industry scenarios.

HSA3170 Financial Management of Healthcare Organizations

40 hours, 4 credits

This course focuses on healthcare finances, assets, cost concepts, capital budgeting, and general principles of accounting applied in the healthcare environment. Students will discuss the development and management of department budgets, and the common sources of healthcare revenues and expenses.

HSA3215 Healthcare Marketing

30 hours, 3 credits

This course will focus on the role of marketing within a healthcare organization. Marketing has become the centerpiece that brings together quality improvement performances on a national and global scale. Students will explore the purpose of marketing as well as the concepts, tools, and skills used to help organizations reach their intended market share.

HSA3383 Quality Improvement in Healthcare

40 hours, 4 credits

This course examines methods for assuring quality in healthcare and the statistical applications of measuring outcomes. There will be an emphasis on performance improvement and the relationship between healthcare quality, organizational performance, and the role of governing and accrediting bodies in healthcare organizations. Common methods and trends in quality improvement will be explored.

HSA3422 Regulation and Compliance in Healthcare

40 hours, 4 credits

This course is an exploration of the many entities that regulate healthcare delivery, from local, state, and federal government to the accreditation agencies of healthcare organizations. Issues and methods for compliance with the many laws and regulations are examined. The course provides an overview of the impact of regulatory agencies on the operation of healthcare facilities. Corporate ethics and responsibilities and the operation of healthcare as a business are explored.

Prerequisite: **HSA3110**

HSA4110 Healthcare Operations Management

40 hours, 4 credits

In this course, students examine the operations of managing people, information technology, materials, and facilities in the healthcare industry.

HSA4124 International Healthcare

40 hours, 4 credits

In this course, students will compare and contrast foreign healthcare services and systems, focusing on cultural, geographic, environmental, economic, and political factors.

Prerequisite: **HSA3110**

HSA4150 Healthcare Planning and Policy Management

40 hours, 4 credits

This course provides a study of current healthcare-policy issues affecting the U.S. healthcare system and the politics that drive policy and planning of healthcare delivery. The influence of participants outside the healthcare industry and the various levels of government involved in policymaking will be examined. Economic theory, trends, and the future of healthcare will be explored.

Prerequisite: **HSA3110**

HSA4191 Healthcare Information Systems

40 hours, 4 credits

The Healthcare Information Systems course focuses on how healthcare institutions can use technology and information processes and solutions to assist in the diagnosis of diseases and the documentation of patient records and other data. It also addresses the strategies and techniques healthcare business professionals can use to help increase the quality of healthcare services and the efficiency with which the services are delivered.

HSA4210 Advanced Healthcare Law and Ethics

40 hours, 4 credits

This course examines ethical theories and the principles of bioethics. Students will analyze these theories and principles and apply them to ethical problems in the healthcare field. This course includes educational resources from Harvard Business Publishing.

HSA4922 Healthcare Management Capstone

30 hours, 3 credits

This online course is designed to allow students to integrate the knowledge and skills gained in the Healthcare Management BS program. Through case analysis, class discussion, and a research project, students will synthesize and demonstrate their understanding of core healthcare management concepts via completion of a Capstone project approved by the instructor.

Prerequisite: Expected to be the final upper-level core course completed

HSA5000 Scholarly Research and Writing

40 hours, 4 credits

This course provides students with an understanding of scholarly research and writing. Students will learn how to identify, locate, and analyze scholarly research and sources for use in their graduate studies and their various disciplines. Additionally, students will learn and apply scholarly writing characteristics, data visualization, and presentation strategies to diverse audiences.

HSA5100 Introduction to Healthcare Delivery Systems

40 hours, 4 credits

This course offers students an in-depth analysis of the historical development, present structure, and future direction of the U.S. healthcare system. Students will conduct ongoing comparative analyses between the healthcare system in the U.S. and the healthcare system of other developed nations. This course will provide an examination of the complexities facing the current healthcare delivery system. Students will gain insights into the various reimbursement methodologies, performance measurement tools, and current resource allocation strategies. Students will be able to identify critical challenges facing key stakeholders and articulate viable strategies for creating a more effective balance among the vertices of the iron triangle of health: costs, access, and quality.

HSA5200 Healthcare Policy, Ethics, and Laws

40 hours, 4 credits

This course presents a comprehensive view of ethics and laws as they pertain to the development of health policy. Students will examine the fundamentals of the various principles of healthcare law and the manner in which those principles intersect with ethics and health policy. The course will offer students an opportunity to evaluate critical factors that influence policy decisions and reform efforts. Students will articulate the impact of legal, ethical, and policy challenges relative to private and public health systems, politics, interest groups, lobbyists, and proposed reforms. Throughout the course, students will perform case analysis to demonstrate competency in identifying potential legal and ethical problems in different healthcare settings and propose appropriate solutions based on current legal and ethical guidelines.

HSA5300 Population Health

40 hours, 4 credits

In this course, students will learn about the principles of population health management and how to use these principles to critically evaluate healthcare data from multiple sources. Graduates will learn about disease management models and how the health of populations and economies are managed. Using the foundational principles of population health management, graduates will analyze multiple data sources to determine patterns in population health. By the end of the course, graduates will have the ability to develop population health projects using advanced techniques to identify ongoing and future healthcare concerns.

HSA5400 Healthcare Financial Management and Economics

40 hours, 4 credits

This course provides students with a foundation in economics and financial management within the current healthcare environment. It addresses the impact of economic principles as it applies to local, national, and global markets. It evaluates the socioeconomic and political influences affecting healthcare organizations as well as the application of fiscal management for short-/long-term viability. The course analyzes the implications of current healthcare delivery and reimbursement models, challenges with resource allocation, and the establishment of payer contracts on the financial health of an organization. Upon completion of this course, students will be able to analyze financial statements and apply budgeting principles to create a financial plan and a departmental budget, utilize financial management tools, and calculate key financial ratios.

HSA5500 Healthcare Leadership and Human Resources

40 hours, 4 credits

In this course, students will assess the role of human capital resources in healthcare organizations, including the recruitment, retention, management, and development of these resources. Students will gain an understanding of key roles that human resource professionals play in planning for workforce needs and how human resource management should be directly aligned with the strategic goals of the organization. Additionally, students will examine organizational behavior, leadership theories, and change management dynamics, as well as the roles and responsibilities of management within healthcare organizations. Students will focus on understanding management and leadership principles to help navigate change. Students will consider the theory and practice of managing individuals and groups through motivation, communication, teamwork, collaboration, leadership, organizational change, negotiation, and conflict management and resolution.

HSA6000 Healthcare Information Systems and Technology

40 hours, 4 credits

Students in this course have the opportunity to learn how health information technologies, systems, and applications assist healthcare organizations and their leaders in the execution of clinical and organizational strategies. They will also learn how these complex information systems and analytics help decision makers to improve patient care outcomes and business performance. Topics include evolving technologies such as data analytics, eHealth, personalized medicine, social media, predictive analytics, and using technology applications to manage population health. Students will conduct risk assessment to assess legal and ethical issues in health information technology and change management.

HSA6100 Healthcare Operations Management

40 hours, 4 credits

This course provides students with an understanding of the functions of operations management within the healthcare industry. Students will gain the ability to employ techniques to evaluate and improve organizational performance. Students will be able to map the various branches of operations management and develop an overall organizational evaluation. They will also be able to identify methods to overcome operational challenges, incorporate lean operating philosophies, and use data analytics. This course will enable students to create competitive strategies to minimize cost, increase efficiency, and improve quality of care. Students will evaluate real-world scenarios through case studies and professional experience to create executive summaries, business plans, and proposals.

HSA6200 Healthcare Quality Management

40 hours, 4 credits

This course provides graduates with a foundation in the history of quality management and the continuing effects quality plays in healthcare administration. Graduates will be able to critically evaluate diverse healthcare populations using quality improvement models and strategies. Upon completion of this course, students will learn to develop quality improvement initiatives and engage healthcare staff in developing strategies to monitor efficacy of those initiatives.

HSA6300 Healthcare Strategic Planning and Marketing

40 hours, 4 credits

In this course, students will evaluate and formulate strategic plans and review their value in the development of healthcare industries. Students will identify the key components of a strategic plan and analyze approaches to strategic thinking in a healthcare context. Using these key concepts students will learn to create effective goals and objectives for strategic planning and provide an analysis of opportunities for quality improvement.

HSA6900 Healthcare Administration Capstone

40 hours, 4 credits

This course is the capstone course that culminates the Master of Health Administration degree. It focuses on the application of critical problem solving skills, using evidence-based and informed practices covered in previous courses. Topics covered include analyzing and interpreting healthcare financial information, healthcare information technology systems, and operational processes. This course prepares students to graduate with the skills to design strategic plans for organizational change in alignment with market forces and trends. Students will also have the opportunity to explore the various healthcare models and systems needed to address population healthcare needs.

Prerequisite: Expected to be the final course completed

HSC Health Sciences

HSC1531 Medical Terminology

40 hours, 4 credits

This is a basic medical vocabulary-building course. An emphasis will be placed on the most common medical terms based on prefixes and suffixes, Latin and Greek origins, and anatomic roots denoting body structures. All body systems will be covered with a focus on word parts, terms built from word parts, abbreviations, and basic disease and surgical terms. Students will be expected to focus on spelling and pronunciation.

HSC1675 Healthcare Exploration and Careers

30 hours, 3 credits

This course assists students choosing and planning for their program selection and career path by exploring the roles and responsibilities of various healthcare professions and providing a high-level overview of the organizational structure and interaction to these professions within the healthcare system. In addition, students will evaluate career development skills, strengths and weaknesses, and abilities to identify career professional development and advancement opportunities in their chosen healthcare profession.

HSC2641 Medical Law and Ethics

40 hours, 4 credits

This course includes a study of the United States legal system and court process with emphasis on legal and ethical issues within the healthcare environment. Students will learn about various laws and regulations that impact healthcare, including privacy and confidentiality rules. Students will explore how medical laws and ethics apply to their future career.

HSC3010 Contemporary Health and Wellness

40 hours, 4 credits

In this course, students will explore the field of contemporary health and wellness, and become familiar with the variety of therapeutic methods offering holistic alternatives for patient care. Students will study the foundations and systems pertaining to health and wellness, preparing the student for health and wellness advocacy.

HSC3145 Therapeutic Communication and Patient Services

40 hours, 4 credits

This course introduces students to the roles of communication, compassion, and decision- making in healthcare. Students will identify and explain the techniques and barriers to effective communication that enhance patient interaction. Students will focus on therapeutic communication, alternative and complementary approaches to healthcare, and their roles in supporting patient privacy and dignity.

Prerequisite: **HSC1531**

HSC3258 Multidisciplinary Medical Practices

40 hours, 4 credits

This course provides an introduction to multidisciplinary medical practice concepts and methods for evaluating coordinated medical services while working with diverse populations. Topics include comparing various medical models, holistic health approaches, improving patient outcomes, analyzing cost savings, advocating patient healthcare, providing patient education, and case- management skills.

Prerequisite: **HSC1531**

HSC3371 Health Education and Training

40 hours, 4 credits

This course examines health and wellness education and focuses on opportunities within the healthcare field to support wellness and prevention through patient education. Students will explore evidence-based practices, community health, and disease management. Emphasis will be placed on examining and applying technologies necessary in delivering patient education to promote public health, preventative health, and individual wellness.

HSC3485 Healthcare Advocacy

40 hours, 4 credits

This course provides the knowledge, skills, and understanding necessary to act as a healthcare advocate for patients, diverse clients, and special populations across the life span. Students will evaluate different barriers to healthcare, patient rights, health justice, and behaviors related to promoting health and disease prevention. Students will also identify the role of cultural beliefs in relation to health practices and social services.

HSC4009 Healthcare and Aging

40 hours, 4 credits

The course is designed to investigate health concerns and aspects of the aging process. Explores concepts related to specific health problems confronting the aging population, examines preventative (primary, secondary, and tertiary) health behaviors along with health maintenance strategies. This course will also explore death and the dying process as well as stress the importance of purposeful living.

Prerequisite: **PHA1500**

HSC4125 Behavioral Health

40 hours, 4 credits

This course examines behavioral health in the contexts of wellness education and advocacy. Students will explore the relationship between behavioral health and overall wellness, while examining the critical importance of demonstrating advocacy skills to meet the behavioral health needs of patients in today’s healthcare systems. Key emphasis will be placed on analyzing applicable models of advocacy and understanding the unique ethical and legal challenges associated with the rapidly evolving shifts in our present behavioral health marketplace.

HSC4290 Health and Wellness Capstone

30 hours, 3 credits

The Health and Wellness Capstone course is designed as a final milestone for students to demonstrate the ability to use interdisciplinary methods to draw together different areas of study focusing on relevant health and wellness concepts and concerns. Students will rely heavily on knowledge and skills learned in previous program courses to demonstrate transferable skills related to critical thinking, digital fluency, information literacy, ethics and professional responsibility, communication and diversity, and teamwork.

Prerequisite: Expected to be the final upper-level core course completed

HSC4500 Epidemiology

40 hours, 4 credits

This course examines the patterns and causes of disease in populations, how diseases are documented, and how to analyze the data to understand disease causes.

HUM Humanities

HUM2023 Humanities

40 hours, 4 credits

This course investigates human creative achievement. It is designed to increase the student's understanding of human experience and culture. Topics include art, music, literature, architecture, drama, and philosophy.

HUN Human Nutrition

HUN2000 Human Nutrition

40 hours, 4 credits

This course introduces the principles of nutrition and the role of nutrients in the human body. Students learn about the body's nutritional needs, along with the nutritive value of foods and the factors influencing the body's requirements throughout the life span. The relationship between nutrition and cultural, ethnic, religious, and socioeconomic influences on nutritional health and disease is also included.

HUS Human Services

HUS1001 Introduction to Human Services

40 hours, 4 credits

The introductory course in Human Services provides a survey of human services as an impactful profession. It provides fundamental knowledge into self and with the applicable skills towards advancing knowledge, ethical values, and practical experiences necessary to successfully assist others individually and collectively.

Prerequisite: This course should be taken in the student's first quarter

HUS1175 Developing Awareness and Understanding

40 hours, 4 credits

Discovering the inner workings of oneself is a necessary step to providing the best support to others. This course will guide students through a process of self-discovery that will help them identify how their values, biases, strengths, and weaknesses can impact their personal and professional relationships. Topics covered include methods to recognize and address conflicts, the value in responding with empathy, and the importance of maintaining a work/life balance.

HUS1238 Evolving Populations in Human Services

40 hours, 4 credits

In this course, students will explore the various situations and human beings with which Human Services professionals may work. Students will also explore the types of positions they can fill in a human services organization targeting a specific population of individuals.

HUS1320 Introductory Strategies to Crisis Intervention

40 hours, 4 credits

In this course, students will examine the impact of crisis and trauma on individuals. Students will gain an understanding of the theories and necessary crisis intervention skills, and they will explore the application of these skills in crisis situations.

Prerequisite: **HUS1001**

HUS1461 Perspectives on Human Behavior

40 hours, 4 credits

This course will introduce prospective Human Services professionals to knowledge of behavior at individual, group, and societal levels. This course focuses on theories and knowledge relative to the biological, psychological, sociological, and cultural characteristics evident in many facets of contemporary society.

HUS1632 Working with Clients

40 hours, 4 credits

This course will introduce students to communication techniques and practical skills used in human services. Students will gain insight into the scope of daily work activities performed by a human services professional and begin to practice and develop their own communication tools for use in the field.

HUS2409 Micro and Macro Systems in Human Services

40 hours, 4 credits

This course will cover the different systems that interact to form the client experience. Students will evaluate the different types of personal and social systems that impact clients in a holistic and inclusive manner. Students will also evaluate their own life systems and discuss how they may impact their experiences with the clients.

HUS2627 Principles of Ethical and Legal Practices in Human Services

40 hours, 4 credits

In this course, students will look at professional standards of practice and common legal considerations within the Human Services profession. Using applicable laws, the Human Services Code of Ethics, and real-life scenarios, students will learn to identify common mistakes that could lead to serious consequences for them, their clients, the employer, and the community at large.

HUS2834 Professional Practices in Human Services

40 hours, 4 credits

This course will cover expectations, responsibilities, and skills that students will need to enter the human services field as an entry-level professional. Students will learn skills such as basic counseling, active listening, professional communication, and navigating ethical issues. Students will gain a more complete understanding and will have the basic skills to undertake the next level of professional development.

HUS2979 Human Services Associate Capstone

40 hours, 4 credits

The Human Services Associate Capstone course is a culmination of all that has been covered in the Human Services Associate’s degree. Through an integrated case study assessment, students will have the opportunity to showcase their mastery of the competencies throughout the program. The course is an in-depth, student-centered experience which requires the integration of theory and practical experience. Students will be assessed on their ability to apply all they have learned to a real- life assessment of a human services case.

Prerequisite: This course should be taken in the student’s final quarter

HUS3000 Ethics and Professionalism in Human Services

40 hours, 4 credits

This course will uphold ethical and professional standards for accurately conducting and documenting interactions with clients. It will address mandated reporting and protecting confidentiality throughout the intervention process. It will also focus on creating and maintaining professional boundaries and positive relationships with clients and colleagues.

Prerequisite: **SYG1000**

HUS3025 Interpersonal Relations for Helping Professions

40 hours, 4 credits

This course will explain the importance of establishing strong interpersonal relationships within human services. It will prepare students to develop techniques to interact effectively with others by looking closely at their own values, belief systems and background. Students will adopt supportive communication strategies to motivate others and improve relationships.

Prerequisite: **PSY1012**

HUS3110 Human Development Throughout the Lifespan

40 hours, 4 credits

This course will explain theories for how individuals develop throughout the lifespan and how variables such as environment and culture impact all areas of development. It will include how to observe individuals and contextualize their developmental histories to identify needs both one-on- one and in groups.

HUS3120 Human Sexuality

40 hours, 4 credits

In this course, students will develop an awareness of historical, current, and cross-cultural perspectives on human sexuality. They will work through their initial reactions to individuals with different gender identities, sexual orientation, sexual behaviors, and experiences with sexual abuse. They will also acknowledge personal biases that may be barriers to working with others. Finally, they will also practice using effective techniques to address sexuality related needs of clients.

HUS3130 Theoretical Approaches to Service Delivery

40 hours, 4 credits

In this course, students will explore a variety of theoretical approaches for treatment and intervention service delivery in the human services and use them to address individual client needs. They will practice using approaches for short-term solutions, culturally diverse clients, and behavior change. Students will also practice assessing a human services agency’s theoretical approach and creating a plan to prepare themselves to successfully implement the approach in practice.

HUS3260 Dynamics of Human Ecosystems

40 hours, 4 credits

This course will view individuals through a systems theory lens focusing on an ecological systems theoretical perspective. It will provide students with an opportunity see how an individual’s multiple dimensions interact and enable them to make change in their lives. It will assist students to identify an individual’s behavior patterns and strengths based upon the interactions of their related systems.

Prerequisite: **HUS3130**

HUS3270 Working with Special Populations

40 hours, 4 credits

This course presents the principles and concepts of vulnerability as it relates to helping professions and Human Services. This course offers a general framework to study vulnerable populations and a comprehensive overview of risk factors for vulnerability and consequences of disparities in the United States. Through self-reflection, students will develop the knowledge and skills necessary to work with vulnerable populations by adapting strategies to meet the needs of diverse populations.

HUS3340 Models and Techniques of Effective Helping

40 hours, 4 credits

In this course, students will develop the day-to-day skills necessary to work one on one with clients. Practice includes building rapport, guiding conversations, and establishing clear boundaries and expectations for relationships with clients. They will also practice self-care by setting goals, acknowledging personal limitations, organizing their time, and creating a support network. They will also practice managing stress using strategies that work best for them to help prevent burnout in the field.

HUS3350 Applied Human Communication

40 hours, 4 credits

This course examines objective, professional verbal and nonverbal language when interacting with clients. Students will assess intercultural communication and strategies to manage personal biases when interacting with others. They will analyze the different types of communication and how different communication strategies may be necessary based on the situation. They will also practice using clear, concise, objective language to create goals, intervention plans, document interactions with clients, and explore all other types of communication used in the field.

HUS4000 Social Problems and Advocacy

40 hours, 4 credits

In this course, students will assess social problems from multiple perspectives and advocate for societal change to resolve social problems at a local, national, and global level. Perspectives include systems, historical, and sociological perspectives to analyze the root causes of the problem, the institutions and issues that compound the problem, and different ways of viewing and addressing the problem. Students will also practice selecting appropriate advocacy strategies and settings in which to effectively advocate for change.

HUS4130 Research Methodology in Human Services

40 hours, 4 credits

In this course, students will demonstrate understanding of the basic scientific method. Students will identify basic types of research including descriptive, correlational and experimental. Students will develop a basic experimental or correlational study. They will critically evaluate a variety of published studies. Students will be introduced to data gathering techniques such as survey direct observation and sampling. Students will locate relevant studies for the clinical and community intervention. Students will develop basic research questions and formulate null and alternative hypotheses. They will develop basic research methods for evaluating the hypotheses, demonstrating how to reject and fail to reject each.

Prerequisites: **HUS3130**; **HUS3260**

HUS4140 Practical Application of Assessment and Evaluation

40 hours, 4 credits

This course will uphold ethical and professional standards for accurately conducting and documenting interactions with clients. It will address mandated reporting and protecting confidentiality throughout the intervention process. It will also focus on creating and maintaining professional boundaries and positive relationships with clients and colleagues.

HUS4220 Intervention Strategies and Resources

40 hours, 4 credits

In this course, students will practice enabling clients to move through the stages of change and implement treatment plans to improve the quality of their lives. Practice includes using motivational interviewing strategies to help build self-efficacy and autonomy and to work through any conflicts between clients' values, ideas, and behaviors. Students will also practice collaboratively creating treatment plans with clients. This includes defining goals and priorities, locating appropriate resources, and determining ways to measure progress.

Prerequisite: **HUS4140**

HUS4230 Administration and Management in Human Services

40 hours, 4 credits

This course examines the Human Services Professional as a strategic, ethical leader. They will practice designing programs, implementation, and evaluation plans to address a community need. Students will practice maintaining the responsibilities of a Human Services Practitioner, including leadership, management, operation, and practice in the field.

HUS4300 Case Management in Practice

40 hours, 4 credits

In this course, students will practice integrating the skills they need to work effectively with clients as general case workers in human services. They will practice managing multiple complex cases to effectively prioritize and address individual client needs. This practice includes assessing needs, identifying strengths, creating appropriate service plans, and coordinating and monitoring progress. It also includes completing documentation to communicate case work. Students will also practice using effective helping skills to manage their cases and effectively address client needs.

HUS4440 Pathways to Career Success

40 hours, 4 credits

In this course, students will assess their personal values, beliefs, and interests in human services and create a relevant career path for their professional development. Practice includes exploring potential career opportunities and selecting specific populations to serve, needs to address, and settings to work in. They will also create career-related goals, assess current strengths and growth opportunities, and identify strategies to address potential challenges they may encounter in the profession.

HUS4450 Human Services Capstone II

30 hours, 3 credits

The capstone course represents the final milestone in the Human Services Bachelor's program. Students will integrate the knowledge and skills gained to demonstrate achievement of the program outcomes. This course will provide students with an opportunity to integrate learning, skills, and knowledge from the Human Services Program in the form of a Capstone Project. Through case analysis, class discussion, reflective exercises and a research project, students will synthesize and demonstrate their understanding of core Human Services concepts via completion of a Capstone project approved by the instructor. They will support their work by demonstrating their transferable skills including critical thinking, digital fluency, information literacy, ethics, communication, and diversity to support practice as a professional in the field of Human Services.

Prerequisites: **HUS3000**; **HUS4130**; Expected to be the final upper-level core course completed

IDC Interdisciplinary Computing

IDC3152 Enterprise Resource Reporting

40 hours, 4 credits

In this course, students will develop an understanding of advanced enterprise resource reporting and business intelligence and how businesses can use them to support decision-making. Major electronic techniques and tools for classifying, segmenting, and analyzing business information will be examined. Students will learn how to integrate enterprise resource tools into standard business processes.

INS International Studies

INS3677 International Leadership and Human Resource Management

40 hours, 4 credits

This course is designed to introduce students to the complexities of the human resource management processes on a global scale. Students learn how to differentiate between domestic and international human resource management. Employee training and development is addressed, including how to assimilate new employees in the global arena.

ISM Information Systems Management

ISM2321 Managing Information Security

40 hours, 3 credits

Information security is not only an IT issue, but also a management issue as well. Therefore, this course introduces students to a detailed examination of the systems-wide perspective of information security. They begin with the strategic planning process for security, which includes an examination of the policies, procedures, and staffing functions necessary to organize and administrate ongoing security functions in an organization. Course subjects include security practices, security architecture, and models, continuity planning, and disaster recovery planning. This course is one step in helping students prepare to take the SSCP certification exam.

Prerequisite: **CET2660C**

ISM2541C Project Management and Team Leadership

40 hours, 3 credits

In this course, students will discover many of the theories and methodologies of effective leadership and project management. The topics of managing diverse teams, multitasking, planning for contingencies, as well as fundamentals in project management best practices will be covered. The student will come away with an understanding of leadership and project management practices that can be put to use in the workplace.

Prerequisite: **CTS2511**

ISM3015 Management of Information Systems

40 hours, 4 credits

Students are introduced to the foundations of management information systems. This includes current trends, fundamental MIS technology concepts, applications for business functions, and management practice. Students will gain exposure to analyzing, utilizing, and supervising integrated management information systems.

ISM3110C Information Technology Project Management Tools

60 hours, 4 credits

This course will introduce students to the generally accepted processes and knowledge areas found in the project management profession; the tools such as Excel, Visio, MS Project, and techniques to drive the project. Information Technology Management Bachelor’s Degree and Information Technology Project Management

Information Technology Management Bachelor’s Degree and Information Technology Project Management Certificate Only - Prerequisites: **CDA3626C**; **CTS2511**
Business Management Bachelor’s Degree Only - Prerequisite: **GEB3422**

ISM3255C Information Technology Project Management I

60 hours, 4 credits

This course emphasizes the fundamental concepts and principles of project management defined by the Project Management Institute (PMI) in the Certified Associate in Project Management (CAPM) topics that include project planning, executing, monitoring, and controlling tools and techniques.

Prerequisite: **ISM3110C**

ISM4470C Information Technology Project Management II

60 hours, 4 credits

In this course, students further their learning on the fundamental concepts of project management and learn to apply principles of cost estimation and budgeting; quality planning, management, and control; and procurement life cycle activities as they relate to projects.

Prerequisite: **ISM3255C**

ISM4505C Information Technology Organization Support

50 hours, 4 credits

Supporting an organization with a myriad of software and hardware implementations can be a daunting challenge. This course gives a systematic approach to understanding how to best effectively support the computing environment for competitive advantage.

ISM6200 Business Intelligence and Analytics

40 hours, 4 credits

This course provides an in-depth understanding of data and analytics and their application to organizational decision-making. Topics covered include understanding what data, metrics, and analytics are needed to explain and predict organizational outcomes as well as the application of a variety of statistical analysis methods to develop insights and data visualization. This course prepares students to be both effective producers and critical consumers of analytical findings that can improve business performance.

Prerequisite: **FIN6466**

LBS Labor Studies

LBS2030 Training and Development

40 hours, 4 credits

This course is a study of training and development fundamentals including how training relates to human resource management and human resource development, how internal and external factors influence employee behavior, and the role of adult learning in training. Students will examine how training needs are determined, best practices in developing and implementing training programs, and how to evaluate training efforts.

LDR Leadership Studies

LDR2439 Introduction to Organizational Leadership

40 hours, 4 credits

This course provides students with an opportunity to learn the fundamental theory and practical application of organizational leadership in the context of diversity. Emphasis is placed on a foundation in theoretical concepts and their practical applications to enable students to understand the chaotic and consistently changing world of organizations and help them develop their own skills to become effective leaders.

LDR4200 Leadership and Management Essentials

30 hours, 3 credits

This course explores how to identify an individual leadership style and become a creative and effective leader. Students will enhance leadership and professional development skills and examine the principles of high-performance leadership skills. Throughout the course, focus content areas consist of capabilities of motivation, critical thinking, decision-making, effective communication, group organizational skills, and strategies to implement change. Students will explore building and leading innovative cultures in the workplace.

LDR4360 Dynamic Team Development

40 hours, 4 credits

Students will learn the individual skills and competencies necessary to be an impactful and engaging team member. Areas of concentration include emotional intelligence, team innovation, role resilience, conflict resolution, and collaboration tools. Students explore factors that contribute to team dynamics.

LDR5000 Professional Growth and Leadership

40 hours, 4 credits

This course will help students gain the ability to deal effectively with emotions in the workplace, which is critical to success as a leader at any level. Emotional Intelligence is increasingly critical as a skill set and, combined with native intelligence, will increase the ability to successfully manage challenges presented, as the pace increases and our environment makes more demands on our cognitive, emotional, and physical resources. Students will learn to identify their personal and holistic challenges with maintaining positive environments and collaborative relationships as well as overcoming resistance and negativity. Students will explore tools, techniques, skills, and perceptions to perform and manage emotions with confidence and positive results.

LDR5100 Human Resources Strategy

40 hours, 4 credits

This course provides an overview of Human Resources management in organizations and examines the role of the Human Resources (HR) function in contributing to an organization’s business strategy and creating sustainable competitive advantages. The Human Resources strategies, systems, policies, and practices used by organizations to compete effectively in today’s global economy are therefore examined. The course helps to prepare students to function effectively as strategic business partners in organizations.

LDR5200 Organizational Behavior and Leadership

40 hours, 4 credits

This course provides an overview of the management of organizational behavior and leading people. As careers advance from the individual contributor to the leadership level, concerns about technical knowledge need to be complemented with knowledge about how to coordinate, motivate, and lead others. This course is designed to help provide an integration of technical skills with the human side of organizations.

LDR5300 Legal, Ethical, and Risk Issues in Organizations

40 hours, 4 credits

This course is the study of the legal, ethical, and risk challenges and issues organizations face. It places focus on ensuring the organization operates ethically and legally while at the same time focuses on reducing or eliminating risk. Topics covered will be the employees’ work environment, union-related and labor relations law, reasonable accommodations, employment relations, negotiation skills, and risk management. This course will prepare students to be legal and ethical leaders who minimize risk.

LDR5400 Strategic Recruitment and Retention

40 hours, 4 credits

This course is designed to improve the student's overall talent management outlook. The goals of the course are to identify the best ways to retain employees and to recruit new talent. By doing this, companies can ensure they are able to thrive, no matter what the economy does and no matter what happens in an industry.

Prerequisite: **LDR5300**

LDR6000 Rewards System Management

40 hours, 4 credits

This course is the study of practices in contemporary reward and compensation systems management. It places focus on how organizations reward their employees and the decision-making behind the strategy. Topics covered will be legal aspects of rewards systems management; various compensation systems including executive and global compensation, market research and benchmarking, and organizational strategy alignment. This course will prepare students for a deeper understanding of rewards and motivation in a diverse, ever-changing environment.

Prerequisite: **LDR5300**

LDR6100 Performance Management

40 hours, 4 credits

This course gives Human Resources professionals and managers tools and strategies for effective performance appraisals that motivate employees to achieve higher productivity. Topics covered are establishing performance criteria, using various appraisal formats, conducting meaningful performance discussions, initiating ongoing coaching for key stakeholders, and encouraging employees to prepare for a performance discussion.

Prerequisite: **LDR5300**

LDR6200 Applied Human Resources Analytics

40 hours, 4 credits

This course is the study of data, metrics, and analytics to solve Human Resources needs. It places focus on gaining business insights, identifying needs, and recommending solutions through metrics. Topics covered will be human resources information systems and common technologies, market research and benchmarking, and solving Human Resources problems. This course will prepare students for a deeper understanding of analytics and provide them with tools to make educated decisions in a business setting.

LDR6300 Global Intelligence

40 hours, 4 credits

This course is the study of the global landscape for today's organization. It places focus on leadership and strategy in a global environment. Topics covered will be country-specific and U.S. laws, international aspects of Human Resources, Human Resources trends, global organizational and leadership challenges, a global training program, and a global risk management plan. This course will prepare students for leadership in a global organization.

LDR6400 Change Management

40 hours, 4 credits

This course is designed to gain a comprehensive understanding of Change Management, why change happens, how it happens, and what needs to be done to overcome resistance to change. Student will develop an understanding of the challenges associated with change management and its impact on individuals, teams, and organizations.

LDR6900 Human Resources Management Capstone

40 hours, 4 credits

This course is designed for students to apply the knowledge they have learned in the Master of Human Resources and Organizational Leadership degree to a real-world business scenario. Key areas of focus include: human resources strategy; organizational behavior and leadership; legal, ethical, and risk issues in organizations; strategic recruitment and retention rewards systems management; performance management; applied human resources analytics; global intelligence; and change management. This course is designed to be taken at the end of the program.

Prerequisite: Expected to be the final upper-level course completed

LIT Literature

LIT2000 Introduction to Literature

40 hours, 4 credits

This course offers an introduction to the most common literary genres: fiction, poetry, drama, and literary nonfiction. Students will study the basic elements of each genre, learn how to compare genres, become familiar with sample texts that illustrate the particularities of each genre, and practice the skills of analyzing and writing about literary texts. Reading and analysis of texts will include a variety of literary forms and periods. Students will engage in approaches to determining literary meaning, form, and value.

Prerequisite: **ENC1101** recommended

LIT3382 Modern World Literature

40 hours, 4 credits

This course explores how authors from around the world have engaged with important themes and historical events since the onset of modernism near the start of the twentieth century. Students will examine the interplay of fiction and history, the varieties of literary style, and the qualities that link as well as distinguish works from different cultures. Students will respond to texts critically in discussion and essays, as well as research critical evaluations of literary topics, authors, etc.

MAC Mathematics — Calculus and Precalculus

MAC1106 Advanced Algebra

50 hours, 5 credits

This course introduces students to advanced algebraic topics. Students will gain experience with complex number operations, function notation and function operations, higher order systems of equations, solving logarithmic and exponential equations, and investigating sequences and series.

Prerequisite: Satisfactory score on placement exam

MAD Mathematics — Discrete

MAD3300 Discrete Mathematics

40 hours, 4 credits

Discrete mathematics is an essential part of the foundation of computer science (a study of finite structure), statistics, and algebra. Its topics can be divided into discrete parts and it is applicable across many disciplines that draw from analytical thinking. In this course, students will study logic, counting, probability, and basic cryptography. Topics include set theory, functions, relations, algorithms, and graph theory. The emphasis is on ideas and abstraction in addition to problem solving. This course will prepare students to apply abstract thinking in their prospective career fields.

MAN Management

MAN1300 Introduction to Human Resource Management

40 hours, 4 credits

This course is an introduction to the management and leadership of an organization's human resources. It explores the importance of establishing or administrating the goals, policies, and procedures of the organization. Topics discussed include: communication, employee benefits, interview techniques, motivation, safety, hiring, discipline, and employment guidelines.

MAN2021 Principles of Management

40 hours, 4 credits

Students enrolled in this course will develop managerial skills and insights by studying management practices. In addition, they will develop an understanding of the manager/employee relationship and the legal and ethical issues that impact these relationships.

MAN2062 Business Ethics

40 hours, 4 credits

This course presents an examination of current moral and ethical issues that arise in the world of business, as well as an analysis of the main theories of moral obligation, right and wrong action, and good and bad values.

MAN2793 Introduction to Functional and Project Management

40 hours, 4 credits

This course examines various management roles and how they interrelate within organizations by analyzing the daily tasks and responsibilities within each management role. The course compares how divisional managers lead teams, investigates cross-functional team relations, and discusses the importance of developing project management skills within various management disciplines.

MAN3322 Human Resource Information Systems

40 hours, 4 credits

This course examines the role of human resource information systems in today's organizations and human resource departments. Key areas of focus include human resource information systems design, acquisition, and implementation. The role of these systems in talent acquisition and management is also examined.

MAN3429 Modern Human Resource Management

40 hours, 4 credits

This seminar course introduces students to timely human resources topics: helping organizations manage workforce planning related to mergers and acquisitions, outsourcing and offshoring as a workload planning strategy, and sustainability and corporate social responsibility.

MAN3504 Operations Management

40 hours, 4 credits

In this course, students examine the operations function of managing people, information, technology, materials, and facilities to produce goods and services. Specific areas covered will include designing and managing operations, purchasing raw materials, controlling and maintaining inventories, and producing goods or services that meet customers' expectations. Quantitative modeling will be used for solving business problems.

MAN3668 Strategic Human Resource Management

40 hours, 4 credits

This course is designed to teach students how to integrate the human resources function with an organization's overall strategic planning process. Students will learn how to establish human resources goals and objectives in the context of an organization's business goals to help increase employee performance and satisfaction. Strategies for creating a culture that values innovation and competitiveness will also be explored.

MAN3710 Law and Ethics for the Human Resource Professional

40 hours, 4 credits

This course introduces students to the world of law and ethics. This is a broad area and is specific only to human resources. Students are able to work with real-world scenarios and company situations to assess for compliance and ethical behavior. Finally, students apply various types of decision-making models for effective practice and strategic planning.

MAN4055 Workforce Performance and Talent Management

40 hours, 4 credits

This course examines strategies and techniques for developing and managing employees to help institutions create a competitive workforce. Students will learn how to work with employees on how to build a successful career through an institution's performance appraisal and professional development processes.

MAN4128 Workforce and Labor Relations Management

40 hours, 4 credits

This course examines the context of workforce and labor relations management, the collective bargaining process, and labor contracts. Students will learn how to establish a bargaining unit, negotiate and implement a collective bargaining agreement, and participate in the arbitration process.

MAN4143 Contemporary Leadership Challenges

40 hours, 4 credits

This course examines current issues within the management field. This course is highly interactive in that both students and faculty are actively engaged in researching, presenting, and discussing course materials. In addition to gaining in-depth exposure to a current key topic in the field, students learn to become active and effective members of a professional learning community.

MAN4164 Sales Force Management

40 hours, 4 credits

This course is the study of managing and leading a salesforce. It focuses on managing and leading both on-site and remote personnel by applying communication skills and the ability to develop relationships. Topics covered include qualities found in effective sales managers, integrating both managerial and leadership skills, embracing diversity, working with global teams, conflict management, and developing business acumen.

Prerequisite: **MAR3592**

MAN4240 Organizational Behavior Analysis

40 hours, 4 credits

This course is designed to explore human behavior in work settings from an interdisciplinary perspective. The following topics will be studied and analyzed from a management perspective: organizational structure, leadership, power, conflict management, individual and group dynamics, motivation, morale, and communication.

MAN4320 Human Resource Recruitment and Selection

40 hours, 4 credits

This course introduces students to the basic principles and techniques of staffing the workplace. Students will analyze theories and strategies utilized in staffing, planning, recruiting, and selection and performance assessment.

MAN4330 Compensation Administration

40 hours, 4 credits

This course addresses tangible and intangible compensation and the use of compensation to motivate and reward employee performance. The course also covers job analysis, job description, and job evaluation on the basis of compensable factors as well as designing an equitable pay structure. In addition, students analyze the influence of unions and government in determining the compensation of the labor force, including compensation of both hourly workers and managerial employees.

MAN4572 Instructional Design, Training and Development, and Learning

40 hours, 4 credits

This course is designed to introduce students to the field of instructional design. Theories of instructional design are covered, with an emphasis on the systematic approach to learning and instruction. An emphasis is placed on learning the different training approaches, such as ADDIE. Students will transfer the learning to a project, demonstrating an understanding of key instructional design concepts: analysis, design, development, implementation, evaluation, and metrics.

MAN4602 International Business

40 hours, 4 credits

This course provides management students with an introduction to international economic, political, cultural, and business environments. Students will develop a basic understanding and appreciation of the myriad factors involved in managing people within a global workforce.

MAN4636 Business Development and Customer Relations Management

40 hours, 4 credits

This course is the study of tasks and processes used to identify and execute new areas of business. It focuses on cultivating partnerships, identifying new market opportunities for products and services, and increasing profitability by building strategic relationships. Topics include identifying new opportunities, cultivating and sustaining value-added partnerships or other commercial relationships, and an overview of Customer Relationship Management (CRM). This course prepares students with a working knowledge of current CRM platforms, and to successfully pursue a long-term growth strategy from customers, markets, and relationships.

Prerequisite: **MAR3592**

MAN4701 Leading Change

40 hours, 4 credits

This course will focus on the impact of change in an organizational setting. Various change management models will be explored, providing students with a foundation for approaching change and developing effective skills and techniques to perform in the workplace when change occurs. Students apply business concepts to real-world case study examples and determine strategies for bringing constructive change to an organization.

MAN4720 Strategic Management

40 hours, 4 credits

This course is designed to integrate prior business courses through study, discussion, and creation of strategic management plans. Students will evaluate the key functions of organizations and integration of these functions to understand the best practices used to achieve competitive advantages. Topics will include strategic formulation, implementation, and evaluation.

MAN4845 Leadership and Teams

40 hours, 4 credits

This course provides an applied approach to leadership, team building, collaboration, and conflict resolution. Students will understand and apply these concepts to workplace settings. Students will develop structures, processes, and strategies to create and maintain effective teams. Gender, culture, individuality, and telecommuting in team dynamics will also be explored.

MAN4930 Business Management Bachelor Capstone

40 hours, 4 credits

In this course, students demonstrate mastery of core business functions and methodologies, leadership skills, and management strategies for dynamic business environments. Additionally, the student's ability to apply human-centered concepts, evaluate the role of business technology, and interpret data is assessed.

Prerequisite: Expected to be the final upper-level course completed

MAN4991 Human Resource Project Capstone

20 hours, 2 credits

In this course, students apply the knowledge and skills they have learned in the Human Resource and Organizational Leadership Bachelor of Science degree to a real-world business scenario. Key areas of focus include strategic human resource management, organizational leadership, workforce performance, compensation and benefits, employment law, corporate social responsibility, workplace health, safety and security, employee engagement and motivation, needs analysis, metrics, and training and development. This course is designed to be taken at the end of the program.

Prerequisite: Expected to be completed in last or second-to-last quarter

MAN5100 Value Chain and Operations Management

40 hours, 4 credits

This course is the study of how external influences and internal capabilities affect organizational strategies, tactics, and execution. This course covers topics surrounding the application of Michael Porter's Five Forces and value chain models to examine competitive forces, economic constraints, and organizational capabilities. Additionally, operations management's role in organizational performance is explored. Students will examine organizational challenges and opportunities in order to formulate strategies that sustain competitive advantage.

MAN6100 Innovation and Change Management

40 hours, 4 credits

This course provides an overview of innovation and change management's impact on how organizations conduct business. Students will also explore the importance of global and domestic innovation as well as its effect on research and development. By understanding technology and tools used in the innovation process, students will be well prepared to lead organizations in the global economy.

MAN6500 Business Strategy and Entrepreneurship

40 hours, 4 credits

This course provides business model strategies and business development techniques for starting or managing a business. In addition, the entrepreneurial process and characteristics as well as the importance of risk assumption will be explored. Students will learn how the entrepreneurial process assists in identifying potential business opportunities. They will also learn about the components and importance of business plans that incorporate selecting a business model, business development, ethics, risk, and entrepreneurial mindset.

MAN6720 Applied Strategic Planning

40 hours, 4 credits

This course provides methods and processes for effective applied strategic planning. Students will study the importance of holistic strategic thinking when developing an organization's strategic plan. Students will also evaluate an organization's infrastructure, perform a gap analysis, and assess the impact of globalization as part of the strategic planning process.

MAR Marketing

MAR2011 Principles of Marketing

40 hours, 4 credits

This course serves as an introduction to the marketing concept, integrating seven key marketing perspectives. Topics include consumer buying behavior, business-to-business markets and organizational buying behavior, market research techniques, fundamental pricing concepts, marketing channels and logistics, integrated marketing communications, and marketing's role in e-commerce.

MAR2374 Online Multimedia Marketing

40 hours, 4 credits

This course explores online multimedia marketing strategies and techniques. In addition to exploring online marketing channels, this course will also address the value of online multimedia marketing to create engagement and increase sales. Emerging online multimedia technologies and techniques will also be introduced.

Prerequisite: **GEB2444**

MAR2873 Public Relations and Advertising Strategies

40 hours, 4 credits

Students examine the similarities and differences between public relations, advertising and promotional marketing, and how to differentiate between a target audience and a target market. Marketing interactions with associated stakeholders, including current and new customers; shareholders; the media; financial and industry analysts will be explored. Other parts of the enterprise, such as senior management and marketing, finance, and human resources departments are studied.

Prerequisite: **MAR2011**

MAR3033 Introduction to Marketing Design

30 hours, 3 credits

This course is the study of marketing design and the important role it plays in providing an introduction to basic design concepts for the marketing messages. It focuses on the different design concepts and techniques used in the creation of the marketing message to the customer. Topics covered include hierarchical typographical, color psychology, and other design concepts to communicate the client message. This course prepares students to apply fundamental design concepts to marketing messages.

MAR3128 Foundations of Digital Marketing

40 hours, 4 credits

This course introduces students to basic concepts related to digital marketing. They will investigate major digital marketing platforms all while identifying its role in today's business environment. By the end of the course, students will be able to outline the steps for creating a cross-platform digital marketing plan that presents a consistent brand message.

MAR3250 Marketing Research

30 hours, 3 credits

This course is the study of marketing research and the important role it plays in providing useful information to make marketing decisions. It focuses on different research methodologies and their roles in meeting research goals and objectives. Topics covered include the marketing research process, qualitative and quantitative research methods, consumer and market trends, and the analysis of research findings. This course prepares students to synthesize research and apply customer insights to marketing decisions.

MAR3322 Marketing Law and Ethics

40 hours, 4 credits

This course is the study of legal and ethical issues in marketing. It focuses on the distinction between law and ethics and the importance of considering both when making marketing decisions. Topics covered include legal and regulatory compliance, methods to minimize stakeholder risk, ethical values and best practices, and the application of legal and ethical considerations to real-life marketing decisions. This course prepares students to comply with legal requirements and manage ethical gray areas that may arise in a career in marketing.

MAR3592 Strategic Sales and Sales Management

40 hours, 4 credits

This course is the study of strategic sales and effective sales management of both B2C sales and B2B sales. It exposes students to the value of consultative selling rather than the more common and traditional transactional selling. The focus is on strategic partnering and building long-term relationships. Students will explore the differences between channels and customer needs. This course will prepare students with the knowledge, skills, and abilities required to focus on target consumers in relevant ways and to gain competitive advantage.

MAR3817 Search Engine Optimization and Marketing Strategies

40 hours, 4 credits

This course examines the history of search engine optimization (SEO), the evolution of SEO, and the three basic stages of getting long-form blog content to rank in organic search engines. Application of keyword strategies, local and offpage SEO techniques, developing an account structure, and defining success metrics are examined. This course also provides hands-on experience developing and optimizing campaigns.

MAR4065 Marketing Communications

40 hours, 4 credits

This course allows students to learn best practices when communicating through multiple channels and with a range of audiences. Topics include the development of a brand, how to align communication methods with the brand, copywriting of key marketing plan components, and communication strategies to gain campaign approval. This course prepares students to plan and execute integrated marketing campaigns designed to support business goals through traditional and digital platforms.

MAR4171 Advanced Marketing Strategies

40 hours, 4 credits

In this course, students will learn about advanced applications of marketing mix strategies in both domestic and international business environments. Topics include common internal resources and external trends that influence marketing decisions and organizational factors that can solidify strategic success.

MAR4285 Advanced Digital Marketing Strategies

40 hours, 4 credits

This course is an application of the concepts learned in Foundations of Digital Marketing. Students will employ real-world, digital marketing campaigns and understand the placement of each in the sales funnel. Students will also learn how to discern what digital marketing sources are worth following, and, more importantly, how to avoid information that is incorrect or outdated.

Prerequisite: **MAR3128**

MAR4316 Visual Marketing and Social Media

40 hours, 4 credits

This course introduces students to higher levels of social media strategy and execution. Topics include social media strategy and campaign development, incorporating the use of effective visual marketing, and addressing crisis communication plans through social media. This course prepares students to communicate with marketing stakeholders about the necessity of end-to-end consumer engagement in visual and social media initiatives.

Prerequisite: **MAR3128**

MAR4409 Professional Selling

40 hours, 4 credits

This course is the study of the interpersonal value-added communication process within professional selling. It focuses on developing a framework for each point of contact a salesperson has with a customer. Each stage of the framework builds upon the previous step. Topics covered focus on relationships, products, customers, presentations, and ethics. Topics also include an overview of certifications available for sales professionals. This course prepares students for successfully uncovering and satisfying the needs and wants of a prospect, while building and maintaining long- term relationships between both parties.

Prerequisite: **MAR3592**

MAR4532 Sales Promotion, Analytics, and Forecasting

40 hours, 4 credits

This course is the study of short-term tactics to boost sales, increasing demand and visibility through sales promotions, and analyzing trends to predict future events. It focuses on creating value for the consumer and supporting organizational goals and objectives. Topics covered are measuring sales promotions, differentiating the characteristics of business-to-consumer (B2C) and business-to-business (B2B) channels, predictive analytics, and promotional demand forecasting. This course prepares students to attract more customers, drive value, and ethically maximize business results.

Prerequisite: **MAR3592**

MAR4920 Marketing Bachelor Capstone

40 hours, 4 credits

This course is the capstone course that culminates the Marketing Bachelor’s Degree. It focuses on the application of marketing theories and concepts covered in previous courses. Topics covered include marketing plan development and implementation, the importance of aligning integrated marketing strategies with organizational goals, the application of marketing research, traditional and digital communication channels, and marketing metrics and analysis. This course prepares students to graduate with a realistic view of the types of business decisions marketing practitioners make on a daily basis. Students will also have the opportunity to explore a range of career options in the field of marketing.

Prerequisite: Expected to be the final upper-level course completed

MAR5819 Marketing Strategy

40 hours, 4 credits

This course is designed for students to analyze data and evaluate key marketing components in order to create an effective marketing strategy. Key areas of focus include value proposition, branding, digital marketing, buyer behavior, marketing analytics, and marketing communications. This course provides students with an understanding of how to assess the value and impact of marketing campaigns and successfully apply the marketing mix to remain competitive in the marketplace.

MAT Mathematics

MAT1222 Algebra

40 hours, 4 credits

This course introduces students to algebraic terminology and applications. Students will gain experience with real number operations, variables, linear equations, polynomials, integer exponents, graphs, factoring, radical expressions, quadratic equations, and rational expressions.

Prerequisite: Passing grade in Developmental Education coursework or placement determined by Rasmussen University entrance placement exam score

MAT1402 General Education Mathematics

40 hours, 4 credits

This course introduces students to topics from modern mathematics that are relevant to everyday life and not typically covered in the standard university math sequence. Students will be exposed to a variety of mathematical tools from diverse branches of mathematics. They will utilize these tools to solve interesting, real-world problems. Topics may include, but are not limited to game theory, graph theory, the mathematics of growth, applications of geometry, probability, and statistics.

Prerequisite: Passing grade in Developmental Education coursework or placement determined by Rasmussen University entrance placement exam score

MAT3172 The Mathematics of Games

40 hours, 4 credits

An introduction to the mathematics of games. Math topics may include, but are not limited to probability, statistics, and introductory game theory.

MCB Microbiology

MCB2340C General Microbiology

50 hours, 4 credits

This course provides an introduction to microbiology that emphasizes effects of microorganisms on human systems. Topics include microbial cell structure, function, and metabolism; requirements for and control of growth; genetics, mutations, and biotechnology; a survey of bacteria, viruses, algae, fungi, protozoa, and Helminthes; interactions with and impact of microbes on humans, including mechanisms of pathogenicity. This course includes a virtual lab to practice and apply microbiology concepts.

MEA Medical Assisting

MEA1243 Pharmacology for the Allied Health Professional

40 hours, 4 credits

This course is designed for a variety of allied health programs requiring an understanding of pharmacology. It attempts to present a basic rationale for understanding current drug therapy. This course presents drugs according to their therapeutic applications. Pertinent physiology and related diseases are reviewed before the pharmacology of the drug is discussed. The approach by body system in this course serves to provide the necessary background information and to refresh the student's memory of previously learned material through which the therapeutic action of the drugs can be clearly understood.

Prerequisites: **HSC1531**; **BSC2093C** or **PHA1500**

MEA1350 Fundamentals in Clinical Techniques

100 hours, 6 credits

MEA1350 Lecture (20 hours, 2 credits)
MEA1350L Lab (80 hours, 4 credits)

In this course, students will begin to develop and apply skills in injections, phlebotomy, and basic vital signs. They will begin to understand reasoning and sequencing of immunizations, basic lab functions, and applied lab skills as well as learn basic CPR. In addition, students will recognize proper techniques in providing efficient patient care within a clinical setting and applied knowledge of basic laboratory coding.

MEA1460 Clinical Laboratory Applications and Diagnostic Procedures I

100 hours, 6 credits

MEA1460 Lecture (20 hours, 2 credits)
MEA1460L Lab (80 hours, 4 credits)

In this course, students will begin to develop and apply learned applied skills and procedure technique within pulmonary, audiology, and ophthalmology. Students will also learn patient care assessment, procedures, and applicable tests within women's health, the importance of good nutrition in conjunction with an understanding of common eating disorders. In addition, students will learn to work with common injuries and treatment of orthopedics. Students will gain overall knowledge within various clinical department settings.

Prerequisites: **HSC1531**; **MEA1350**; **PHA1500**

MEA1570 Clinical Laboratory Applications and Diagnostic Procedures II

100 hours, 6 credits

MEA1570 Lecture (20 hours, 2 credits)
MEA1570L Lab (80 hours, 4 credits)

In this course, students will begin to develop and apply learned patient care assessment, procedures, diagnosis, and treatments within clinical departments to include internal medicine, geriatrics, pediatrics, urology, cardiology, endocrinology, special needs, and disability patient care. In addition, students will recognize proper assessment and utilize basic skills in working with patients dealing with a terminal illness in addition to identifying the psychological states of death or dying. In this course, students will also learn basic procedural coding, where applicable.

Prerequisites: **HSC1531**; **MEA1350**; **PHA1500**

MEA2203 Pathophysiology

50 hours, 5 credits

Students will learn basic concepts and terminology related to diseases and disorders of the human body. Focus is on the structure, nature, causes, diagnostic procedures, pharmacology and treatment of common diseases of selected human body systems.

Prerequisite: **BSC2093C**

MEA2820 Medical Assisting Capstone

20 hours, 2 credits

In conjunction with the Medical Assisting Externship, students will complete an online Medical Assisting Capstone course. In this course, students will learn job-search techniques and skills for entry-level medical assistants as well as share and learn from their externship experiences with the class. Students will also prepare to sit for a medical assisting credential examination during this course (either the CMA or RMA depending on program enrollment date).

Corequisites: **MEA2895**; Expected to be the final lower-level core course completed

MEA2895 Medical Assistant Experiential Externship

200 hours, 6 credits

In conjunction with a Medical Assisting Capstone, students will complete 180 hours of a Medical Assisting training experience in a physician's office/clinic or medical center and 20 hours of online lecture. While on the clinical site, the extern will perform medical assisting job duties in both the front-office administrative and the back-office clinical areas, in order to develop on-the-job learning skills.

Prerequisite: Must have passed all Medical Assisting core courses except **E242** Career Development
Corequisite: **MEA2820**

MEA2976 Medical Assistant Professional Externship

260 hours, 6 credits

In conjunction with the Medical Assisting Capstone course, students will train in a physician's office/ clinic or medical center. They will complete 240 hours of Medical Assistant training where they will perform a wide variety of clinical, administrative, and technical duties. They will develop their skills to better prepare them for their future employment in the Medical Assisting field.

Prerequisite: Must have passed all Medical Assisting core courses except **E242** Career Development
Corequisite: **MEA2820**

MLT Medical Laboratory Technology

MLT1245 Clinical Chemistry I

40 hours, 3 credits

MLT1245 Lecture (20 hours, 2 credits)
MLT1245L Lab (20 hours, 1 credits)

An introduction to analytical techniques, instrumentation, and basic principles of clinical chemistry methods. Presents the theory and application of biochemical analytes, including clinical significance and normal reference ranges.

Prerequisites: **HSC1531**; **MAT1222**; **MLT1728**; **PHA1500**

MLT1325 Phlebotomy

40 hours, 3 credits

MLT1325 Lecture (20 hours, 2 credits)
MLT1325L Lab (20 hours, 1 credits)

In this course, students will learn the skills to perform a variety of blood collection methods using proper techniques and universal precautions. This course will emphasize proper patient identification and applying the principles of safety and infection control. The student laboratory setting will provide an opportunity to perform basic phlebotomy procedures.

Prerequisites: **HSC1531**; **PHA1500**

MLT1377 Hematology I

40 hours, 3 credits

MLT1377 Lecture (20 hours, 2 credits)
MLT1377L Lab (20 hours, 1 credits)

Introduction to the theory and practical application of routine and special hematology procedures. Presents red-blood-cell function, hematopoiesis, and associated diseases. The student laboratory focuses on identifying normal and abnormal red-blood-cell morphology and the evaluation of stained blood smears.

Prerequisites: **HSC1531**; **PHA1500**

MLT1448 Clinical Microbiology I

40 hours, 3 credits

MLT1448 Lecture (20 hours, 2 credits)
MLT1448L Lab (20 hours, 1 credits)

This course will include basic concepts of microbiology. Emphasis will be placed on cell structure and function of human, pathogenic microorganisms. Disease, resistance, and immune system function will be included. Methods of microbe control will be introduced. A student laboratory will be utilized for experiences in fundamental microbiology techniques.

Prerequisite: **MLT2166**

MLT1485 Urinalysis

40 hours, 3 credits

MLT1485 Lecture (20 hours, 2 credits)
MLT1485L Lab (20 hours, 1 credits)

An introduction to urinalysis and body-fluid analysis. Includes anatomy and physiology of the kidney, and physical, chemical, and microscopic analysis of urine, cerebral spinal fluid, and other body fluids.

Prerequisite: **MLT2166**

MLT1728 Introduction to Chemistry

40 hours, 3 credits

MLT1728 Lecture (20 hours, 2 credits)
MLT1728 Lab (20 hours, 1 credits)

This course is designed for students without a chemistry background. It includes chemical symbols and formulas, atomic theory, equation writing and balancing, chemical nomenclature, calculations involving chemical formula and a brief introduction to organic chemistry, physical chemistry, analytical and biochemistry.

Prerequisite: **MAT1222**

MLT2166 Clinical Chemistry II

60 hours, 4 credits

MLT2166 Lecture (30 hours, 2.5 credits)
MLT2166L Lab (30 hours, 1.5 credits)

Expanding upon concepts learned in Clinical Chemistry I, this course further examines the principles and procedures of various tests performed in Clinical Chemistry. Integral to this course is continued explanation of the physiological basis for the test, the principle and procedure for the test, and the clinical significance of the test results, including quality control and normal values.

Prerequisite: **MLT1245**

MLT2230 Hematology II

60 hours, 4 credits

MLT2230 Lecture (30 hours, 2.5 credits)
MLT2230L Lab (30 hours, 1.5 credits)

Expanding upon concepts learned in Hematology I, this course further examines the theory and practical application of routine and special hematology procedures. Presents white blood cell function, hematopoiesis, and associated diseases. The student laboratory focuses on identifying normal and abnormal white blood cell morphology and the evaluation of stained blood smears. Coagulation principles and techniques will be included.

Prerequisite: **MLT1377**

MLT2395 Immunology

40 hours, 3 credits

MLT2395 Lecture (20 hours, 2 credits)
MLT2395L Lab (20 hours, 1 credits)

Basic immunology and serology concepts will be presented with an emphasis on selected infectious diseases and autoimmune disorders. The theory of immunologic and serologic procedures will also be presented.

Prerequisite: **MLT2230**

MLT2450 Immunohematology

40 hours, 3 credits

MLT2450 Lecture (20 hours, 2 credits)
MLT2450L Lab (20 hours, 1 credits)

An introduction to the fundamentals of the immune system and the principles of genetics as they apply to blood group inheritance and blood banking procedures. Includes donor selection, blood collection, blood component processing, and administration of blood components. Utilizes a student laboratory for experiences in routine blood-banking procedures.

Prerequisites: **MLT1377**; **MLT2395**

MLT2533 Clinical Microbiology II

60 hours, 4 credits

MLT2533 Lecture (30 hours, 2.5 credits)
MLT2533L Lab (30 hours, 1.5 credits)

Expanding on concepts learned in Clinical Microbiology I, this course provides further instruction in basic microbiology with emphasis placed on viruses, fungi, and parasites. Epidemiology and infection control will be introduced. A student laboratory will be utilized for experiences in fundamental microbiology techniques.

Prerequisite: **MLT1448**

MLT2775 Clinical Practicum

360 hours, 12 credits

Supervised clinical rotations and or simulation laboratory experience of the microbiology, immunohematology, clinical chemistry, urinalysis, hematology, and phlebotomy departments.

Prerequisites: Approval by MLT Program Coordinator; completion of all coursework required by clinical affiliate and MLT Program Coordinator
Corequisite: **MLT2864**

MLT2864 Medical Laboratory Technician Capstone

20 hours, 2 credits

Students will demonstrate their knowledge, clinical and laboratory experience in the areas of microbiology, immunohematology, clinical chemistry, urinalysis, hematology, and phlebotomy.

Corequisite: **MLT2775**

MMC Mass Media Communication

MMC3407 Visual Communication in the Media

40 hours, 4 credits

This course examines how the world is interpreted through visuals. Students evaluate how visuals are used to send and receive preferred and intentional messages. Students also consider the impact visuals have on long-term societal perceptions and daily communication.

MNA Management Applied

MNA1161 Customer Service

40 hours, 4 credits

This course covers the basic concepts of essential communication skills needed in business to interact/work effectively with individuals and/or groups. Special areas of emphasis include solving problems, developing a customer service strategy, coping with challenging customers, increasing customer retention, and surveying customer satisfaction.

NGR Graduate Nursing

NGR5013 Foundations of Advanced Nursing Practice

40 hours, 4 credits

This course builds on previously learned undergraduate knowledge and skills and serves as the foundation for graduate nursing education. Topics include nursing and related theories as they apply to advanced nursing practice. The art and science of nursing as they relate to clinical judgment and decision-making in a complex healthcare system are discussed. The importance of developing culturally responsive strategies and meaningful communication is emphasized.

Prerequisite: Must be taken in student's first quarter

NGR5056 Advanced Health Assessment Across the Lifespan

40 hours, 4 credits

This course prepares students to demonstrate the advanced knowledge and skills of comprehensive health assessments across the life span. Students integrate advanced interviewing skills and examination techniques for comprehensive, focused, and regional assessments. Students have the opportunity to perform advanced health interviews and comprehensive assessments and develop evidence-based plans of care.

Pre- or corequisite: **NGR5149**

NGR5101 Research and Evidence-Based Practice

40 hours, 4 credits

In this course, students examine the research process and various research methods for advanced nursing practice. Students learn the skills necessary to conduct a rigorous critical appraisal of evidence. Statistical methods and data analysis for interpreting research results along with generating recommendations based on the evidence are discussed.

NGR5149 Advanced Pathophysiology Across the Lifespan

40 hours, 4 credits

This course prepares students to integrate advanced knowledge of pathophysiology to distinguish normal from abnormal processes across the life span. Students synthesize principles of genetics, epigenetics, and cultural responsiveness to improve health outcomes. Students have the opportunity to evaluate pathophysiologic concepts by body system in the context of advanced nursing practice.

NGR5172 Advanced Pharmacology Across the Lifespan

40 hours, 4 credits

This course provides in-depth knowledge of advanced pharmacology and the financial, policy, and technology implications surrounding pharmacotherapeutics. Students analyze pharmaceutical agents by body system to improve health outcomes across the life span. Students have the opportunity to evaluate advanced pharmacologic concepts within the context of advanced nursing practice.

Pre- or corequisite: **NGR5149**

NGR5800 Leading Healthcare Transformation

40 hours, 4 credits

This course introduces students to advanced nursing leadership with an emphasis on policy development, quality improvement strategies, and healthcare accessibility and availability. Students are prepared for opportunities to lead change that impact the profession of nursing.

NGR6001 Foundations of Family Nurse Practitioner Practice

30 hours, 3 credits

In this course, students are introduced to the role, scope, and standards of practice of the family nurse practitioner. Topics covered include the foundations of diagnostic reasoning and strategies to integrate theory and current evidence to guide person-centered primary care of the family. Students also analyze how legal, ethical, social, cultural, and global factors impact primary healthcare across the lifespan.

Prerequisite: Completion of all 5000-level courses

NGR6011 Foundations of Adult-Gerontology Primary Care Nurse Practitioner Practice

30 hours, 3 credits

In this course, students are introduced to the role, scope, and standards of practice of the adult- gerontology primary care nurse practitioner. Topics covered include the foundations of diagnostic reasoning and strategies to integrate theory and current evidence to guide person-centered primary care of the adult-gerontology primary care population. Students also analyze how legal, ethical, social, cultural, and global factors impact primary healthcare of patients ranging in age from young adult to frail elderly.

Prerequisite: Completion of all 5000-level courses

NGR6021 Foundations of Pediatric Primary Care Nurse Practitioner Practice

30 hours, 3 credits

In this course, students are introduced to the role, scope, and standards of practice of the primary care pediatric nurse practitioner. Topics covered include the foundations of diagnostic reasoning and strategies to integrate theory and current evidence to guide person-centered pediatric primary care. Students analyze how legal, ethical, social, cultural, and global factors, including social determinants of health, impact primary healthcare of pediatric patients ranging from birth to young adult.

Prerequisite: Completion of all 5000-level courses

NGR6036 Advanced Diagnostic Techniques

40 hours, 2 credits

NUR6036 Lecture (10 hours, 1 credits)
NUR6036LL Clinical (30 hours, 1 credits)

This course equips students with advanced knowledge and practical skills for selecting, interpreting, and applying diagnostic modalities in clinical practice. Emphasis is placed on the evidence-based use of diagnostic tests across the lifespan. Students learn to critically evaluate diagnostic options, correlate test results with patient assessments and differential diagnoses, and integrate diagnostic findings into advanced clinical decision-making. The course also examines the indications, limitations, risks, ethical considerations, and cost-effectiveness of diagnostic testing, including emerging technologies and direct-to-consumer tests.

Adult-Gerontology Primary Care specialization Prerequisite: **NGR6011**
Family specialization Prerequisite: **NGR6001**
Pediatric Primary Care specialization Prerequisite: **NGR6021**

NGR6050 Nursing Education in the Classroom

60 hours, 4 credits

NGR6050 Lecture (30 hours, 3 credits)
NGR6050LL Clinical (30 hours, 1 credits)

In this course, students explore the theoretical underpinnings of teaching strategies, assessment, and evaluation in the classroom setting. Emphasis is on developing and implementing strategies used to enhance achievement of learning outcomes. The practicum component of this course focuses on the role of the nurse educator with the application of creative teaching strategies. During this experience, students will integrate innovative teaching strategies to be successful in the classroom setting.

Prerequisites: Completion of all 5000-level courses; **NGR6701**

NGR6100 The Business Side of Nursing

40 hours, 4 credits

This course provides the opportunity for students to evaluate healthcare economics as an essential component of their role as a nursing leader. Students analyze a budget and business plan using a variety of methods to challenge or support allocations while utilizing a systematic framework to support healthcare decisions.

Prerequisite: Completion of all 5000-level courses

NGR6117 Leadership and Management in Advanced Nursing Practice

80 hours, 4 credits

NGR6117 Lecture (20 hours, 2 credits)
NGR6117LL Clinical (60 hours, 2 credits)

In this course, students expand their knowledge and skills required to be effective nurse leaders, with a focus on integration and appraisal strategies within a community of practice. The indirect- care practicum experience provides students the opportunity to utilize newly developed leadership knowledge and skills at an advanced nursing practice level.

Prerequisites: Completion of all 5000-level courses; **NGR6100**; **NGR6250**; **NGR6801**

NGR6150 Nursing Education in the Clinical Setting

60 hours, 4 credits

NGR6150 Lecture (30 hours, 3 credits)
NGR6150LL Clinical (30 hours, 1 credits)

This course focuses on the role of the clinical nurse educator. Emphasis is placed on developing and implementing teaching and learning strategies that support learning in the clinical setting. The practicum component of this course focuses on application of creative teaching strategies in the clinical environment. During this experience, students will integrate innovative teaching strategies to be successful educators in the healthcare setting.

Prerequisites: Completion of all 5000-level courses; **NGR6701**

NGR6168 Complementary and Alternative Medicine in Advanced Practice Nursing

40 hours, 2 credits

NUR6168 Lecture (10 hours, 1 credits)
NUR6168LL Clinical (30 hours, 1 credits)

This course explores the integration of reflective nursing practice with evidence-based complementary and alternative therapies in the context of holistic primary advanced-practice nursing care across the lifespan. Emphasizing a holistic approach, students will examine practices such as reflection, mindfulness, healing, holistic and culturally respectful communication, and holistic and complementary modalities (CAMs) in primary care. The course highlights the importance of evidence, collaboration with whole-system healthcare providers, addresses environmental health and sustainability, and emphasizes compassionate care and healing as central to patient outcomes.

Adult-Gerontology Primary Care specialization Prerequisite: **NGR6011**
Family specialization Prerequisite: **NGR6001**
Pediatric Primary Care specialization Prerequisite: **NGR6021**

NGR6211 Principles of Adult-Gerontology Primary Care

40 hours, 4 credits

In this course, students gain advanced knowledge of pathophysiologic alterations and disease management of common disorders in the adult, aging adult, and frail elderly populations. Students integrate this knowledge with current evidence and diagnostic reasoning to formulate differential diagnoses and propose person-centered pharmacological and non-pharmacological interventions for health promotion, disease prevention, and disease management in primary care settings.

Pre- or corequisite: **NGR6001**

NGR6234 Reproductive Health of the Family

40 hours, 4 credits

In this course, students develop advanced nursing knowledge required to diagnose and manage selected acute and chronic disorders of the male and female reproductive system. Topics include health promotion and disease prevention, family planning, and pre-conception care. Additionally, students learn strategies used in the management of pregnant and postpartum patients in the primary care setting.

Pre- or corequisite: **NGR6001**

NGR6250 Meaningful Communication and Collaboration

40 hours, 4 credits

This course focuses on the importance of communication and building effective relationships to effectively lead within a community of practice. Personal leadership awareness, role modeling, and shared decision-making are discussed. Students learn about the art of influencing behaviors, crucial conversations, and consensus building in advanced nursing leadership.

Prerequisite: Completion of all 5000-level courses

NGR6262 Foundations of Psychiatric Mental Health Nurse Practitioner Practice

40 hours, 4 credits

In this course, students are introduced to the roles, scope, and standards of practice of Psychiatric Mental Health Nurse Practitioners. Topics covered include strategies to develop therapeutic relationships, reflective practice techniques, and the components of a comprehensive psychiatric assessment. Students analyze how ethical, legal, social, and cultural factors impact mental health across the lifespan.

Prerequisite: Completion of all 5000-level courses

NGR6265 Adult-Gerontology Primary Care Nurse Practitioner Practicum I

160 hours, 6 credits

NUR6265 Lecture (10 hours, 1 credits)
NUR6265LL Clinical (150 hours, 5 credits)

This course is the first of four practicum experiences for the adult-gerontology primary care nurse practitioner student. The required practicum provides an opportunity for students to apply newly acquired knowledge and skills with adult patients seeking primary care services. Although practicum experiences may include a variety of adult-gerontology primary care patients, there is a focus on health promotion and disease management. Emphasis is placed on identification of normal versus abnormal, signs and symptoms, clinical decision making, and plans of care including pharmacological interventions appropriate to age and developmental stage. Students identify the appropriate care, intervention, and education for patients in primary care settings. Students perform comprehensive and episodic clinical assessments, including appropriate diagnostic testing and therapeutic interventions with guidance of clinical preceptors.

Prerequisites: **NGR6011**; **NGR6211**; **NGR6640**; **NGR6650**

NGR6266 Adult-Gerontology Primary Care Nurse Practitioner Practicum II

160 hours, 6 credits

NUR6266 Lecture (10 hours, 1 credits)
NUR6266LL Clinical (150 hours, 5 credits)

This course and practicum experience provide an opportunity for students to apply newly acquired knowledge and skills as they participate in the evaluation, treatment, and management of patients seeking primary care services. Although practicum experiences may include a variety of adult patients, there is a focus on caring for adolescent, young adult, and adult patients. Students apply the knowledge of advanced assessment and diagnostic reasoning to formulate treatment plans for primary care patients within the ages of adolescence through adult. Emphasis is placed on the identification of signs and symptoms of disorders, selecting treatments and pharmacological interventions, inclusive of health promotion, health restoration and maintenance, and evidence- based practice in primary care settings.

Prerequisite: **NGR6265**

NGR6267 Adult-Gerontology Primary Care Nurse Practitioner Practicum III

160 hours, 6 credits

NUR6267 Lecture (10 hours, 1 credits)
NUR6267LL Clinical (150 hours, 5 credits)

In this course and practicum experience, students apply newly acquired advanced nursing knowledge and skills as they participate in the evaluation and treatment of aging adults and frail elderly patients seeking primary care services. Students apply the knowledge of advanced assessment and diagnostic reasoning to formulate treatment plans for aging adult and frail elderly primary care patients. There is an emphasis on the identification of signs and symptoms of disorders, selecting treatments and pharmacological interventions, health promotion, health restoration and maintenance, and evidence- based practice in primary care settings.

Prerequisite: **NGR6266**

NGR6268 Adult-Gerontology Primary Care Nurse Practitioner Practicum IV

160 hours, 6 credits

NUR6268 Lecture (10 hours, 1 credits)
NUR6268LL Clinical (150 hours, 5 credits)

This final practicum course provides an opportunity for students to work with patients within the student’s particular population and areas of interest. Students continue to refine skills of assessment, diagnosis, and formulation of treatment plans for primary care adult-gerontology patients.

Prerequisite: **NGR6267**

NGR6300 Curriculum Design and Program Evaluation

40 hours, 4 credits

This course focuses on curriculum design, development, and program evaluations that align with evidence-based nursing education strategies and national guidelines and standards. Current impacts, trends, and innovations in creating sustainable nursing education programs are examined.

Prerequisites: Completion of all 5000-level courses; **NGR6701**

NGR6330 Principles of Pediatric Primary Care

40 hours, 4 credits

This course prepares students to address specialized healthcare needs of children within the framework of a family-centered course. There is a focus on the patient from birth to young adult, emphasizing advanced nursing knowledge of growth and development, health promotion, health restoration, and health maintenance. Students apply diagnostic reasoning and evidence-based practice as they learn to manage common acute, episodic, and chronic disease processes in pediatric patients in the primary care settings.

Pre- or corequisite: **NGR6001**

NGR6340 Advanced Primary Care of the Pediatric Patient I

40 hours, 4 credits

In this course, students develop knowledge and skills to provide primary care to pediatric patients with complex health disorders. Students develop evidence-based plans of care using age-appropriate assessments, diagnostics, and disease management strategies for primary care of pediatric patients with a focus on select body systems. There is an emphasis on the collection of subjective and objective data, laboratory findings, diagnostic tests, diagnoses, and a plan for patient-centered therapeutic interventions for disease management of primary care pediatric patients with complex disorders of the HEENT, integumentary, immunologic, musculoskeletal, gastrointestinal, genitourinary, and renal systems.

Prerequisite: Completion of all 5000-level courses

NGR6350 Advanced Primary Care of the Pediatric Patient II

40 hours, 4 credits

In this course, students continue to develop knowledge and skills to provide primary care to pediatric patients with complex health disorders. Students develop evidence-based plans of care using age-appropriate assessments, diagnostics, and disease management strategies for primary care of pediatric patients with a focus on specific body systems. There is an emphasis on the collection of subjective and objective data, laboratory findings, diagnostic tests, diagnoses, and a plan for patient- centered therapeutic interventions for disease management of primary care pediatric patients with complex disorders of the endocrine, respiratory, cardiovascular, hematological, and neurological system as well as the management of complex mental health disorders.

Prerequisite: Completion of all 5000-level courses

NGR6365 Family Nurse Practitioner Practicum I

160 hours, 6 credits

NUR6365 Lecture (10 hours, 1 credits)
NUR6365LL Clinical (150 hours, 5 credits)

This course is the first of four practicum experiences for the family nurse practitioner student. The required practicum provides an opportunity for students to apply newly acquired knowledge and skills with patients seeking primary care services. Although practicum experiences may include patients across the lifespan, there is a focus on health promotion and disease management of patients with reproductive disorders, and the childbearing family. Emphasis is placed on identification of normal versus abnormal, signs and symptoms of disorders, and treatment plans including pharmacological interventions appropriate to age and developmental stage. Students identify the appropriate care, intervention, and education for patients in primary care settings.

Prerequisites: **NGR6001**; **NGR6211**; **NGR6234**; **NGR6330**

NGR6366 Family Nurse Practitioner Practicum II

160 hours, 6 credits

NUR6366 Lecture (10 hours, 1 credits)
NUR6366LL Clinical (150 hours, 5 credits)

This course and practicum experience provide an opportunity for students to apply newly acquired knowledge and skills as they participate in the evaluation, treatment, and management of patients seeking primary care services. Although practicum experiences may include patients across the lifespan, there is a focus on caring for pediatric and young adult patients. Students apply the knowledge of advanced assessment and diagnostic reasoning to formulate treatment plans for pediatric and young adult primary care patients. Emphasis is placed on the identification of signs and symptoms of disorders, selecting treatments and pharmacological interventions, inclusive of health promotion, health restoration and maintenance, and evidence-based practice in primary care settings.

Prerequisite: **NGR6365**

NGR6367 Family Nurse Practitioner Practicum III

160 hours, 6 credits

NUR6367 Lecture (10 hours, 1 credits)
NUR6367LL Clinical (150 hours, 5 credits)

In this course and practicum experience, students apply newly acquired advanced nursing knowledge and skills as they participate in the evaluation and treatment of adults, aging adults, and frail elderly patients seeking primary care services. Students apply the knowledge of advanced assessment and diagnostic reasoning to formulate treatment plans for adult, aging adult, and frail elderly primary care patients. There is an emphasis on the identification of signs and symptoms of disorders, selecting treatments and pharmacological interventions, health promotion, health restoration and maintenance, and evidence-based practice in primary care settings.

Prerequisite: **NGR6366**

NGR6368 Family Nurse Practitioner Practicum IV

160 hours, 6 credits

NUR6368 Lecture (10 hours, 1 credits)
NUR6368LL Clinical (150 hours, 5 credits)

This final practicum course provides an opportunity for students to work with patients within the student’s particular population and areas of interest. Students continue to refine skills of assessment, diagnosis, and formulation of treatment plans for primary care family practice patients across the lifespan.

Prerequisite: **NGR6367**

NGR6462 Psychopathology and Neurobiology of Mental Health Disorders

40 hours, 4 credits

This course focuses the neurobiology and psychopathology of mental health disorders. Students explore the development of mental health disorders, including mood disorders, psychotic disorders, anxiety disorders, sleep disorders, personality disorders, and the study of disorders in special populations. The components of a psychiatric interview are also emphasized in this course.

Pre- or corequisite: **NGR6262**

NGR6465 Pediatric Primary Care Nurse Practitioner Practicum I

160 hours, 6 credits

NUR6465 Lecture (10 hours, 1 credits)
NUR6465LL Clinical (150 hours, 5 credits)

This course is the first of four practicum experiences for the pediatric primary care nurse practitioner student. The required practicum provides an opportunity for students to apply newly acquired knowledge and skills with pediatric patients seeking primary care services. Although practicum experiences may include a variety of pediatric patients, there is a focus on health promotion and disease prevention in the primary care of the well-child. Emphasis is placed on identification of normal versus abnormal, signs and symptoms, clinical decision making, and plans of care including pharmacological interventions appropriate to age and developmental stage. Students identify the appropriate care, intervention, and education for pediatric patients and their families in primary care settings. Students perform comprehensive and episodic clinical assessments, including appropriate diagnostic testing and therapeutic interventions with guidance of clinical preceptors.

Prerequisite: Completion of all 5000-level courses. Residential Skills Check.

NGR6466 Pediatric Primary Care Nurse Practitioner Practicum II

160 hours, 6 credits

NUR6466 Lecture (10 hours, 1 credits)
NUR6466LL Clinical (150 hours, 5 credits)

This course and practicum experience provide an opportunity for students to apply newly acquired knowledge and skills as they participate in the evaluation, treatment, and management of patients seeking primary care services. Although practicum experiences may include a variety of pediatric primary care patients, there is a focus on caring for patients ages birth through pre-school. Students apply the knowledge of advanced assessment and diagnostic reasoning to formulate treatment plans for pediatric primary care patients. This course further prepares students to diagnose, treat, and manage common disorders of increasing complexity in pediatric patients from birth to preschool age.

Prerequisite: Completion of all 5000-level courses

NGR6467 Pediatric Primary Care Nurse Practitioner Practicum III

160 hours, 6 credits

NUR6467 Lecture (10 hours, 1 credits)
NUR6467LL Clinical (150 hours, 5 credits)

This course and practicum experience provide an opportunity for students to apply newly acquired knowledge and skills as they participate in the evaluation, treatment, and management of patients seeking primary care services. Although practicum experiences may include a variety of pediatric primary care patients, there is a focus on caring for patients ranging from school age through young adult. Students apply the knowledge of advanced assessment and diagnostic reasoning to formulate treatment plans for pediatric primary care patients. This course further prepares students to diagnose, treat, and manage common disorders of increasing complexity in pediatric patients with a focus on patients ranging from school age to young adult.

Prerequisite: Completion of all 5000-level courses

NGR6468 Pediatric Primary Care Nurse Practitioner Practicum IV

160 hours, 6 credits

NUR6468 Lecture (10 hours, 1 credits)
NUR6468LL Clinical (150 hours, 5 credits)

This final practicum course provides an opportunity for the primary care pediatric nurse practitioner student to work with pediatric patients within the student's particular age group and areas of interest. Students continue to refine skills of assessment, diagnosis, and formulation of treatment plans for primary care pediatric patients.

Prerequisite: Completion of all 5000-level courses

NGR6502 Psychiatric Mental Health Treatment Modalities

40 hours, 4 credits

This course provides an introduction to the use of evidenced-based treatment modalities in psychiatric care. Emphasis is placed on constructing knowledge and experience of pharmacotherapies and brief psychotherapies appropriate in the psychiatric care setting. Additionally, students learn to identify and make appropriate referrals within the community to address comorbid mental health problems.

Prerequisite: **NGR6462**
Pre- or corequisite: **NGR6538**

NGR6538 Psychopharmacology

40 hours, 4 credits

This course builds on concepts of advanced pharmacology, focusing principles of psychopharmacology across the lifespan. Topics covered include psychopharmacogenomics, pharmacodynamics, pharmacokinetics, and pharmacotherapeutics for major classifications of psychotropic drugs for psychiatric mental health disorders. This course prepares students to evaluate psychopharmacotherapy within the context of advanced practice nursing.

Prerequisites: **NGR6262**; **NGR6462**

NGR6640 Advanced Primary Care of the Adult and Older Adult I

40 hours, 4 credits

In this course, students develop knowledge and skills to provide primary care to adult-gerontology patients with complex health disorders. Students develop evidence-based plans of care using age-appropriate assessments, diagnostics, and disease management strategies for primary care of adult-gerontology patients with a focus on select body systems. There is an emphasis on the collection of subjective and objective data, laboratory findings, diagnostic tests, diagnoses, and a plan for patient-centered therapeutic interventions for disease management of adult-gerontology primary care patients with complex disorders of the HEENT, integumentary, immunologic, musculoskeletal, gastrointestinal, genitourinary, and renal systems.

Prerequisites: **NGR6011**; **NGR6211**

NGR6650 Advanced Primary Care of the Adult and Older Adult II

40 hours, 4 credits

In this course, students continue to develop knowledge and skills to provide primary care to adult- gerontology patients with complex health disorders. Students develop evidence-based plans of care using age-appropriate assessments, diagnostics, and disease management strategies for primary care of adult-gerontology patients with a focus on remaining body systems. There is an emphasis on the collection of subjective and objective data, laboratory findings, diagnostic tests, diagnoses, and a plan for patient-centered therapeutic interventions for disease management of adult-gerontology primary care patients with complex disorders of the endocrine, respiratory, cardiovascular, hematological, and neurological system as well as the management of complex mental health disorders.

Pre- or corequisite: **NGR6640**

NGR6701 The Role of the Nurse Educator

40 hours, 4 credits

In this course, students learn the foundations of the nurse educator role. Attributes that foster positive learning environments and factors influencing nursing education are discussed. Evidence-based strategies based on educational theory, scholarship, and service are emphasized.

Prerequisite: Completion of all 5000-level courses

NGR6703 Advanced Nursing Practice

60 hours, 4 credits

NGR6703 Lecture (30 hours, 3 credits)
NGR6703LL Clinical (30 hours, 1 credits)

This course provides an opportunity for students to engage in a graduate-level, direct-care practicum integrating newly acquired advanced nursing knowledge into practice. The experience is designed to allow graduate nursing students to integrate cognitive learning with the effective and psychomotor domains of advanced nursing practice. There is an emphasis on developing a deeper understanding of the nursing profession based on reflective practices as students continue to develop their own plans for lifelong learning and professional identity development.

Prerequisites: **NGR5056**; **NGR5149**; **NGR5172**

NGR6716 Simulation in Healthcare

40 hours, 4 credits

This course focuses on best practices for simulation-based education (SBE). Ethical and legal issues related to simulation-based education are examined to promote safe, quality simulation experiences. Students have the opportunity to evaluate and design components of simulation experiences, systems, and operations.

Prerequisites: Completion of all 5000-level courses; **NGR6820**

NGR6767 Practice Management for the Nurse Practitioner

40 hours, 2 credits

NUR6767 Lecture (10 hours, 1 credits)
NUR6767LL Clinical (30 hours, 1 credits)

This course provides content related to the business principles of practice management for the advanced practice nurse. The required practicum experience provides an opportunity for students to apply newly learned knowledge in the primary care practice setting. Topics include marketing strategies, legal aspects of practice management, principles of billing and coding for reimbursement, and strategies to provide telehealth services.

Adult-Gerontology Primary Care specialization Prerequisite: **NGR6011**
Family specialization Prerequisite: **NGR6001**
Pediatric Primary Care specialization Prerequisite: **NGR6021**

NGR6801 Advanced Nursing Leadership

40 hours, 4 credits

This course focuses on the knowledge, skills, and abilities that guide advanced nursing leadership. Topics include systems thinking and effective project management to guide quality improvement and policy development. Incorporating evidence-based strategies to inform decision-making, building effective teams, and promoting professional development are also emphasized.

Prerequisite: Completion of all 5000-level courses

NGR6820 Healthcare Technology

40 hours, 4 credits

In this course, students examine the use of current health technology along with future healthcare innovations. Topics include the components of connected healthcare and current and future ethical and legal dilemmas arising from the use of healthcare technology, feasibility, and usability.

Prerequisite: Completion of all 5000-level courses

NGR6840 Integrating Technology

80 hours, 4 credits

NGR6840 Lecture (20 hours, 2 credits)
NGR6840LL Clinical (60 hours, 2 credits)

This course provides the opportunity for students to apply newly acquired knowledge during an indirect-care practicum experience. Utilizing technology, students engage in the quality improvement process to address an identified challenge within a system, program, or process. Through review and analysis of external and internal evidence, students propose an innovative solution to the identified problem.

Prerequisites: Completion of all 5000-level courses; **NGR6716**; **NGR6820**; **NGR6870**

NGR6870 Informatics in Advanced Nursing Practice

40 hours, 4 credits

This course introduces students to the foundations of nursing informatics, including standards of professional practice and use of evidence and theories specific to informatics. Students examine interoperability for sharing information among healthcare team members as part of continuous quality improvement. Designs of information systems, feasibility, functionality, usability, and sustainability are also discussed.

Prerequisite: Completion of all 5000-level courses

NGR6900 MSN Capstone

40 hours, 4 credits

The MSN Capstone course provides a culminating experience with an opportunity for students to synthesize new knowledge and behaviors necessary to lead change and address contemporary issues in advanced nursing practice. Students demonstrate cultural responsiveness, interprofessional collaboration, and meaningful communication while using scholarly evidence to guide policy and practice.

Prerequisite: Must be taken in student’s final quarter

NGR6910 Psychiatric Mental Health Nurse Practitioner Practicum I

160 hours, 6 credits

NGR6910 Lecture (10 hours, 1 credits)
NGR6910LL Clinical (150 hours, 5 credits)

This course is the first of four practicum experiences for the psychiatric mental health nurse practitioner student. This practicum provides opportunity for students to apply newly acquired knowledge and skills with clients seeking mental healthcare services. Although practice experiences may include patients across the lifespan, there is a focus on caring for the child, adolescent, and family. Emphasis is placed on identification of signs and symptoms of disorders, therapeutic modalities, and pharmacological interventions appropriate to age and developmental stage across the lifespan. Students identify the appropriate care, intervention, and education for the patient, family, and caregivers.

Prerequisites: **NGR6262**; **NGR6462**; **NGR6502**; **NGR6538**;

NGR6920 Psychiatric Mental Health Nurse Practitioner Practicum II

160 hours, 6 credits

NGR6920 Lecture (10 hours, 1 credits)
NGR6920LL Clinical (150 hours, 5 credits)

This practicum course provides opportunity for students to apply newly acquired knowledge and skills as they participate in the evaluation and treatment of adults with psychiatric disorders. Students apply the learned skills of therapeutic interviewing, evaluation, and formulation of treatment plans for adults with psychiatric disorders. Emphasis is placed on identification of signs and symptoms of disorders, therapeutic modalities and pharmacological interventions.

Prerequisite: **NGR6910**

NGR6930 Psychiatric Mental Health Nurse Practitioner Practicum III

160 hours, 6 credits

NGR6930 Lecture (10 hours, 1 credits)
NGR6930LL Clinical (150 hours, 5 credits)

In this course, students participate in the evaluation and treatment of aging adults with psychiatric disorders. Students apply the learned skills of therapeutic interviewing, evaluation, and formulation of treatment plans for aging adults with psychiatric disorders. Emphasis is placed on identification of signs and symptoms of disorders, therapeutic modalities and pharmacological interventions. Although practice experiences may include patients across the lifespan, there is a focus on therapeutic interviewing, evaluation, and formulation of treatment plans for aging adults with psychiatric disorders.

Prerequisite: **NGR6920**

NGR6940 Psychiatric Mental Health Nurse Practitioner Practicum IV

190 hours, 7 credits

NGR6940 Lecture (10 hours, 1 credits)
NGR6940LL Clinical (180 hours, 6 credits)

This final practicum course provides an opportunity for students to work with patients within the student's particular areas of interest. Students continue to refine skills of therapeutic interviewing, assessment and diagnosis, and formulation of treatment plans for patients with psychiatric disorders.

Prerequisite: **NGR6930**

NGR7730 Organizational and Systems Leadership

40 hours, 4 credits

This course focuses on collaborative leadership as an integral aspect of advanced nursing practice to eliminate health disparities and promote patient safety and excellence in practice. Students learn how a unique and personalized blend of leadership styles can be utilized to address the impact of practice policies and procedures on meeting healthcare needs. Topics covered include patient safety principles, quality healthcare standards, eliminating health disparities, and expanding global impact.

NGR7840 Applied Research and Statistics

40 hours, 4 credits

This course prepares students to function in the role of the DNP prepared nurse when translating evidence and engaging in evidence-based nursing practice. Topics include research design and methodology, data collection and analysis methods, interpretation and reporting of statistical results, and skills required to critically read and evaluate nursing and healthcare literature. The emphasis is on understanding the relevance and use of appropriate statistical methods in nursing research.

NGR7853 Nursing Inquiry and Translation of Evidence

40 hours, 4 credits

In this course, students compare and contrast research-focused versus practice-focused scholarship. The process for valid, clinical inquiry is explored and includes the location, appraisal, and synthesis of external and internal evidence. Students learn strategies to integrate methods of translation necessary for implementing, sustaining, and disseminating evidence-based practice change.

Pre- or corequisite: **NGR7840**

NGR7892 Essentials of Healthcare Policy

40 hours, 4 credits

In this course, students examine the importance and interdependence of policy and healthcare. Topics include the analysis of healthcare issues and policy making, the policy process, and impacts of globalization. Students enhance their ability to serve as advocates in the nursing profession's influence on healthcare policies.

NGR7894 Population and Global Health

40 hours, 4 credits

This course focuses on the principles of population health while examining the role of nursing in improving health and reducing health disparities. Students critique the systems and environments that influence the health of individuals, aggregates, and populations. Through the investigation and use of epidemiological concepts, health promotion and disease prevention strategies, and determinants of health, students design evidence-based programs and services to improve health outcomes.

NGR7910 Leadership Practicum

30–150 hours, 1–5 credits

Select hours/credits needed:
NGR7911LL Leadership Practicum (30 hours, 1 credit)
NGR7912LL Leadership Practicum (60 hours, 2 credits)
NGR7913LL Leadership Practicum (90 hours, 3 credits)
NGR7914LL Leadership Practicum (120 hours, 4 credits)
NGR7915LL Leadership Practicum (150 hours, 5 credits)
This clinical course provides students the opportunity to complete up to 150 hours of additional practice experience focused on applying leadership knowledge and skills to the clinical setting. Students may select one to five credits based on the number of clinical hours needed to accumulate the required 1,000 hours of post-baccalaureate practice.

NGR7920 Healthcare Information Systems and Technology Practicum

30–150 hours, 1–5 credits

Select hours/credits needed:
NGR7921LL Healthcare Information Systems and Technology Practicum (30 hours, 1 credit)
NGR7922LL Healthcare Information Systems and Technology Practicum (60 hours, 2 credits)
NGR7923LL Healthcare Information Systems and Technology Practicum (90 hours, 3 credits)
NGR7924LL Healthcare Information Systems and Technology Practicum (120 hours, 4 credits)
NGR7925LL Healthcare Information Systems and Technology Practicum (150 hours, 5 credits)
This clinical course provides students the opportunity to complete up to 150 hours of additional practice experience focused on applying knowledge of healthcare information systems and technology to the practice setting. Students may select one to five credits based on the number of clinical hours needed to accumulate the required 1,000 hours of post-baccalaureate practice.

NGR7930 Population and Global Health Practicum

30–150 hours, 1–5 credits

Select hours/credits needed:
NGR7931LL Population and Global Health Practicum (30 hours, 1 credit)
NGR7932LL Population and Global Health Practicum (60 hours, 2 credits)
NGR7933LL Population and Global Health Practicum (90 hours, 3 credits)
NGR7934LL Population and Global Health Practicum (120 hours, 4 credits)
NGR7935LL Population and Global Health Practicum (150 hours, 5 credits)
This clinical course provides students the opportunity to complete up to 150 hours of additional practice experience focused on applying knowledge and skills related to population and global health to the practice setting. Students may select one to five credits based on the number of clinical hours needed to accumulate the required 1,000 hours of post-baccalaureate practice.

NGR8701 Executive Leadership I

80 hours, 4 credits

NGR8701 Lecture (20 hours, 2 credits)
NGR8701LL Clinical (60 hours, 2 credits)

In this course, students are introduced to the executive leadership role and develop advanced competencies to serve as system-focused executive nursing leaders. Through an emphasis on transformative leadership skills, students promote forward thinking within complex healthcare systems and provide safe, reliable, quality care to diverse patients and populations. Topics covered include leadership and professionalism, relationship-building and communication, and business intelligence to thrive as a nursing leader. The required 60 hours of practice experience provides students the opportunity to develop and apply advanced leadership skills.

Prerequisite: **NGR7730**

NGR8702 Executive Leadership II

110 hours, 5 credits

NGR8702 Lecture (20 hours, 2 credits)
NGR8702LL Clinical (90 hours, 3 credits)

This course builds on previously learned leadership knowledge and focuses on the development of advanced competencies for system-focused executive nursing leaders. Topics covered include leadership strategies for change management and sustainable outcomes, high reliability theory for quality and safety, and processes for incorporating cultural principles into healthcare delivery. The required 90 hours of practice experience provide students the opportunity to further develop and apply advanced leadership skills.

Prerequisite: **NGR8701**

NGR8731 Public Health and Policy I

80 hours, 4 credits

NGR8731 Lecture (20 hours, 2 credits)
NGR8731LL Clinical (60 hours, 2 credits)

This course provides students with a comprehensive understanding of the application of epidemiological principles to the delivery of healthcare services and organizations. Concepts and methods of epidemiology are applied to advanced nursing practice. This course challenges students to appraise public health principles and science in the design of programs and services to improve the health of people and their communities. The required 60 hours of practice experience foster the application of managerial epidemiology and information technology as students work with public health experts to improve population health outcomes.

Prerequisite: **NGR7892**

NGR8732 Public Health and Policy II

110 hours, 5 credits

NGR8732 Lecture (20 hours, 2 credits)
NGR8732LL Clinical (90 hours, 3 credits)

This course provides a catalyst for students to comprehend, formulate, and disseminate healthcare policy. Students are prepared to support the development, implementation, and evaluation of health policy. The impact of the political process on access and delivery of healthcare and the quality and safety of healthcare at the local, national, and global levels are explored. The required 90 hours of practice experience support the development and implementation of public health policy, programs, and services within an interdisciplinary team.

Prerequisite: **NGR8731**

NGR8768 Professional Identity Development

80 hours, 4 credits

NGR8768 Lecture (20 hours, 2 credits)
NGR8768LL Clinical (60 hours, 2 credits)

This course focuses on the professional identity development of a practice-focused nurse scholar. Students develop strategies for the internalization of core values and perspectives integral to the nursing profession. There is an emphasis on developing skills needed to role model attributes of a resilient, practice-focused scholar in today's ever-changing healthcare environment. The required 60 hours of practice experience provide students the opportunity to begin developing a professional identity as a DNP prepared nurse.

NGR8911 DNP Project I

130 hours, 5 credits

NGR8911 Lecture (10 hours, 1 credits)
NGR8911LL Clinical (120 hours, 4 credits)

In this course, students develop and present a proposed DNP project through scholarly written and oral communication. The proposal includes an overview of the practice problem, a critical appraisal of the evidence, the theoretical framework selected, and a plan for implementation and evaluation of the proposed DNP project. The required 120 hours of practice experience provide students the opportunity to apply newly acquired skills and knowledge to the practice setting as they develop the proposed project. Project topics relate to the student's unique area of nursing practice and aim to translate evidence into practice to improve health outcomes.

Prerequisite: Must have completed a total of 640 post-baccalaureate clinical hours

---

NGR8912 DNP Project II

130 hours, 5 credits

NGR8912 Lecture (10 hours, 1 credits)
NGR8912LL Clinical (120 hours, 4 credits)

In this course, students implement the approved DNP project plan under the guidance of a faculty mentor. Students apply knowledge and skills to address the ethical, legal, financial, and organizational aspects of the DNP project as they implement a practice change to improve health outcomes. The required 120 hours of practice experience provide students the opportunity to apply newly acquired skills and knowledge to the practice setting while implementing their DNP project.

Prerequisite: **NGR8911**

NGR8913 DNP Project III

130 hours, 5 credits

NGR8913 Lecture (10 hours, 1 credits)
NGR8913LL Clinical (120 hours, 4 credits)

In this course, students complete a culminating DNP project grounded in implementation science and reflective of the dynamic healthcare environment. Students present and defend the completed DNP project through a scholarly paper and an oral on-site presentation. The final product reflects advanced knowledge and skills acquired to translate evidence into practice, impact organizations and systems, and apply evidence-based practice to improve health outcomes of individuals, families, or populations. The required 120 hours of practice experience provides the opportunity to apply newly acquired skills and knowledge to the practice setting.

Prerequisite: **NGR8912**

NUR Nursing

NUR1055 Introduction to Nursing

40 hours, 4 credits

In this course, students are introduced to the profession of nursing. Nursing theory, scope of practice, and standards of care provide the context for evidence-based nursing. Components of professionalism and communication are discussed. Students are introduced to various systems of measure and basic medical terminology.

Prerequisite: **BSC2094C**

NUR2063 Essentials of Pathophysiology

30 hours, 3 credits

This course provides an overview of pathophysiology. Emphasis is placed on regulatory and compensatory mechanisms necessary to maintain and restore homeostasis. A systems-based approach is used to explore etiology, clinical signs, and symptoms of disorders.

Prerequisite: **BSC2094C**

NUR2180 Physical Assessment

60 hours, 3 credits

This course focuses on developing the knowledge and skills necessary for holistic health assessment. Students learn to perform and accurately document a systematic health history and physical assessment of the adult client.

Prerequisite: **BSC2094C**
Pre- or Corequisite: **NUR2063**

NUR2214 Nursing Care of the Older Adult

50 hours, 3 credits

NUR2214 Lecture (20 hours, 2 credits)
NUR2214LL Clinical (30 hours, 1 credit)

In this course, care models specific to the older adult are explored. Students examine perceptions of ageism and the impact of those attitudes on the healthcare of older adults. Resources to promote autonomy and safety with healthcare decisions as a client ages are discussed with an emphasis on ethical advocacy in gerontology. The clinical component provides students with opportunities to apply theoretical knowledge in healthcare settings.

Pre- or corequisite: **NUR2356**

NUR2243 Professional Nursing Skills I

60 hours, 3 credits

This course introduces students to the skills necessary to provide basic care and comfort. Students demonstrate essential skills to care for clients with musculoskeletal, integumentary, and elimination needs. Accurate medication calculation and safe medication administration are required.

Pre- or corequisite: **NUR2356**

NUR2356 Multidimensional Care I

90 hours, 5 credits

NUR2356 Lecture (30 hours, 3 credits)
NUR2356LL Clinical (60 hours, 2 credits)

This course introduces students to principles of basic care and comfort. Students explore diverse multidimensional strategies for nursing practice specific to musculoskeletal, integumentary, sensory, perception, immunologic, infectious, and inflammatory disorders. The clinical component provides students with opportunities to apply theoretical knowledge in healthcare settings.

Prerequisite: **NUR2180**

NUR2392 Multidimensional Care II

120 hours, 6 credits

NUR2392 Lecture (30 hours, 3 credits)
NUR2392LL Clinical (90 hours, 3 credits)

Students continue to explore diverse multidimensional strategies for nursing practice specific to cancer, fluid and electrolytes, acid-base balance, gastrointestinal, and endocrine system disorders. The clinical component provides students with opportunities to apply theoretical knowledge in healthcare settings.

Prerequisite: **NUR2356**
Pre- or corequisite: **NUR2474**

NUR2459 Mental and Behavioral Health Nursing

80 hours, 4 credits

NUR2459 Lecture (20 hours, 2 credits)
NUR2459LL Clinical (60 hours, 2 credits)

In this course, students explore internal and external factors that impact clients' state of balance. Students examine the effects of stress and coping on the client and family, as well the complexities of caring for clients experiencing mental health disorders. The clinical component provides students with opportunities to apply theoretical knowledge in mental healthcare settings.

Prerequisites: **NUR2356**; **PSY1012**
Pre- or corequisite: **NUR2474**

NUR2474 Pharmacology for Professional Nursing

40 hours, 4 credits

This course introduces students to the pharmacological principles for safe medication administration. Emphasis is placed on the classifications of medications used in the body systems. Special considerations are examined for the effects of medications and nursing interventions on special populations.

Prerequisite: **NUR2063**; or a current, unencumbered Practical Nursing license that awarded LPN-RN Bridge course waiver
Pre- or corequisite: **MAT1222**

NUR2502 Multidimensional Care III

120 hours, 6 credits

NUR2502 Lecture (30 hours, 3 credits)
NUR2502LL Clinical (90 hours, 3 credits)

Students explore diverse multidimensional strategies for nursing practice specific to reproductive, respiratory, cardiovascular, hematologic, and urinary system disorders. The clinical component provides students with opportunities to apply theoretical knowledge in healthcare settings.

Prerequisites: **NUR2392**; **NUR2474**

NUR2513 Maternal-Child Nursing

80 hours, 4 credits

NUR2513 Lecture (20 hours, 2 credits)
NUR2513LL Clinical (60 hours, 2 credits)

The focus of this course is on the professional nurse's role in providing safe, effective care for the mother, newborn, and child. This course examines relevant medication administration, pharmacology, nutritional principles, and cultural and spiritual diversity, as well as legal and ethical issues related to care of the maternal and pediatric client to promote health and safety. The clinical component provides students with opportunities to apply theoretical knowledge in healthcare settings.

Prerequisites: **DEP2004**; **NUR2392**; **NUR2474**
Pre- or corequisite: **NUR2648**

NUR2648 Professional Nursing Skills II

40 hours, 2 credits

This course introduces students to higher-level skills necessary to provide care for diverse clients across the lifespan. Students learn to care for clients with respiratory, gastrointestinal, hematological, and fluid balance disorders. Specific skills covered during this course are evaluated and validated in a supervised laboratory setting. Students have the opportunity to demonstrate medication administration for newborn and pediatric clients in a safe environment.

Prerequisite: **NUR2243**
Pre- or corequisite: **NUR2502**

NUR2755 Multidimensional Care IV

120 hours, 6 credits

NUR2755 Lecture (30 hours, 3 credits)
NUR2755LL Clinical (90 hours, 3 credits)

Students explore diverse multidimensional strategies for nursing practice specific to clients with neurological disorders and trauma. Students integrate prioritization, critical thinking, and higher-order problem solving to plan and provide care for patients in complex, specialized settings, including critical care, medical emergencies, and disasters. The clinical component provides students with opportunities to apply theoretical knowledge in healthcare settings.

Prerequisites: **NUR2502**; **NUR2513**; **NUR2648**

NUR2832 Leadership and Professional Identity

80 hours, 4 credits

NUR2832 Lecture (20 hours, 2 credits)
NUR2832LL Clinical (60 hours, 2 credits)

This course examines the professional nursing leadership and management responsibilities. Students use evidence-based practice to guide decision-making and support clinical judgment to improve client outcomes. Students demonstrate principles of professional identity, and examine the regulatory standards of nursing practice within the legal and ethical underpinnings that improve healthcare. The clinical component provides students with opportunities to apply theoretical knowledge in healthcare settings.

Pre- or corequisite: **NUR2755**

NUR2989 Associate Degree in Nursing Capstone

30 hours, 3 credits

This capstone course serves as a culmination of previous learned content and experiences in the Associate Degree in Nursing program. Students apply critical-thinking skills to synthesize principles of physiological and psychosocial integrity, health promotion and maintenance, and quality improvement to deliver safe, collaborative healthcare. Students demonstrate clinical reasoning and engage in reflection and self-analysis as they prepare for transition to practice.

Prerequisite: Must be completed in student's final quarter
Pre- or corequisites: **NUR2755**; **NUR2832**

NUR3055 Professional Nursing Role Transition

50 hours, 5 credits

This course supports registered nurses in transitioning to the baccalaureate professional role. Students will examine the scope and standards of nursing practice while applying evidence-based principles, clinical reasoning, and critical thinking to deliver patient-centered care. Emphasis is placed on developing a professional identity, accountability, and a lifelong learning mindset through self-reflection and strategies for personal and professional growth in today's dynamic healthcare environment.

Prerequisite: Must be taken in first quarter

NUR3306 Integration of Genetics and Genomics into Ethical Nursing Practice

40 hours, 4 credits

In this course, students explore the multidimensional components of genetics and genomics in nursing practice. Student design an evidence-based plan of care inclusive of findings from a focused genetic and genomic assessment. Influences of legal and governmental policies are integrated into the pursuit of ethical advocacy for at-risk individuals and populations.

NUR3455 Professional Communication in Nursing

50 hours, 5 credits

This course focuses on developing advanced communication skills essential for professional nursing practice. Students will learn strategies for advocacy, patient engagement, and collaboration within diverse healthcare settings. Emphasis is placed on using evidence-based techniques and tools to enhance oral and written communication, including the dissemination of scholarly findings. Learners will practice conveying data and information in clear, practice-ready language tailored to varied audiences, supporting evidence-informed decision-making and quality patient care.

NUR3472 Emerging Healthcare Technologies and Innovation

40 hours, 4 credits

In this course, the numerous roles of the Nurse Informaticist are explored, including social, legal, and ethical components. Strategies to integrate principles of quality and safety with innovative technology are compared. Innovative technology to inform data-driven, valid decisions is integrated into healthcare delivery based on the technology life cycle.

NUR3475 Healthcare Technology and Informatics in Nursing

50 hours, 5 credits

This course examines the integration of technology and informatics in contemporary nursing practice, with the goal of enhancing patient care and improving health outcomes. Students will analyze the impact of emerging technologies on clinical judgment, safety, and quality improvement, as well as their role in supporting interprofessional collaboration. Emphasis is placed on ethical considerations, professional standards, and the use of patient data and information systems in healthcare delivery. Learners will evaluate innovations that have transformed processes or products, preparing them to leverage technology for evidence-based decision-making and population health management.

NUR3565 Nursing Policy, Ethics, and Law

50 hours, 5 credits

This course examines the ethical, legal, and policy frameworks that shape professional nursing practice. Students will explore ethical theories, principles, and their impact on healthcare decisions, as well as the interplay between innovation, ethics, and patient care. Emphasis is placed on analyzing current healthcare policies, legal standards, and economic principles influencing nursing practice. Learners will develop strategies to mitigate legal risks associated with negligence and malpractice, while promoting ethical and evidence-informed decision-making in diverse healthcare settings.

NUR3643 Research and Theory

50 hours, 5 credits

This course provides an introduction to nursing theory development and research along with an emphasis on the works of selected prominent nursing theorists. Additionally, students examine principles of the research process to support the evaluation and utilization of nursing research. Associations between nursing research, theory, and evidence-based practice are explored. Students propose a solution to integrate evidence-based findings into nursing practice.

Prerequisite: **STA3215**

NUR3645 Evidence-Based Practice in Nursing

50 hours, 5 credits

This course emphasizes the integration of research, theory, and evidence-based practice (EBP) to improve patient outcomes and advance nursing care. Students will explore the components of the research process, ethical considerations, and the application of EBP principles in clinical decision-making. The course focuses on differentiating research, outcomes research, EBP, and quality improvement, while developing skills to synthesize evidence and propose solutions to clinical practice questions. Learners will apply evidence-based strategies to influence patient care and drive organizational change within diverse healthcare settings.

NUR3738 Integrative Nursing

40 hours, 4 credits

This course contributes to the development of knowledge regarding holistic health, with an emphasis on nursing practice and research for the advancement of healthcare. Students gain an authentic expression of holistic knowledge they can apply to their practice and personal health. This course examines holistic principles and evidence-based approaches to promote patient-centered care. Students explore the role of science in promoting holistic care while exploring the safety and efficacy of complementary and integrative therapies.

NUR3835 Quality Improvement in Nursing

50 hours, 5 credits

This course prepares nurses to lead quality improvement initiatives that enhance patient safety and healthcare outcomes. Students will identify gaps in care, analyze processes, and use evidence- based strategies to design and implement innovative solutions. Emphasis is placed on data analysis, outcome evaluation, and principles of change management within complex healthcare systems. Learners will develop and disseminate proposals that integrate best practices to drive continuous improvement in clinical settings.

NUR3894 Contemporary Issues in Nursing

40 hours, 4 credits

This course explores current issues affecting nursing practice. Focus is placed on how healthcare concerns shape and guide nursing practice. Topics discussed in this course reflect a dynamic healthcare environment inclusive of communicable diseases, healthcare policy, ethical concerns, cultural and social issues, information technology, and nurse staffing.

NUR3907 Scholarly Communication in Nursing

40 hours, 4 credits

This course prepares students to develop professional scholarly communication in the context of nursing. This course focuses on effectively communicating scholarly information in various formats, including written, visual, and verbal, to prepare for dissemination to the community.

NUR4153 Clinical Reasoning and Clinical Judgment

50 hours, 5 credits

In this course, the processes involved in transformation of learned knowledge and skills into active nursing practice are examined. Situated cognition is integrated with multiple modes of inquiry to support modification of clinical judgment. Students determine lifelong strategies to refine assimilation of external and internal cues as precursors to reliable transition from knowing to doing.

NUR4244 Public Health Nursing

90 hours, 5 credits

NUR4244 Lecture (30 hours, 3 credits)
NUR4244LL Clinical (60 hours, 2 credits)

In this course, students examine the foundations of community and public health nursing. The impacts of cultural influence, health determinants, and governing policy for public health are explored. Students collaborate with community partners to identify needs and design solutions. The clinical component provides students with opportunities to apply theoretical knowledge and practice population-based care.

Pre- or corequisite: **NUR2502**

NUR4245 Population and Public Health Nursing

50 hours, 5 credits

This course examines the principles and practices of population health and public health nursing, with a focus on systems thinking and the social determinants of health. Students will analyze the cultural, socioeconomic, behavioral, environmental, and policy factors that influence health outcomes at local, state, national, and global levels. The course focuses on designing evidence-based strategies for community care and preventive approaches for vulnerable populations. Students will apply epidemiological methods to address chronic and emerging health conditions through collaborative, population-focused interventions.

NUR4327 Influence of Policy, Finance, and Law on Healthcare

40 hours, 4 credits

In this course, students examine the dynamics of health policy, economics, and legal influences on nursing practice. Emphasis is placed on political action, policy creation, economic considerations, regulatory environments, and legal implications. Students select and appraise strategies to reduce risk of litigation related to errors in judgment and practice.

Prerequisite: **NUR2356**

NUR4590 Professional Identity of the Nurse Leader

80 hours, 5 credits

NUR4590 Lecture (35 hours, 3.5 credits)
NUR4590LL Clinical (45 hours, 1.5 credits)

In this course, components of leadership and management are examined. Students integrate leadership and management principles into data-driven decisions impacting complex microsystems and macrosystems of healthcare delivery. Innovative strategies to facilitate meaningful change are examined with a focus on outcomes aligned with quality improvement processes. Students explore the evolution of professional identity inclusive of integrity, advocacy, leadership, and commitment to safe, effective, evidence-based nursing practice. The clinical component provides students with opportunities to apply theoretical knowledge in healthcare settings.

Pre- or corequisite: **NUR4153**

NUR4595 Nursing Leadership and Management

50 hours, 5 credits

This course prepares nurses to assume leadership and management roles within complex healthcare systems. Students will examine organizational structures, systems-based practices, and strategies that promote quality care, patient safety, and the well-being of the workforce. Emphasis is placed on leadership attributes, decision-making, and principles guiding the supervision of nursing care. Learners will integrate innovative approaches to change management, interprofessional collaboration, and advocacy to advance nursing practice and sustain improvements in healthcare delivery.

NUR4681 Global Health

40 hours, 4 credits

In this course, students explore the foundations of global health, including the components of epidemiology. The impact of global disease surveillance processes is examined, and strategies to control emerging healthcare concerns are developed. A critique of access to global healthcare is discussed, with an emphasis on high-risk and vulnerable populations. Students gain perspective regarding methods to integrate social determinants and human rights concerns into global health planning.

Pre- or corequisite: **NUR4244**

NUR4756 Transition to Practice

90 hours, 5 credits

NUR4756 Lecture (30 hours, 3 credits)
NUR4756LL Clinical (60 hours, 2 credits)

In this course, students collaborate within intraprofessional and interprofessional teams, integrating principles of leadership and professional identity to provide comprehensive, evidence- based, multidimensional nursing care. Complex medical surgical cases are examined from multiple perspectives as students integrate assessment data to design innovative solutions. Students apply principles of clinical reasoning and clinical judgment to demonstrate benchmarks associated with preparation for the NCLEX-RN®. The clinical component provides students with opportunities to apply theoretical knowledge in healthcare settings.

Prerequisite: **NUR2755**
Pre- or corequisite: **NUR4590**

NUR4922 Bachelor of Science in Nursing Capstone

40 hours, 4 credits

In this course, students synthesize concepts of professionalism, ethics, research, quality and safety, leadership, emerging technologies, healthcare policies, and population and global health into strategies supporting practice excellence and sound clinical judgment. Emphasis in this culminating course is on the creation of a therapeutic environment for self and client. Evidence-based findings support decisions and inform nursing practice.

Prerequisite: Must be completed in student’s final quarter

NUR4926 RN-BSN Capstone

60 hours, 6 credits

This culminating course integrates knowledge, skills, and professional values acquired throughout the RN-BSN program. Students will apply theoretical, empirical, and evidence-based principles to deliver safe, high-quality, and person-centered care across diverse healthcare settings. Emphasis is placed on leadership, interprofessional collaboration, population health strategies, and professional accountability aligned with ethical, legal, and regulatory standards. As the final course, students will complete a comprehensive capstone project and portfolio demonstrating achievement of program outcomes and readiness for professional nursing practice.

Prerequisite: Must be taken in final quarter

PGY Photography

PGY1300C Digital Photography and Image Editing

40 hours, 3 credits

This course provides an introduction to the techniques and theories of digital photography, with an emphasis on photographs telling a story or emphasizing a subject or product. The course covers pre- visualization, composition, image capture, and digital manipulation and final output. Students will learn to appreciate and use photography as part of the communication process of design.

Pre- or corequisite: **GRA1700C**

PHA Pharmacy

PHA1500 Structure and Function of the Human Body

40 hours, 4 credits

This course provides a working knowledge of the structure and function of the human body. A general introduction to cells and tissues is followed by study of the anatomy and physiology of the skeletal and muscular systems. The student is introduced to the nervous, cardiovascular, respiratory, digestive, urinary, reproductive, and endocrine systems.

Prerequisite: In programs that specifically require this course, must be completed by end of student's second quarter.

PHC Public Health

PHC4305 Practices and Policies in Public Health

40 hours, 4 credits

This course is designed to examine the various aspects of public health practices and policies. Explores the concepts of planning, implementing, and evaluating health education programs. This course will also explore the process of policy development from conception to implementation, as well as ethical issues that often confront health educators.

PHC5035 Epidemiology and Biostatistics

40 hours, 4 credits

In this course, students learn the role of epidemiology and biostatistics in disease prevention. Students learn a variety of exposure-disease models related to disease pathways and occurrence prevention. Students learn the strengths and weaknesses of epidemiological study designs, and how to interpret the analysis to draw conclusions from these studies. Students will utilize different data sources and will learn the difference between primary and secondary data. Students will calculate disease rates and measures of association and develop skills to assess the scope and magnitude of the risk factors that influence health outcomes.

PHC5103 Essentials of Public Health

40 hours, 4 credits

This course includes introduction of public health concepts, overview of historical aspects of public health, and advances in the field of public health. Students learn models and tools that aid in the design of programs that promote healthy behaviors. Students understand the mission and the goals of public health, evaluate global health initiatives, and are introduced to the roles and responsibilities of various careers in this field.

PHC5374 Environmental Health and Emergency Preparedness

40 hours, 4 credits

In this course, students learn principles of environmental health. Topics discussed include exposure assessment, environmental and occupational hazards, risk management, and disaster management. Students learn the impact environmental laws and regulatory guidelines have on global health.

PHC5441 Social Determinants of Health

40 hours, 4 credits

This course presents students with an overview of social determinants of health within local, national, and global populations. Students learn how to develop strategies to mitigate health disparities as well as the impact determinants have on health outcomes. Students learn the impacts that bias, cultural competency, and health literacy have on the health outcomes of diverse groups.

PHC5470 Principles of Health Behavior

40 hours, 4 credits

This course studies basic principles of behavior analysis and identifies areas of public health in which these principles are used. Health behavior models for culturally appropriate and theory- driven individual and community-based behavior change interventions are examined. Students analyze literature and health belief models to develop, implement, and evaluate health behavior interventions within new or existing health promotion programs.

PHC6117 Public Health Leadership

40 hours, 4 credits

This course utilizes the Core Competencies for Public Health Professionals as the framework for self-assessment, designing a personal and professional leadership development plan, and identifying mentors and professional resources for growth. Topics include leadership strategies for interprofessional group cohesion, conflict management, and dealing with difficult people. Students examine various approaches to addressing cultural and diversity issues among work groups and in addressing various community audiences.

PHC6517 Public Health Administration, Governance, and Management

40 hours, 4 credits

This course focuses on the organization of public health systems, the policies governing these systems, and the delivery programs at the local, state, and federal levels. This course explores communication strategies that emphasize cultural awareness and diverse population initiatives. Topics covered include public health organization management and policies, interprofessional collaborative practices, financial management, local and state budgets, strategic planning, and quality improvement.

PHC6716 Program Design and Evaluation

40 hours, 4 credits

In this course, students identify a population health need and develop a program vision, goals, and process, including timelines and budgets. The course emphasizes community stakeholder engagement in the development of the program and detailing the interim and summative goals to be evaluated as the program is being implemented. The course also introduces how to develop a program proposal to align with the grant application process.

PHC6724 Evidence-Based Public Health Research

40 hours, 4 credits

This course builds upon epidemiological concepts about research principles and study designs related to public health. A range of research methodologies and designs are discussed, including qualitative and quantitative approaches, sampling methodologies, measurements, descriptive and inferential statistics, hypothesis testing, survey design and administration, data analysis, and interpretation.

Prerequisite: PHC5030

PHC6940 Master of Public Health Practicum

120 hours, 4 credits

During the practicum, students work with an organization to understand its role in the improvement of public health. During the practicum, students complete a project that supports the goals of the organization and its stakeholders. At the conclusion of the practicum, students reflect on their experience and the impact of their project on the field of public health.

Prerequisite: Expected to be completed in the student's final quarter

PHC6990 Master of Public Health Capstone

40 hours, 4 credits

The Master of Public Health Capstone allows students to apply and synthesize the theory, knowledge, skills, and competencies they acquired in courses and the practicum. Students connect all aspects of the public health core competencies and apply them to analyzing and addressing public health initiatives. The capstone promotes the use of critical thinking, cultural competence, and evidence-based research to promote health and disease management in diverse populations.

Prerequisite: Expected to be completed in the student's final quarter

PHI Philosophy

PHI1520 Ethics Around the Globe

40 hours, 4 credits

This course is a study of various and common ethical principles around the world and their relationships to morality and professional responsibility. Emphasis is placed on the application of ethical theories to problems faced in increasingly globalizing business and society.

PHI2103 Introduction to Critical Thinking

40 hours, 4 credits

This course builds essential critical thinking and reasoning skills through real-world problem-solving. Students will analyze challenges, evaluate sources, and map deductive, inductive, and abductive arguments. They will also identify errors in reasoning, such as logical fallacies and cognitive biases, and demonstrate sound decision-making by establishing and weighing criteria. Finally, students will construct cogent, persuasive arguments to support innovative solutions.

Prerequisite: **ENC1101**

PHT Physical Therapy

PHT1000 Physical Therapist Assistant Fundamentals

100 hours, 6 credits

PHT1000 Lecture (20 hours, 2 credits)
PHT1000L Lab (80 hours, 4 credits)

This course will teach the fundamentals of data collection within the physical therapist assistant's scope of practice along with an introduction to the profession and the role as a member of the healthcare team. It places focus on the professional organizations, overview of legal and ethical issues relating to the physical therapist assistant, importance of interpersonal communication skills relating to the profession. There will be a special emphasis on minimizing risk through appropriate and safe patient handling, transfers, and gait training.

Pre- or corequisites: **BSC2093C**; **HSC1531**

PHT1100 Introduction to Evidence-Based Practice and Therapeutic Interventions

60 hours, 4 credits

PHT1100 Lecture (20 hours, 2 credits)
PHT1100L Lab (40 hours, 2 credits)

This course is an introduction to the underlying principles and clinical application of evidence-based practice and basic therapeutic interventions. It places focus on developing the student's ability to obtain peer-reviewed research, performing basic appraisal of the evidence, and learning thermal, mechanical, and electrotherapeutic interventions used to address pain, inflammation, edema, soft tissue healing, and muscle reeducation. There is a hands-on lab component to this course. This course will prepare students to incorporate evidence-based practice and the proper integration of these basic interventions into physical therapy practice.

Prerequisites: **BSC2093C**; **HSC1531**; **PHT1000**

PHT1200 Principles of Musculoskeletal Physical Therapy – Lower Quarter

70 hours, 5 credits

PHT1200 Lecture (30 hours, 3 credits)
PHT1200L Lab (40 hours, 2 credits)

This course will teach students about the presentation of lower-quarter musculoskeletal disorders with a focus on therapeutic exercises in this region. Structure and function of the lower-quarter musculoskeletal system will be covered. There will be a focus on selecting and implementing appropriate evidence-based therapeutic exercises as they relate to musculoskeletal physical therapy practice for the lower quarter.

Pre- or corequisite: **PHT1100**

PHT1300 Principles of Musculoskeletal Physical Therapy – Upper Quarter

70 hours, 5 credits

PHT1300 Lecture (30 hours, 3 credits)
PHT1300L Lab (40 hours, 2 credits)

This course will teach students about the impact of upper-quarter musculoskeletal disorders on patients seeking physical therapy. Structure and function of the upper-quarter musculoskeletal system will be covered. There will be a focus on selecting and implementing appropriate evidence-based therapeutic exercises as they relate to musculoskeletal physical therapy practice for the upper quarter.

Prerequisites: **BSC2094C**; **PHT1200**

PHT2000 Principles of Neuromuscular Physical Therapy

50 hours, 4 credits

PHT2000 Lecture (30 hours, 3 credits)
PHT2000L Lab (20 hours, 1 credits)

This course is the study of common neuromuscular disorders including stroke, spinal cord injury, traumatic brain injury, and Parkinson's disease. Students will study the structure and function of the human nervous system and common nervous system pathology and will learn to implement physical therapy treatment programs for this patient population. This course will prepare students to care for patients with neuromuscular disorders.

Pre- or corequisite: **PHT1300**

PHT2500 Physical Therapist Assistant Clinical I

220 hours, 8 credits

This course is designed to allow for application of fundamental material learned in the classroom in the physical therapy healthcare environment. Additionally, this course will include an emphasis on coursework that focuses on topics such as documentation, data collections, theory, clinical judgment, and utilization of the medical record. Students will experience physical therapist assistant interventions, prioritizing responsibilities in a changing environment, applying ethical and professional behaviors, as well as interaction within the PT/physical therapist assistant team. Upon completion of this course, the student should have a full understanding of the role of the physical therapist assistant and PT/physical therapist assistant team in the clinical environment.

Prerequisite: **PHT2000**

PHT2600 Physical Therapy Practice Across the Lifespan

50 hours, 4 credits

PHT2600 Lecture (30 hours, 3 credits)
PHT2600L Lab (20 hours, 1 credits)

This course is the study of normal human development across the life span. Students will study common pediatric and geriatric conditions requiring physical therapy intervention. Topics will include study of changes in major systems related to aging, common pediatric developmental pathologies and societal implications associated with these populations. This course will prepare students to implement physical therapy programs for children and aging adults in various practice settings.

Prerequisite: **PHT2500**

PHT2650 Physical Therapy Practice for Special Populations

50 hours, 4 credits

PHT2650 Lecture (30 hours, 3 credits)
PHT2650L Lab (20 hours, 1 credits)

This clinical course is the study of physical therapy in special populations including patients with cardiovascular, pulmonary, and pelvic health conditions. Students will also study physical therapy treatment of wounds and amputations. Topics will include the effects of disease on organ systems and function and on the family and society. This course will prepare students to implement physical therapy programs for these patient populations.

Pre- or corequisite: **PHT2600**

PHT2700 Physical Therapist Assistant Clinical II

370 hours, 13 credits

In this clinical course, the student will learn and apply advanced strategies in developing a therapeutic alliance with clients/patients. Students will determine how to utilize health information technology, making decisions about appropriate use within the clinical environment. Students will be prepared for moral reasoning, resolving conflict, and effective decision-making while practicing under the supervision of a physical therapist. Upon completion of this course, the student will be prepared for entry-level practice as a physical therapist assistant.

Prerequisite: **PHT2650**
Corequisite: **PHT2800**

PHT2800 Physical Therapist Assistant Capstone

20 hours, 2 credits

This course is a synthesis of material from all courses. Students will complete a portfolio demonstrating proficiency in transferable skills. Additionally, students will prepare for the national Physical Therapist Assistant licensure exam.

Prerequisite: **PHT2650**
Corequisite: **PHT2700**

PHY Physics

PHY4060 Understanding Ourselves Through Physics

40 hours, 4 credits

This course tracks how we have understood ourselves and our world - including time, space, gravity, and our gadgets - as understanding of how physics has evolved. Topics will include Newton’s “discovery” of gravity, Einstein and relativity, energy particles and waves, the atom and how we use it, Schrödinger’s cat, and modern technologies.

PLA Paralegal

PLA1013 Introduction to Law and the Legal System

40 hours, 4 credits

Students will examine the American legal system and related terminology from a paralegal’s perspective. They will explore the sources of law and structure and authority of government, including the court system and court procedures. In addition, students will examine the difference between civil and criminal cases. Students will explore different areas of law where paralegals may work. They will study the skills and knowledge required for success, including legal writing, legal research, interviewing, and case management duties. Students will study ethical and professional responsibilities associated with paralegal duties.

Prerequisite: This course should be taken in the student’s first quarter

PLA1108 Introduction to Legal Research

30 hours, 3 credits

This course introduces the legal research process for paralegals. Students will develop information literacy skills specific to the paralegal field by working with primary sources, like state and federal enacted law and secondary sources. Students will learn the meaning and practice of Shepardizing™.

PLA1305 Criminal Law and Procedure

40 hours, 4 credits

This course introduces students to criminal laws including classification of crimes, theories of punishment, rules and procedures of the pretrial process, stages of the criminal process, defenses, sentencing, and other related offenses. Students will be able to analyze what crimes would be applicable to a specific set of fact scenarios.

PLA1330 Legal Ethics

30 hours, 3 credits

This course develops the ability of paralegals to recognize and handle professional responsibility and ethical issues that arise in the practice of law. In-depth analysis of attorney and paralegal ethical codes, as well as researching answers to ethical dilemmas. Topics include the Unlicensed Practice of Law (UPL), confidentiality, privilege, conflicts of interest, and professional conduct. Students will research and apply ethical rules and guidelines to specific situations, as well as identify issues where paralegals must choose which tasks can be done independently or those which must be done by or under the supervision of an attorney.

PLA1423 Contracts

40 hours, 4 credits

This course introduces students to contract law including legal requirements and methods used to make an agreement enforceable. It covers remedies for breach of oral, written, and electronic contracts. Students will research the law of contracts and related ethical rules and apply them to drafting and correcting contract clauses as they would in a law office.

PLA2203 Civil Litigation

40 hours, 4 credits

This course is the study of civil litigation. It places focus on the paralegal’s role through each stage of a civil case from the first point of contact with a client, through each stage of litigation. Topics covered include initiating a lawsuit including pleadings, the discovery stage of a lawsuit, legal motions, and documents in preparation for trial. This course prepares students to construct pleadings, interview clients, and to prepare discovery, trial, and post-trial documents.

PLA2273 Torts

40 hours, 4 credits

This course introduces students to intentional torts, unintentional torts, negligence, including the standard of care, causation, limitation of duty defenses, strict liability, and damages.

PLA2330 Legal Writing

40 hours, 4 credits

After examining the sources of law and the structure of the federal and state court systems, students will be introduced to case and statutory analysis and to an understanding of the role of the paralegal in performing substantive legal analysis and writing tasks. They will learn how to analyze and synthesize written opinions. Students will use the results of their research from the Legal Research course in connection with at least three (3) significant writing projects, including memoranda of law. High-level communication skills will be developed to effectively communicate in writing to different potential readers, including clients, attorneys in an office, trial court judges, and appellate panel judges. Analysis and preparation of high-level legal content as well as formatting, citation rules, and other items needed for writing in this field will be developed. Students will organize an appellate brief, which requires specific, rule-based formatting and structural content. This content includes items such as tables of cases and other authorities, a table of contents, statement of the case, argument, and conclusion.

PLA2435 Corporate Law

40 hours, 4 credits

This course will provide students an overview of the formation, operation, and dissolution of the corporate entity. Stockholders rights and remedies as corporate owners will be examined. Corporate documents and corporate formalities will be discussed.

PLA2476 Employment Law

40 hours, 4 credits

Students will develop an understanding of selected legal issues involved in human resource management. Legal issues to be addressed include labor relations, employee rights, sexual harassment, diversity, and compensation and benefits law. The primary orientation of the course will be to enable learners to recognize the spirit and purpose of the legal framework of enterprise so that learners can embrace compatible strategies and avoid cutting corners in the short run, which can ultimately result in major disasters.

PLA2620 Property and Estate Planning

40 hours, 4 credits

This course provides basic concepts of the laws of property and probate. Students will apply laws and ethics to drafting real estate, probate, and estate planning documents. Students will use client interview answers to create several types of legal and financial documents needed in this field.

PLA2763 Law Office Management

30 hours, 3 credits

This course engages students in understanding how a law office operates. Topics covered include file management, law office billing, professional communication, the use of software in the law office, and how social media plays a role in the law office.

PLA2800 Family Law

40 hours, 4 credits

This course is designed to teach the student to handle client interviews, to draft necessary pleadings and supporting documents, and to perform research relative to the practice of family law and domestic relations matters. The student will develop an understanding of the law relating to marriage, cohabitation, divorce, annulment, custody and support, adoption, guardianship, and paternity. Students will draft pleadings and documents including antenuptial and property settlement agreements.

PLA2820 Paralegal Associate Capstone

40 hours, 4 credits

This course prepares students for entry into the legal community through a simulated and meaningful law office experience in an online environment. Students will demonstrate their mastery of the content of their core curriculum and apply specialized theory, skills, and concepts. Students will engage in advanced analysis, research, and writing projects. Students will engage in practical work experience in the day-to-day operations of a law office work environment and will handle simulated client cases.

Prerequisite: This course should be taken in the student’s final quarter

POT Political Theory

POT4001 Political Thought

40 hours, 4 credits

The aim of this course is to understand and appreciate some important authors and traditions of political thought. The course will cover such topics as authority, consent, freedom, and obligation.

PRN Practical Nursing

PRN1032 Client-Centered Care I

90 hours, 5 credits

PRN1032 Lecture (30 hours, 3 credits)
PRN1032LL Clinical (60 hours, 2 credits)

This course introduces students to foundational knowledge for Practical Nursing, including basic care, comfort, and nutrition. Students identify client-centered interventions for individuals with concerns related to safety and mobility. Nursing care for the client with infectious, inflammatory, immunologic, integumentary, musculoskeletal, and sensory or perception disorders is explored. The clinical component provides students with opportunities to apply theoretical knowledge in healthcare settings.

Pre- or corequisite: **NUR1055**

PRN1150 Practical Nursing Skills I

40 hours, 2 credits

This course introduces students to skills required for basic care and comfort of individuals experiencing alterations in skin integrity, nutrition, and metabolism. Students demonstrate appropriate techniques for data collection, medical asepsis, standard precautions, and universal precautions. Accurate medication calculation and demonstration of safe medication administration are required.

Pre- or corequisite: **PRN1032**

PRN1178 Client-Centered Care II

90 hours, 5 credits

PRN1178 Lecture (30 hours, 3 credits)
PRN1178LL Clinical (60 hours, 2 credits)

In this course, students build on previously acquired knowledge to provide safe and effective care for the client with alterations in endocrine and gastrointestinal systems or cancer. Additionally, nursing interventions for the perioperative client is explored. Normal and abnormal diagnostic and lab results for these related disorders are discussed. The clinical component provides students with opportunities to apply theoretical knowledge in healthcare settings.

Prerequisite: **PRN1032**

PRN1253 Principles of Gerontological Nursing

50 hours, 3 credits

PRN1253 Lecture (20 hours, 2 credits)
PRN1253LL Clinical (30 hours, 1 credits)

This course provides an overview of the Practical Nurse’s role when providing client-centered care for the older adult. The student will focus on promoting a holistic approach to care for the geriatric client. This course examines basic pathophysiological, nutritional, pharmacology, psychosocial, and ethical and legal responsibilities associated with the care of the older adult client. The clinical component provides students with opportunities to apply theoretical knowledge in healthcare settings.

Pre- or corequisite: **PRN1032**

PRN1381 Principles of Pharmacology

30 hours, 3 credits

This course provides foundational knowledge of pharmacotherapeutics as related to client care. Major drug classifications, as well as principles of pharmacokinetics and pharmacodynamics are explored for medications affecting the body systems. Legal, ethical, and professional considerations surrounding medication administration are explored. Resources needed for safe medication preparation and administration, as well as principles of professional communication related to client safety, are presented.

Pre- or corequisite: **MAT1222**

PRN1409 Client-Centered Care III

90 hours, 5 credits

PRN1409 Lecture (30 hours, 3 credits)
PRN1409LL Clinical (60 hours, 2 credits)

This course builds upon previously learned client-centered care content. Emphasis is now placed on care of the client with disorders related to the urinary, respiratory, cardiovascular, and hematologic systems. The clinical component provides students with opportunities to apply theoretical knowledge in healthcare settings.

Prerequisites: **PRN1178**; **PRN1381**

PRN1562 Principles of Mental Health Nursing

70 hours, 4 credits

PRN1562 Lecture (25 hours, 2.5 credits)
PRN1562LL Clinical (45 hours, 1.5 credits)

This course focuses on caring for clients with mental health disorders. Emphasis is placed on foundations of mental health concepts, therapeutic environments, coordinated care, and crisis management interventions. Care of the client with substance abuse, addictive disorders, and psychobiologic disorders, as well as special populations with mental health disorders, is presented. The clinical component provides students with opportunities to apply theoretical knowledge in mental healthcare settings.

Pre- or corequisite: **PRN1178**

PRN1664 Practical Nursing Skills II

20 hours, 1 credits

This course reviews skills used within the Practical Nursing role. Skills focus on the care of the client with fluid and electrolyte imbalance and disorders of the gastrointestinal, respiratory, cardiac, and hematologic systems. Accurate medication calculation and demonstration of safe medication administration are required.

Prerequisite: **PRN1150**

PRN1725 Client-Centered Care IV

90 hours, 5 credits

PRN1725 Lecture (30 hours, 3 credits)
PRN1725LL Clinical (60 hours, 2 credits)

This course builds on previous knowledge to focus on care associated with diseases and disorders related to the neurologic system. The nursing process is utilized as students learn to care for clients experiencing complex disorders and medical emergencies. The role of the practical nurse in perioperative nursing care, emergency response, and disaster preparedness is also included. The clinical component provides students with opportunities to apply theoretical knowledge in healthcare settings.

Prerequisite: **PRN1409**

PRN1831 Principles of Maternal-Child Health Nursing

70 hours, 4 credits

PRN 1831Lecture (25 hours, 2.5 credits)
PRN 1831LL Clinical (45 hours, 1.5 credits)
This course explores health promotion and maintenance of women from the prenatal to postpartum period and the newborn from conception to adolescence. Normal growth and development, as well as deviations from normal, are explored. The focus of the course is on providing a safe, effective care environment for the mother, newborn, and child. Relevant pharmacological interventions, nutritional principles, cultural and spiritual diversity, as well as legal and ethical issues related to maternal and pediatric care are included. The clinical component provides guided clinical experiences that allow students to apply theoretical knowledge in healthcare settings.

Pre- or corequisite: **PRN1409**

PRN1993 Practical Nursing Diploma Capstone

30 hours, 3 credits

This capstone course serves as the culminating experience of the Practical Nursing Program. Students synthesize the knowledge needed to deliver client-centered nursing care inclusive of physiological and psychosocial integrity, health promotion and maintenance, and quality improvement, while collaborating to provide a safe and effective care environment. Students demonstrate clinical reasoning and engage in reflection and self-analysis as they prepare for transition to practice.

Prerequisite: Must be taken in the student's final quarter
Pre- or corequisites: **PRN1725**; **PRN1831**

PSY Psychology

PSY1012 General Psychology

40 hours, 4 credits

This course will provide students with a general understanding of basic methodologies, concepts, theories, and practices in contemporary psychology. Areas of investigation may include the goals and research methodologies of psychology, the science of the brain, theories of human development and intelligence, concepts of motivation and emotions, the science of sensation and perceptions, and the current practices pertaining to psychological disorders, therapies, and treatments.

PSY2420 Abnormal Psychology

40 hours, 4 credits

This course teaches students the applied discipline of abnormal psychology. Students will explore abnormal behavior in disparate societies and cultures. Applications include individuals who have difficulty functioning effectively in everyday life, the impact of family dysfunction on the individual, and the influence of mental illness on criminal behavior. Variables which may affect a person's ability to adapt and function in a community will be considered, such as genetic makeup, physical condition, reasoning, and socialization.

Prerequisite: **PSY1012**

PSY3738 The Psychology of Social Media

40 hours, 4 credits

This course examines psychology impacts when humans engage with peers through online networks for social and professional use. Benefits to be explored include networking, distance team building, access to global perspectives, and social media's impact on Benedict Anderson's "Imagined Communities." Also explored will be the psychology of harmful online behaviors such as cyberbullying and trolling.

PTN Pharmacy Technician

PTN1009 Foundations of Pharmacy Practice

40 hours, 4 credits

This course serves as an introduction to the history and origins of the practice of pharmacy and the role of a pharmacy technician. This course will also provide an overview of pharmacy laws and safety guidelines, compounding equipment, billing procedures, mathematical equations, types of medication, and routes of administration. Application of pharmacy terminology and abbreviations will be covered.

Pre-or corequisite: **HSC1531**

PTN1146 Pharmacy Calculations

40 hours, 4 credits

This course provides the calculations necessary to be a successful member of the pharmacy team. Students will learn how to calculate dosages that meet the safety laws and regulations of the practice of pharmacy. Students will also be prepared to calculate measurements, conversions, ratios, and dilutions.

Prerequisite: **PTN1009**

PTN1237 Pharmacology for Technicians

40 hours, 4 credits

This course will provide students with the knowledge of common drugs, classifications, and their impact on various body systems. Topics covered include routes of administration, medication preparations and supplies, basic math calculations, and therapeutic uses for common prescription and non-prescription pharmaceutical agents. Students will study the processes involved with reviewing patient medication orders and will learn about the various equipment used to administer pharmaceutical agents.

Prerequisite: **HSC1531**
Pre- or corequisite: **PHA1500**

PTN1454 Sterile and Non-Sterile Compounding

30 hours, 2 credits

The student will learn to prepare sterile and non-sterile compounds. In this course the students will apply pharmacy math skills to calculate the dose necessary to compound sterile and non-sterile products. Emphasis will be placed on proper aseptic technique, compounding non-sterile products, identifying compounding supplies, handling of chemotherapy and biological agents, compounding of total parenteral nutrition (TPNs), and interpreting and labeling of compounded medication orders.

Prerequisite: **PTN1146**
Pre- or corequisite: **PTN1237**

PTN2050 Pharmacy Technician Capstone

30 hours, 3 credits

This course is an overview of all pharmacy technician program courses and concepts, with an emphasis on reviewing and preparing for the national examinations that lead to certification as a Pharmacy Technician.

Prerequisite: Expected to be the final lower-level core course completed

PTN2873 Pharmacy Retail Practicum

60 hours, 2 credits

Students will apply the knowledge gained from the program in a workplace setting. They will be able to provide high-quality customer service by utilizing learned communication skills and will gain experience working as a team member within the field of pharmacy. They will apply technical skills learned in the classroom, including but not limited to inventory management, automation, billing procedures, medication preparation, and dosage calculations. They will learn to operate the necessary equipment and software for processing medications and will be able to observe all safety procedures applied in the pharmacy setting.

Prerequisite: Expected to be the final lower-level core course completed

PTN2915 Pharmacy Virtual Practicum

60 hours, 2 credits

Students will apply the knowledge gained from the program in a virtual workplace setting. They will be able to provide high-quality customer service by utilizing learned communication skills and will gain experience working as a team member within the field of pharmacy. They will apply technical skills learned in the classroom, including but not limited to inventory management, automation, billing procedures, medication preparation, and dosage calculations. They will learn to operate the necessary equipment and software for processing medications and will be able to observe all safety procedures applied in the pharmacy setting.

Prerequisite: Expected to be the final lower-level core course completed

QMB Quantitative Methods in Business

QMB1000C Fundamentals of Data Analytics

40 hours, 3 credits

In this course, students will be introduced to the concepts and tools used in current analytics practices. Students will be able to identify common tools, terms, and ideas. Topics covered will include visualization, data quality, platforms, and scripting.

QMB1311C Python Programming

60 hours, 4 credits

In this course, students will work with the Python programming language to learn how it can be used to handle important computing tasks. Students will demonstrate their understanding of flow control, functions, object-oriented concepts, and basic data structures as well as utilizing external modules.

Prerequisite: **COP1044C**

QMB2200C Fundamentals of Data Visualization

60 hours, 4 credits

This course is an introduction to the concepts and tools used in current visualization methodologies. Students will be able to understand the software and other processes used to produce visualizations. Topics covered will include report design, human perception of visualization, and chart selections rules.

QMB2311C Advanced Python Programming

60 hours, 4 credits

In this course, students will focus on advanced Python techniques and best practices. Through a series of hands-on labs, students will focus on advanced topics to include lambda functions, comprehensions, handling file operations, integration of Regular Expression (regex) logic, and troubleshooting code issues with debugging techniques.

Prerequisite: **QMB1311C**

QMB3000 Introduction to Data Analytics

60 hours, 4 credits

This course introduces students to the data analytics lifecycle. Students will learn about data sources, data analysis, computing environments, and data ecosystems. Students will compare the key features of various industry tools used to analyze and visualize data. This course describes opportunities and challenges for implementing the data life cycle in a business setting.

Data Analytics Bachelor's Degree Only - Prerequisites: **COP1532C**; **QMB1311C**
Business Management Bachelor's Degree Only - Prerequisite: **CTS3265C**

QMB3100 Foundations of Analytics Platforms, Environments, and Software

60 hours, 4 credits

This course explores the different types of environments found in the data analytics space. Topics include a study of the different types of analytics tools used during the data analytics lifecycle and within the Extract Transform Load (ETL) processes in particular.

Data Analytics Bachelor's Degree Only - Prerequisite: **STA1625**
Business Management Bachelor's Degree Only - Prerequisite: **STA3215**

QMB3200 Introduction to Scripting

60 hours, 4 credits

This course is an introduction to scripting using the online SAS® software suite for accessing, manipulating, analyzing, and visualizing data. Students will learn how to write scripts that are used throughout the data analytics lifecycle to facilitate descriptive and statistical analysis and to produce reports and visualizations that communicate actionable insights to audiences of varying technical backgrounds.

QMB3300 Introduction to Data Visualization

60 hours, 4 credits

This course explores data visualization tools and techniques. It emphasizes the best ways to communicate data to the intended audience. Students learn about tools that aid in visualizing data and how to develop an objective depiction of data using an editorial thinking approach. This course will prepare students for the challenges of having to analyze data and communicate results to audiences with various skill levels and preferences.

QMB4000 Data Elements

60 hours, 4 credits

This course reviews the concepts, standards, and functions used to identify data elements necessary for an efficient data preparation process.

Prerequisite: **QMB3200**

QMB4100 Applied Business Intelligence

60 hours, 4 credits

This course allows students to apply skills and techniques for analyzing existing business performance data to provide support for business planning. It places focus on planning an end-to-end business intelligence process, platform, database, and analytical tool usage. Students will learn about processing and analyzing data, quality assurance and regulatory adherence, and preparing data for consumption. Students will create visualizations to help guide business decision-making.

Prerequisite: **CTS3265C**

QMB4200 Advanced Analytics Platforms, Environments, and Software

60 hours, 4 credits

This course covers the data analytics lifecycle surrounding Big Data. Topics include Big Data architectures, batch and real-time processing environments, ETL tools and techniques, Big Data storage technologies, machine learning, and visualization. Security, legal, and ethical issues will also be addressed. Students will work with the SAS® statistical software suite to perform exploratory data analysis and reporting.

Prerequisite: **QMB3100**

QMB4300 Data Quality in Analytics

60 hours, 4 credits

Quality data allows for quality analysis. In this course, students will learn how to identify common types of data quality issues including missing data, incorrect data, outliers, normalization, and duplication. This course will prepare students to prepare data for analytics projects.

QMB4400 Data Analysis and Optimization

60 hours, 4 credits

This course will allow students to run data extracts and scripts to demonstrate a complete data analysis process, while requiring the identification and application of data element requirements, scripting modifications, and preparation techniques that could improve analysis results.

Prerequisites: **QMB4000**; **QMB4300**

QMB4500 Data Visualization Implementation and Communication

60 hours, 4 credits

This course focuses on the study of data sets which relate to meeting client needs. It includes methods used to evaluate data such as benchmarking, scoring, and ranking. Students learn the difference between correlation and causation. Students will explore techniques for visualizing both quantitative and qualitative data. This course will prepare students with the skills to derive business insights and make meaningful inferences from data sets.

Prerequisite: **QMB3300**

QMB4900 Data Analytics Capstone

60 hours, 3 credits

This course allows students to demonstrate their skills and techniques for analyzing generalized business data to provide support for business planning. It places focus on planning an end-to-end business analytics process; platform, database, and analytical tool usage; processing and analyzing data; quality assurance and regulatory adherence; preparing data for consumption; and visualization creation to help guide business decision-making.

Prerequisite: Expected to be the final upper-level core course completed

REL Religion

REL3308 Contemporary World Religions

40 hours, 4 credits

An investigation of the historical and theological development of world religions from earliest times until the present. The course will cover the lives of the major religious founders and leaders in history, as well as the scriptures and religious text of world religions. The development of religious rituals will also be dealt with. The relationship between world religions and secular governments will be investigated, as well as the role and status of women in world religions.

RMI Risk Management & Insurance

RMI4020 Risk Management

40 hours, 4 credits

This upper-level business course explores the elements of risk management and insurance essential to the business environment. This course will develop the rationale for risk-management systems and examine the environments in which they operate. Students will learn, analyze, and evaluate approaches to measuring and managing risks in various business environments.

RTE Radiologic Technology

RTE1000 Introduction to Radiology and Patient Care

80 hours, 5 credits

RTE1000 Lecture (20 hours, 2 credits)
RTE1000L Lab (60 hours, 3 credits)

This course provides an overview of radiology and its role in the healthcare system. Principles, practices, and policies of healthcare organizations are explored. The legal, ethical, and professional standards related to radiology are examined. This course will include the basics of patient-care skills in the radiology department.

Pre- or corequisite: **HSC1531**

RTE1100 Radiology Physics

70 hours, 5 credits

RTE1100 Lecture (30 hours, 3 credits)
RTE1100L Lab (40 hours, 2 credits)

This course is the study of radiographic physics. It places focus on the process in which the X-ray circuit creates electrons and the interactions that occur inside and outside the X-ray tube. Topics covered will be the X-ray circuit, X-ray production, and photon interactions with matter. This course will prepare students for operation of the X-ray control panel and X-ray tube.

Prerequisite: **MAT1222**; **RTE1000**
Pre- or corequisite: **PHA1500**

RTE1200 Advanced Modalities in Radiology

30 hours, 3 credits

This course provides a working knowledge of the different modalities available to the radiology technologist. The student will be introduced to the application of these different modalities, methods by which images are acquired, and recognize the differences in images for specific modalities.

Prerequisite: **RTE2500**

RTE2000 Radiographic Equipment and Acquisition

40 hours, 3 credits

RTE2000 Lecture (20 hours, 2 credits)
RTE2000 Lab (20 hours, 1 credits)

This course is the study of factors that influence radiologic images and the equipment that produces the images. It places focus on the correct selection of factors and operation of equipment to produce a quality image. Topics covered will include image acquisition, technical evaluation, and equipment operation. This course will prepare students for operation of all radiologic equipment and the selection of appropriate factors using digital radiography equipment.

Prerequisite: **RTE1100**

RTE2100 Radiographic Evaluation, Disease, and Quality Control

30 hours, 3 credits

This course is the study of the analyzation of radiographic images, and the quality control for radiographic equipment. It places focus on the critical thinking skills required to analyze healthy and diseased images and make the appropriate adjustments as necessary. Topics covered will include image criteria, diseases, and quality control equipment tests. This course will prepare students for critiquing images, identifying diseases, and quality control testing.

Prerequisite: **RTE2000**

RTE2200 Radiobiology and Radiation Protection

50 hours, 4 credits

RTE2200 Lecture (30 hours, 3 credits)
RTE2200 Lab (20 hours, 1 credit)

This course is the study of the effects of radiation on the human body and how to minimize exposure through radiation protection. It will focus on implementing the ALARA principle in order to safely use diagnostic radiation in the medical field. It will cover short- and long-term effects of radiation and protection measures used in clinical settings. This course will prepare students to go into an externship with a solid foundation of ionizing radiation interactions with biologic systems.

Prerequisite: **RTE2000**

RTE2300 Radiographic Positioning and Anatomy

110 hours, 5 credits

RTE2300 Lecture (10 hours, 1 credits)
RTE2300L Lab (40 hours, 2 credits)
RTE2300LL Clinical (60 hours, 2 credits)

This course is the introduction course to radiography positioning and associated anatomy of the chest, bony thorax, upper extremities, and abdomen. It places focus on the foundations of diagnostically sound radiograph positioning. Topics covered will include standard routine projections for chest, bony thorax, upper extremities, and the abdomen; medical and positional terminology associated with proper positioning; and complete image analysis. This course introduces students to becoming a real-world radiographer. During this course, students will complete a clinical experience to demonstrate knowledge and skills.

Prerequisite: **RTE1100**

RTE2400 Radiographic Positioning and Anatomy II

110 hours, 5 credits

RTE2400 Lecture (10 hours, 1 credits)
RTE2400L Lab (40 hours, 2 credits)
RTE2400LL Clinical (60 hours, 2 credits)

This course is the study of proper radiologic positioning of the lower extremities, pelvic girdle, and spine. It places focus on maintaining the level of knowledge and professionalism developed within Radiographic Positioning and Anatomy I and continues to expand the student's knowledge, skills, and abilities within radiography. Topics covered are the standard routine projections for the lower extremities, pelvic girdle, and spine as well as associated image analysis. This course gives the student an expanded preparation in becoming a radiographer.

Prerequisite: **RTE2300**

RTE2500 Radiographic Positioning and Anatomy III

110 hours, 5 credits

RTE2500 Lecture (10 hours, 1 credits)
RTE2500L Lab (40 hours, 2 credits)
RTE2500LL Clinical (60 hours, 2 credits)

This course is the study of proper radiologic positioning of the skull, fluoroscopy, and special procedures. It places focus on trauma protocols, special procedures as well as critical thinking scenarios. Topics covered are proper C-arm use, fluoroscopic procedures, and possible pharmaceutical reactions that may occur in radiology. This course will prepare the students for knowledge needed to fully prepare the student to perform at all levels of the clinical rotations.

Prerequisite: **RTE2400**

RTE2600 Radiologic Technology Practicum I

300 hours, 10 credits

This course is designed to provide the student with a clinical experience that includes a solid introduction to radiologic imaging in various clinical settings. This course functions to expand and apply knowledge gained in the Radiographic Positioning and Anatomy courses. One of the assumptions of this curriculum is that the student, who has passed the Radiographic Technology core courses, will be ready to apply knowledge by operating radiologic equipment and procuring quality radiologic images beginning Week 1 of this course.

Prerequisites: **RTE2200**; **RTE2500**

RTE2700 Radiologic Technology Practicum II

300 hours, 10 credits

This course is designed to provide the student with a clinical experience that includes a solid introduction to radiographic imaging in various clinical settings. This course functions to expand and apply knowledge gained in the Radiographic Positioning and Anatomy courses. One of the assumptions of this curriculum is that the student who has passed the Radiologic Technology core courses will be ready to apply knowledge by operating radiographic equipment and procuring quality radiographic images beginning Week 1 of this course.

Prerequisite: Must have passed all core courses except **E242**, **RTE2800** and **RTE2900**

RTE2800 Radiologic Technology Practicum III

300 hours, 10 credits

This course is designed to provide the student with a clinical experience that includes a solid introduction to radiographic imaging in various clinical settings. This course functions to expand and apply knowledge gained in the Radiographic Positioning and Anatomy courses. One of the assumptions of this curriculum is that the student who has passed the Radiologic Technology core courses will be ready to apply knowledge by operating radiographic equipment and procuring quality radiographic images beginning Week 1 of this course.

Prerequisite: **RTE2700**
Corequisite: **RTE2900**

RTE2900 Radiography Technology Capstone

20 hours, 2 credits

In conjunction with the Radiologic Technology Practicum, students will complete an online Radiography Technology Capstone course. In this course, students will learn job-search techniques and skills for entry-level radiographic technologists as well as share and learn from their practicum experiences with the class. Students will also prepare to sit for the ARRT certification exam.

Prerequisite: **RTE2700**
Corequisite: **RTE2800**

SPC Speech Communication

SPC2017 Oral Communication

40 hours, 4 credits

This course will present students with a broad understanding of communication in a variety of contexts. Students will learn the processes and strategies of oral communication by exploring speech anxiety, audience analysis, and organizational speech patterns. Students will research, use supporting materials, and use effective language to develop and present a narrative, informative, and persuasive speech.

SPN Spanish Language

SPN271 Conversational Spanish

40 hours, 4 credits

This course focuses on common words and phrases students need to develop a working vocabulary which will enable them to communicate with Spanish-speaking individuals in their personal and professional lives. Although oral communication is stressed, included is an overview of Spanish grammar, phonetic pronunciation, and Hispanic culture.

STA Statistics

STA1625 Essential Statistics and Analytics

40 hours, 4 credits

In this course, students will be introduced to descriptive analytics. They will develop basic statistical literacy along with the ability to analyze and evaluate real-life problems using statistical methods. Students will learn to organize and present quantitative data by means of graphical and numerical methods. Topics include descriptive statistics, basic probability theory, discrete and continuous probability distributions, and sampling distributions.

Prerequisite: Passing grade in Developmental Education coursework or placement determined by Rasmussen University entrance placement exam

STA3215 Inferential Statistics and Analytics

40 hours, 4 credits

This course will introduce statistical methods used for descriptive statistics. Students will build their statistics knowledge while strengthening their ability to analyze real-life scenarios and draw conclusions in a meaningful way. Topics include measures of central tendency and measures of variability, normal distribution, properties of populations and samples, hypothesis testing, and correlation and simple regression.

Prerequisite: Passing grade in Developmental Education coursework or placement determined by Rasmussen University entrance placement exam

STS Surgical Technology

STS1005C Fundamentals of Surgical Technology

70 hours, 4 credits

This course will orient the student to surgical technology and prepare them for scrub and circulator duties as well as Surgical Procedures I, and Surgical Practicum I and II. Topics include standards of conduct, special populations, safety standards, equipment, biomedical science, asepsis and sterile technique, surgical supplies, and instrumentation. This course is a preparatory class for Surgical Procedures I and Surgical Practicum I and II.

Prerequisites: **HSC1531**; **PHA1500**
Pre- or corequisite: **BSC2093C**

STS1186C Surgical Procedures I

70 hours, 4 credits

This course will expand on the duties and responsibilities as the role of scrub or STSR and circulator in the field of surgical technology. Areas explored and applied in this course include wound healing, surgical case management, instrumentation, diagnostic procedures, minimally invasive surgery, robotics, general, obstetrics, and gynecologic surgery. This course is a preparatory class for Surgical Procedures II.

Prerequisite: **STS1005C**
Pre- or corequisite: **BSC2094C**

STS1260 Surgical Pharmacology

20 hours, 2 credits

Students in this course will demonstrate an understanding of pharmacology and anesthesia concepts and their applications related to the field of surgical technology. They will study anesthesia methods, agents, and techniques of administration. They will also be able to define terminology related to pharmacology, identify medications used on surgical patients, and describe safe practices of medication handling in the surgical environment.

Prerequisite: **STS1005C**

STS1347 Surgical Microbiology

20 hours, 2 credits

This course has been designed to educate the student in the treatment of the disease-causing organisms that may present with a surgical patient or develop post-surgery as an acquired infection. This course specifically addresses the needs of the surgical technologist in maintaining aseptic techniques and caring for surgical patients before, during, and after surgery.

Prerequisite: **STS1005C**

STS2080C Surgical Procedures II

70 hours, 4 credits

This course further expands upon the duties and responsibilities as the role of scrub in the field of surgical technology. Surgical areas explored and applied in this course include genitourinary, ophthalmologic, otorhinolaryngologic, maxillofacial, and plastic and reconstructive surgery. This course is a preparatory class for Surgical Procedures III and Surgical Practicum I and II.

Prerequisite: **STS1186C**

STS2180C Surgical Procedures III

70 hours, 4 credits

This course will expand on the duties and responsibilities as the role of scrub in the field of surgical technology. Surgical areas explored and applied in this course include orthopedic, peripheral vascular, cardiothoracic, pediatric, neurosurgery, and trauma surgery. This course is a preparatory class for Surgical Practicum I and II.

Prerequisite: **STS2080C**

STS2304 Surgical Tech Practicum I

250 hours, 8 credits

This course is designed to provide students with a clinical experience that includes a solid introduction to the operating room, and to scrub and circulating routines. This course functions to expand and apply knowledge gained in the Surgical Procedures courses. One of the assumptions of this curriculum is that the student who has passed the Clinical Readiness portion of the program will be ready to apply knowledge by scrubbing and circulating in a supervised setting beginning Week 1 of this course.

Prerequisite: Successful completion of all courses except **E242** and **STS2305**

STS2305 Surgical Tech Practicum II

250 hours, 8 credits

This course is designed to provide students with a clinical experience that includes a solid introduction to the operating room, and to scrub and circulating routines. This course functions to expand and apply knowledge gained in the Surgical Procedures courses and the Surgical Tech Practicum I clinical experience. One of the assumptions of this curriculum is that the student who has passed Surgical Practicum I will continue to apply knowledge by scrubbing and circulating in a supervised setting beginning Week 1 of this course.

Prerequisite: **STS2304**

SYG Sociology

SYG1000 Introduction to Sociology

40 hours, 4 credits

In this course, students will explore the concept of culture and its impact on social interactions. Students will assess sociological concepts, while also understanding that differences can exist from their own perspective. Concepts include basic sociological topics such as socialization, gender, race, social organization, and social change. Through the course, students should achieve a better understanding of sociological concepts that impact society. Socioeconomic influences on nutritional health and disease are also included.

SYG4119 Sociology in a Digital World

40 hours, 4 credits

This course examines how society’s structure adapts as densely populated cities grow and more crowds congregate and create data in cyberspace. Topics to be explored through a sociological lens include wikis, big data, the digital divide, online networking, the evolution of language, and deviance.

TAX Taxation

TAX2002 Income Tax

40 hours, 4 credits

This course is designed to provide knowledge of the rights, options, and requirements in filing returns for the individual and small business.

Prerequisite: **ACG1033**

TAX3257 Partnership and Corporate Taxation

40 hours, 4 credits

This course is a comprehensive study of corporate and partnership taxation. Students will analyze how to form and structure corporations and partnerships, the process of preparing and filing associated tax returns, and addressing special taxation issues.

TRA Transportation and Logistics

TRA3086 Principles of Supply Chain

40 hours, 4 credits

This course is the study of supply chain management from an operational, tactical, and strategic perspective within the organization. Topics will include the relationships and flows of materials, information, and resources. This course will provide students with the understanding of supply chain creating value, enhancing efficiencies, and satisfying customers through optimization.

TRA3142 Quality Improvement

40 hours, 4 credits

This course provides a comprehensive discussion in quality and process management. Topics include coursework in the following areas: evaluating differing perspectives related to quality, understanding quality theories and applications, integrating global supply chain and international quality standards, understanding the strategic quality planning process, describing the importance of the customer in the quality-driven process, describing the importance of benchmarking in the development of quality design, evaluating quality and innovation in product and process design, developing and managing quality improvement teams, describing processes for the implementation and validation of a quality system, and applying quality audit processes in the business environment.

TRA4017 Procurement and Supplier Relations

40 hours, 4 credits

This course offers students exposure to a wide range of purchasing techniques and strategies used across a broad spectrum of industries. In this course, students will gain insight into both tactical and strategic decisions routinely found in today’s business environment. Students will learn how to effectively source, solicit bids, negotiate, and select suppliers based on dynamic, real-world scenarios.

Prerequisite: **TRA3086**

TRA4153 Supply Chain Risk and Compliance

40 hours, 4 credits

This course reviews regulatory compliance mandates around the world. Students will understand the scope, impact, and risks associated with regulation requirements on supply chain, including managing logistics and trade compliance, understanding environmental and safety compliance, and becoming skilled at policy development to ensure compliance throughout the supply chain.

TRA4238 Transportation and Distribution Management

40 hours, 4 credits

This course covers essentials of transportation and distribution management. Students will build key skills related to selecting the optimal mode of transportation while considering the impact to the customers and the overall supply chain.

TRA4370 Inventory Management

40 hours, 4 credits

This course is the study of the knowledge associated with successfully managing inventory and warehouse operations. Topics covered in this course will include strategic design, analytical assessment, and process build. This course will prepare students for work within the field of supply chain and logistics management.

TRA4495 Supply Chain and Logistics Management Capstone

30 hours, 3 credits

This course will synthesize learning from the Supply Chain and Logistics Management program. Students will reflect upon and demonstrate understanding in the areas of global logistics, operations, supply chain, process improvement, and advanced technologies. Students will submit a capstone project demonstrating synthesis of their learning.

Prerequisite: Expected to be completed in final term

Self-Directed Assessments

Knowledge Credit Self-Directed Assessments

See specific options listed on program pages, as denoted by the “+” symbol. The “+” symbol following a course title indicates that there is an equivalent self-directed assessment specifically for this course. The “+” symbol appearing after a General Education category heading indicates that there is at least one self-directed assessment available to fulfill an elective within this category. Lower-division self-directed assessments on the Lower Division charts may only be selected in place of designated courses listed in the certificate-, diploma-, and associate-level curricula of a self-directed assessment-eligible program. Upper-division self-directed assessments on the Upper Division chart may only be selected in place of designated baccalaureate-level courses (generally identifiable by course numbers in the 3000s and 4000s). Courses listed as required within a program must be fulfilled either via the faculty-led course, or its specified self-directed assessment.

Lower Division - General Education

Course Equivalent	Self-Directed Assessment	Self-Directed Assessment Description	Test-Out Quarter Credits
English Composition	English Composition	See **ENC1101** English Composition course description	4
Communication	Communicating in Your Profession	See **COM1388** Communicating in Your Profession course description	4

Social Sciences	Principles of Economics	See **ECO1000** Principles of Economics course description	4
Social Sciences	General Psychology	See **PSY1012** General Psychology course description	4
Social Sciences	Perspectives on Society	This assessment introduces students to key concepts and perspectives for understanding society and the ways individuals and groups interact within it. Students examine cultural and social differences, historical and contemporary social issues, and the factors that shape experiences across communities. The assessment explores how culture, institutions, and social structures influence opportunities, relationships, and outcomes in society. Students develop skills in critical thinking, empathy, and respectful engagement with people from a variety of backgrounds.	4

The decision to accept transfer credits is always at the discretion of the receiving institution.

Upper Division - General Education

Course Equivalent	Self-Directed Assessment	Self-Directed Assessment Description	Test-Out Quarter Credits
Communication	Conflict Management	This assessment delves into applying conflict resolution techniques to manage conflict in the world and workplace. The skills of conflict resolution and principles of healthy and negative conflict will be utilized in the assessment. Also, the techniques for resolution following conflict will be applied to encourage positive outcomes.	4
Communication	Visual Communication in the Media	See **MMC3407** Visual Communication in the Media course description	4
Humanities	Art in the World and the Workplace	See **ART3477** Art in the World and the Workplace course description	4
Humanities	The Science of Learning	In this assessment, learning principles and the science of how humans learn will be applied. The most effective practices for successful learning and the concepts that positively shape learning will be addressed. The different learning styles and known methods of effective instruction will be included in the assessment.	4
Math	Inferential Statistics and Analytics	See **STA3215** Inferential Statistics and Analytics course description	4
Social Sciences	Sociology in a Digital World	See **SYG4119** Sociology in a Digital World course description	4
Social Sciences	The Psychology of Teams	In this assessment, students will show their competency in applying team psychology in the world and workplace. The assessment will address the differences between the study of team psychology and the psychology of the individual. Key areas of negotiation, leadership, conflict management, collaboration, and ethics will be featured in the assessment.	4

The decision to accept transfer credits is always at the discretion of the receiving institution.

General Education Philosophy

General Education courses at Rasmussen University enhance and support a student's chosen field of study and teach universal skills that can be applied to any career or life experience. General Education courses foster lifelong learning and curiosity. Exposure to diverse perspectives helps students find their place in the context of the larger world.

English Composition

English Composition is the study of rhetoric and writing with an emphasis on incorporating research and analysis. In the area of English Composition, students will demonstrate understanding and application of audience awareness, research skills, and academic writing. Courses in this category provide students with learning experiences that include identifying and evaluating source material to integrate into organized academic writing.

Communication

Communication is the study of how people share information, ideas, meaning, and culture. In the area of Communication, students will demonstrate understanding and application of research skills. They will also demonstrate effective verbal, nonverbal, and visual skills for multiple purposes and effective techniques for solving conflicts. Courses in this category provide students with practical learning experiences that can be applied to the real world.

Humanities

Humanities is the study of human culture and expression around the globe. In the area of Humanities, students will demonstrate understanding and application of knowledge that provides a historical glimpse into a broader human perspective. Courses in this category provide students with learning experiences that include gaining knowledge of the arts and developing a global outlook.

Mathematics

Mathematics is the study of numerical relationships, geometrical and spatial properties, quantitative reasoning, and logic. In the area of Mathematics, students will demonstrate basic math skills and apply quantitative reasoning. Courses in this category provide students with learning experiences that include practical application of mathematical concepts.

Natural Sciences

Natural Sciences is the study of the physical world and how life works. In the area of Natural Sciences, students will demonstrate understanding of the natural world, its processes, and the inter-relationships of its systems. Students will apply the scientific method to find answers, prove or disprove hypotheses, analyze claims, and discover facts. Courses in this category provide students with learning experiences that include exploration of the world around them.

Social Sciences

Social Sciences are the study of human society and behaviors, cause and effect, and limited resources encountered by consumers within a society. In the area of Social Science, students will demonstrate an understanding of human behavior, historical events, cultural and societal differences, consumer behavior, and the inter-workings of an economy. Courses in this category provide students with learning experiences that include analyzing and interpreting of data and evaluating society as a whole.

General Education Requirements For Rasmussen University

Bachelor's degree candidates must successfully complete at least twenty-four (24) upper-division General Education credits beyond the lower-division credits required in an associate's degree (see program page for specific requirements). Upper-division courses have course numbers in the 3000s and 4000s, and lower-division courses have course numbers in the 1000s and 2000s. Bachelor's degree upper-

division General Education credits should be distributed across the following categories: Communication, Humanities, Math / Natural Sciences, and Social Sciences.

Associate's degree candidates must successfully complete at least thirty-two (32) credits of General Education coursework distributed across the following categories: English Composition/Communication, Humanities, Math / Natural Sciences, and Social Sciences (see program page for specific requirements).

Diploma programs include General Education courses as designated by program. Certificate programs may not include General Education courses because they are career-focused. Developmental Education courses do not count toward General Education requirements (or major and core requirements) in any program.

General Education Philosophy

General Education courses at Rasmussen University enhance and support a student's chosen field of study and teach universal skills that can be applied to any career or life experience. General Education courses foster lifelong learning and curiosity. Exposure to diverse perspectives helps students find their place in the context of the larger world.

English Composition

English Composition is the study of rhetoric and writing with an emphasis on incorporating research and analysis. In the area of English Composition, students will demonstrate understanding and application of audience awareness, research skills, and academic writing. Courses in this category provide students with learning experiences that include identifying and evaluating source material to integrate into organized academic writing.

Communication

Communication is the study of how people share information, ideas, meaning, and culture. In the area of Communication, students will demonstrate understanding and application of research skills. They will also demonstrate effective verbal, nonverbal, and visual skills for multiple purposes and effective techniques for solving conflicts. Courses in this category provide students with practical learning experiences that can be applied to the real world.

Humanities

Humanities is the study of human culture and expression around the globe. In the area of Humanities, students will demonstrate understanding and application of knowledge that provides a historical glimpse into a broader human perspective. Courses in this category provide students with learning experiences that include gaining knowledge of the arts and developing a global outlook.

Mathematics

Mathematics is the study of numerical relationships, geometrical and spatial properties, quantitative reasoning, and logic. In the area of Mathematics, students will demonstrate basic math skills and apply quantitative reasoning. Courses in this category provide students with learning experiences that include practical application of mathematical concepts.

Natural Sciences

Natural Sciences is the study of the physical world and how life works. In the area of Natural Sciences, students will demonstrate understanding of the natural world, its processes, and the inter-relationships of its systems. Students will apply the scientific method to find answers, prove or disprove hypotheses, analyze claims, and discover facts. Courses in this category provide students with learning experiences that include exploration of the world around them.

Social Sciences

Social Sciences are the study of human society and behaviors, cause and effect, and limited resources encountered by consumers within a society. In the area of Social Science, students will demonstrate an understanding of human behavior, historical events, cultural and societal differences, consumer behavior, and the inter-workings of an economy. Courses in this category provide students with learning experiences that include analyzing and interpreting of data and evaluating society as a whole.

General Education Requirements For Rasmussen University

Bachelor's degree candidates must successfully complete at least twenty-four (24) upper-division General Education credits beyond the lower-division credits required in an associate's degree (see program page for specific requirements). Upper-division courses have course numbers in the 3000s and 4000s, and lower-division courses have course numbers in the 1000s and 2000s. Bachelor's degree upper-division General Education credits should be distributed across the following categories: Communication, Humanities, Math / Natural Sciences, and Social Sciences.

Associate's degree candidates must successfully complete at least thirty-two (32) credits of General Education coursework distributed across the following categories: English Composition/Communication, Humanities, Math / Natural Sciences, and Social Sciences (see program page for specific requirements).

Diploma programs include General Education courses as designated by program. Certificate programs may not include General Education courses because they are career-focused. Developmental Education courses do not count toward General Education requirements (or major and core requirements) in any program.

Lower Division General Education Course Selections

The "+" symbol following a course code indicates there is an equivalent self-directed assessment for this specific course. See Self-Directed Assessments for details.

The "++" symbol following a course code indicates an offering is available only as a self-directed assessment. A traditional faculty-led course is not available. See Self-Directed Assessments for details.

Academic Policies & Standards

Academic Integrity Policy & Honor Code

Academic Integrity is core to the mission of Rasmussen University and sets the foundation for academic excellence. It is with utmost importance that students understand how to be responsible learners and conduct themselves with the highest standards of honor and integrity. As such, the Academic Integrity Policy defines the University's expectations for student academic behavior and outlines procedures for handling allegations of academic misconduct. Academic misconduct, whether intentional or unintentional, may be a violation of the Academic Integrity Policy. Violations of the Academic Integrity Policy may lead to disciplinary action up to and including dismissal from the University. Students are expected to commit to the following Honor Code when completing academic requirements and related activities.

Honor Code:

Rasmussen University expects students to commit themselves to adhering to the highest standards of ethical behavior and academic integrity when completing all coursework, participating in internship and clinical experiences, and fulfilling exam requirements. To reinforce this commitment, the University has adopted an Honor Code that outlines the University's expectations of honorable conduct.

All students enrolled in a course or program at Rasmussen University are expected to adhere to this Honor Code and pledge to avoid any action that violates the Academic Integrity Policy. Students are expected to approach their academic obligations with honor and uphold the five tenants of the Honor Code which are: Honesty, Ownership, Nobility, Observance, and Respect. As a student, you may be required to attest to this Honor Code throughout your academic experiences. Failure to pledge or attest to the Honor Code is neither an offense against the Honor Code, nor a defense of an alleged academic integrity violation.

Honesty

I am committed to upholding the highest standards of academic integrity. I understand that integrity and honesty are important values for my success in school and within my chosen career field.

Ownership

I will conduct myself ethically with honor and integrity in all the coursework I produce. Under the guidance of my instructors and through using university-approved learning resources, it is my responsibility to understand the course content and show what I have learned on course work (including exams and quizzes), using my independent ability free of cheating, collusion, interference, plagiarism, forgery, submitting acquired work as my own, and the use of generative artificial intelligence (AI) that does not adhere to the expectations as outlined in the Generative Artificial Intelligence (AI) Learning Assessment and Research Policy.

Nobility

I hold myself and others accountable to the Academic Integrity Policy. I will not engage in behavior that undermines the learning environment or reputation of the university. Concerns regarding my actions or actions of others will be reported to university officials.

Observance

I will observe and revere this Honor Code, and I acknowledge that a violation of the Honor Code or the Academic Integrity Policy may result in disciplinary action that may impact the outcome of my education.

Respect

I will treat faculty, staff, and students with respect and promote an environment of fairness, trust, and professionalism.

Definitions

1. **Academic Misconduct** is the violation of the Academic Integrity Policy, including all forms of academic cheating including, but not limited to, acts listed below and any other act that results in unfair advantage to the student.
2. **Cheating** is defined as fraud, deceit, or dishonesty on an assignment, quiz, exam, assessment, discussion posts, or any other academic work, collectively referred to for the purposes of this policy as "Academic Activity." Examples include, but are not limited to:

    a. Copying answers, data, or information for any Academic Activity from another student in which the student is not permitted to work jointly with others.
    b. Utilizing an unauthorized 3rd party for help with Academic Activities.
    c. Misusing Artificial Intelligence sites in violation of the Generative Artificial Intelligence (AI) Learning Assessment and Research Policy.
    d. Using or attempting to use unauthorized materials, texts, notes, information, or study aids to gain unfair advantage in any Academic Activity.
    e. Using prohibited electronic devices during exams or assignments, such as using a hidden earpiece to receive answers or accessing unauthorized information on a device.

3. **Collusion** is collaborating with another person or entity to create an unfair advantage, assisting, attempting to assist, or receiving assistance from another person to create an unfair advantage; or conspiring with another person or entity in or outside the University to create an unfair advantage. Examples include, but are not limited to:

    a. Allowing others to use your Academic Activities or providing unauthorized access to your Academic Activities, University technological resources, or University-issued academic accounts to any other individual.
    b. Gaining unauthorized access to another student's Academic Activities, University technological resources, or University-issued academic accounts.
    c. Sharing and disclosing any Academic Activities.
    d. Submitting Rasmussen or student content to unauthorized 3rd-party sites.
    e. Using content from unauthorized 3rd-party sites without appropriate citations and without permission from the University.

4. **Fabrication** is the act of creating something that does not exist. **Falsification** is the act of changing something to deceive. **Forgery** is the act of imitating or counterfeiting documents, signatures and the like. Examples include, but are not limited to:

    a. Deliberately falsifying, altering, or inventing student records.
    b. Deliberately falsifying, altering, or inventing information for an Academic Activity.
    c. Deliberately falsifying, altering, or inventing citations used in an Academic Activity.

5. **Impersonation** is defined as assuming another person's identity or allowing another person or entity to impersonate you or assume your identity to complete an Academic or Enrollment Activity. Examples include, but are not limited to:

    a. Completing official documents, such as entrance requirements or accommodation requests.
    b. Taking exams/quizzes.
    c. Submitting assignments or deliverables for a course.
    d. Attending (or logging in to) class in lieu of another individual.
    e. Taking part in clinicals or externships.
    f. Communicating under the guise of the student.

6. **Plagiarism** is the act of representing an individual's or organization's words, thoughts, or ideas as one's own. Examples include, but are not limited to:

    a. Using information (a paraphrase or quotation, in whole or in part) from a source without attempting to give credit to the author of that source.
    b. Using charts, illustrations, images, figures, equations, etc., without citing the source.
    c. Using an Academic Activity (in whole or in part) purchased, copied, or obtained from an unauthorized 3rd party.
    d. Violating copyright or committing piracy, including the use, alteration, or duplication of media, software, code, or information when expressly prohibited or where copyright exists or is implied.
    e. Misusing generative Artificial Intelligence without citing the use of it or in any other manner against the University's Generative Artificial Intelligence (AI) Learning Assessment and Research Policy.

7. **Sabotage** seeks to gain unfair academic advantage by destroying, damaging, or stealing another person's work and or property, or obstructing or interfering with an instructor's materials or another student's academic work (including documents, design, data, technology, etc.) Examples include, but are not limited to:

    a. Installing spyware, viruses, or other damaging software in another person's computer or academic equipment to undermine or damage another person's academic progress.
    b. Withholding or misrepresenting common knowledge about an academic activity as a deliberate attempt to harm another person's academic progress.
    c. Revealing confidential data about another person or their Academic Activity.

Violations: Students who violate the Academic Integrity Policy, (commit academic misconduct) are subject to corrective action to deter future misconduct and to hold students accountable for their actions. Academic Integrity Policy violations and corrective actions are documented and cumulative; corrective actions may be increased based on past academic integrity records, the severity of the violation, and the impact upon the academic community. Examples of corrective actions that may be implemented depending upon the severity of the occurrence(s), include but are not limited to the following:

Faculty Implemented Corrective Actions

- Redo Academic Activity for partial or full credit; Late Assignment Policy deduction may apply.
- No resubmission – Partial credit on Academic Activity
- No resubmission – Zero credit on Academic Activity

Academic Integrity Committee Corrective Actions

- Withdrawal from the course and receive a Fail (F) grade.
- Dismissal from Rasmussen University

The University reserves the right to dismiss a student from the University for academic misconduct; students who are dismissed from the University because of academic misconduct may not reenroll. Students who commit Academic Misconduct also risk harming future educational and employment opportunities.

Competency-Based Education (CBE) Violations: Students who violate the Academic Integrity Policy (commit academic misconduct) in a Competency-Based Education (CBE) course which allows multiple submissions may result in failing their first submission attempt.

Subsequent deliverable attempts may be allowed pending consideration of past academic integrity record, the severity of the violation, and the impact upon the academic community.

PLA Violations: Students who violate the Academic Integrity Policy (commit academic misconduct) in self-directed assessments, credit by examination (TO), or other Prior Learning Assessment options automatically fail the assessment without retake opportunity of the assessment in which the violation occurred or its equivalent.

Academic Integrity Appeal Process

When there is a finding of academic misconduct, the student will have the opportunity to provide any additional and pertinent information they would like considered so long as the basis for the appeal is to claim that the act of academic misconduct was not committed. Attempting to justify the act of misconduct is not an acceptable basis for an appeal. A student found in violation of the Academic Integrity Policy may appeal a finding of academic misconduct based upon the type of implemented corrective action.

- Faculty Implemented Corrective Actions must be appealed first to the faculty within 5 business days of the violation determination. If not resolved at the faculty level, the student may appeal within 5 business days of the faculty's response to the Associate Vice President, Dean, or Nurse Administrator leader. Decisions made by the Associate Vice President, Dean, or Nurse Administrator leader are final.
- Academic Integrity Committee Corrective Actions must be appealed within 5 business days of the Academic Integrity Committee decision to the Academic Appeals Committee. Decisions made by the Academic Appeals Committee are final.

Academic Overload Policy

An academic or credit overload occurs when an undergraduate student registers for more than 20 credits per quarter or more than 12 credits in a 5.5-week term, or when a graduate student registers for more than 16 credits per quarter or more than 12 credits in a 5.5-week term. In order to qualify for an overload, an undergraduate student must have completed a minimum of 30 credits at Rasmussen University. A graduate student must have completed a minimum of 16 credits at Rasmussen University in order to apply for an overload. The student must also be meeting the Rasmussen University Standards of Satisfactory Academic Progress.

Undergraduate students must have a cumulative grade point average of at least 3.01 (3.5 for bachelor-completer programs), and graduate students must have a cumulative grade point average of at least 3.5 to apply for an overload. Students who qualify will be eligible to take up to 24 total credits in the designated quarter. Students who desire an overload should consult with their Academic Advisor as well as the Dean or Dean of Nursing/Nurse Administrator of the campus in which they are enrolled.

Assessment

Rasmussen University has developed an institutional culture wherein assessment is at the heart of the University's daily functions. The Rasmussen University Comprehensive Assessment Plan (CAP) is the primary measurement for the Institution's mission. The CAP is organized around the Mission Statement and the four purposes that support the mission. For each purpose, supporting objectives have been developed, and assessment tools are used to collect data and assess each objective. In this way, the University systematically assesses the purposes and, ultimately, the mission of the Institution. To guide this process, Rasmussen University has established four Councils, which align with the four purposes that support the mission; as such, the University provides its faculty and staff with a central role in the decisions that impact the future of the institution.

In the spirit of this learning-focused approach to assessment, academic assessment at Rasmussen University follows a pattern of incoming, ongoing, and outcome assessment.

The University has an academic assessment plan that it uses to evaluate and improve the quality of learning and teaching. The academic assessments used measure incoming student skills through a placement test to determine students' reading, writing, and numeracy skills; ongoing skills in a formative fashion in individual courses; and end of program skills through various program outcomes assessments.

Transferable Skills Assessment

Transferable Skills are essential abilities which are valued by employers in many professional fields and form the basis for lifelong learning. Rasmussen University has identified six Transferable Skills as institution-level learning outcomes.

Students will have the opportunity to demonstrate these skills in various courses across their programs of study, especially in course projects across the curricula. Many of these projects have an authentic focus on the type of tasks students will perform in the workplace. Students may be assigned to submit a comprehensive Transferable Skills project in their program capstone courses as well.

Attendance Policy

A basic requirement for employment in any organization is regular, on-time attendance. Rasmussen University students are expected to be on time and in regular attendance for all of their classes. Workplace etiquette also requires a call be made if an absence is necessary. Rasmussen University students are expected to call the University and to indicate whether they will be absent or tardy. It is the student's responsibility to contact the instructor to get missed information, class work, and assignments.

Faculty are required to keep accurate attendance records that are submitted to the student's record. Rasmussen University makes attendance records available to supporting agencies and prospective employers. Students must maintain regular attendance and be in satisfactory academic standing to remain eligible for financial aid.

A. Traditional Course Attendance Requirements:
Attendance requirements in traditional courses are met by
(a) Attending a face-to-face course session at the campus or other class location, or
(b) Substantive online activity, including commentary in the discussion section of the online classroom, posting of required assignments and course quizzes and exams in a timely manner. Discussion posts in the student lounge area of the classroom are encouraged but do not count as attendance activities. Attendance is not equivalent to participation. Student grades will be impacted by the frequency and quality of participation in class, whether face to face or online, consistent with the requirements of the particular course and as outlined in the course syllabus.

1. **First-Week Attendance**
   Students are expected to meet attendance requirements in their courses on or before the sixth business day of the start of each quarter/term. Students who have not met the attendance requirement in at least one scheduled University course within six business days of the start of each term may be administratively withdrawn from the University.

2. **Course Attendance**
   a. If a student has not attended a course within 14 days of their last date of attendance in that course, they may be administratively withdrawn from the course. If the student has not attended any courses within 14 days of their last day of attendance, they may be administratively withdrawn from the University. Upon withdrawal, a student's financial aid eligibility will be adjusted according to the Institution's refund policy as described in the University Catalog and will be assigned grades according to the Rasmussen University Course Drop Policy.
   b. Rasmussen University uses a standard grading scale for its courses (although some programs may be required to follow additional standards).
   c. Nursing and Health Sciences programs may have clinicals, externships, practicums, professional practice experiences, simulation, lab, and lecture attendance requirements that are more stringent than the attendance policy above. Attendance policies for programs with additional requirements can be found in program-specific handbooks.

B. Competency-Based Course Attendance Requirements:
Attendance requirements for programs delivered exclusively as competency-based courses are met by
(a) completing and submitting identified activities or deliverables within the competency-based course, and
(b) substantive academic engagement, including completing the course Learning Plan, quizzes, or diagnostic assessments.

1. First-Week Attendance
Students are expected to meet attendance requirements in at least one course on or before the sixth business day of the start of

each term or they may be administratively withdrawn from the University. Completion and submission of the Learning Plan will be required to fulfill the first week attendance requirement in a competency-based course and gain access to the content of the course.

2. Course Attendance

a. If a student has not attended a course within 14 days of their last date of attendance in that course, they may be administratively withdrawn from the course. If the student has not been in attendance in any courses within 14 days of their last day of attendance, they may be administratively withdrawn from the University. Upon withdrawal, a student's financial aid eligibility will be adjusted according to the Institution's refund policy as described in the University Catalog and will be assigned grades according to the Rasmussen University Course Drop Policy.
b. Student grades will be impacted by the completion of deliverables.
c. Students have until the final day of the quarter/term to complete the competency-based course(s).
d. Competency-based course scores will be converted to letter grades following the Competency-Based Education Course Grade Conversion Scale and will appear on the student's transcript.
e. Upon completing a competency-based course, the attendance requirements have been met and Rasmussen University will post the final letter grade to the student's record.
f. Clinicals, externships, practicums and professional practice experiences in Nursing and Health Sciences programs have attendance requirements that are more stringent than the attendance policy above. Attendance policies for programs with additional requirements can be found in program-specific manuals/handbooks.

Students receiving funds from any state or federal agency or other fund-granting entity may be subject to the additional attendance requirements of that specific agency.

Class Content

The University reserves the right at any time to make changes to improve the quality or content of the programs of study offered. The University reserves the right to cancel any classes or programs where enrollment is under 12 students. Students will be notified of changes impacting their program of study.

Class Standing

Rasmussen University determines class standing by the number of credit hours a student has earned. The University assigns class standings according to the following criteria:

- Freshman: 0-35 credits earned
- Sophomore: 36-71 credits earned
- Junior: 72-128 credits earned
- Senior: 129 or more credits earned

Course & Status Change Policies

Course Add Policy

Students who are enrolled in courses at the beginning of an 11-week quarter may add Term 1 courses through the second business day of Term 1 and add Term 2 courses through the sixth business day of Term 1, which is the close of the Course Add period. Courses may be added through the second business day of Term 2 only when Term 2 is the student's first Term of attendance. Students may add 11-week courses through the sixth business day of the quarter, which is the close of the Course Add period. Business days are defined as Monday through Friday, excluding any University holidays.

Course Drop Policy

Students may drop courses through the sixth business day of the quarter/term. The sixth business day of the term or quarter is the close of the drop period for all programs. For courses dropped prior to tuition billing, the student will be unregistered from the course and no grade will be assigned. Tuition is billed on the seventh business day of the term or quarter for all courses remaining on the schedule. If tuition billing has occurred, the student may drop a quarter-based Term 2 course through the sixth business day of Term 2 and the student will receive a grade of CL, which does not have an academic impact. It may, however, have a financial impact. Anticipated graduation dates may be adjusted for a student who drops registered courses.

Beginning on the seventh business day of a quarter/term, a dropped course in the current quarter/term will receive a withdrawal grade per the Course Withdrawal Policy. For quarter-based Term 2 courses a student who has already been billed tuition may swap courses for an equivalent credit-value course up through the second day of Term 2. The student cannot add courses to their schedule if tuition has already been billed. Business days are defined as Monday through Friday, excluding any University holidays.

Course Withdrawal Policy

Course withdrawal dates vary depending on the scheduled length of the course. Once the Course Drop period has passed, students are permitted to withdraw from a course no later than Friday of Week 9 for 11-week courses, Tuesday of Week 5 for 5.5-week Term 1 courses, and Friday of Week 10 for 5.5-week Term 2 courses. The request for withdrawal must be received in writing by the Academic Advisor no later than 11:59 p.m. on the last day to withdraw.

During the withdrawal period, the student will receive a withdrawal grade (W) on their transcript for any classes from which they have been withdrawn. See the Satisfactory Academic Progress Policy to understand the impacts of withdrawing from one or more courses. Tuition will continue to reflect the tuition billed at the close of the course drop period.

Once the Course Withdrawal period closes, the student will receive a failing grade (F) on their transcript for any classes from which they have been withdrawn. See the Satisfactory Academic Progress Policy to understand the impacts of withdrawing from one or more courses. Tuition will continue to reflect the tuition billed at the close of the course drop period.

To meet program completion requirements, a student will need to register for any failed or withdrawn courses in a future term, which may also impact the anticipated graduation date. Pre-licensure nursing programs limit the number of course withdrawals, see the School of Nursing Repeating Courses and Course Withdrawal Policy for Pre-licensure Programs for more information.

Anticipated graduation dates may be adjusted for students who withdraw from registered courses during a term. Students who fail to notify the University that they have stopped attending and wish to withdraw from a class are still scheduled in the class. See the Satisfactory Academic Progress Policy to understand the impacts of being withdrawn from one or more courses. Tuition will continue to reflect the tuition billed at the close of the drop period.

If a student receiving financial aid withdraws from a course or all courses, there may be financial penalties. A student who withdraws from all courses will be withdrawn from the University and will have their financial aid eligibility adjusted according to the Academic Unit's refund policy as described in the University Catalog. Anticipated graduation dates may be adjusted for students who withdraw from registered courses during a term. A student who withdraws from a course is no longer allowed to attend or participate in that course.

Cancel Return Policy

A cancel status is defined as any student who, in their first quarter of enrollment or reenrollment, meets attendance requirements in one or more courses and subsequently withdraws from all courses prior to the course drop period. A cancel-status student will not be considered for reentry in the same quarter in which they posted attendance and withdrew or were administratively withdrawn.

Administrative Withdrawal from a Course, Program, or the University

The University may initiate an administrative withdrawal from a course, a program, or for complete withdrawal from Rasmussen University. An administrative withdrawal is managed according to policies established by the University. An administrative withdrawal from a course, program, or the University may be initiated as a result of the student's failure to pay tuition, failure to attend classes, failure to remain active in at least one course (unless granted stop out, leave, or another exception), failure to meet course prerequisites, failure to meet the standards of satisfactory academic progress, violations of the Conduct and Dismissal Policy or Academic Integrity Policy , failure to meet programmatic expectations, and other situations.

Program Transfer Policy

Accepted students may transfer programs based on meeting certain criteria. Active student requests for program transfers, appeals, if required, and the subsequent approval, must be received prior to Friday of the first week of a quarter break in order for the program transfer to take effect the next quarter. The request for a program transfer will either be approved or denied based on a review of academic standing and progress to date with Rasmussen University and any documentation submitted for an appeal, if an appeal is required. A clear background check is required for enrollment in certain programs as determined in the Background Checks Policy . Students who do not successfully pass a background check will be administratively withdrawn from the University. If a student chooses to transfer their academic program, the student defaults to the current catalog and curriculum requirements. A student who chooses to transfer programs must provide written authorization and a new enrollment agreement.

A student in good academic standing at the end of the most recent quarter of attendance will be allowed to transfer programs at the start of the next quarter as long as all program transfer requirements have been met.

A student who is not meeting Satisfactory Academic Progress, as defined in the Standards of Satisfactory Academic Progress , at the end of their most recent quarter of attendance will be allowed one program transfer at Rasmussen University. Any subsequent requests for a program transfer when the student is not meeting Satisfactory Academic Progress will be denied unless they meet the exemption criteria. The one program transfer limitation may be appealed to the Associate Vice President, Dean, or Nurse Administrator of the desired program following the process available through the campus of enrollment.

Students who meet any one of the criteria below are considered exempt from the one program transfer limit if they are not meeting the standards of Satisfactory Academic Progress at the end of their most recent quarter of attendance. Students who meet this criteria do not need to file an appeal to the Associate Vice President, Dean, or Nurse Administrator of the desired program.

- The returning student has not attended Rasmussen University within the past five years (sixty months) since their most recent withdrawal date.
- The returning student earned a credential from another accredited institution after attending Rasmussen University.
- The returning student's previous program from which they withdrew while not meeting Satisfactory Academic Progress is no longer offered at Rasmussen University.
- The returning student's previous program from which they withdrew while not meeting Satisfactory Academic Progress is no longer offered at that campus (i.e., bachelor program now only offered through Rasmussen University Online).
- An active student is requesting to transfer to the most recent catalog version of the program in which they are currently enrolled.
- An active student is changing credentials within the lower-level coursework, such as from an associate's degree to a certificate or a diploma, or from the certificate to a diploma or an associate's degree. A student who requests to move from an associate's degree or certificate or diploma credential to a bachelor degree program must meet the Satisfactory Academic Progress program transfer requirements.

If a student has exhausted their one opportunity for a program transfer while not meeting Satisfactory Academic Progress, the student may request a program transfer appeal to be reviewed by the University Academic Appeal committee. The process requires the student to complete and return a Program Transfer Appeal form and, in some instances, supporting documentation. The program transfer appeal process information is available to active students through their Academic Advisor and to returning students through their Admissions Representative. If a returning student is granted a program transfer appeal, the appeal will be honored for a single reenter to take place within the next three months as noted on the approved Program Transfer Appeal. An approved program transfer

appeal is only honored for the program the student appealed to enter. Students will receive written confirmation of the approval or denial to transfer programs.

Students reentering into or transferring to the Physical Therapist Assistant program must complete the requirements as detailed in the Physical Therapist Assistant Associate's Degree Re-Enrollment Policy.

Developmental Education Courses

Students are placed into Developmental Education courses based on the results of the Rasmussen University Placement Assessment. To help ensure student success, students requiring Developmental Education coursework must attempt one such course in their first term of enrollment. Students requiring two Developmental Education courses must attempt **B080** Reading and Writing Strategies in their first term of enrollment and **B087** Practical Math in their second quarter of enrollment. If a student withdraws from or does not pass a required Developmental Education course, the student must pass that course in the subsequent full quarter of enrollment or the student will be administratively withdrawn from the University. As such, any required Developmental Education courses must be completed no later than the end of the student's third full quarter of enrollment, or the student will be withdrawn from the University.

Students requiring two Developmental Education courses must attempt **B080** Reading and Writing Strategies and one additional course in their program of enrollment prior to enrolling in the Developmental Education **B087** Practical Math course. Students requiring two Developmental Education courses will not be scheduled into both courses in their first quarter of enrollment. If necessary, however, a student may be scheduled into both Developmental Education courses in each of the terms of the second quarter. Upon earning a passing grade in **B080** Reading and Writing Strategies, and at least three credits of coursework in their program of enrollment with a grade of "C" or higher, the student will be allowed to take a full-time credit load, if desired.

Developmental Education course credits are not counted toward graduation, and must be passed with a grade of "SX." Students enrolled in Developmental Education courses are eligible for financial aid. Students are not eligible to access competency courses until all Developmental Education requirements have been successfully fulfilled. Developmental Education courses must be taken in conjunction with courses required in an eligible program.

Developmental Education and Rasmussen University Placement Assessment Re-Test Policy

The goal of Developmental Education is to provide students with a solid foundation of basic skills and knowledge as they move on to college-level courses. Placement into Developmental Education courses reflects the commitment Rasmussen University has to ensuring the success of all students, and to providing educational opportunities to those who enroll. Coursework in English and math that is numbered below 100 is considered to be Developmental Education. University Placement Assessment scores are used to appropriately place students in English and math courses according to skill level. See Placement Assessment Table for placement scores.

The University placement assessment may not be retaken for initial placement purposes during the quarter in which a developmental level course is scheduled. However, a student may repeat the assessment at the end of a quarter in which the Developmental Education course was attempted and prior to the start of the following quarter in order to prove readiness for college-level coursework. If the student places into Developmental Education coursework following the re-assessment, the student must repeat the Developmental Education course in the following quarter as long as the student is still eligible to repeat the Developmental Education course.

Empowered Learning Competency-Based Education (CBE) Programs Policy

Students enrolled in a CBE program will be enrolled in competency-based courses where they are offered and in traditional courses when a course is not available as a competency-based course. Traditional courses are defined as courses of any modality with specific assignment deadlines. CBE courses are defined as those which allow students control over their assignment deadlines and are time flexible within the academic term.

- CBE programs will offer at least 51% of the program credits as CBE credits.
- Students will matriculate into Rasmussen University upon acceptance in a CBE program of their choice.
- Competency-based courses will count as credits toward financial aid eligibility.
- All Rasmussen University policies and procedures apply to a student in a CBE program unless otherwise noted.
- Attendance policies of the University must be met.
- It is the expectation that students in a CBE Program will complete their program by taking a combination of traditional courses and competency-based courses dependent upon the delivery method the course is offered by the University.
- It is the expectation that students in a graduate CBE Program will complete their entire program by taking competency-based courses.
- Students have until the final day of the quarter/term to complete the competency-based course(s). Competency-based courses must be completed within the academic term of the program.
- Student grades will be impacted by the completion of deliverables.
- Upon completing a competency-based course, the attendance requirements have been met and Rasmussen University will post the final letter grade to the student's record. Final grades may take up to seven calendar days to post to a student's transcript after completion of the course.
- Competency-based course scores will be converted to letter grades following a standard grading scale as identified on the Competency-Based Education Course Grade Conversion Scale and will appear on the student's transcript.
- Students who do not complete a competency-based course within the allotted time will be required to repeat it as a competency-based course.
- If a student has already attempted and failed or withdrawn from a traditional course, as indicated by a posted F/FD or W grade, the student will be allowed to attempt the equivalent competency-based course following the expectations of the Repeating Courses Policy.
- Students who no longer have courses remaining to complete in their current quarter/term and intend to return at the start of the subsequent quarter/term may be administratively placed on a Short Term Leave. Refer to the Short Term Leave Policy for additional information.

Extenuating Circumstances Policy

During your studies, you may experience circumstances outside your control that may impact your ability to fulfill the requirements of your courses or program. These guidelines are in place to ensure equity for all students.

Extenuating Circumstances are defined as situations that meet the following criteria:

- They are different from your usual day-to-day life;
- They are unforeseen and/or outside of your control (i.e., you could not have prevented them); and,
- They substantially impact your ability to comply with the policies of the academic unit.

The following are considered extenuating circumstances with appropriate documentation:

- Military service
- Jury duty
- Formal written accommodations as permitted under the Disability Services and Accommodations Policy (ADA/Section 504 Compliance)

If the extenuating circumstances reported fall under a Title IX offense and/or pregnancy-related conditions, this should be reported to the Title IX Coordinator at titleix@rasmussen.edu for support and consideration. Title IX Offenses include incidents of sexual misconduct such as sex-based harassment, sexual violence, dating violence, and domestic violence.

The following situations may be considered extenuating circumstances with appropriate documentation; this list is not all-inclusive:

- Serious illness or caregiving of self or an immediate family member
- Personal accident or injury of a significant nature
- Bereavement circumstances outside of the Bereavement Policy
- Victim of a crime

- Short-term incarceration
- Court Appearance when mandated as third-party or witness
- Transportation emergencies such as a car accident
- Conflicts with childcare
- Housing displacement
- Medical complications
- Natural disasters or other emergencies declared by a state or federal agency

Standards of acceptable evidence include, but are not limited to, the following:

- Health provider’s letter or certificate that confirms your illness and clearly identifies the time of the illness
- Hospital admission and discharge letter, to confirm time spent in the hospital
- Death certificate, order of service, or funeral director’s letter
- Police Report
- Eviction notice or similar evidence of housing displacement
- Military orders
- Stamped jury duty summons form from the court
- Emergency declaration
- Intake and/or release paperwork
- Accommodations plan on file

All documentation may be subject to verification of authenticity.

The following situations are generally not considered extenuating circumstances; this list is not all-inclusive:

- Poor Time Management: Failure to manage time effectively or procrastination
- Work Commitments: Not planning appropriately for work commitments or volunteer work
- Holidays or Travel Plans: Lack of prioritization for academic expectations related to vacations or trips
- Lack of Preparation: Not completing work related to exams or assignments, misreading of schedule or tardiness
- Transportation Issues: Not planning for routine/expected traffic delays
- Non-Urgent Appointments: Routine appointments that can be scheduled at alternative times
- Minor Illnesses that do not significantly impact academic performance

Extenuating Circumstances Review Request Procedure

Students who experience extenuating circumstances as outlined above may submit a review request for consideration when those circumstances have prevented compliance with academic unit policies. Review requests must be based on documented circumstances beyond the student’s control and submitted within the timelines described below. All personal and sensitive information submitted as part of this process will be handled in accordance with applicable privacy laws and academic unit policies. Data will be securely stored and accessible to those with legitimate educational interest.

No retaliatory action may be made by the academic unit or any of its representatives against those who file a review request/appeal, participate in the resolution process, or are the subject of the matter. The academic unit will investigate and attempt to resolve each review request/appeal made under this policy, and associated allegations of retaliation.

Note: Review requests related to Final Grades, Academic Integrity, Satisfactory Academic Progress (SAP), Transfer Credit, Program Change, or any other policy which has a defined appeal procedure must follow their respective appeal procedures and will not be reviewed under this process.

1. Submission of an Extenuating Circumstances Review Request
    - Students must initiate the review request through their Academic Advisor. A completed Extenuating Circumstances Review Request Form and supporting documentation should be submitted immediately following the occurrence necessitating an exception due to an

extenuating circumstance, but no later than 11:59 p.m. CT on the Thursday prior to the start of the subsequent term or quarter.

- The review request and supporting documentation will be reviewed by the Academic Leader, who will render a decision.
- A written decision will be communicated to the student via email within five (5) business days, but no later than the end of day Friday of Week 1 of the following term or quarter.
- Approved review requests are valid for the next immediate quarter or the next term in which the course is offered, whichever occurs first, unless stated otherwise in an approval.
- **Non-Active Status:** Students seeking re-enrollment who require an approved review request (excluding clinical courses) must submit their materials no later than five (5) business days prior to the start of the term in which they intend to return. Students re-enrolling in a clinical course must submit their materials no later than fifteen (15) business days prior to the start of the quarter or term in which they intend to return.

2. Submission of a Committee-Level Procedural Appeal

If an Extenuating Circumstances Review Request is denied, a student may request a Committee-Level Procedural Appeal only on one or more of the following grounds:

- Extenuating Circumstances Review Request process or procedural error that affected the outcome of the appeal
- New evidence that was not reasonably available at the time of the decision
- Evidence that the Academic Leader had a conflict of interest, bias, or retaliatory behavior that affected the outcome

Students must submit the Committee-Level Procedural Appeal Form within ten (10) business days of receiving the decision from the Academic Leader. This appeal is not a re-evaluation of the initial review request but a review of whether the process was conducted fairly and appropriately. The Academic Appeals Committee will have fifteen (15) business days from receipt of the appeal to either grant or deny the appeal. The decision of the Academic Appeals Committee is final.

Final Grade Appeal Policy

Academic appeals are for final grades in a course. Students may appeal a final grade for only two reasons: (1) the final grade reflects a computational or clerical error and/or (2) the final grade does not align with the expectations of the course syllabus. Final Grade Appeals must be submitted using the official Final Grade Appeal form and include supporting documentation relevant to the appeal.

Final Grade Appeals will not be considered for the following circumstances:

- Individual assignments;
- Final grades posted more than 90 days ago;
- Appeals not submitted using the official Final Grade Appeal form;
- Students whose degrees have been conferred.

Requests to re-take exam(s) or re-submit assignment(s) are not considered part of the Final Grade Appeal and must be addressed between the student and the faculty member before the end of the term/quarter.

- Since the grading process involves the instructor’s assessment of the student’s academic performance, the only issue under consideration for final grade appeal is whether the student can provide clear evidence that the assignment of the grade was a result of a calculation/clerical error or does not align with the expectations of the course syllabus.
- Grades submitted by faculty at the end of each quarter are not subject to revision on the basis of additional work or a new examination. Grade disputes may not be filed for sanctions imposed under the Academic Integrity Policy or other conduct policies.
- Decisions made by the Academic Leader are final.

Final Grade Appeal Process:

1. Students must begin the Final Grade Appeal process through their Academic Advisor.
2. Completed Final Grade Appeal forms and supporting documentation must be submitted no later than 11:59pm CT on the Thursday prior to the start of the subsequent quarter to receive a resolution by the end of the first week of the quarter. After 90 days, all grades are

considered final.

3. The Final Grade Appeal form and supporting documentation will be routed to the Academic Leader, who will review and render a decision. The decision of the Academic Leader is final.
4. A decision will be communicated to the student via email within five (5) business days.

Generative Artificial Intelligence (AI) Learning, Assessment, and Research Policy

Rasmussen University supports students' ethical and transparent use of generative artificial intelligence (AI). Generative AI refers to technologies that can create content autonomously, such as text, images, or multimedia. Ethical use of generative AI includes implementation of such tools in the processes of brainstorming and editing. All use of the generative AI by students must comply with Rasmussen University's Academic Integrity Policy. Any use of generative AI to supplement student submissions of course assignments and deliverables - written, visual, or otherwise - must be cited appropriately with the A.I. tool employed, e.g., (OpenAI, 2025). Generative AI should not be used by students to complete assignments or deliverables in total. Rasmussen University students are responsible for the quality of ideas as well as the accuracy of information and sources within all their submitted assignments.

Grading Scales

- Common Grading Scale
- Point Scale Alphabetical Grading System
- Health Sciences Programs Grade Scale
- Nursing Programs Grade Scale
- Competency-Based Education (CBE) Course Grade Conversion Scale for Undergraduate Programs
- Master's Programs Grade Scale
- Doctoral Programs Grade Scale
- Doctoral Pass/Fail

Grade Information

All grades and credits earned and attempted remain on the student's transcript. This includes incomplete, withdrawn, repeated, failed, pass/fail, transferred, and developmental education course grades. It also includes credits taken while attending Rasmussen part-time and credits for which a student did not receive financial aid. All attempted course credits and grades that apply to a student's program are considered when calculating Cumulative Grade Point Average. In instances where course expiration policies apply, the credits are no longer applicable to that program and do not impact the calculated GPA; however, the grades will remain on the student's transcript. See Course Expiration policies for core courses in the School of Design, School of Health Sciences, School of Justice Studies, School of Nursing, and School of Technology. See the Standards of Satisfactory Academic Progress Policy to understand the impact of grades in the calculation of Cumulative Grade Point Average.

Developmental Education Course Grade Scale

All Developmental Education courses are satisfactory/unsatisfactory (SX/UX) courses. The following grading scale is then used to determine if students have passed the courses:

Grade	Threshold
SX	73% or higher

UX	Below 73%

Undergraduate Programs Common Grade Scale

This applies to all courses numbered 100 through 4999.

Letter Grade	Percentage Range
A	100 to 93%
A-	92 to 90%
B+	89 to 87%
B	86 to 83%
B-	82 to 80%
C+	79 to 77%
C	76 to 73%
C-	72 to 70%
D+	69 to 67%
D	66 to 63%
D-	62 to 60%
F	Below 60%

Common Grading Scale

Some General Education courses may contain a lecture component with a corequisite lab component. If a grade is achieved at or above the threshold of 60% in both components of a course which consists of lecture and lab components, each component will receive the grade earned independently. Failure to earn a grade at or above the threshold of 60% in either the lecture or lab component will result in failure of both components of the course.

Point Scale Alphabetical Grading System

Letter Grade	Grade Points	Description
A	4.00	Excellent
A-	3.75	
B+	3.50	
B	3.00	Very Good
B-	2.75	
C+	2.50	
C	2.00	Average
C-	1.75	
D+	1.50	
D	1.00	Below Average
D-	0.75	
F	0.00	Failure
AUDIT	NA	Audit

CL	NA	Non-transcripted Grade
CW	NA	Course Waiver
FD	NA	Failure Dropped
I	NA	Incomplete
PD	NA	Pandemic Withdrawal
PT	NA	Pending Transfer Credit
S/SX	NA	Satisfactory
TO	NA	Test-Out
TR	NA	Official Transfer Credit
U/UX	NA	Unsatisfactory
UXD	NA	Unsatisfactory Drop
W/WX/WL	NA	Withdrawal

See the Standards of Satisfactory Academic Progress for more information on how grades are used in determining how each of the standards are met for Satisfactory Academic Progress.

Health Sciences Programs Grade Scale

The following grade scale applies to all upper- and lower-level courses with prefixes of BSC, HIM, HSC, MEA, MLT, MTS, PHT, PTN, RTE, and STS.

Letter Grade	Percentage Range
A	100 to 93%
A-	92 to 90%
B+	89 to 87%
B	86 to 83%
B-	82 to 80%
C+	79 to 77%
C	76 to 73%
F	Below 73%

In addition to the lecture component, a School of Health Sciences course may contain a corequisite lab component, a corequisite clinical/externship/practicum learning component, or both. Satisfactory performance (score of 73% or higher) in each of the learning components of the course is required to earn a passing grade in the course. If a satisfactory grade is achieved in all learning components of a course, each learning component will receive an independent grade. Failure to earn a satisfactory grade in all learning components of the course will result in failure of all components of the course. All learning component grades will appear on the student's transcript.

School of Nursing Programs Grade Scale

Students are required to earn at least a "C" in their undergraduate School of Nursing courses at Rasmussen University part of American Public University System ("Rasmussen"). This applies to all NU, NUR, PN, and PRN coursework courses level-numbered 1000 through 4999. The grading scale for these courses is as follows:

Letter Grade	Percentage Range
A	100 to 94%

B	93 to 85%
C	84 to 78%
F	Below 78%

Core courses in undergraduate, pre-licensure School of Nursing programs at Rasmussen (defined as the Practical Nursing Diploma program, Professional Nursing Associate's degree program, and the Bachelor of Science in Nursing degree program through the Standard Entrance Accelerated BSN Entrance Option and the Second Degree Accelerated BSN Entrance Option) may contain a co-requisite lab component, co-requisite clinical learning component, or both in addition to the lecture component of a course. Satisfactory performance in the lecture component (score of 78% or higher) and a satisfactory assessment in the laboratory and/or clinical experience are required to earn a passing grade in the course. The individual exam percentages, total exam score average, and total course grade will not be rounded up. For example, 77.9% will not be rounded up to 78%. Failure to earn a satisfactory assessment in any one component will result in failure in all components of the course. If a satisfactory assessment is achieved in the lab and/or clinical learning experience, courses with multiple components will receive a coordinated grade for each component equivalent to the earned grade in the lecture component.

Competency-Based Education (CBE) Course Grade Conversion Scale for Undergraduate Programs

The following course grade conversion scale can be used to convert competency-based education course scores to letter grades. This applies to all courses numbered through 4999.

Competency Report Scale	Percentage Range	Letter Grade
4	100 to 94%	A
3	93 to 85%	B
2	84 to 78%	C
1	Below 78%	F

Master's Programs Grade Scale

Students are required to earn at least a "C" in their master's-level courses. This applies to all courses numbered 5000 through 6999.

Letter Grade	Percentage Range
A	100 to 94%
B	93 to 85%
C	84 to 78%
F	Below 78%

Doctoral Programs Grade Scale

Students are required to earn at least a "B" in their doctoral level courses. This applies to all courses numbered 7000 through 8999.

Letter Grade	Percentage Range
A	100 to 94%
B	93 to 85%
F	Below 85%

Doctoral Programs Pass/Fail Grade Scale

Pass/Fail	Percentage Range

P	100 to 85%
F	Below 85%

Health Sciences Clinicals, Externships, Practicums, and Professional Practice Experiences

Clinicals, externships, practicums or professional practice experiences for Health Sciences programs are to be conducted in University-approved locations. Each site will be established utilizing an agreement to determine the responsibilities of the external partner, Rasmussen University, and the participating student. Students may need to travel out of the immediate area to complete clinical, externship, practicum or professional practice experience activities. The cost of any such travel is the responsibility of the student. Clinicals, externships, practicums or professional practice experiences in Health Sciences programs have attendance expectations that differ from the general Rasmussen University Attendance Policy. These attendance policies can be found in the program-specific manuals/handbooks.

In order to pass a clinical, externship, practicum or professional practice experience course, students must complete the required number of clinical, externship, practicum or professional practice experience hours for the course. Students who do not complete all required practicum hours during the quarter or term in which the course is scheduled will fail the course.

All student activities associated with the curriculum, especially while the student is completing their clinical, externship, practicum or professional practice experience, will be educational in nature. The student will not receive any monetary remuneration during this educational experience, nor will they be substituted for hired staff personnel within the clinical institution.

Often, students will be offered a position toward the end of their clinical, externship, practicum or professional practice experience. It must be understood by both parties that should compensation occur for time associated with the clinical, externship, practicum or professional practice experience requirement, the student may be administratively withdrawn from the program and forfeit any accumulated hours.

Incomplete Grade Policy

Incomplete Grade Policy

An "I" indicates an incomplete grade and is a temporary grade for a course which a student is unable to complete due to extenuating circumstances during the Term/Quarter. Allowing the student extra time compensates for events or conditions not within the student's control (e.g., illness, emergencies, etc.) See the Extenuating Circumstances Policy for details.

The student must request an incomplete from the instructor or the incomplete grade can be granted at the discretion of the instructor prior to the last day of the Term/Quarter. If the incomplete is granted by the instructor, the student will have seven calendar days from the last day of the student's Term/Quarter to complete and submit their outstanding coursework. The instructor will then have seven calendar days to grade and submit the student's final grade for the Term/Quarter.

Incomplete grades will not be granted exclusively for the sake of improved cumulative grade point average, nor will they be granted to allow students to make up "extra credit" work. The instructor will take the following into consideration when granting an incomplete grade:

a. The work to be completed must have been regularly assigned work, identified in the course syllabus.
b. The student can reasonably be expected to complete the work by the deadline.
c. The student's grade will be substantially improved.
d. The student has demonstrated a commitment to completing work in a timely fashion throughout the Term/Quarter.
e. Granting the incomplete is truly in the best interest of the student.
f. By completing the work, the student is able to demonstrate their ability to meet the course objectives.

An Incomplete (I) grade may adversely impact Satisfactory Academic Progress until it is resolved with a final grade. See the Credits and Grades section of the Satisfactory Academic Progress Policy to understand the impact.

An incomplete grade not completed by the deadline will be changed to the calculated alternate grade designated by the instructor on the Incomplete Form and will be included in the cumulative grade point average. The final grade awarded for the course is included in the calculation of the cumulative grade point average. See Satisfactory Academic Progress Policy.

Select programs may offer an extended incomplete for a student's final quarter of enrollment. Students should refer to the applicable program handbook for details. An approved extended incomplete will result in a change of status from Active to Short Term Leave. See the Short Term Leave Policy for details.

Physical Therapist Assistant Incomplete Grade and Short Term Leave Policy

The Incomplete Grade Policy and Policy for Change of Grade noted in the Course Catalog apply to students in the Physical Therapist Assistant Program with the following exception:

To complete the final quarter of the Physical Therapist Assistant Program and graduate, students must pass **PHT2700** PTA Clinical II and **PHT2800** PTA Capstone.

For PHT2700 PTA Clinical II:

- To achieve a passing grade in **PHT2700** PTA Clinical II, the student must complete ALL of the following: a minimum of 360 hours of clinical experience evidenced by submission of a minimum of 10 weekly Clinical Trackers; rating of "entry level" on all (14) components of the Clinical Performance Instrument (CPI) or current clinical internship assessment tool; completion of all assignments with a 73% or higher on each assignment in the online (1 credit) component.
- If the student is not successful in achieving "entry level" in all (14) components of the CPI or current clinical internship assessment tool by the end of their final quarter, the student may be granted an extended incomplete for **PHT2700**, provided they have completed all assignments in the online component with a 73% or higher.

For PHT2800 PTA Capstone:

- To achieve a passing grade in **PHT2800**, a student must achieve 73% or higher on a proctored, on-campus NPTE practice exam AND pass the course with 73% or higher.
- If the student is not successful in achieving a 73% or higher on a proctored, on-campus NPTE practice exam by the end of the final quarter, they may be granted an extended incomplete.
    - During the extended incomplete period, students will have a maximum of two proctored, on-campus NPTE practice attempt(s) to achieve a score of 73% of higher.
    - Exam attempt(s) will occur at the location and time designated by the Program Director.

The Program Director, in coordination with the Clinical Education Coordinator, when necessary, will consider granting an extended incomplete on an individual basis. Students must communicate their request for an extended incomplete to the Clinical Education Coordinator and Program Director PRIOR to submission of final grades for the quarter. If an extended incomplete is granted, the student will work with the Clinical Education Coordinator and/or Program Director in creating a remediation plan that will satisfy course requirements. The extended incomplete will not extend beyond the end of the following quarter. During the quarter of extended incomplete, the student will be placed in a Short Term Leave status and the provisions of the Short Term Leave Policy will apply. If the student is not successful in meeting the requirements of this remediation plan during the one quarter of extended incomplete status, the student's incomplete grade status will be changed to a failure of the course and will be scheduled to repeat the failed course in the next quarter it is available. Students are allowed only one extended incomplete opportunity.

Independent Study Policy

Independent study applies when a student contracts to meet regularly with a qualified instructor to fulfill the assignments, tests, projects, and other tasks necessary to achieve the performance objectives of a given course. Independent study requires a student to be motivated and organized. Because an independent study does not provide the student with the classroom interaction normally expected in higher education, it is to be offered only when there is no alternative and as infrequently as possible.

Students may take, and the University may offer, a course through independent study when all of the following conditions are met:

1. The course is not currently offered on-site or online.
2. Completion of the course is necessary for on-time graduation.
3. The need for the course in the quarter/term in question does not arise from the student's decision to withdraw from the course in an earlier quarter/term, the student's failure to satisfactorily complete the course in an earlier quarter, the student's decision to change programs, or the student's decision to accelerate graduation near the end of their program.
4. The student will complete work of a similar quantity and quality as required in a regularly scheduled course and will meet the standard performance objectives for the course. If the method for meeting and assessing the performance objectives differs from the standard course syllabus, the changes will be noted within the course section.
5. Within the first week of the independent study, the student and instructor must meet to review the course schedule and determine how the course and weekly objectives will be met and assessed.
6. If the independent study is held residentially, the instructor and student(s) will meet an equivalent of at least 11 hours which are distributed evenly across the weeks of the quarter/term.

Late Assignment Policy

The Academic Unit is committed to ensuring students can succeed in their academic courses and programs, and students should adhere to the expected due dates listed in their classes. If academic activities are submitted late, they will be subject to some deductions in points; these situations are described below.

All Course Delivery Modalities (except CBE)

- All assignments are expected to be completed by the stated due date unless extenuating circumstances exist and the student has communicated with their instructor. See the Extenuating Circumstances Policy for details.
- The following assignment types will not be accepted for a grade after the final stated due date (note that not all types of assignments will be present in all courses):
  - Pre-Class assignments
  - Discussion posts and replies
  - Quizzes and exams
  - Live lecture responses
  - In-Class assignments, such as laboratories, simulations, in-class demonstrations, presentations, clinical activities, etc.
  - Any other assignments specifically stated in the syllabus
- For assignments turned in after the due date, a 5% late deduction is applied each calendar day for up to seven days. Assignments submitted more than seven days after the due date will not be graded and will receive a zero in the grade book.
  - No daily late penalties are applied to these assignments for the first module in any fully online course and within the first week of all other courses of the academic term or quarter. Assignments submitted more than seven days after the due date will not be graded and will receive a zero in the grade book.

Competency-Based Education (CBE) Modality

- CBE courses are exempt from the late policy during the academic quarter because of the flexibility of the CBE assignment due dates for submissions.

End of Course (All Modalities)

- At the end of the term or quarter, students may not submit work after the final submission due date in any course, regardless of format.
- If extenuating circumstances impact the ability to meet deadlines at the end of the term or quarter, students should contact faculty to discuss an Incomplete Grade. See the Incomplete Grade Policy and Extenuating Circumstances Policy for details.

Eligibility to Substitute Master’s-Level Course While Enrolled in a Non-Nursing Bachelor’s Degree Program Policy

Rasmussen University allows eligible students enrolled in specified programs an opportunity to substitute specific master’s-level (5000-6000 level) courses for certain bachelor’s-level (3000-4000 level) courses. Eligibility to register for 5000-6000 level courses is determined by meeting the following criteria:

- The student must be enrolled in a bachelor’s degree program that offers master’s level course substitutions for bachelor’s-level courses.
- To qualify and maintain eligibility for taking master’s-level courses while enrolled in the bachelor’s program student must have a cumulative GPA of 3.0 or higher in the bachelor’s degree.
- The student must have completed at Rasmussen University, with a final grade of B or higher in each course, at least 20 credits of bachelor’s-level (3000-4000 level) faculty-led courses within the enrolled bachelor’s program.
- Student must be meeting all SAP standards.
- Each eligible bachelor’s-level course has only one direct master’s-level substitution. The courses are a one-for-one exchange, not a pool.
- Once student is enrolled in their first master’s-level course, their schedule will be updated to include all other master’s-level course substitutions, as appropriate, for future quarters. Students must contact their Advisor to opt back into bachelor’s level courses within the terms of the Course Add Policy.
- If student does not meet cumulative GPA requirements as of the quarter prior to being scheduled to take the master’s-level course, student will be rescheduled into the appropriate bachelor’s-level course.
- Master’s-level courses attempted while enrolled in a bachelor’s program remain on the student’s transcript and are included in the calculation of all three standards of Satisfactory Academic Progress (SAP) in both their bachelor’s and the master’s programs, as applicable.
- If a student fails a course and chooses the alternate master’s- or bachelor’s-level course substitute, the failed grade remains on the transcript and in the cumulative GPA of the student. In order to replace the failed grade, student must retake the failed course at the same level. See the Satisfactory Academic Progress (SAP) policy for additional information.
- When all program requirements have been met, student will graduate with a bachelor’s degree. All unexpired graduate-level credits attempted at the bachelor’s level will be applied to the Rasmussen’s master’s degree program if the course is a required course in the program.

Eligibility to Substitute Master's-Level Course While Enrolled in a Nursing Bachelor's Degree Program

Rasmussen University allows eligible students enrolled in specified programs an opportunity to substitute specific master’s-level (5000-6000 level) courses for certain bachelor’s-level (3000-4000 level) courses. Eligibility to register for 5000-6000 level courses is determined by meeting the following criteria:

- The student must be enrolled in a bachelor’s degree program that offers master’s level course substitutions for bachelor’s-level courses.
- To qualify and maintain eligibility for taking master’s-level courses while enrolled in the Nursing Bachelor’s program, a student must have a cumulative GPA of 3.0 or higher in the enrolled bachelor’s degree.
- The student must have completed at Rasmussen University, with a final grade of B or higher in each course, at least 16 credits of bachelor’s-level (3000-4000 level) faculty-led Nursing courses within the enrolled bachelor’s program.
- Student must be meeting all Satisfactory Academic Progress (SAP) standards.
- Each eligible bachelor’s-level course has only one direct master’s-level substitution. The courses are a one-for-one exchange, not a pool, unless identified on the substitution table as a choice.

- Once student is enrolled in their first master's-level course, their schedule will be updated to include all other master's-level course substitutions, as appropriate, for future quarters. Students must contact their Academic Advisor to opt back into bachelor's-level courses within the terms of the Course Add Policy.
- If student does not meet cumulative GPA requirements as of the quarter prior to being scheduled to take the master's-level course, student will be rescheduled into the appropriate bachelor's-level course.
- Master's-level courses attempted while enrolled in a bachelor's program remain on the student's transcript and are included in the calculation of all three standards of Satisfactory Academic Progress (SAP) in both their bachelor's and master's programs, as applicable.
- If student fails a course and chooses the alternate master's- or bachelor's-level course substitute, the failed grade remains on the transcript and in the cumulative GPA of the student. In order to replace the failed grade, student must retake the failed course at the same level. See the Satisfactory Academic Progress (SAP) policy for additional information.
- When all program requirements have been met, student will graduate with a bachelor's degree. All unexpired graduate-level credits attempted at the bachelor's level will be applied to the Rasmussen's master's degree program if the course is a required course in the program.

School of Nursing Course Expiration Policy for Undergraduate Programs

Students who qualify for reentry into an undergraduate School of Nursing program at Rasmussen University part of American Public University System ("Rasmussen") may receive credit for previously completed core courses as designated by course prefix NUR or PRN. Application of credit in core courses will be available based upon the following course expiration periods and restrictions:

- Previously attempted core courses of pre-licensure School of Nursing programs at Rasmussen (defined as the Practical Nursing Diploma program, Professional Nursing Associate's degree program, and the Bachelor of Science in Nursing degree program through the Standard Entrance Accelerated BSN Entrance Option and the Second Degree Accelerated BSN Entrance Option) coursework with an NUR or PRN prefix have a four-quarter expiration from the last quarter in which attendance and grades were posted. Previously attempted core courses from a prior enrollment applies to the program of reentry if reentry is within four academic quarters following the most recent quarter of nursing program attendance.
- Previously attempted core coursework of the Bachelor of Science in Nursing degree program through the RN to BSN Entrance Option at Rasmussen has a twelve-quarter expiration from the last quarter in which attendance and grades were posted. Previously attempted core coursework from a prior enrollment applies to the program of reentry if reentry is within twelve academic quarters following the most recent quarter of nursing program attendance.
- If the program of reentry does not require a previously completed course, no credit will be awarded.

Online Courses

Students may be required to take online courses in order to complete a degree. All new students will complete an orientation program prior to beginning classes. Online course activities and assignments at Rasmussen University are conducted via chat, email, message boards, and interactive websites. Tuition and fees for online courses are assessed at the same rate as for residential courses unless otherwise indicated. Online instructors receive training and support while operating in the online environment. A list of computer hardware and software requirements for online courses is provided to students upon enrollment. Course technology and resources, including e-books and other resources required for online courses, are generally available within the online course. Additional resources required will be shipped directly to the student.

Repeating Courses Policy

Students who are meeting Satisfactory Academic Progress may take a required course up to three times, but only at regular tuition rates. An expired course does not count as an attempted course for the purpose of this policy. In order to progress in their program, a student

must repeat any courses they failed or withdrew from the next time the course is offered. No course can be repeated within the same quarter/term in which it was most recently attempted. Students who are not meeting Satisfactory Academic Progress may take a required course a maximum of two times, but only at regular tuition rates.

Repeated course credits may be included in financial aid award calculations when:

- The student is taking a course for a second or third time, and only failing or withdrawn grades have been earned in any previous attempts of that course. Leave of Absence grades (WX for Medical Leave and WL for Military Leave) are excluded from this requirement, OR
- The student is repeating a previously passed course (this is applicable one time only per previously passed course) for a higher grade. In this case, if the student fails or withdraws from the previously passed course or earns a lower passing grade than what was earned on the first attempt, the highest passing grade will apply, and the student loses all future financial aid eligibility for that course.

Students who are meeting Satisfactory Academic Progress and fail or withdraw from a required course a total of three times may be able to switch to another program that does not include the course as a required part of the program curriculum without going through the program transfer appeal process. Students who fail or withdraw from a course a total of three times, and who cannot switch to another program as determined by the program transfer appeal process, will be withdrawn from the University. The student cannot return to the University and enroll in a program that requires the unsuccessfully attempted course until an equivalent course is completed elsewhere by earning a grade of C- or higher or equivalent, and transfers it back into Rasmussen University as official transfer credit, in accordance with the transfer of credit requirements.

Developmental Education courses may only be repeated once. Students who fail or withdraw from a Developmental Education course a second time (UX or WX grades) will be withdrawn from the University. Refer to the Developmental Education Courses policy regarding scheduling requirements.

All attempts of repeated courses remain on academic records and transcripts, regardless of the earned grade, even though the grade may not be included in the GPA calculation. Students should be aware that graduate schools and other institutions to which they might wish to transfer may not accept repeats and may include all grades in calculating GPA for admission. The academic record for a student in Graduate or Withdrawn status is complete and final. No changes will be made unless there is a documented clerical error, and previously passed course(s) cannot be retaken to improve cumulative Graduate GPA.

Refer to the Satisfactory Academic Progress Policy for details on how repeated and transferred courses will impact a student's academic and financial status.

School of Health Sciences Repeating Courses Policy

Students are required to attend the Clinical, Externship, Practicum or Professional Practice Experience Orientation prior to their first clinical, externship, practicum or professional practice experience. They receive a clinical, externship, practicum or professional practice experience manual that discusses the expectations, and students are required to sign an acknowledgement form that is submitted and included in their programmatic file. The clinical, externship, practicum or professional practice experience manual discloses that students have two attempts, regardless of grade awarded, to complete their clinical, externship, practicum or professional practice experience successfully, or they will be administratively withdrawn from the program. An approved medical (WX grade) or military leave (WL grade) will not be counted toward the count of attempts. If a student is administratively withdrawn from a clinical, externship, practicum or professional practice experience site due to circumstances out of their control, attempts will be made to secure an additional site within the same quarter for the student to complete their clinical, externship, practicum or professional practice experience.

Students enrolled in the Pathway to Patient Care Seminar course will have one opportunity to attempt the course regardless of grade (SX/UX/WX) earned.

School of Nursing Repeating Courses & Course Withdrawal Policy for Pre-Licensure Programs

Students must repeat and pass any courses in which they receive a failing grade or from which they have withdrawn or dropped in order to progress in their program. If the student is eligible to repeat the course, the failed, withdrawn or dropped course must be repeated the next time the course is offered. All attempts at courses, whether passed, failed, or withdrawn, remain on the student's transcript. See the Satisfactory Academic Progress Policy for American Public University System (the "System") in the System Catalog and see the Standards of Satisfactory Academic Progress (SAP) Policy for Rasmussen University part of American Public University System ("Rasmussen") in the Rasmussen academic unit section of the System Catalog for information on how repeating courses impacts a student's GPA and SAP status.

Repeating Failed Courses Policy:

Students enrolled in undergraduate, pre-licensure School of Nursing programs at Rasmussen (defined as the Practical Nursing Diploma program, Professional Nursing Associate's degree program, and the Bachelor of Science in Nursing degree program through the Standard Entrance Accelerated BSN Entrance Option and the Second Degree Accelerated BSN Entrance Option) are permitted to fail one nursing core course as designated by course prefix (NUR or PRN). However, a second failure, whether it be the same core course or any other nursing-core course, will result in an administrative withdrawal from the nursing program. Core nursing courses may need to be repeated in a program of reentry based upon course expiration periods as defined in the School of Nursing Reenter Policy for Pre-Licensure Programs and as allowed by the School of Nursing Course Expiration Policy for Undergraduate Programs.

Nursing students will have their previously completed core courses (as designated by course prefix NUR and PRN) assessed against the current program to determine which course(s) will be applied to the program into which they are enrolling. All previously completed general education courses will be applied as required in the program. The student will be allowed to re-enter at the appropriate level in a current program if a space in the program is available and all other re-entry requirements are met.

All core courses, whether passed or failed, from any prior enrollment will remain on the student's academic record. When a student re-enters an undergraduate, pre-licensure School of Nursing program at Rasmussen after the course expiration period as defined in the School of Nursing Course Expiration Policy for Undergraduate Programs , no previously failed core courses will apply for the purpose of determining the number of failed core courses or apply for the purpose of determining Satisfactory Academic Progress ("SAP").

For graduates of an undergraduate, pre-licensure School of Nursing program at Rasmussen who are returning forin School of Nursing pre-licensure, undergraduate School of Nursing programs at Rasmussen (defined as the Practical Nursing Diploma program, Professional Nursing Associate's degree program, and the Bachelor of Science in Nursing degree program through the Standard Entrance Accelerated BSN Entrance Option and the Second Degree Accelerated BSN Entrance Option) are permitted to withdraw/drop only once from the same core course as designated by course prefix (NUR or PRN). Students must successfully repeat any withdrawn/dropped course in the next quarter, prior to progressing in the program. A second withdrawal, from the same core course or its equivalent, will result in an administrative withdrawal from School of Nursing programs at Rasmussen at the end of the quarter. Documented and approved Medical and Military Leaves are not used in the calculation and application of the School of Nursing Repeating Withdrawn Courses Policy.

Doctor of Nursing Practice Program Progression Requirements

Students enrolled in this program are scheduled as a cohort and have a required course sequence and credit load that must be followed. The cohort progresses sequentially for seven quarters (full-time) or up to 14 quarters (part-time) and graduates after successful completion of all credit hours.

1. Didactic (non-practicum courses) must be taken prior to beginning practicum courses for part-time students. For full-time students, four didactic (non-practicum courses) must be completed prior to beginning practicum experiences. The fifth non-practicum course can be taken as a corequisite course with the practicum course.
2. The Practicum Clinical Courses (Healthcare Information and Systems Technology; Leadership; or Population and Global Health) must be taken any quarter prior to beginning the DNP Project course sequence.

3. Effective with Spring quarter 2024, a student will be permitted to fail or withdraw from ONE course a maximum of ONE time. ALL remaining courses must be passed on the first attempt. An approved medical or military leave will not be considered when applying these policy requirements.
4. Each didactic course in this program is offered only once each calendar year. A student will not be eligible to participate in a practicum course when the prerequisite didactic course is not passed.
5. A student must complete this program within a four calendar-year period from the point in time of starting the program, or risk being administratively withdrawn from the program.
6. If a student fails or withdraws from a course in the program, they will either be placed on a short term leave or be administratively withdrawn from the program at the end of the quarter.
7. Reentry is limited to one time for students withdrawn from the program for any reason. However, students who have been administratively withdrawn/dismissed from the program for disciplinary or conduct reasons may not be eligible for reentry into the program and may not be eligible for reentry to Rasmussen University.

Student Testing Policy

Assessment is defined as: Evaluations or measurements used to document students' academic readiness, learning progress, skill acquisition, or educational needs.

Assessment takers are expected to comply with the Student Testing Policy when taking any assessment, as defined in this policy. Failure to adhere to the policy may result in an Academic Integrity Policy violation inquiry.

- Assessment takers are not permitted to take an assessment for any other student.
- Assessment takers are not permitted to have another person take an assessment on their behalf.
- During testing, assessment takers may not use the computer for any function other than completing the proctored assessment.
- Assessment takers are not permitted to copy, reproduce, record, distribute, or disclose the assessment questions by any means or allow another individual to do so.
- Assessment takers with an approved accommodation are expected to notify their faculty of the specific assessment-related accommodations they need at least 24 hours in advance of the exam or end of day Thursday for a weekend assessment by presenting their Residential Accommodations Verification Document. This will help ensure that the accommodations are provided on time.
- Assessment takers must immediately notify the proctor if they experience technical difficulties during an assessment.
- To access the assessment, assessment takers must show their photo identification. Photo identifications must be an original, current (valid) ID issued by a city/state/ federal government agency.
  - You must use the name on your ID to register to test, and the photo ID must be clearly recognizable as you.
  - Students who are in the process of changing their name must provide supporting evidence of the name change, such as a marriage certificate or legal name change documentation.
- For Assessments that require a webcam to ensure the best experience,
  - If a webcam is required, your face should be clearly visible.
  - Position the webcam so your face is centered in the frame the entire time you are signed in and complete your assessment.
  - Ensure all other computer applications are closed, and if required, anti-virus software is disabled before you begin your assessment.
  - Do not attempt to block the webcam's view by moving the device, blocking the webcam with a piece of paper or other objects, or sliding the cover over the lens.
  - Avoid leaving the view of the webcam, using unauthorized materials, moving in an unusual or excessive way, looking away from the screen, or speaking.
- There are two time constraints on the exam/quiz: When the exam/quiz deadline passes (that is, the date and time at which students will no longer be able to access the exam or quiz), and when the time limit on the exam/quiz has ended (that is, when the amount of time allotted for students to take the exam/quiz is completed). Students must be careful to leave themselves enough time to complete the exam/quiz before the deadline passes and must be cognizant of the time limitations of the exam/quiz, as well.
- **Cheating hurts everyone.** If you see it, report it. If you suspect another tester is attempting to create an unfair advantage or encounter any other attempt to violate the Academic Integrity Policy, you are encouraged to report the activity to Rasmussen University Officials.

You can make an anonymous report about assessment security concerns by using the Online Reporting System https://www.rasmussen.edu/student-experience/academic-integrity/.

In-Person Assessment Requirements:

- Assessment takers are expected to be on campus, in the designated testing area, and ready for the assessment at or prior to the scheduled start time of the assessment. The campus will use a process to determine on-time arrival. Assessment takers should expect the doors to the assessment environment to be closed at the scheduled start time of the exam. Students arriving after the doors are closed, regardless of check-in status, will be considered late and will not be permitted to enter the assessment environment, forfeiting their opportunity to take the exam.
- Assessment takers may be required to wait in a designated waiting area outside of the testing environment prior to the testing time.
- Assessment takers must take care of any personal needs (i.e., restroom) before receiving their ticket to enter the room for the assessment.
- Assessment takers may not eat food or candy, drink, or chew gum during the assessment unless an approved accommodation requires it.
- Assessment takers are required to utilize laptops/computers approved by the school with the appropriate lockdown platforms installed. Students who do not meet this requirement will not be permitted to take the exam.
- For paper-based testing, written responses to questions must be designated clearly. Students will record their name, the date and the course name and section number on each piece of paper.
- Students must submit the exam by the conclusion of the testing period. If technical difficulty prevents a student from submitting the exam, the issue must be immediately documented by the proctor and elevated to the faculty member for next steps, which may include a resubmittal of the original exam immediately following the resolved technical issue, or a make-up exam offered if necessary.
- If an assessment taker leaves the testing environment for any reason without permission, they are not permitted to re-enter the environment during testing.
- If an assessment taker must leave for any reason during the assessment prior to completing the assessment, any personal items that were allowed to stay in the room must remain in the assessment environment until the assessment is completed by all students. The proctor has the discretion to approve a temporary exit from, and to allow the removal of any personal items from the assessment environment, and approve their return to the assessment environment.
- Makeup Exams – Makeup eligibility is determined by the following situations:
  - Arrived late or exited early due to extenuating circumstances. See the Extenuating Circumstances Policy for additional information. Depending on the type of assessment, student must work with Dean/Program Coordinator to determine if a makeup is allowed.
  - Missed assessments due to extenuating circumstances. See the Extenuating Circumstances Policy for additional information. Depending on the type of assessment, student must work with Dean/Program Coordinator to determine if a makeup is allowed.
  - Arrived late or exited early without approval – No makeup allowed.
  - Did not comply with provisions of the Student Testing Policy – No makeup allowed.
  - Entrance Exams make-up will require approval of the Campus Executive Director.
  - Early exams/quizzes will not be given prior to the originally scheduled date.
  - Unannounced or pop quizzes cannot be made up.
- Within 24 hours of the missed exam/quiz, student must contact their instructor by phone, e-mail, or in-person and provide documentation of an extenuating circumstance for faculty to determine whether an extenuating circumstance exists and whether a make-up exam/quiz will be offered. If the student knows in advance of the exam/quiz that they will not be able to take the exam/quiz as scheduled, the instructor must be notified of the anticipated absence before the original exam/quiz is given. If a make-up exam/quiz will be offered, then students are generally expected to make up the exam within two business days of their return; the make-up date and time determination will be made by the faculty/dean.
- For assessments with a scheduled break, you may eat or drink outside the assessment room during the break. Electronic devices are not to be used during scheduled breaks. Ensure that you have returned to your seat prior to the end of the break period.
- During the assessment, only authorized resources and exam materials are permitted on your desk or workspace in the testing area. Unauthorized electronic devices, including cell phones, tablets, smartwatches, calculators, cameras, smart glasses, pagers, wireless headphones, or other electronic equipment, are not allowed.
  - Calculators, if allowed, along with writing tools and scratch paper will be provided by the campus.

- If you utilize scratch paper, you must:
  - Not write on scratch paper until you have started the assessment.
  - Write your name on the piece of scratch paper distributed once the assessment begins.
  - Not copy or reconstruct assessment items during or after the assessment for any reason.
  - Return all scratch paper to the proctor at the end of the assessment.
- Personal belongings are strictly prohibited in the assessment environment.
  - This includes bags, backpacks, purses and wallets, cosmetics including lip balm, and any item that could be used to conceal your identity or an unauthorized testing aid.
  - Personal items allowed to stay in the room will be placed in a designated location, and the student must prove that all electronic devices are turned off.
  - Assessment takers should leave personal items in a locked vehicle, out of sight of passersby, or at home if they are not required for their time on campus. Rasmussen University is not liable for any loss of, damage to, and/or theft of personal property left unattended by an assessment taker anywhere on campus, in the parking lot, or in a vehicle while complying with this policy.

- Assessment takers may be asked to roll up their sleeves, empty their pockets, or remove their glasses to demonstrate that their person is free of any electronic devices or other prohibited items upon entry to the testing environment.
  - Assessment takers asked to roll up their sleeves who wear long sleeves as part of a modesty provision of a sincerely-held religious belief may request a private screening area.
- Assessment takers who refuse to comply with these expectations will be asked to exit the testing environment and will not be permitted to complete the proctored assessment.
- School of Nursing students are expected to wear their uniforms for any testing on campus, see Uniforms Policy in the School of Nursing handbook.

Exceptions to personal belongings rule:

- Personal Laptops that are approved by the institution for test-taking. When laptops/computers are provided by the institution, those must be used.
- Cultural-religious attire
  - Assessment takers may be asked to pull back their head covering and demonstrate that they do not have listening devices unrelated to a documented accommodation upon entry to the testing environment.
  - Assessment takers who refuse to comply with the head check expectations will be asked to exit the testing environment and will not be permitted to complete the proctored assessment.
  - Assessment takers asked to pull back their head covering who wear the head covering as part of a modesty provision of a sincerely-held religious belief may request a private screening area.
- Campus-provided earplugs or noise-canceling headphones

Exiting the Assessment Environment at the end of the Assessment:

- Log out of the assessment and leave the computer in place.
- Turn in your scratch paper and remove any permitted personal belongings.
- Quietly leave the testing environment as soon as you finish the assessment.
  - Students are not permitted to re-enter the environment during the assessment.

Graduation, Credentials & Honors

Complete Non-Graduate Status Policy

Students who are completing coursework in non-degree/credential-seeking opportunities will have their final status awarded as Complete Non-Graduate. Students in non-degree/credential seeking opportunities with a status of Complete Non-Graduate are not eligible for

graduate benefits. Where applicable, coursework completed in non-degree/credential seeking opportunities may have credits applied to eligible programs.

Graduation Requirements Policy

Degrees, diplomas, and certificates are awarded solely on the merit and completion of requirements listed, and not on the basis of clock hours in attendance. Students enrolled in undergraduate programs must complete 33 percent of their program requirements at Rasmussen University, and no more than 67 percent may be completed via transfer credits, course waivers, credit by examination, or other means. Exceptions to this rule exist; see Transfer Credit Policies. Clock hours listed in the synopsis of subjects are estimated hours of class work necessary to complete the subject.

Students enrolled in an undergraduate degree program, diploma, or certificate must have a cumulative grade point average of a 2.00 and above with a passing grade in each required course.

Students enrolled in a graduate degree program must have earned a cumulative grade point average of 3.00 or higher and have completed each required course with a passing grade in order to earn the degree.

The academic record for a student in Graduate status is complete and final. No changes will be made unless there is a documented clerical error, and previously passed course(s) cannot be retaken to improve cumulative Graduate GPA.

As you approach graduation, please ensure your account balance is paid in full prior to graduating, or you will not receive your diploma except when required by any applicable law.

Diplomas, at the time of issuance, reflect the date the degree/certification was awarded and bear signatures of the current Rasmussen University administration. Graduates may request a replacement diploma by calling 952-230-3092. The current fee for a replacement diploma is $23, which is collected before the diploma order is placed. Replacement Rasmussen diplomas will reflect Rasmussen University and will show the date the degree/certification was awarded and will bear the signatures of the Rasmussen University administration at the time the replacement diploma is requested.

Honors Definition

Academic Honors

Each quarter, Rasmussen University recognizes outstanding academic achievement by awarding certificates of achievement. Enrolled, degree-seeking students who earn a quarterly grade point average of 3.25 - 3.749 will receive an Honor Roll certificate. Enrolled, degree-seeking students who earn a quarterly grade point average of 3.75 - 4.00 will receive a Dean's List certificate.

Graduation Honors

Rasmussen University recognizes outstanding academic achievement by awarding honors to graduates who meet minimum qualifications. Graduation honors will be noted on the diploma and transcripts of students, and they will receive gold cords for the graduation ceremony as a symbol of this achievement.

Certificate, Diploma, and Associate's Degree Honors

Students who complete all graduation requirements and earn a cumulative grade point average of 3.50 or higher will graduate with honors.

Bachelor's Degree Honors

Students who complete all graduation requirements and earn a cumulative grade point average of 3.50 or higher will graduate with one of the following honors:

- **Cum Laude:** Bachelor's students who earn a cumulative grade point average of 3.50 - 3.669
- **Magna Cum Laude:** Bachelor's students who earn a cumulative grade point average of 3.67 - 3.749
- **Summa Cum Laude:** Bachelor's students who earn a cumulative grade point average of 3.75 - 4.00

Master's and Doctoral Degree Honors

Students who complete all graduation requirements and meet the following requirements will graduate "with Distinction":

- GPA requirement 3.85 or higher for courses completed at the graduate level (5000 and above)

Transfer Credit Policies

General Transfer Credit

- The Academic Unit reserves the right to accept or deny transfer of credit based on the guidelines below.
- Transfer credit will be awarded only after the prospective student applies for admission to the Academic Unit. If the prospective student does not start at the Academic Unit, transfer credit will be rescinded.
- Students must request their official transcripts be sent directly from the originating institution to the Academic Unit. It is the student's responsibility to ensure that all official transcripts have been received by the institution. Official transcripts can be sent electronically from the originating institution or from an approved third-party provider.

  Students may request their official transcripts be emailed directly to transcripts@rasmussen.edu or mailed directly to:

  Rasmussen University part of American Public University System
  Attn: Transcripts Department
  5555 96th Avenue North - Suite 100
  Brooklyn Park, MN 55443

  Transcripts sent to the institution by the student, rather than directly from the originating institution, will be deemed unofficial.
- As part of the acceptance process, official and unofficial transcripts will be evaluated for transfer of credit. Students will be provided with a summary of the total number of accepted and potential transfer credits and the equivalent Academic Unit courses they will fulfill.
- Students in bachelor-completer programs will be withdrawn from the University if official transcripts are not received by the Friday of the 13th week of enrollment.
- A student may send copies of unofficial transcripts during the initial admissions process for potential transfer credit assessment purposes only. Potential transfer credits are not final grades and are not posted to the student record. Any potential transfer credit assessed in fulfillment of a prerequisite or corequisite will be rescinded if an official transcript is not received by the Academic Unit at the time the required post-requisite course is scheduled due to curriculum sequence.
- College-level courses completed at an accredited institution of higher learning as recognized by the U.S. Department of Education or the Council for Higher Education Accreditation (CHEA), or recognized by the American Council on Education (ACE), or the Academic Unit's predetermined course-by-course equivalencies approved by the National College Credit Recommendation Service (NCCRS) will be considered for transfer credit.
- Students must complete 33% of their program requirements at Rasmussen University, and no more than 67% may be completed via transfer credits, course waivers, and credit by examination, or other means, except as noted below.

  1. Students in the Medical Assisting, Medical Laboratory Technician, Physical Therapist Assistant*, Radiologic Technology and Surgical Technologist programs must complete at least 50% of their program requirements at Rasmussen University, and no more than 50% may be completed via transfer credits, course waivers, credit by examination, or other means, with the exception of "completer block transfer" candidates for the Healthcare / Health Sciences Associate's Degree – Medical Assisting Specialization.

***** Physical Therapist Assistant students accepted through the METC Block Transfer Policy must complete at least 25% of their program requirements at Rasmussen University.

2. Students in the Practical Nursing Diploma program must complete all Core nursing courses (PRN, NUR course prefix) at Rasmussen University. For students who start or reenroll in the Practical Nursing Diploma program on or after January 5, 2026, the only General Education course requirement that may be fulfilled through transfer credit, credit by examination, self-directed assessment, or other means, is **ENC1101** English Composition.
3. Students in the Professional Nursing Associate's Degree program must complete all Core nursing courses (NUR course prefix) at Rasmussen University, excluding Core nursing courses that may be eligible for Course Waiver based on a current, unencumbered Practical Nursing/Vocational Nursing license. Only General Education course requirements may be fulfilled with transfer credit, credit by examination, self-directed assessment, or other means.
4. Students in the Bachelor of Science in Nursing Degree program - RN to BSN entrance option must complete at least 25% of their program requirements at Rasmussen University, and no more than 75% may be completed via transfer credits, course waivers, credit by examination, self-directed assessment, or other means.

   Students in the pre-licensure Bachelor of Science in Nursing programs must complete at least 52% of their program requirements at Rasmussen University, and no more than 48% may be completed via transfer credits, course waivers, credit by examination, self-directed assessment, or other means.
5. Students in Master of Science in Nursing programs may fulfill up to 12 Core program credits with eligible transfer credit.
6. Students in the Nursing Post-Graduate Certificate (non-Nurse Practitioner) programs must complete 100% of their program requirements at Rasmussen University.
7. Students in the Nursing Post-Graduate Certificate-Nurse Practitioner programs may fulfill up to 12 Core credits with eligible transfer credit.
8. Students in Doctor of Nursing Practice programs may fulfill up to 12 Core credits as transfer credit based on eligible previously completed coursework plus up to 15 Practicum credits (up to 450 hours) as Course Waiver transfer credit based on eligible previously completed transfer credit. A maximum of 27 credits may be fulfilled with transfer credit.
9. Students in the Law Enforcement Associate's degree program with a conferred Associate's or Bachelor's degree in an approved program from a certified Minnesota Peace Officer Standards and Training (MN POST) Board institution must complete at least 25% of their program requirements with Rasmussen University, and no more than 75% may be completed via transfer credits, course waivers, credit by examination, self-directed assessment, or other means.

- The Academic Unit awards quarter credits in whole numbers. One semester credit is equivalent to 1.5 quarter credits. The calculated number is rounded down to the nearest whole number. Transfer credits based on a different unit of credit than quarters will be subject to conversion prior to being transferred.
- International transcripts must be evaluated by an approved Association of International Credential Evaluators, Inc. (AICE-eval.org) or National Association of Credential Evaluation Services (NACES.org) member to determine if the student's credit transfer is equivalent to the Academic Unit's coursework. Transcripts from institutions located in U.S. Territories and Commonwealths that are accredited by an accreditor recognized by the U.S. Department of Education require an evaluation from an approved credential evaluation service provider only when the transcript is not written in the English language. The student is responsible for the cost of the evaluation.
- Transfer credit is evaluated based on the program in which the student is applying for or is currently enrolled in.
- Credits earned at the Academic Unit will be transferred directly from one academic unit campus to another. Only the courses that are applicable to the current program will be posted or calculated.
- See the Satisfactory Academic Progress Policy to understand how transferred credits from institutions other than the Academic Unit and prior learning assessments including test-outs, self-directed assessment, and course waivers impact Cumulative GPA and other Satisfactory Academic Progress standards in the student's program of enrollment and progress toward program completion.
- Courses for which a student has received official transfer credit will be listed on the student's transcript with a Transfer (TR) designation.
- Courses for which a student has received credit by examination or self-directed assessment will be listed on the student's transcript with a Test-Out (TO) designation.
- Courses for which a student has received credit through waiver will be listed on the student's transcript with a Course Waiver (CW) designation.

- Potential transfer credits that were assessed at the time of enrollment pending the receipt of an official transcript and still remain at the end of the student's program, when all other course requirements have been passed, will be rescinded, and the student will need to complete the program requirements in order to graduate. Failure to successfully complete all required coursework or submit official transcripts by the end of their program will result in the student being withdrawn.
- When courses are not accepted for transfer, a student may file an appeal through the following process:
  1. The student completes an appeal form. Supplemental information such as a syllabus, course description, or text may be required.
  2. The information will be submitted to the Transfer Credit Appeal Committee for review.
  3. The student will be notified of the decision.

Course-by-Course Transfer Credit

- Course-by-course transfer credits from an accredited institution of higher learning will be evaluated based on course content and credit hour. Courses that are comparable in content may be accepted when the Academic Unit's transfer credit requirements are met.
- Lower-level course requirements may be fulfilled with either lower-level or upper level external transfer courses. Upper-level course requirements may be fulfilled only with upper-level external transfer courses. Lower-level courses are typically numbered 100-299 or 1000-2999. Upper-level courses are typically numbered 300 499 or 3000-4999.
- An external course must have the minimum number of credits to that of the Academic Unit course to be accepted as transfer credit.
- Undergraduate programs require a grade of C- or higher for external courses to be eligible for transfer credit, unless superseded by a course-specific transfer policy. A grade of Pass (in a Pass/Fail grading system) or Satisfactory (in a Satisfactory/Unsatisfactory grading system) that can be verified as equivalent to a grade of C- or higher may be eligible for transfer credit. When an institution awards grades in percentage terms rather than as letter grades, a grade of 70% or higher is eligible for transfer credit consideration.
- Master's programs require a grade of C or higher and doctoral programs require a grade of B or higher for coursework to be eligible for transfer credit.
- If a required course was previously attempted and failed at the Academic Unit, the transfer grade will replace the grade earned at the Academic Unit when an official transcript is provided, and the attempted credits will continue to apply for the purpose of determining Satisfactory Academic Performance. If a required course was previously attempted and passed at the Academic Unit, transfer credit will not be accepted to replace the grade earned at the Academic Unit. When an elective General Education course was attempted at the Academic Unit, the transfer grade will fulfill the course requirement, and the attempted credits and grade earned at the Academic Unit will apply for the purpose of determining Satisfactory Academic Performance.
- General Education credits may be considered for transfer regardless of completion date unless superseded by program-specific transfer policy.
- Clinical, Externship, Internship, Practicum, Professional Practice Experience, Capstone, and other end-of-program courses cannot be transferred in from another institution of higher learning or fulfilled via a Rasmussen challenge (test out) exam.
- Credits in Core courses in Technology programs must have been earned within three (3) calendar years of the date the student starts in the program. Prefixes include CDA, CEN, CET, CGS, CIS, CNT, COP, CTS, ISM, and QMB. This excludes **CGS1240** Computer Applications and Business Systems Concepts and **CTS2511** Excel, which do not have expirations.
- Credits in Core courses in Design programs must have been earned within five (5) calendar years of the date the student starts in the program. Prefixes include ADV, DIG, GRA, and PGY. This excludes **ART1200C** Sketching for Designers, which does not have an expiration.
- Credits in Core courses in Health Sciences programs must have been earned within five (5) calendar years of the date the student starts in the program. Prefixes include HIM, HSA, HSC, MEA, PHC, and PTN. This excludes **HSC1531** Medical Terminology, which does not have an expiration.
- Credits in Core courses within the Medical Assisting, Medical Laboratory Technician, Physical Therapist Assistant, Radiologic Technology, and Surgical Technologist programs with course prefixes of MEA, MLT, PHT, RTE, and STS cannot be fulfilled with transfer credit based on courses completed at other institutions. Students who have completed external courses similar to Rasmussen courses with prefixes of MEA, MLT, PHT, RTE, and STS at an accredited institution within one calendar year of the date the student starts in the program may attempt a challenge exam when approved by the Dean. The **MEA2203** Pathophysiology and **MLT1325** Phlebotomy courses can be fulfilled by external transfer credit or challenge exams, and must have been earned within five (5) calendar years of the date the student starts in the program.

- When previously completed at Rasmussen, Medical Laboratory Technician, Physical Therapist Assistant, Radiologic Technology, and Surgical Technologist core courses with prefixes of MLT, PHT, RTE, and STS have a two (2) calendar year time limit from time of course completion and the start date of the student's reentry into the program. This excludes **MLT1325** Phlebotomy and **MLT1728** Introduction to Chemistry courses, which have a five (5) calendar year time limit.
- Nursing Programs will not accept any Core course transfers for courses with prefixes of NUR and PRN. Master of Science in Nursing, Post-Graduate Certificate-Nurse Practitioner, and Doctor of Nursing Practice programs allow up to 12 Core program credits (NGR prefix) to be fulfilled with transfer credit when comparable graduate-level courses have previously been completed within five (5) calendar years of the date the student starts in the program and the courses were completed when enrolled in a programmatically accredited program. Practicing nurse practitioners who are nationally certified are exempt from the five (5) calendar year requirement.
- Credits in core courses in Criminal Justice, Law Enforcement, and Paralegal programs with course prefixes CCJ, CJC, CJE, CJL, and PLA must have been earned within five (5) calendar years of the date the student starts in the program.
- Law Enforcement Transfer:
  1. Credits in core courses in Law Enforcement programs with the course prefix CJK as well as the **CJE2990** Capstone for Law Enforcement course must be completed at Rasmussen and expires 12-months after course completion. However, **CJK2640** Minnesota Traffic Code and **CJK2724** Minnesota Criminal Code are eligible for transfer of credit.
  2. Transfer credits for Law Enforcement Core Courses (CCJ, CJE, CJK, CJL prefixes) can only be accepted if the incoming course is from an accredited institution and contains approved equivalent training, upon satisfactory evidence as determined by the Law Enforcement Coordinator.
  3. Graduates of a regionally accredited, Minnesota POST Board approved Law Enforcement Skills Certificate program may be eligible for a block transfer of up to 22 credits to be applied toward the law enforcement skills-specific courses in the Law Enforcement Associate’s degree program at Rasmussen University. The Law Enforcement Capstone course must be completed at Rasmussen University. Total transferred credits cannot exceed the 75% transfer credit limit. Students must submit an official transcript at the time of application to be accepted into the Law Enforcement Associate’s Degree and to have the transfer credits posted to their academic record.
  4. Applicants to the Law Enforcement Associate’s program who have a conferred Associate’s or Bachelor’s degree from an accredited institution as recognized by the U.S. Department of Education may be eligible for a block transfer of up to 35 credits to be applied toward General Education Courses and **CGS1240** Computer Applications and Business Systems Concepts.
  5. Additionally, applicants to the Law Enforcement Associate’s program with a conferred Associate’s or Bachelor’s degree from a regionally accredited school in a program that is approved by the Minnesota Peace Officer Standards and Training (MN POST) Board may be eligible for an additional block transfer of up to 32 credits to be applied toward the law enforcement academic-specific courses in the Law Enforcement Associate’s degree program. When applying this policy, the transfer maximum is 75%.

Completer Block Transfers

Bachelor-Completer Programs Block Transfer

The following transfer policies apply:

- Students who have a conferred associate's or bachelor's degree from an accredited institution as recognized by the U.S. Department of Education may receive 90 or 91 lower-level transfer credits according to their program's acceptance requirements as stated on the catalog program page. These students will begin their program with junior status.
- Students who have completed at least 60 quarter credits of college-level coursework, and completed college-level English Composition and Math courses, with a grade of C- or higher at an institution accredited by an agency recognized by the U.S. Department of Education will receive block transfer credit up to the actual eligible credits completed.
- Students enrolling into a program that requires specific lower-level coursework and have not completed this coursework will have their block transfer adjusted to reflect the additional lower-level courses needed.

Healthcare Associate's Degree - Healthcare Administration Specialization Completer Block Transfer

The following Completer block transfer may be awarded only when student is enrolled in the version of this program that does not require a School of Nursing and School of Health Sciences Entrance Exam and is enrolled through Rasmussen University Online:

The block transfer of 38 credits includes all certificate courses, and may be awarded when the student graduated from a healthcare-related certificate or diploma program with at least 38 quarter credits or 26 semester credits at an accredited institution of higher learning as recognized by the U.S. Department of Education or the Council for Higher Education Accreditation.

Students will need to complete 32 General Education credits and 21 core and specialization credits, unless transferred on a course-by-course basis. When applying this policy, the transfer maximum is 67% and the student is not eligible to earn the Healthcare Certificate.

Healthcare Associate's Degree - Medical Administrative Assistant Specialization Completer Block Transfer

The following Completer block transfer may be awarded only when student meets one of the following criteria:

1. Students who have completed a Medical Administration Certificate or Diploma program that was accredited by an accrediting agency recognized by the U.S. Department of Education or Council for Higher Education Accreditation at the time the program was completed may be eligible for a block transfer of 32 credits when enrolling in this Associate's Degree program. The block transfer includes all certificate-level courses except **COM1002** Introduction to Communication and **E242** Career Development. Students will need to complete 36 General Education credits, 23 core and specialization credits, unless transferred on a course-by-course basis. When applying this policy, the transfer maximum is 67% and the student is not eligible to earn the Medical Administrative Assistant Certificate.
2. Graduates of a Rasmussen University Medical Administrative Assistant Diploma program may receive a Completer block transfer of 55 credits when enrolling in this Associate's Degree program. Students will be awarded a block transfer of 38 credits to apply toward the Medical Administrative Assistant Certificate and 17 credits that include **HSA2117** US Healthcare Systems, **MEA2203** Pathophysiology, 4 credits of Humanities, and 4 credits of Math / Natural Science. When applying this policy, the transfer maximum is 67% and the student is not eligible to earn the Medical Administrative Assistant Certificate.

Healthcare Associate's Degree - Medical Assisting Specialization Completer Block Transfer

A block transfer of 41 core credits may be awarded into this Associate's program when student is both enrolled through Rasmussen University Online and graduated from a Medical Assisting Diploma program earned at an accredited institution of higher learning as recognized by the U.S. Department of Education or the Council for Higher Education Accreditation.

The block transfer of 41 credits includes all 37 core credits of the diploma and **PHA1500** Structure and Function of the Human Body. Students will need to complete 36 General Education credits and 14 core and specialization credits, unless transferred on a course-by-course basis. Rasmussen University Medical Assisting Diploma graduates may receive actual credits earned in their program up to the credit value of the current diploma program. When applying this policy, the transfer maximum is 67% and the student is not eligible to earn the Medical Assisting Diploma.

Healthcare Associate's Degree – Pharmacy Technician Specialization Completer Block Transfer

A block transfer of 32 core credits may be awarded into this Associate's program if one of the following criteria is met:

1. Graduated from a Pharmacy Technician certificate or diploma program earned at an accredited institution of higher learning as recognized by the U.S. Department of Education or the Council for Higher Education Accreditation (CHEA), or
2. Completed a Pharmacy Technician education or training program accredited by either American Society of Health System Pharmacists (ASHP) or Accreditation Council of Pharmacy Education (ACPE).

The block transfer of 32 credits includes all certificate-level courses except **COM1002** Introduction to Communication and **E242** Career Development. Students will need to complete 36 General Education credits and 23 core and specialization credits, unless

transferred on a course-by-course basis. When applying this policy, the transfer maximum is 67% and the student is not eligible to earn the Pharmacy Technician Certificate.

Health Information Technician Associate's Degree Completer Block Transfer

A block transfer of 25 credits may be awarded into this Associate's program if one of the following criteria is met:

1. Graduated from a Rasmussen University Medical Billing and Coding Certificate program within the past five (5) calendar years from the date student starts in the program, or
2. Completed a Medical Billing and Coding education or training program approved by the American Health Information Management Association (AHIMA®) Foundation's Professional Certificate Approval Program (PCAP) that was earned within the past five (5) calendar years from the date student starts in the program.

Students will need to complete **CGS1240** Computer Applications and Business Systems Concepts, **HIM1125** ICD-CM Coding, and **HIM1126C** ICD-PCS Coding courses unless transferred on a course-by-course basis. When applying this policy, the transfer maximum is 67%.

Declining Transfer of Credit

A student may choose to decline external transfer credit that would otherwise be awarded by submitting the transfer credit declination form to their Academic Advisor. The transfer credits will be removed from the student's current enrollment record. The request must explicitly state for which course(s) the student wants to waive the transfer of credit. The declined transfer credit may be rescinded at a later date by submitting a written request to their Academic Advisor. Students using Veteran's Affairs (VA) educational benefits must submit all previously completed college-level coursework for transfer evaluation, and all credits deemed eligible for transfer must be accepted by the academic unit. The U.S. Department of Veteran's Affairs does not allow students using VA education benefits to decline transfer of credit, so a student who chooses to decline eligible transfer credit will not receive military funding for declined transfer courses and will need to secure other means of payment.

Transfer of General Education Science Credits for School of Nursing and School of Health Sciences

Science courses covered by this policy:

- **BSC2093C** Human Anatomy and Physiology I *
- **BSC2094C** Human Anatomy and Physiology II *
- **PHA1500** Structure and Function of the Human Body

Transfer of credit, and credit for previously completed Rasmussen courses, for specific required General Education science courses as defined in the program curriculum, may be awarded when the following requirements have been met:

- Course was completed within five (5) calendar years of the date the student starts in the program.
  - Students who are reentering the same program credential within five quarters of when they withdrew are exempt from the 5-year time limit if the credits were previously earned at Rasmussen University or previously accepted by Rasmussen as official transfer credit with a TR grade posted.
- Course was completed with a grade of C- or higher.
- Course credits are at least equal to Rasmussen’s course credit value.
- If the courses were completed more than five (5) calendar years from the date student starts in the program and/or the course(s) were completed with a grade below C-, the student may, at their own expense, choose to enroll in the Rasmussen self-directed assessment

or attempt the Rasmussen credit by examination (test out) for courses covered by this policy. If a score of 78% or higher is achieved in a self-directed assessment or 73% or higher is achieved in a test out exam, Test Out (TO) transfer credit will be awarded.

For Nursing programs:

- When a new or returning student is scheduled to start their first Nursing courses in their first quarter of enrollment (course prefix NUR), transferred coursework must be completed and proof of completion based on an official transcript provided prior to the first day of the student's first quarter of enrollment in the program.
- When a continuing student is scheduled to start their first Nursing courses (course prefix NUR), transferred coursework must be completed and proof of completion based on an official transcript provided to the first day of the quarter in which the Nursing courses are scheduled.

For Health Sciences programs:

- Transferred coursework must be completed, and proof of completion provided, prior to the first day of the term that the student is scheduled for a course for which the external course is either a prerequisite or corequisite.

For Nursing and Health Sciences programs:

- When both courses of an eligible two-part Human Anatomy & Physiology (A&P) with lab series have been completed at the same institution or through the same entity, the courses will be eligible to fulfill both **BSC2093C** Human A&P I and **BSC2094C** Human A&P II.
- When Rasmussen Academic Leadership has verified that the content of an external A&P I or A&P II course includes the same body systems as the Rasmussen course, the external course will be eligible to fulfill the Rasmussen course requirement. For example, Rasmussen's **BSC2094C** Human A&P II course includes the endocrine system; an external A&P II course that does not include the endocrine system is not eligible to fulfill Human A&P II as transfer credit.

See the General Transfer Credit and Course-by-Course Transfer Credit policies for additional transfer requirements.

General Education Block Transfer for Baccalaureate Candidates

For students with a conferred Bachelor's degree, General Education coursework will be transferred as a block regardless of conferred degree or degree sought through Rasmussen University.

- All required General Education courses must be met due to accreditation requirements.
- For those students without an earned degree, General Education credits passed with a grade of C- or higher applicable to the enrolled program will be applied.

Transfer of Credit for Non-Nursing Master's Degree Students

Non-nursing master's-level students must complete at least 80% of their program requirements at Rasmussen University, and no more than 20% may be completed via transfer credits. Students who have provided Rasmussen with their official transcript showing a Bachelor's degree or higher was earned and their official transcript that contains graduate-level courses may request transfer of 5000- or 6000-level coursework previously completed at another institution with a grade of C or higher. Each transferring course must closely align to the course objectives and expected outcomes of the course it is replacing. Transferred credits count toward Cumulative Completion Rate and will appear on the student's transcript.

The student is responsible for submitting previously completed coursework for transfer credit consideration. The student will be required to provide the syllabus from the term the course was completed, as well as identify the Rasmussen course they think closely aligns with the course they completed. A maximum of four courses can be submitted for review at a time. The Associate Vice President, Dean, or Nurse Administrator will determine if transfer credit will be awarded. This decision cannot be appealed. If more than two external courses are deemed comparable to Rasmussen courses, the student has the choice as to which two courses they would like fulfilled with transfer credit. If none of the submitted courses are accepted as transfer credit, the student may submit additional courses for review until maximum transfer credit has been awarded.

Pre-Licensure Bachelor of Science in Nursing Program Eligibility and Transfer of Credit Policy

This 180-credit degree consists of 106 core Nursing credits and 74 General Education credits. Only General Education courses can be fulfilled with transfer credit. General Education course requirements include **HUN2000** Human Nutrition and four lab-based science courses: **BSC2093C** Human Anatomy and Physiology I, **BSC2094C** Human Anatomy and Physiology II, **CHM1100C** General Chemistry and **MCB2340C** General Microbiology. All General Education course requirements must be completed before core Nursing courses can be taken.

Second Degree Accelerated BSN (A-BSN) Entrance Option

A student is eligible to enroll in the Second Degree Entrance Option when a bachelor's degree has previously been awarded. A block of 52 General Education credits will be awarded upon submission of official transcript.

- When student enrolls with all four lab-based science courses and **HUN2000** Human Nutrition completed, a block of 52 General Education credits will be awarded, and 22 General Education credits for the five required General Education courses will be separately awarded, leaving 106 core Nursing credits to complete. Student will be eligible to take core Nursing courses at time of start.
- When student needs to complete one or more of the required General Education science course requirements listed above, a block of 52 General Education credits will be awarded. Additional General Education transfer credit will be awarded for the required science courses when comparable courses have been completed and meet transfer credit requirements.

Student is required to complete any unfulfilled General Education science courses in their first and second quarters of enrollment. Upon completion of the General Education science courses, the student will be eligible to enroll in core Nursing courses.

Standard Entrance Option

A student is eligible to enroll in this entrance option when they have not yet attended college, have taken college-level courses but do not have a degree, or have an associate's degree only.

Transfer credit is assessed on a course-by-course content basis based upon submission of official transcript(s). Upon completion of all General Education course requirements, the student will be eligible to enroll in core Nursing courses.

Pre-Licensure Bachelor of Science in Nursing Program Eligibility and Transfer of Credit Policy

This 180-credit degree consists of 106 core Nursing credits and 74 General Education credits. Only General Education courses can be fulfilled with transfer credit. General Education course requirements include **HUN2000** Human Nutrition and four lab-based science courses: **BSC2093C** Human Anatomy and Physiology I, **BSC2094C** Human Anatomy and Physiology II, **CHM1100C** General Chemistry and **MCB2340C** General Microbiology. All General Education course requirements must be completed before core Nursing courses can be taken.

Second Degree Accelerated BSN (A-BSN) Entrance Option

A student is eligible to enroll in the Second Degree Entrance Option when a bachelor's degree has previously been awarded. A block of 52 General Education credits will be awarded upon submission of official transcript.

- When student enrolls with all four lab-based science courses and **HUN2000** Human Nutrition completed, a block of 52 General Education credits will be awarded, and 22 General Education credits for the five required General Education courses will be separately awarded, leaving 106 core Nursing credits to complete. Student will be eligible to take core Nursing courses at time of start.
- When student needs to complete one or more of the required General Education science course requirements listed above, a block of 52 General Education credits will be awarded. Additional General Education transfer credit will be awarded for the required science courses when comparable courses have been completed and meet transfer credit requirements.

Student is required to complete any unfulfilled General Education science courses in their first and second quarters of enrollment. Upon completion of the General Education science courses, the student will be eligible to enroll in core Nursing courses.

Standard Entrance Option

A student is eligible to enroll in this entrance option when they have not yet attended college, have taken college-level courses but do not have a degree, or have an associate's degree only.

Transfer credit is assessed on a course-by-course content basis based upon submission of official transcript(s). Upon completion of all General Education course requirements, the student will be eligible to enroll in core Nursing courses.

Bachelor of Science in Nursing - RN to BSN Entrance Option Articulation

Applicants to the RN to BSN entrance option who have a current, unencumbered RN license in the U.S. and have a conferred Associate's Degree in Nursing, and who satisfy all program admission requirements, will be awarded an articulation transfer equivalent to 102 credits toward this program. An additional eight lower-level General Education elective credits may be awarded for additional coursework completed in addition to the conferred Associate's Degree in Nursing. Students who are not awarded transfer credit for all 110 lower-level credits will be required to complete self-directed assessments from a designated course pool during the first 18 months of enrollment.

Applicants without an associate's degree in nursing are required to have previously completed all of the General Education course requirements that align to the Professional Nursing Associate's Degree program. Applicants who have not completed all of these requirements are not eligible to enroll in this program.

- Upper-division core courses are not transferable.
- Upper-division General Education coursework is transferable and follows the standard Course-by-Course Transfer Policy.
- The maximum percentage of credits that may be transferred into the program is 75%.

Transfer of Credit for Master of Science in Nursing Students

Master of Science in Nursing programs allow up to 12 Core program credits (NGR prefix) to be fulfilled with transfer credit when comparable graduate-level courses have previously been completed within the previous five (5) calendar years of the date student starts in the program and when the student was enrolled in a programmatically accredited program. Practicing nurse practitioners who are nationally certified are exempt from the 5-year requirement. Capstone courses are not eligible to be fulfilled with transfer credit and must be completed at Rasmussen University.

The student is responsible for submitting previously completed coursework for transfer credit consideration. A grade of C or higher is required for transfer credit consideration. The student will be required to provide the syllabus from the term the course was completed, as well as identify the Rasmussen course they think closely aligns with the course they completed. A maximum of four courses can be submitted for review at a time. The Dean of Nursing for DNP and MSN will determine if transfer credit will be awarded. This decision cannot be appealed. If more than three external courses are deemed comparable to Rasmussen courses, the student has the choice as to which three courses they would like fulfilled with transfer credit. If none of the submitted courses are accepted as transfer credit, the student may submit additional courses for review until maximum transfer credit has been awarded.

Transfer of Credit for Post-Graduate Certificate-Nurse Practitioner Students

Applicants who are accepted into a Post-Graduate Certificate-Nurse Practitioner program may be eligible to have one to three Core course requirements fulfilled with transfer credit when comparable graduate-level courses have previously been completed within the past five (5) calendar years from the date student starts in the program and when the student was enrolled in a programmatically accredited program. Practicing nurse practitioners who are nationally certified are exempt from the 5-year requirement.

Transfer credit eligibility is limited to fulfilling three Core course requirements: **NGR5056** Advanced Health Assessment Across the Lifespan, **NGR5149** Advanced Pathophysiology Across the Lifespan and **NGR5172** Advanced Pharmacology Across the Lifespan.

- Advanced health assessment, which includes assessment of all human systems, advanced assessment techniques, concepts, and approaches.
- Advanced physiology/pathophysiology, which includes general principles that apply across the life span.
- Advanced pharmacology, which includes pharmacodynamics, pharmacokinetics, and pharmacotherapeutics of all broad categories of agents.

The student may be required to provide syllabi for review from the year the courses were completed. If the Dean of Post-Licensure Nursing determines transfer credit can be awarded, the grades will be posted on the student's transcript as transfer credit (TR) and the student will not be required to complete these courses at Rasmussen.

Transfer of Credit for Doctor of Nursing Practice Students

When determining program entrance acceptance, the Doctor of Nursing Practice (DNP) programs allow up to 12 Core program credits (NGR prefix)/3 courses to be fulfilled with transfer credit, plus up to 15 Practicum credits/450 hours to be fulfilled with Course Waiver transfer credit. For Core courses, comparable doctoral-level courses must have been completed when the student was enrolled in a programmatically accredited program, with an accreditor recognized by the U.S. Department of Education, and within the previous five (5) calendar years of the date the student starts in the program. DNP Project courses are not eligible to be fulfilled with transfer credit and must be completed at Rasmussen University.

The student is responsible for submitting previously completed coursework for transfer credit consideration. A grade of B or higher is required for transfer credit consideration. The student will be required to provide the syllabus from the term the course was completed, as well as identify the Rasmussen course they think closely aligns with the course they completed. A maximum of four courses can be submitted for review at a time. The Dean of Nursing for DNP and MSN will determine if transfer credit will be awarded. This decision cannot be appealed. If more than three external courses are deemed comparable to Rasmussen courses, the student has the choice as to which three courses they would like fulfilled with transfer credit. If none of the submitted courses are accepted as transfer credit, the student may submit additional courses for review until maximum transfer credit has been awarded.

For Practicum courses, the Dean of Nursing for DNP and MSN will determine the number of total clinical/practicum hours previously earned at the post-baccalaureate level that will apply to the program. Up to 15 Practicum credits (up to 450 hours) will be waived and recorded on the student's record as Course Waiver transfer credit. The student will be required to complete the remaining practicum course hours required to complete the program.

Military Block Transfer

Healthcare Admin/Health Sciences

Students who have completed a Medical Education and Training Campus (METC) program through a branch of the United States Armed Forces as recorded on either a Joint Services Transcript (JST) or a Community College of the Air Force transcript may be eligible for a block transfer of 55 credits when enrolling into the Healthcare Associate's Degree - Healthcare Administration Specialization (Health Sciences Associate's Degree - Healthcare Specialization in Illinois). When applying this policy, the maximum transfer limit is 67%.

A block transfer of 55 credits may be awarded when program of instruction is accredited or certified by a professional practice programmatic accrediting agency that is recognized by the University at the time of enrollment and transfer credit is reviewed. The list of approved agencies is available upon request through the Rasmussen Transfer Assessment team. This 55-credit block transfer is comprised of the Healthcare Certificate program (38 credits), **HSA2117** US Healthcare Systems (4 credits), **MEA2203** Pathophysiology (5 credits), one General Education Communication elective (4 credits), and one General Education Humanities elective (4 credits).

Military Block Transfer for Medical Assisting Diploma and Healthcare/Health Sciences Associate's - Medical Assisting Specialization

Students who have completed the Basic Medical Technician or Corpsman training program through a branch of the United States Armed Forces as recorded on either a Joint Services Transcript (JST) or Community College of the Air Force transcript may be eligible for:

1. A block transfer of 24 credits when enrolling into the Medical Assisting Diploma program. The block transfer includes **COM1002** Introduction to Communication, **HSC1531** Medical Terminology, **MEA1350** Fundamentals in Clinical Techniques, **MEA1460** Clinical Laboratory Applications & Diagnostic Procedures I, and **PHA1500** Structure and Function of the Human Body. When applying this block transfer, the maximum transfer limit is 50% and student is not eligible to double major with the residential Healthcare/Health Sciences Associate's - Medical Assisting specialization until student is in their last or second-to-last quarter.
2. A block transfer of 41 credits when enrolling into the Healthcare Associate's Degree - Medical Assisting specialization program through Rasmussen University Online. The block transfer includes all Medical Assisting Diploma courses except **E242** Career Development, **HSC2641** Medical Law and Ethics, and **PSY1012** General Psychology. When applying this block transfer, the maximum transfer limit is 67% and student is not eligible to earn the Medical Assisting Diploma.

Students who have completed the Combat Medic Specialist training program through the United States Army as recorded on either a Joint Services Transcript (JST) or Community College of the Air Force transcript:

1. A block transfer of 20 credits when enrolling into the Medical Assisting Diploma program. The block transfer includes **HSC1531** Medical Terminology, **MEA1350** Fundamentals in Clinical Techniques, **MEA1460** Clinical Laboratory Applications & Diagnostic Procedures I, and **PHA1500** Structure and Function of the Human Body. When applying this block transfer, the maximum transfer limit is 50% and student is not eligible to double major with the residential Healthcare/Health Sciences Associate’s - Medical Assisting specialization until student is in their last or second-to- last quarter.
2. A block transfer of 37 credits when enrolling into the Healthcare Associate’s Degree-Medical Assisting specialization program through Rasmussen University Online. The block transfer includes all Medical Assisting Diploma courses except **COM1002** Introduction to Communication, **E242** Career Development, **HSC2641** Medical Law and Ethics, and **PSY1012** General Psychology. When applying this block transfer, the maximum transfer limit is 67% and student is not eligible to earn the Medical Assisting Diploma.

Physical Therapist Assistant Associate's Degree

Students who have completed a Medical Education and Training Campus (METC) Physical Therapy Program through a branch of the United States Armed Forces within the past five (5) calendar years from the date student starts in the program, as recorded on either a Joint Services Transcript (JST) or a Community College of the Air Force transcript, may be eligible for a block transfer of 63 credits when enrolling in this Associate's program. Students accepted through this Block Transfer policy must complete at least 25% of their program requirements at Rasmussen University.

The following block transfer may be awarded only when student meets all of the following criteria:

1. Completion of METC Physical Therapy Program evidenced by official transcripts. If the METC Physical Therapy Program was completed over five years ago, the student must have work experience in a Physical Therapist Assistant, Aide, or Technician role within the last five years. A letter of verification is required as evidence of this work experience and must be approved by the Dean.
2. Minimum of 3 months full time experience in a healthcare setting during active duty, preferably in a physical therapy setting. A letter of verification is required as evidence of this experience and must be approved by the Dean.
3. Completion of programmatic acceptance requirements: application, background screening, programmatic interview; students transferring 63 or more credits are exempt from the School of Nursing and School of Health Sciences Entrance Exam.

The block transfer includes: **BSC2093C** Human Anatomy and Physiology I, **BSC2094C** Human Anatomy and Physiology II, **HSC1531** Medical Terminology, **PHT1000** Physical Therapist Assistant Fundamentals, **PHT1100** Introduction to Evidence-Based Practice and Therapeutic Interventions, **PHT1200** Principles of Musculoskeletal Physical Therapy-Lower Quarter,

PHT1300 Principles of Musculoskeletal Physical Therapy-Upper Quarter, **PHT2000** Principles of Neuromuscular Physical Therapy, **PHT2500** PTA Clinical I, **PHT2700** PTA Clinical II, and **PSY1012** General Psychology.

Pre-licensure Nursing

Students who enroll in a Rasmussen Practical Nursing, Professional Nursing or pre-licensure Bachelor of Science in Nursing program and have completed specific Medic Courses while in the military as recorded on either a Joint Services Transcript (JST) or Community College of the Air Force transcript may be awarded a block transfer for the following courses:

Practical Nursing Diploma Program:

- Air Force - Medic Course BMTCP fulfills **PHA1500** Structure and Function of the Human Body, **PRN1032** Client-Centered Care I and **PRN1381** Principles of Pharmacology.
- Army - Medic Course Medic Program 68W or AR-0709-0065 V04 Health Care Specialist fulfill **PHA1500** Structure and Function of the Human Body and **PRN1381** Principles of Pharmacology.
- Navy and Marines - Medic Course **HM0000** fulfills **PHA1500** Structure and Function of the Human Body, **PRN1032** Client-Centered Care I and **PRN1381** Principles of Pharmacology.

Professional Nursing Associate's and Pre-licensure Bachelor of Science in Nursing Degree Programs:

- Air Force - Medic courses (**BMTC101N** , **NURS101** and **NURS201**) or (**NUR1318** , **NUR1319** and **NUR1304** , **NUR1317** or **NUR1320**) fulfill **NUR1055** Introduction to Nursing and **NUR2180** Physical Assessment.
- Army - The Combat Medic Program or AR-0709-0065 V04 Health Care Specialist fulfills **NUR2180** Physical Assessment.
- Navy - Medic courses **BMTC101N** , **NURS101** and **NURS201** fulfill **NUR1055** Introduction to Nursing and **NUR2180** Physical Assessment.

Self-Directed Assessment Policy

Rasmussen University's self-directed assessment offerings fulfill some academic program requirements. Demonstrated mastery through the successful completion of self-directed assessments allows students to test out of some courses within their academic program.

- A signed enrollment agreement in a program that allows self-directed assessment is required to gain access to the library of self-directed assessments. Non-Degree Seeking students do not have access to self-directed assessments.
- Student must attempt a minimum of six credits in Traditional Courses or Competency-Based Courses per quarter to be eligible for financial aid while taking a self-directed assessment, and student is not eligible to attempt self-directed assessment until all Developmental Education requirements are fulfilled.
- Any student or prospective student must be in good academic standing to enroll in any self-directed assessments.
- Student has flexible time to complete a self-directed assessment attempt but is not to exceed 45 days from the point in time each self-directed assessment is accessed.
- Self-directed assessments must be completed prior to the first day of the quarter in which the student is expected to graduate. The quarter of expected graduation is determined by the graduation date as it appears in the Rasmussen Student Portal. Students who do not meet this requirement will be expected to complete the course requirements as a regularly scheduled Traditional Course or a Competency-Based Course.
- Self-directed assessment is optional unless a programmatic requirement explicitly dictates that certain credits be completed using self-directed assessment. Such requirements are published in the University Catalog.
- If student does not complete the self-directed assessment attempt within the deadline, then student will be required to meet the programmatic requirement through a Traditional Course or a Competency-Based Course at the applicable standard tuition and fee rates.
- Academic Appeals are not considered for self-directed assessment or any other form of prior learning assessment. Technical issues should be resolved by calling Classroom IT Support at 833-606-1909 at the time an issue is discovered.

- Enrolled students may elect to take a self-directed assessment in lieu of a course for any course that has been identified as having a self-directed assessment equivalent or fulfills the same General Education category.
- Credit for successfully completed self-directed assessment will appear on the student transcript with a grade designation of TO (test-out credit), will equal the number of credits for the course equivalent(s) of the self-directed assessment, and will count toward student's maximum transfer of credit.
- If a student has already attempted the faculty-led course, as indicated by any posted grade, including W/WD/WP/WX or F/FA/FD and excluding CL, PD, and WL grades, the student will not be allowed to attempt the equivalent self-directed assessment option. If the course is subject to time limits and is expired, the equivalent self-directed assessment option may be attempted.
- A student may complete a self-directed assessment and later decline Transfer Credit for the option (TO grade) and enroll in an equivalent Traditional Course or a Competency-Based Course and earn a letter grade.
- Self-directed assessments which are attempted in lieu of prerequisite and corequisite courses must be successfully completed prior to the start of the term in which the post-requisite course is required. Failure to do so may result in delays in program completion. See the Prerequisites and Corequisites language at the beginning of the Course Descriptions section for details.
- Self-directed assessment enrollment will not satisfy credit load requirements for the purposes of veterans benefit program funding or any other student financial assistance program.
- Each self-directed assessment attempt has a per-attempt out-of-pocket fee defined in the Tuition and Fee Attachment to the Enrollment Agreement, and these attempts cannot be paid for with state or federal financial aid. Fees for self-directed assessment are non-refundable and nontransferable if student has been accepted to the program.
- Contact your Academic Advisor for a list of available self-directed assessments as well as instructions to enroll and pay the self-directed assessment fee.
- Payment of the self-directed assessment fee does not guarantee the award of credits. Any credits awarded will be based on successfully meeting the criteria of the assessment and the criteria of this policy.
- Credits awarded through self-directed assessments (TO) may not be transferable to another institution. The decision to accept transfer credits is always at the discretion of the receiving institution.

Self-Directed Assessment Policy

Rasmussen University's self-directed assessment offerings fulfill some academic program requirements. Demonstrated mastery through the successful completion of self-directed assessments allows students to test out of some courses within their academic program.

Fees for self-directed assessment are non-refundable and nontransferable if student has been accepted to the program.
- Contact your Academic Advisor for a list of available self-directed assessments as well as instructions to enroll and pay the self-directed assessment fee.
- Payment of the self-directed assessment fee does not guarantee the award of credits. Any credits awarded will be based on successfully meeting the criteria of the assessment and the criteria of this policy.
- Credits awarded through self-directed assessments (TO) may not be transferable to another institution. The decision to accept transfer credits is always at the discretion of the receiving institution.

Credit by Examination (Challenge Exams or Test-Outs)

Students may receive credit for a Rasmussen University course by taking an examination in place of the actual faculty-led course. Some exams may be taken by enrolled students prior to beginning their coursework at Rasmussen University.

- Enrolled students may request credit by examination for courses if an exam has been developed.
- An examination score of 73% or higher is required to earn credit by examination.
- The examination grade will be posted as Test-Out (TO) on the student transcript.
- Credits earned count in the transfer maximum.
- Credit by examination will not count as credits for financial aid eligibility.
- A credit by examination may be attempted only once for each course.
- If a student has already attempted the faculty-led course, as indicated by any posted grade, including W/WD/WP/WX or F/FA/FD and excluding CL, PD, and WL grades, the student will not be allowed to attempt the equivalent credit by examination. If the course is subject to time limits and is expired, the equivalent credit by examination may be attempted.
- If a student does not pass a Credit by Examination attempt, the option to attempt the faculty-led course remains.
- Academic Appeals are not considered for credit by examination, self-directed assessment, or any other form of prior learning assessment. Technical issues should be resolved by calling Classroom IT Support at 833-606-1909 at the time an issue is discovered.
- Prepayment of a non-refundable and non-transferable credit by examination fee is required prior to being granted access to any credit by examination. Refer to Tuition Rates & Fees for current rates.
- Payment of the fee does not guarantee the award of credits; any credits awarded will be based on meeting all of the criteria above.
- Credit by examination will not satisfy credit load requirements for the purposes of veterans benefit program funding or any other student financial assistance program.
- Contact your Academic Advisor for a list of available credit by examination opportunities as well as instructions to enroll and pay the credit by examination fee.

- Credits awarded through credit by examination (TO) may not be transferable to another institution. The decision to accept transfer credits is always at the discretion of the receiving institution.

College Equivalency Credit

Credits earned through college equivalency programs will be posted on student transcripts as Test-Out (TO) credits and will not be assigned letter grades or applied to cumulative grade point average.

The academic unit recognizes the following college equivalencies:

- Advanced Placement (AP) examinations administered by the College Board. A score of 3 or higher required.
- For graduates of United States high schools who provide transcripts of individual certificate completion in an International Baccalaureate® (IB) Diploma Programme credit may be awarded based on individual subjects; examination scores of 4 and higher are required. Courses will be accepted relative to the program of enrollment.
- College-Level Examination Program (CLEP) examinations administered by the College Board. A score of 50 or higher is required for computer- based testing since 2/15/2003. For paper-based exams taken prior to 2/15/2003, the CLEP ACE recommended score will be used. CLEP examinations have a 20-year time limit based on the College Board removing scores from their system and not able to provide transcript service
- DSST, DANTES, Excelsior College UExcel Exams. Passing scores are determined by the individual test requirements.
- Other types of university equivalency courses and/or examinations may be evaluated for eligibility by the Central Transfer Department.

Course Waivers

A Rasmussen University approved course waiver requires an external learning experience to meet at least 80% of the course objectives/competencies of the Rasmussen University course being waived. Course waivers are tied to certifications, credentials, and exams administered by professional organizations. Course waivers require documented evidence of assessment of student learning (e.g., certification, credential, exam, or license).

School of Business Waivers

Course waivers will be considered for students who have select professional certifications from Lean Six Sigma or the HR Certification Institute™ for the distinction of Professional in Human Resources (PHR) or for the distinction of Senior Professional in Human Resource Management (SPHR):

- Course waivers will be considered for specific courses within the School of Business related to the certification and the program of enrollment.
- Certifications must be current.
- The student’s credential will be reviewed, and if the criteria are met, the course requirements will be waived and the grades will be posted on the student’s transcript as a Course Waiver (CW).
- Students presenting evidence of the Lean Six Sigma-White Belt will be awarded credit as Course Waiver (CW) for the Management of Information Systems course requirement.
- Students presenting evidence of certification by the HR Certification Institute for the distinction of PHR will be awarded the following credit as Course Waiver (CW):
  1. Introduction to Human Resource Management
  2. Employment Law
  3. Modern Human Resource Management
  4. Workforce and Labor Relations Management
- Students presenting evidence of certification by the HR Certification Institute for the distinction of SPHR will be awarded the following credit as Course Waiver (CW):
  1. Introduction to Human Resource Management

2. Employment Law
3. Modern Human Resource Management
4. Workforce and Labor Relations Management
5. Strategic Human Resource Management

Course waiver will be considered for students who have select Project Management certifications from the Project Management Institute. Students presenting evidence of certification by the Project Management Institute for the distinction of Project Management Professional Certification or Certified Associates in Project Management will be awarded Course Waiver (CW) credit for the Business Project Management course.

School of Design Waivers

Course waivers will be considered for students who have select professional certifications from Adobe and Autodesk.

- Course waivers will be considered for specific courses within the School of Design related to the certification.
- Certifications must have been earned within the last five years or are current through renewal.
- The student's credential will be reviewed, and if the criteria are met, the course requirements will be waived and the grades will be posted on the student's transcript as a Course Waiver (CW).

School of Education Waivers

Students enrolled in School of Education programs may receive course waivers if they have earned specific professional credentials. In order to request a School of Education Waiver, the student must present a current and valid certificate or transcript from the credentialing agency. The student's credential will then be reviewed, and if the criteria are met, Rasmussen University will waive the course requirements and the grades will be posted on the student transcript as a Course Waiver (CW). The accepted credentials and courses eligible for waiver under this policy are explained below:

1. Students enrolled in an Early Childhood Education Certificate, Diploma, or Associate's Degree who hold any of the following credentials may receive waivers from: Foundations of Child Development; Early Childhood Education Curriculum and Instruction; and Health, Safety, and Nutrition/CDA Application.
   a. CDA Credential awarded by the Council for Professional Recognition
   b. Florida Child Care Professionals Credential (FCCPC) awarded by the Florida Department of Children and Families
   c. Florida Early Childhood Professional Credential (ECPC) awarded by the Florida Department of Education
   d. Florida Child Care Apprenticeship Credential (CCAC) awarded by the Florida Department of Education
   e. Child Care Professional (CCP) awarded by the National Early Childhood Program Accreditation (NECPA)
2. Students who hold any of the following Wisconsin Registry credentials may receive waivers as indicated below.
   a. Wisconsin Infant and Toddler Credential—Students who hold this credential and are enrolled in the Early Childhood Education Certificate, Diploma or Associate's Degree programs may receive waivers from: Foundations of Child Development; Infant and Toddler Development; and Dynamics of the Family.
   b. Wisconsin Preschool Credential—Students who hold this credential and are enrolled in the Early Childhood Education Certificate, Diploma or Associate's Degree programs may receive waivers from: Foundations of Child Development; Early Childhood Education Curriculum and Instruction; Health, Safety, and Nutrition/CDA Application; and Guiding Children's Behavior.
   c. Wisconsin Administration Credential—Students who hold this credential and are enrolled in the Early Childhood Education Leadership Bachelor's Degree may receive waivers from: Organizational Management in Early Childhood Education; and Ethics and Leadership In Early Childhood Education.
   d. Wisconsin Leadership Credential—Students who hold this credential and are enrolled in the Early Childhood Education Leadership Bachelor's Degree may receive waivers from: Ethics and Leadership in Early Childhood Education; and Supporting Professional Practices in Early Childhood Education.
3. Students who hold the AIM4Excellence Director Credential and are enrolled in the Early Childhood Education Leadership Bachelor's degree program may receive waivers from: Organizational Management in Early Childhood Education; Supporting Professional Practices in Early Childhood Education; and Ethics and Leadership in Early Childhood Education.

4. Students enrolled in an Early Childhood Education Certificate, Diploma, or Associate's Degree who completed the Learning Care Group Master Training Program may receive waivers from: Early Childhood Education Exploration I: Knowledge and Early Childhood Education Exploration II: Planning.
5. Students who hold the National Administrators Credential (NAC) awarded by the National Early Childhood Program Accreditation (NECPA) and enrolled in the Early Childhood Education Leadership Bachelor's degree program may receive waiver from: Organizational Management in Early Childhood Education.

School of Health Sciences Waivers

1. Course waivers will be considered for students who have earned the Certified Coding Specialist (CCS or CCS-P) from American Health Information Management Association (AHIMA®).
   - Certifications must be current.
   - Course waivers will be considered for specific courses related to the certification.
   - The student's credential will be reviewed, and if the criteria are met, will waive the course requirements and the grades will be posted on the student transcript as a Course Waiver (CW).
2. Medical Coding Practicum Waiver
   - Students with a minimum cumulative GPA of 3.0 in their program major courses may request a waiver for the Medical Billing Coding practicum coursework.
   - Students must complete and submit the required paperwork to the Associate Vice President/Dean prior to the start of the quarter of the practicum.
   - Students must have a variety of experiences in the necessary medical fields rather than from just one area, and documentation will be required from the student's employer. The Associate Vice President/Dean will inform Central Operations Transfer department of the result of the evaluation.
   - If the waiver is granted, the grade will be posted on the student transcript as a Course Waiver (CW).
3. Phlebotomy Waiver for Medical Laboratory Technician Students
   - Students who enroll in the Medical Laboratory Technician Associate's Degree program and have a Phlebotomy Technician (PBT) certification from the American Society of Clinical Pathology (ASCP), Certified Phlebotomy Technician (CPT) from the National Healthcareer Association (NHA) or the Registered Phlebotomy Technician (RPT) certification from American Medical Technologists (AMT) may receive a waiver from **MLT1325** Phlebotomy.
   - The credential must be current at the time the student starts in the Medical Laboratory Technician program.
   - The student's credential will be reviewed, and if the criteria are met, the Phlebotomy course requirement will be waived and the grade will be posted on the student's transcript as a Course Waiver (CW).

School of Justice Studies Waivers

- Course waivers for specific courses related to a certification within the School of Justice Studies may be considered for students who have select professional certifications from recognized state police/corrections academies.
- A review of the content against the syllabus of the course for which transfer is requested will be assessed; the student will be required to provide evidence of course completion and the syllabus for the course/certification to be assessed that includes the required hours. Awarding a course waiver is at the sole discretion of the Dean, School of Justice Studies and School of Human Services. Sufficient time must be allowed for an appropriate review.
- The student's credential will be reviewed, and if the criteria are met, the course requirements will be waived, and the grades will be posted on the student's transcript as a Course Waiver (CW).

School of Nursing Waivers

Students who enroll in the Professional Nursing Associate's Degree program or a pre-licensure Bachelor of Science in Nursing Degree program, and have a Practical Nursing license (Licensed Practical Nurse (LPN) or Licensed Vocational Nurse (LVN)) that is current and unencumbered on the date their program starts at Rasmussen University, may receive a waiver from **NUR1055** Introduction to Nursing, **NUR2243** Professional Nursing Skills I and **NUR2356** Multidimensional Care I. The student's license status, as recorded on the state's licensing website, will be reviewed and, if the criteria are met, Rasmussen University will waive the course requirements and the grades will be posted on the student transcript as a course waiver (CW).

School of Technology Waivers

- Course waivers will be considered for students who have select professional certifications from CISA, Cisco, CompTIA, C++ Institute, (ISC)², ITIL, Lean Six Sigma, Microsoft, MCSA, PMI, VMWare.
- Course waivers will be considered for specific courses within the School of Technology related to the certification.
- Certifications must have been earned within the last three years or are current through renewal, except Microsoft Office certifications that waive the Excel course requirement, which do not expire.
- The student's credential will be reviewed, and if the criteria are met, the course requirements will be waived and the grades will be posted on the student's transcript as a Course Waiver (CW).

Military Experience Equivalency Credit

University credit for military service may be awarded upon review of a military transcript. Rasmussen University follows the American Council of Education (ACE) recommendations on transferring credit. These credits are usually listed on a Joint Services Transcript (JST) or Community College of the Air Force transcript. ACE recommended military credits accepted for transfer will be posted on the student's transcript as TR (official transfer credit) designation.

Admission and Registration

Getting Started

Admissions Policies

Congratulations on taking the first steps toward earning your degree. When you've chosen the program that best meets your needs, apply for admission by submitting or completing the following steps and other acceptance requirements as determined by your program. Detailed information related to the application and acceptance requirements follows the list below. The University will notify each applicant in writing of acceptance or rejection based on fulfillment of all the application, enrollment and acceptance requirements identified below, collectively known as the Admissions Policies.

Application Requirements and Procedures

All applicants must have fulfilled each of the following to advance through the enrollment process. The University will notify each applicant in writing of acceptance or rejection based on fulfillment of the following requirements:

- Completed application and enrollment agreement
- High School Attestation and Acceptable Documentation Proving High School Graduation or Equivalency: At any time during the enrollment process or while a student is enrolled in a program at Rasmussen University part of American Public University System (Rasmussen), the applicant or student may be required to provide additional evidence of high school graduation or its equivalency upon request. In general, the request for additional information will require the submission of a transcript (preferred) or a diploma identifying the student, the institution and the date of graduation or evidence of completing one of the equivalents identified below. *Students enrolling through a Florida campus are required to provide an official transcript or a high school diploma. The University, at its sole discretion, will determine the validity and applicability of the documents presented. Failure to provide required documentation may result in a denial of admission or an administrative withdrawal or dismissal from the University.

  Rasmussen follows the guidelines of the U.S. Department of Education in recognizing alternative equivalents to a high school diploma:

  - a GED certificate;

- a certificate or other official completion documentation demonstrating that the student has passed a state-authorized examination (such as the Test Assessing Secondary Completion (TASC) the High School Equivalency Test (HiSET), or, in California, the California High School Proficiency Exam) that the state recognizes as the equivalent of a high school diploma (certificates of attendance and/or completion are not included in this qualifying category);
- for homeschooled students, a copy of a secondary school completion credential for homeschool other than a high school diploma or its recognized equivalent) if state law requires homeschooled students to get that credential. If it is not required, a transcript or the equivalent signed by the parent or guardian that lists the secondary school courses the student completed and documents the successful completion of a secondary school education in a homeschool setting;
- an associate's degree;
- passing grades in at least 60 semester or trimester credits or 72 quarter credits that does not result in the awarding of an associate's degree, but that is acceptable for full credit toward a bachelor's degree at any institution; or
- enrollment in a bachelor's degree program where at least 60 semester or trimester credits or 72 quarter credits have been successfully completed, including credits transferred into the bachelor's degree program.

- Graduates of high schools outside of the United States must provide evidence of an equivalency to U.S. secondary education standards. Applicants must provide appropriate documentation as identified by the Ministry of Education in the country where the secondary education was completed along with the standard attestation. The transcript/diploma needs to be evaluated by an academic credential evaluation agency to indicate the student's education level equivalent to U.S. secondary education standards and should be transcribed into English. Approved member evaluators can be found at naces.org or aice-eval.org. The applicant is responsible for the cost of the evaluation. In the rare circumstance where it is impossible for a refugee, an asylee, or a victim of human trafficking to obtain documentation of a secondary school education in a foreign country, the applicant will work with their Admissions Representative to identify alternative submissions in compliance with U.S. Department of Education guidelines.

  When enrollment requires the verification of a degree, in addition to using an approved NACES or AICE member, the applicant may also choose to have their degree verified by Educational Commission for Foreign Medical Graduates (ECFMG.org) or NAFSA: Association of International Educators (NAFSA.org). The applicant is responsible for the cost of the evaluation. NOTE: Only NACES and AICE are approved evaluators for the purpose of assessing completed coursework for transfer of credit.

- Rasmussen only accepts official and unofficial transcripts for courses completed at accredited institutions of higher learning as recognized by the U.S. Department of Education or the Council for Higher Education Accreditation (CHEA), and courses that are recommended by the American Council for Education (ACE) or the National College Credit Recommendation Service (NCCRS).
- Placement Assessment. See Placement Assessment section.

- Successful completion of a non-cognitive assessment, the Rasmussen Ready Success component of the placement assessment. All prospective students of Rasmussen must successfully complete the assessment no later than three business days prior to the start of the term, except as noted below.

  The following applicants are exempt from the non-cognitive assessment requirement when they:

  - Previously completed the assessment as part of an entrance requirement into Rasmussen;
  - Are exempt from both the Rasmussen Ready English and Math Entrance Placement Assessments;
  - Enroll in a program requiring completion of at least 60 eligible quarter credits to enroll;
  - Enroll in either the Paralegal Certificate or Law Enforcement programs;
  - Enroll in a graduate-level program;
  - Have achieved a HESI® Cumulative Score of 55% or higher or a TEAS Total Score of 48.5% or higher within the past five years of the program start date.

Enrollment Requirements and Procedures

Once the application requirements have been met, an applicant may be registered for their first term of courses pending fulfillment of the remaining enrollment and acceptance requirements.

- Experiential online orientation, unless exempted. See Experiential Online Orientation section.
- All financial arrangements are complete, submitted, and verified. See Payment of Tuition and Fees section.
- For selected programs, applicants must also pass a criminal background check. See the Background Checks Policy and the program page for additional information.
- Immunization records completed, as required by state and/or program of enrollment
- In addition to all general Rasmussen University part of American Public University System (Rasmussen) admissions requirements, individuals applying for admission to select programs must also satisfy program-specific admissions requirements. Programs with program-specific admissions requirements include Health Information Management, Law Enforcement, Medical Laboratory Technician, Paralegal Certificate, Physical Therapist Assistant, Radiologic Technology, Surgical Technologist, and School of Nursing programs. Program-specific acceptance requirements are listed on each program page.
- In addition to all other admissions requirements, students must be at least 16 years old to enroll at Rasmussen.

Supplemental Enrollment Requirements and Procedures for Physical Therapist Assistant Program:: School of Nursing and School of Health Sciences Entrance Exam, Background Check, and Programmatic Interview. Once these are met, an acceptance letter will be issued. Once acceptance is issued the Enrollment Agreement can be signed, it must be on file at the University on or before the start date of the program. The Online Experiential Orientation is considered an enrollment requirement and must be met to continue through the first quarter of enrollment. To continue in the program into subsequent quarters, the programmatic Orientation must be completed prior to the last day of the first quarter of enrollment or reentry in the program.

Acceptance Requirements and Procedures

In addition to the application and enrollment requirements, all students must meet the acceptance requirements below to be officially accepted to Rasmussen University part of American Public University System (Rasmussen). Students must be officially accepted to Rasmussen into an eligible degree, diploma or certificate program as one of the eligibility requirements to receive and have financial aid disbursed to their student account.

- Background check cleared for acceptance (select programs require prospective student's completion of a background check)
- High School Verification documentation, if required, provided upon request, including submission of international high school documentation. High School Verification documentation is required for any applicant enrolling in a program through a Florida residential campus.
- Transcripts, official or unofficial, as required by program. International transcript documentation, as required.
- Select programs have program specific admissions requirements in addition to all general Rasmussen admissions requirements. See the admissions requirements for these programs within the applicable program page of the catalog

If for any reason the data supplied in the admissions process is found to be false, invalid or does not satisfy state or federal requirements, or is incomplete, the applicant/student must understand:

1. they will not have met the admissions requirement of Rasmussen and will be subject to immediate dismissal, and,
2. all Title IV financial aid and any state or institutional financial aid that was disbursed on behalf of the student may be refunded to the appropriate source, and
3. the student will be responsible to Rasmussen for all money refunded, and
4. if the student has attended classes, final grades of "C" or higher awarded in courses completed before being accepted will appear on the transcript and count toward the cumulative grade point average. Final grades of "C-" or lower in courses completed will not appear on the transcript and will have no effect on the cumulative grade point average. Courses attempted, but not completed prior to withdrawal will not appear on the transcript and will have no effect on the cumulative grade point average, and
5. by completing the enrollment process at Rasmussen the applicant accepts the consequences of providing incomplete, false, invalid, or unsatisfactory information.

Rasmussen University reserves the right to reject any applicant on the good faith belief that the applicant is seeking to enroll for any reason other than to obtain an educational degree or credential, or if the Rasmussen University determines that admission of the applicant would create a potential danger or disruption to the Rasmussen University or its existing students, staff, and faculty. In the event of

rejection, any monies paid will be refunded in full. The date of acceptance by the Rasmussen University shall be presumed to be the date of delivery of the notice of acceptance; and if delivered by mail, the postmarked date of the letter of acceptance or if delivered electronically, the date the email was sent.

Preparing for Enrollment

Placement Assessment

The Rasmussen Ready assessment is used to determine a student's proficiency in math, English, and digital preparedness. These skills are central to the Rasmussen University part of American Public University System (Rasmussen) Mission and are highly valued in the workforce. Rasmussen Ready is equipped with test preparation tools, including optional live tutoring. Based on English and math assessment results, students are placed in the following courses:

Subject	Score	Course Placement
English	0–25 items correct 26–40 items correct	**B080** Reading and Writing Strategies **ENC1101** English Composition
Math	0–7 items correct 8–20 items correct	**B087** Practical Math Lower-division Math / Natural Sciences course, as required in enrolled program

- Applicants to a program that has a stated minimum School of Nursing and School of Health Sciences Entrance Exam cumulative or total score acceptable for admission to the program are exempt from the Rasmussen Placement Assessment when the minimum score thresholds are met for that program according to the School of Nursing and School of Health Sciences acceptance policies.

  School of Nursing and School of Health Sciences applicants who do not meet the intended program's minimum score for entrance and whose HESI Cumulative Score is below 55% or whose TEAS Total Score is below 48.5% are required to take the University Placement Assessment in order to enroll in another program. Applicants who have achieved a HESI Cumulative Score of 55% or higher or a TEAS Total Score of 48.5% or higher within the past five years are exempt from the Rasmussen University Placement Assessment for any program that does not require a minimum School of Nursing and School of Health Sciences Entrance Exam score.

  Placement Assessment results are valid for five (5) years from the date of the assessment. If the results have expired, returning students who have not successfully completed the required Developmental Education courses, their equivalents, or the courses for which Developmental Education courses are prerequisites must retake the University Placement Assessment to determine placement upon return.

  Returning students who did not take the Placement Assessment and have successfully completed the courses at Rasmussen for which Developmental Education courses are prerequisites, or their equivalents, are not required to take the University Placement Assessment.

  Applicants who transfer from other universities, and whose Placement Assessment scores fall within the range of Developmental Education, will be required to complete the Developmental Education courses.

  Applicants may, after three months, have the option to retake the University Placement Assessment(s). When an extenuating situation exists, an appeal may be submitted to the Student Experience Office to allow an applicant to repeat the entrance exam in fewer than three months. See the Extenuating Circumstances Policy for details.
- Applicants providing a college transcript or grade report indicating a grade of C- or higher or a grade of Pass in college-level English Composition and/or mathematics are not required to complete University Placement Assessments in the corresponding subject area and will not require Developmental Education coursework in areas in which they have previously proven this proficiency.

  Applicants without a conferred associate's degree or higher and who have not completed a college-level English Composition course are required to complete the English placement examination. Students who have not completed a college-level math course are

required to complete the math portion of the placement assessment.

Applicants providing a transcript or grade report with a conferred associate's degree or higher from a United States (U.S.) accredited institution of higher learning as recognized by the U.S. Department of Education or by the Council for Higher Education Accreditation (CHEA) are not required to complete the University Placement Assessment in Reading and Writing and will not require Developmental Education coursework in this area. Students providing a transcript with a conferred associate's degree or higher indicating a grade of C- or higher in college-level mathematics are not required to complete the University Placement Assessment in mathematics and will not require Developmental Education coursework in this area.

- Applicants enrolling in a Master's or Doctoral-level program, or as a Non-Degree Seeking Individual Progress or Audit student, are not required to complete the Rasmussen Placement Assessment.

School of Nursing and School of Health Sciences Entrance Exam Policy

Potential students interested in enrolling in a Rasmussen University part of American Public University System (Rasmussen) School of Nursing or select School of Health Sciences programs must meet one of the acceptance requirements identified on the program's applicable program page of the most current catalog or addendum for their desired program. Potential students will be given access by Admissions to the online registration process for the entrance exam. The applicant may register and pay associated fees for the study materials and exam. The entrance exam must be administered in a proctored setting. Threshold exam percentages will not be rounded. Based on exam scores, applicants may apply for a Rasmussen program of study for which they qualify.

Potential students not meeting the exam score requirement are allowed a maximum of six attempts for any entrance exam attempted at a Rasmussen exam location within 24 months of the student's expected start date of a Rasmussen program. A minimum of one week (seven calendar days) between attempts is expected. Any entrance exam results dated more than 24 months before the expected start date of the Rasmussen University program will not be considered. The following exceptions apply:

- Applicants who have previously taken the entrance exam for admission to another institution may, at their own expense, have the results transferred to Rasmussen if the test date is within 24 months of the start date of the Rasmussen program. The University will verify the transferred scores. Transferred scores must meet all of the requirements for acceptance which means that some cumulative scores may be recalculated or may not be considered valid for the purpose of admission or acceptance. The University has the right to deny admission based on transferred results. Effective April 6, 2026, Illinois campuses will not accept transferred HESI or TEAS exam scores for applicants enrolling in a Nursing program.
- Students who are currently enrolled in a School of Nursing or School of Health Sciences program who transfer directly as an uninterrupted transfer (no time off between quarters) into a different program of study will not be required to requalify if the entrance requirements on file meet the threshold of the program into which they are transferring.
- Students who have left a Nursing program of study and wish to reenter into a Nursing program as an interrupted transfer must meet all eligibility requirements as outlined in the School of Nursing Reenter Policy for Pre-Licensure Programs; in this specific case, the initially qualifying Entrance Exam has a 24-month expiration from the last quarter in which attendance and grades were posted (i.e., the quarter of reentry must be within the 24-month expiration period).

Experiential Online Orientation

All prospective students, except as noted below, are required to complete an Experiential Online Orientation to be accepted at Rasmussen University. This required online orientation provides students with valuable tools and knowledge necessary for success at Rasmussen University. The following students are exempt from the online orientation unless they are changing/adding course delivery modalities:

- Graduates and Completers who return to Rasmussen University within one year following their graduation date.
- Returning students who reenter within two Rasmussen University academic start dates since withdrawing from the University and have a Cumulative GPA in their previous program of 2.0 or greater.
- Prior applicants who previously completed the online orientation within the two most recent Rasmussen University academic start dates.

- Individuals who, due to extenuating circumstances, may be allowed an exception granted by the Campus Executive Director. See the Extenuating Circumstances Policy for details.

Payment of Tuition and Fees

Financing your education is one of the most critical components to understand as you embark on your higher education experience. There may be several options available to you to finance your education, including scholarships, grants, tuition reimbursement, federal, state, and private student loans, as well as direct payments from you. For additional information regarding funding your education options, please visit https://www.rasmussen.edu/tuition.

Once a student has had their financial aid eligibility determined, a student payment will be scheduled for any balance not covered by financial aid resources. Student payments are due in full prior to or on the first day the term begins. It is your responsibility to ensure you have a financial plan in place prior to beginning classes. This includes completing and providing all the required information to Financial Aid prior to starting classes.

If a student has not submitted all requested financial aid eligibility documentation by the beginning of the fifth week of the quarter, a student payment will be scheduled for the full balance due immediately and must be paid by visiting the Pay Online section of the Student Portal at portal.rasmussen.edu. The University does not accept cash but does accept checks mailed to the Business Office and electronic payments including credit cards, debit cards, and electronic checks. The Business Office mailing address is: Rasmussen College, LLC, PO Box 713555, Chicago, IL 60677-0077. All electronic payments must be made through the link in the Pay Online section of the Student Portal.

Failure to pay all outstanding charges (tuition, fees, and other institutional charges) by the due date(s) or in full prior to the term end date may result in collection attempts and the inability to continue courses and withdrawal from the University. As you approach graduation, please ensure your account balance is paid in full prior to graduating, or you will not receive your diploma except when required by any applicable law. To view your student account balance information, visit the Student Account Center at portal.rasmussen.edu.

For any student using U.S. Department of Veterans Affairs Veterans Readiness and Employment (Chapter 31), Post 9/11 G.I. Bill® (Chapter 33) or Survivors and Dependents Education Assistance (Chapter 35) benefits, Rasmussen University part of American Public University System (Rasmussen) ensures that no penalty will be imposed, including the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, due to the delayed disbursement of a payment by the U.S. Department of Veterans Affairs. To qualify, the student may be required to provide the VA Certificate of Eligibility (COE) by the first day of class, a written request to be certified, or additional information necessary for the proper certification by the University.

Technical Requirements

Students are required to have personal laptops for classroom and online learning experiences, and for any other educational activity. Having the accessibility of a laptop allows students to stay connected with their classmates and faculty throughout their courses. Technology requirements for student laptops for all programs are listed below.

Please read this information carefully, as you must ensure that your computer is properly configured.

Please note that some courses require the use of software that is not compatible with Mac® computers. If you use a Mac, you may need to attend a campus, use a PC, or run the software in Windows® emulation mode to complete some required course activities and assignments.

1. Basic Computer Requirements

A fully functional Windows computer or Mac computer capable of running a Windows virtual machine is required. Additionally, a high-speed/broadband internet connection is strongly recommended.

- Chromebooks, Android devices, tablets, and mobile phones have limited compatibility with educational platforms and will not meet the minimum technological requirements, either in software or hardware, and cannot be supported by the IT Help Desk.

Windows®	Mac®
Intel® Core i5 10th generation or newer or AMD equivalent. ARM processors are not supported	Intel® Core i5 10th generation or newer or M1 or newer
Memory – 8GB of RAM or higher	Memory – 8GB of RAM or higher
Windows®11 operating system or newer recommended, minimum of Windows® 10 required	MacOS® Sequoia or newer
Disk space – at least 256GB available 500 GB preferred	Disk space – at least 500MB available
	Virtual Machine or Bootcamp with ability to run Windows 10
Installed copy of Microsoft® Office – Microsoft 365 licenses are provided for all enrolled students	Installed copy of Microsoft® Office – Microsoft 365 licenses are provided for all enrolled students

2. Additional Technical Requirements

Web Browser Requirements:

The following web browsers are formally supported and tested:

Windows®	Mac®
Google® Chrome, preferred	Google® Chrome, preferred
Microsoft® Edge	Safari®

Other

- Java®, if required
- Adobe Reader®
- Wired headset or wired earbuds if needed; wireless devices are not permitted
- Webcam for virtual lectures and exams, as applicable
- Cookies* enabled on browsers.

  ***** A cookie is a small file that is placed on your computer by the server. Cookies are a very common internet technology used by many websites, such as Amazon® or eBay®. Your browser has a setting that allows you to control whether you allow cookies or not. Since cookies are so common, your browser probably already has cookies enabled. If you are unsure whether your browser is set up properly, please contact Classroom IT Support at 833-606-1909.

Required Plug-Ins and Software

- **Acrobat Reader®:** Your courses may include .pdf files, which require the Adobe Acrobat Reader. If Acrobat is not installed on your computer, please download the free Adobe Acrobat Reader: http://get.adobe.com/reader/.
- **Microsoft® Office:** Your courses may require the use of Microsoft® Office (such as Word, PowerPoint, Excel, etc.). If you do not have Microsoft® Office, please call Classroom IT Support at 833-606-1909.
- **Anti-Virus Software: It is highly recommended that you obtain anti-virus software to protect your computer and files.**
- **Audio Equipment:** Certain programs, courses, or assessments may include team projects, Live Classrooms, or media-based projects that would require access to a microphone. Additionally, some programs utilize remote testing software that requires access to a wired headset with a microphone. Therefore, it is highly recommended that you have access to a wired headset and microphone for all programs and coursework (built-in microphones are sufficient).

3. School of Design Computer Requirements

Windows®	Mac®
Required: • Intel® 6th Generation or newer CPU, or AMD Ryzen™ 1000 Series or newer CPU • Advanced Vector Extensions 2 (AVX2) support **Recommended:** • Intel® 11th Gen or newer CPU with Quick Sync – or AMD Ryzen™ 3000 Series / Threadripper™ 3000 Series or newer CPU **Memory:** 16GB of RAM (32GB recommended) **GPU Requirements:** • Windows® with NVIDIA GPU: GPU must be of the Maxwell generation or newer and have at least 4GB of VRAM • Windows® with Intel® or AMD GPU: Discrete GPU with at least 4GB VRAM and support for OpenCL **Recommended:** • 8 GB of GPU Memory	**Required:** • Intel® 6th Generation or newer CPU • Advanced Vector Extensions 2 (AVX2) Support **Recommended:** • Apple® silicon M1 Pro, M1 Max, M1 Ultra or newer **Memory:** 16GB of RAM (32GB recommended) **GPU Requirements:** • Apple® silicon: 16GB of RAM • Intel® Macs with a discrete AMD GPU: 4GB of VRAM **Recommended:** • Apple® silicon: 16 GB of unified memory

Windows®	Mac®
Intel® Dual Core i5 current generation or higher (or equivalent) CPUs must support SSE4.2 and POPCNT instruction sets Windows® 10 (OS provided license through Microsoft® student downloads site) 8GB of RAM (12GB–16GB recommended) 500GB hard drive (1TB recommended)	Intel® Dual Core i5 current generation or higher MacOS® v12.6 Monterey or newer 8GB of RAM (12GB–16GB recommended) 500GB hard drive (1TB recommended) A Mac computer must be capable of running Microsoft Windows with a virtual machine environment, e.g., VMware® Fusion®, Parallels®, Virtual Box®, etc.

Every student is expected to be proficient and responsible with the technology required for their education; this includes:

- **Learning Management Systems**
- **Rasmussen e-mail:** Enrolled students are given a Rasmussen student e-mail address. This is the official e-mail address used to communicate with students. This is the e-mail address that students will use to communicate with faculty and staff. Students should check their Rasmussen e-mail at least daily.
  - E-mail services should only be used for academic communications. Students' use of e-mail should not interfere with others' use of the systems and network. E-mail use shall comply with all federal and state laws and all academic unit policies.

- **IT Help Desk:**While students are welcome and encouraged to contact the IT services available through their campuses for assistance, issues that cannot be resolved locally are escalated to the support team that manages the learning management system. This team can be reached by phone or email:
  - For assistance, contact Classroom IT Support at 833-606-1909 or ClassroomSupport@rasmussen.edu
- **Student Portal:** Students are required to utilize the Student Portal throughout their program. It will be used to post vital information, send reminders and access the Student Account Center. It is the responsibility of the student to access the Student Portal to:
  - Access their courses in learning management systems
  - Access course resources, including the library and tutoring support
  - View the academic calendar
  - Read news postings, including Campus Closure alerts
  - Access career services information
  - Utilize 24/7 tech support and troubleshooting the learning management systems
  - Access the Student Account Center to:
    - Access unofficial transcripts
    - Update personal contact information
    - View the student ledger and pay tuition

Remote Proctoring and Locked Web Browser Policy and Requirements

As part of an effort to use available technology to improve your learning experience by providing convenience, security, and cost-effective education, Rasmussen University part of American Public University System (Rasmussen) requires students to use a locked web browser to enable remote proctoring in some or all courses within its academic programs. The use of locked web browser will require individual student activity to be recorded, both audibly and visually, during certain assessment sessions. Biometric identifiers and information, which include but are not limited to voiceprints and facial geometry scans, may be collected and stored for the purpose of identifying and monitoring students. Other data related to individual student activity during assessment sessions may also be recorded by the locked web browser, including, without limitation, the time taken by a student to answer specific inquiries on an assessment. The locked web browser may analyze the recordings through automated processes to generate additional data derived from the recordings, with the additional data being associated with individual students for use by Rasmussen in evaluating the recordings. The additional data, as well as the original recordings, may be evaluated by Rasmussen employees, including instructors, to review, assess, and analyze student performance and conduct, among other things, for the purpose of improving educational processes for students, including investigating student conduct violations. Rasmussen works with the locked web browser vendor to help ensure privacy regarding the recordings and to comply with federal regulations as to any information or data (including any of the video or audio recordings). Biometric identifiers and information Rasmussen collects from the locked web browser will be destroyed after the initial purpose for collecting or obtaining such identifiers or information has been satisfied or within three years from the student's last interaction with the University.

The locked web browser must be downloaded and installed for use on the student's computer. Therefore, students must possess or have access to a computer that meets the Technical Requirements Policy's Basic Computer Requirements. Immediately before and during an assessment, the use of a webcam and microphone will be necessary. The webcam will be used to record the assessment and will capture the student's image, proof of federal or state photo identification, and an environmental scan of assessment surroundings. The microphone will be used to record the student's voice and any surrounding noises during the assessment.

Students are responsible for their conduct and activities arising during use of locked web browser and for any information or data provided to or through the locked web browser. Rasmussen is not responsible for, nor liable for, any mistakes, inaccuracies, lack of usefulness, defamation, omissions, falsehood, obscenity, or otherwise offensive material in any of the information or data provided through use of the locked web browser by users. Rasmussen does not, and has no obligation to, monitor, pre-screen, or pre-approve information or data, but Rasmussen shall nonetheless have the right (but not the obligation) in its sole discretion, to refuse, delete, or move any information or data that is available via the locked web browser, for any reason, including a violation of any policy.

Students agree that they will not infringe the intellectual property rights of others during use of the locked web browser. Students acknowledge that exams, assessments, and other materials of Rasmussen are protected intellectual property and may not be copied or

shared. Students also agree that Rasmussen is not responsible for protecting any intellectual property rights they, or another party, may assert in any information or data provided to the locked web browser.

University Acceptance or Denial of Enrollment for Bachelor-Completer Programs

The University will notify each applicant in writing of acceptance or rejection based on fulfillment of the University Acceptance or Denial requirements and the following requirements:

- Completion of the Online Orientation.
- Applicants must have a conferred associate's or bachelor's degree from an accredited institution that is recognized by the U.S. Department of Education or the Council for Higher Education Accreditation (CHEA).

  Alternatively, select programs may accept students who have successfully completed 60 quarter or 40 semester college-level credits with a grade of C- or higher in each course from an accredited institution that is recognized by the U.S. Department of Education or the Council for Higher Education Accreditation (CHEA). Any student who has not successfully completed college-level math and college level English Composition coursework with a grade of "C-" or higher must achieve a score on the University Placement Assessment acceptable for admission into the University at a level that does not require developmental coursework. See Transfer of Credit Policies for program-specific acceptance requirements.
- In order to determine eligibility and acceptance, official and unofficial transcripts as well as grade reports from accredited institutions that are recognized by the U.S. Department of Education or the Council for Higher Education Accreditation (CHEA) will be evaluated per the transfer policy of Rasmussen University. Upon completion of the assessment, the applicant will receive a transfer credit evaluation that includes a summary of the courses that may be accepted for transfer. Official transfer of credit (TR) will be awarded for those courses upon receipt of an official transcript and enrollment in a program.
- An applicant may be accepted into a bachelor-completer program, which includes the Information Technology Project Management Certificate program, upon receipt of official or unofficial transcripts, which prove prior credits. Official or unofficial transcripts must be received no later than the sixth business day of the first term of enrollment in order to begin the program. A student who starts at the beginning of a quarter will be withdrawn from the University if official transcripts are not received by Friday of the thirteenth week of enrollment. A student who starts Term 2 of a quarter will be withdrawn from the University if official transcripts are not received before the beginning of Term 2 of the subsequent quarter. In the event that acceptance was based on credits earned at multiple institutions, the official transcript from each institution must be received by the deadline.

  Note that program-specific acceptance requirements may apply.

Background Checks & Immunizations

Background Checks Policy

For some programs, Rasmussen University part of American Public University System (Rasmussen) requires students and potential students to pass background checks for admission or program changes / program transfers. An additional and different background check may also be required during active enrollment prior to practicum or clinical placement depending on site requirements. An additional background check may include components that are different than those originally checked at the time of admissions. Note that "passing" a criminal background check for the purpose of program acceptance or practicum or clinical placement is determined by Rasmussen, in its sole discretion. The background check is designed to alert students and potential students to issues that may impair their ability to complete clinical, externship, or practicum activities or to obtain employment upon graduation. The background check is also designed to prevent the accumulation of unnecessary student loan debt.

Background check requirements are program specific. See the program pages in the Rasmussen Catalog for the background check requirement for each program.

General Background Check and Florida Level 2 Background Check Processes

A general background check is one that is conducted through Rasmussen University's chosen third-party vendor. Potential students enrolling or students preparing for practicum or clinical experiences in any program requiring a general background check will agree to the terms and conditions of the background check process as part of placing the order through the vendor. Potential students enrolling or students preparing for practicum or clinical experiences in any program requiring a background check meeting the Florida statutory definition of a Level 2 background check must complete and return to the University a VECHS Waiver Agreement and Statement.

If the background check reveals any history, Rasmussen University will individually assess the students' or potential students' result to determine whether the students or potential students are eligible to start the program or qualify for practicum or clinical placement.

The University will send either a possible issue letter or a pre-adverse action letter to all students or potential students whose background check reveals any history. A possible issue letter informs potential students or students that a potential problem revealed in their background check may prevent them from completing practicum or clinical activities and/or finding employment in-field after graduation. Students or potential students who receive a possible issue letter may acknowledge the issue and make an informed decision to continue with the program, they may choose to change programs, or they may choose to withdraw from the University.

A pre-adverse action letter informs the students or potential students that the University is about to take adverse action. After receiving a pre-adverse letter, the student may contact the third-party background check firm conducting the general background check or the Florida Department of Law Enforcement and/or FBI conducting the Florida Level 2 background check directly to dispute the information contained in the background check before the University takes adverse action. Unless a dispute is filed, within seven days of sending the pre-adverse action letter, the University will send an adverse action letter indicating the action to be taken, which could include not allowing the potential student to enroll in a certain program, not allowing the student to continue in a practicum or clinical placement, or removing a student from the University.

If the student or potential student wishes to appeal an adverse decision, a written appeal should be submitted following the instructions provided with the adverse action letter. The University will review the appeal and issue a final decision. A denied appeal may cause the potential student or student to become ineligible for enrollment in any program requiring a background check or in any program offered by the University.

A potential student enrolling in a program requiring a general or Florida Level 2 background check may begin attending provisionally if the general or Florida Level 2 background check is in progress, but not complete, at the start of the potential student's first academic period of enrollment. This provision of this policy does not apply to the Physical Therapist Assistant Associate's Degree program whose potential students must have completed the background check process in its entirety, including any required appeal process, before being accepted and starting the program.

If the potential student begins attending while the general or Florida Level 2 background check is in progress and is subsequently issued an adverse action letter and chooses not to appeal, then the potential student will be withdrawn, and any tuition and fees billed will be credited.

If the potential student begins attending while the general or Florida Level 2 background check is in progress and is subsequently issued an adverse action letter, chooses to appeal, and the appeal is denied, then the potential student will be withdrawn, and any tuition and fees billed will be credited.

If at the end of the potential student's first academic period of enrollment the general or Florida Level 2 background check process is still in progress, the potential student may not continue into a second academic period and will be withdrawn until future enrollment eligibility can be determined.

A potential student enrolling in a program that requires a background check will not have their financial aid submitted until the potential student is determined to be eligible through a clear to proceed memo. This process may delay a potential student's funding until the general or Florida Level 2 background check process is complete.

A student who is required to submit to any background check as a condition of practicum or clinical placement during active enrollment who is subsequently denied continued enrollment as a result of the background check will receive no refunds or credits greater than what is allowed by the institution's refund policy for any tuition and fees previously billed or paid. In this circumstance, final grades will be awarded according to the institution's course Course Drop Policy and Course Withdrawal Policy.

A student or potential student whose appeal has been denied has the right to file one request for reconsideration to regain future enrollment eligibility but must provide supplemental or additional information not previously available to support such a request for reconsideration.

Minnesota Department of Human Services Background Check Process

A potential student enrolling in any of the MDHS designated programs will complete an Order Initiation Form. Part of the completion of this form will require review and acceptance of the Minnesota Department of Human Services Background Study Notice of Privacy Practices.

Upon completion of the Order Initiation Form, Rasmussen University part of American Public University System ("Rasmussen") will initiate and submit a background study application to the MDHS via the NetStudy 2.0 system. Once accepted by the MDHS, the MDHS will require the potential student to sign a Consent and Disclosure Form, which will ask the potential student to disclose any prior criminal history directly to MDHS and provide consent directly to MDHS to act on the initiated background study application. Potential students will also be required to schedule an appointment with a MDHS-authorized fingerprint vendor to have their fingerprints and photograph taken. Potential students will have 14 days to complete both of these processes.

A potential student enrolling in a program requiring a MDHS background check may begin attending provisionally if the background check is in progress, but not complete, at the start of the potential student's first academic period of enrollment. This provision of this policy does not apply to the Physical Therapist Assistant Associate's Degree program whose potential students must have completed the background check process in its entirety before being accepted and starting the program.

If the potential student does not complete the consent and disclosure process and present for fingerprinting and photographing within 14 days of the study being submitted to MDHS by Rasmussen, then the MDHS will issue an Order for Immediate Removal, and Rasmussen will subsequently deny enrollment. However, this denial does not preclude enrollment in future start dates. Depending on when the order is received, potential students may be able to restart the background check process for the current start date or may restart the background check process for a future start date.

Once the potential student has completed the consent and disclosure process and has been fingerprinted and photographed, MDHS will make an initial results determination and inform the University. The University will then make an enrollment determination based on the MDHS's initial results determination.

If the MDHS issues a clearance determination, then Rasmussen will issue a clear to proceed notice, allowing the potential student to meet the background check requirement for enrollment.

If the MDHS issues a disqualification determination or a more time required notification requiring supervision, then Rasmussen will issue an adverse letter denying enrollment. If the potential student had begun attending while the MDHS background check was in progress and is subsequently issued an adverse action letter, then the potential student will be withdrawn, and any tuition and fees billed will be credited. Persons who receive a disqualification determination from the MDHS may seek a commissioner's reconsideration with the MDHS but cannot remain enrolled while doing so.

If the MDHS issues a more time required notification that does not require supervision, then Rasmussen will allow the potential student to attend class for one quarter while the MDHS finalizes its decision. If the MDHS has not finalized its decision by the end of the potential student's first quarter of enrollment, the potential student will be withdrawn from the University and any tuition and fees billed for the first quarter of attendance will be credited. If the MDHS finalizes its decision with a clearance determination after the withdrawal, the potential student will be eligible for reentry/re-enrollment for the next subsequent start date. This provision of this policy does not apply to the Physical Therapist Assistant Associate's Degree program whose potential students must have completed the background check process in its entirety before being accepted and starting the program.

In either of the circumstances described in the preceding two paragraphs, final grades of "C" or higher awarded in courses completed while the background check was in process will appear on the transcript and will count toward the cumulative grade point average. Final grades of "C-" or lower in courses completed will not appear on the transcript and will have no effect on the cumulative grade point average. Courses attempted, but not completed prior to withdrawal due to an adverse background check will not appear on the transcript and will have no effect on the cumulative grade point average.

A potential student enrolling in a program that requires an MDHS background check will not have their financial aid submitted until the student is determined to be eligible through a clear to proceed memo issued by Rasmussen. This process may delay a student's funding until the background check process is complete.

A student who is required to submit to the MDHS background study as a condition of practicum or clinical placement during active enrollment who is subsequently denied continued enrollment as a result of the background check will receive no refunds or credits greater than what is allowed by the institution's refund policy for any tuition and fees previously billed or paid. In this circumstance, final grades will be awarded according to the institution's Course Drop Policy and Course Withdrawal Policy.

New criminal history subsequent to the initial background check could result in the MDHS issuing a RAPBACK determination during the student's enrollment. If a RAPBACK determination is received that prevents a student from providing direct contact services, the student will receive an adverse determination from the University withdrawing the student from continued enrollment. A student receiving an adverse determination as the result of a RAPBACK determination by MDHS will receive no refunds or credits greater than what is allowed by the institution's refund policy for any tuition and fees previously billed or paid. In this circumstance, final grades will be awarded according to the institution's Course Drop Policy and Course Withdrawal Policy.

Immunization Requirements

Minnesota law (M.S. 135A.14) requires proof that all students born after 1956 are vaccinated against diphtheria, tetanus, measles, mumps, and rubella, allowing for certain specified exemptions. Non-exempt students must submit the required vaccination information within 45 days after their first enrollment, or they cannot remain enrolled. Please see the campus for a list of possible exceptions.

In addition to other acceptance requirements, Health Sciences and Nursing programs may require specific immunizations upon enrollment. Please see your campus for details.

Reenter Policies

Reenter Policy

A reenter status is defined as any student who withdraws or is administratively withdrawn from all courses after the course drop period in any term and returns in a subsequent quarter/term. A student will not be considered for reentry in the same quarter in which they posted attendance and withdrew or were withdrawn. Reentering students are treated as new students for the purposes of tuition and fees, academic program requirements, and graduation standards. Students who are reentering into programs that require either a conferred degree or at least 60 credits for acceptance may be considered for reentry in the next full quarter/term only upon submission of official transcripts. They must also meet all acceptance requirements as stated in the current catalog. Students will reenter into the current curriculum. Any exceptions to this policy need to be approved by the Dean. For the calculation of Satisfactory Academic Progress, reentering students are treated as continuing students and must meet progress requirements. See Satisfactory Academic Progress Policy.

Reentering students who at the time of their most recent withdrawal had outstanding acceptance requirements for their program such as high school validation, Online Orientation, Nursing Orientation, nursing immunization, clear background check, receipt of official transcripts, or any other acceptance requirement may be considered for reentry only upon meeting all acceptance requirements at the time of reentry review.

If a student is not meeting Satisfactory Academic Progress at the time of withdrawal and wants to switch to a different program upon return, the Program Transfer Policy must be followed. Students returning in satisfactory academic standing or on Financial Aid Warning must have a financial balance of $2,000 or less to be considered for return. All returning students must pay their balances in full prior to the term end date as outlined in the Payment of Tuition and Fees policy. Students returning on Financial Aid Probation, regardless of aid status, must have a zero financial balance and have paid half the tuition amount of the upcoming quarter/term by seven calendar days after the quarter/term start. Students in Health Sciences programs must complete a programmatic assessment to determine an appropriate level of reentry. These students will be allowed to reenter if space is available and all other reentry requirements are met.

Students reentering into or transferring to the Physical Therapist Assistant program must complete the requirements as detailed in the Physical Therapist Assistant Associate's Degree Program Re-enrollment Policy. Students reentering into or transferring to a Nursing program must also complete the requirements as detailed in the School of Nursing Reenter Policy for Pre-Licensure Programs.

Supplemental Reenter Policies

- Nursing Reenter Policy - Pre-licensure Programs
- PTA Program Re-enrollment Policy

School of Nursing Reenter Policy for Pre-Licensure Programs

Students who have been dismissed from an undergraduate, pre-licensure School of Nursing program at Rasmussen University part of American Public University System ("Rasmussen") (defined as the Practical Nursing Diploma program, Professional Nursing Associate's degree program, and the Bachelor of Science in Nursing degree program through the Standard Entrance Accelerated BSN Entrance Option and the Second Degree Accelerated BSN Entrance Option) for disciplinary or conduct reasons will not be eligible for reentry into Rasmussen's School of Nursing programs and are not eligible for reentry to any program through the Rasmussen academic unit.

Reentry is subject to both the School of Nursing Repeating Courses and Course Withdrawal Policy for Pre-Licensure Programs and the School of Nursing Course Expiration Policy for Undergraduate Programs .

Students who have been administratively withdrawn from an undergraduate, pre-licensure School of Nursing program at Rasmussen due to 1) twice failing the same core course as designated by course prefix NUR or PRN, 2) failing any two core courses as designated by course prefix NUR or PRN, or 3) twice withdrawing from the same course as designated by course prefix NUR or PRN are eligible for reentry into the same School of Nursing program within the Rasmussen academic unit after two full academic quarters have passed from the last quarter in which attendance and grades were posted when Rasmussen's Academic Appeal Committee approves an exception to the School of Nursing Repeating Courses and Course Withdrawal Policy for Pre-Licensure Programs . Otherwise, the student may be eligible for reentry into the same School of Nursing program within the Rasmussen academic unit after four full academic quarters have passed from the last quarter in which attendance and grades were posted, at which time all core nursing courses will have expired. See the School of Nursing Undergraduate Handbook for Rasmussen University part of American Public University System for additional information.

Nursing students will have their previously completed nursing core courses (as designated by course prefix NGR, NUR, and PRN) assessed against the current program to determine which course(s) will be applied to the program into which they are enrolling. All previously completed general education courses will be applied as required in the program. Rasmussen University will allow the student to reenter at the appropriate level in a current program if a space in the program is available and all other reentry requirements are met.

All core Nursing coursework, whether passed or failed, from any prior enrollment will remain on the student's academic record. When a nursing student reenters after the course expiration period as defined in the School of Nursing Course Expiration Policy for Undergraduate Programs , no previously failed core nursing courses will apply for the purpose of determining the number of failed core nursing courses or apply for the purpose of determining Satisfactory Academic Progress. See See Satisfactory Academic Progress Policy . The final quarter of a pre-licensure, undergraduate School of Nursing program is defined as the quarter in which the student is enrolled in the Capstone or Transition to Practice course for the first time. This exception will be to repeat the failed course(s) one time in the subsequent quarter if the following criteria are met:

- The student has only one quarter to pass their repeated course(s), including withdrawn and failed attempts.
- The student must be meeting SAP and other continuing enrollment requirements (including clinical compliance) to be eligible to repeat the final term failed course(s).
- The students understand they may not be eligible for financial aid based on total credits registered.

This provision only applies if the student remains continuously enrolled to repeat the failed course in the quarter immediately following the quarter where the failed grade was earned.

Physical Therapist Assistant Associate's Degree Re-enrollment Policy

A Physical Therapist Assistant (PTA) program re-enrollment is defined as any student who was enrolled in the Physical Therapist Assistant program and previously attempted any program-specific core course (PHT prefix) and earned a grade of A-F or W in those courses. This includes students who have withdrawn from the program and/or withdrawn from the University. The University reenter and program transfer policies apply to any Physical Therapist Assistant student who withdrew from the program prior to attempting any core courses (PHT prefix).

Reenrolling students are treated as new students for the purposes of tuition, academic program requirements, and graduation standards. Re-enrollment is limited to one time for students withdrawn from the program for any reason. However, students who have been administratively withdrawn/dismissed from the Physical Therapist Assistant program for disciplinary or conduct reasons may not be eligible for re-enrollment into the program and may not be eligible for reentry to Rasmussen University.

Reenrolling students admitted to a subsequent PTA cohort must meet all current acceptance requirements as identified in the Acceptance Requirements for the Physical Therapist Assistant Associate's Degree program. Acceptance is also subject to cohort size limitations at the campus to which they are applying. In addition, reenrolling applicants are required to demonstrate competencies from previously passed or completed PHT courses. An applicant must prove competencies in course sequence order. At any point that competencies are not proven, the applicant cannot attempt any subsequent competencies. Students will be allowed one attempt to achieve a passing grade as defined by the Health Sciences Program Grade Scale on each of the required competencies. Failure to meet this threshold will require the student to retake the associated courses in the program. Competency assessment may begin no earlier than six (6) months prior to the start date of the reenrolling quarter and must be completed no later than the Friday two weeks prior to the start date of the reenrolling quarter. See Satisfactory Academic Progress Policy.

Non-Program Enrollments

Auditing a Course

A student who audits a course does so for the purposes of self-enrichment and academic exploration. Students who are not enrolled in an eligible program and elect to take courses without earning college credit are considered Audit students. This noncredit option is NOT available to students for courses beginning with: CDA, CEN, CET, CIS, CJK, CNT, COP, COT, CTS (excluding **CTS2511**), EEC, EEX, GRA, HIM, ISM, MEA, MLT, NUR, PHT, PRN, PTN, RTE or STS, or with a course level of 5000 and above. However, a student who is enrolled in a program or is a graduate of a program, in which any of the course prefixes identified above exist, may be eligible to take the course as an Audit if the student's Rasmussen University part of American Public University System (Rasmussen) transcript reflects that a prior passing grade was earned when they were enrolled in a program. An Audit student is not eligible to complete any laboratory or clinical components of a course or any externship or internship, practicum, or practical experiences.

However, a student who is enrolled in a Health Sciences program may be eligible to audit a laboratory component of the course with approval from the Dean or program coordinator. Graduates of Rasmussen School of Nursing programs may audit a Nursing core course as an Individual Progress student based on course and space availability and with the approval of the Dean of Nursing/Nurse Administrator. Graduates of Rasmussen School of Health Science programs with licensure or certification requirements may audit a course with one of the prefixes identified above as an Individual Progress student based on course and space availability and with the approval of the Dean. Approval to audit a course in the School of Nursing or the School of Health Science must be received prior to enrolling as an Individual Progress student.

Students who elect to complete courses on a noncredit basis are not guaranteed full technology access; however, every effort will be made to provide technology resources. An Audit student is considered a learner and it is expected that the student will participate with reasonable regularity and do assigned work. Competency-based education courses are not eligible for Audit. The ability to Audit a course is based on space availability. Audited courses are not eligible for Title IV funding. Transcripts denote a grade of "AUDIT" upon completion of the course.

Rasmussen University Early Honors Program

The Early Honors Program through Rasmussen University part of American Public University System ("Rasmussen") allows high school students to experience college-level courses while enrolled in high school. Through this opportunity, students can have access to courses not offered at their high school and explore potential career areas. Eligibility is limited to high school juniors and seniors who are at least 16 years old at the time of enrollment. All Early Honors Program coursework is fully online and there is no course instruction at a local campus.

Early Honors Program Terms and Conditions

Students must meet the following criteria and expectations to participate in the Early Honors Program:

- Applicants must complete an Early Honors Program application, which includes a high school attestation indicating expected graduation date.
- Applicants must have prior approval from a parent/guardian to be admitted into the program (requires a signed Early Honors Parent/Guardian Approval form).
- Applicants must have prior approval from a high school guidance counselor or administrator to be admitted into the program (requires a signed Early Honors High School Approval Form)
- Applicants must be high school juniors or seniors and have a minimum cumulative high school grade point average of 2.25 out of a possible 4.00. Proof of GPA must be validated by a High School Counselor or Administrator on the Early Honors High School Approval form.
- Applicants must score at least a 26 on the English portion of the entrance placement exam to be accepted to the Early Honors Program.
- The Early Honors Program application deadline is four weeks prior to the start of the intended quarter of enrollment.
- Enrollment in the program is limited to 20 students per quarter, per campus.
- Early Honors Program students may enter the Early Honors Program no earlier than the Rasmussen's Fall Quarter aligning with their high school junior year.
- Early Honors Program students may not remain enrolled in the Early Honors Program any later than the Rasmussen's Spring Quarter aligning with their high school senior year.
- A maximum of 24 credits per student can be taken in the Early Honors Program.
- To continue enrollment in the Early Honors Program, students must maintain a minimum Rasmussen cumulative grade point average of 2.0.
- The applicant must meet with the Director of Admissions or the Campus Executive Director before being accepted to ensure the student meets all criteria and requirements, and to approve the schedule.
- Early Honors students will be accepted on a space available basis for each course selected.
- Early Honors Program students must meet all course prerequisites as listed in the catalog.
- Courses designated with a CJK, HIM, MEA, MLT, NUR, PHT, PRN, PTN, RTE or STS prefix, or with a course level of 5000 and above, are not available to Early Honors students.
- Early Honors students may take up to 8 credits per quarter without a tuition charge.
- Most technology courses require access to specialized hardware and software. Early Honors students will need to secure access to required hardware and software. The University will provide specific technology requirements information for each course.
- Early Honors Program students will receive college credit twords a degree, diploma or certificate through the Rasmussen academic unit of American Public University System for all successfully competed courses
- Early Honors Program students will be issued an official transcript from American Public University System. These credits may be transferable at the discretion of the receiving institution or academic unit.
- Early Honors Program students will receive high school dual enrollment credit for passed Early Honors courses at the discretion of the student’s high school. Approval for dual enrollment credit must be confirmed on the High School Approval Form.
- Early Honors Program students may apply to a full program offered by Rasmussen through the regular admissions process.
- Credits earned through the Rasmussen Early Honors Program are not eligible for dual enrollment credit at Florida high schools or through secondary home education programs pursuant to Section 1007.271, Florida Statutes.

- The Illinois Dual Credit Quality Act (110 ILCS 27) requires high school districts to enter into a contract with institutions of higher education to provide dual credit coursework. For the purpose of the Illinois Dual Credit Quality Act, American Public University System is classified as an out-of-state institution. A school district may not enter into a new contract with an out-of-state institution to provide a dual credit course without first following the procedural requirements of the Dual Credit Quality Act. If a school district does not have a contract with American Public University System meeting the requirements of the Dual Credit Quality Act, then the credits earned through the Rasmussen Early Honors Program are not eligible for dual enrollment credit.
- The Early Honors Program is not a state-approved Postsecondary Enrollment Option (PSEO) program pursuant to the Postsecondary Enrollment Options Act (Minn. Stat. 124D.09). Therefore, Minnesota high school students are not eligible to earn dual high school and college credit through the Early Honors Program.
- American Public University System makes no guarantee that its Early Honors Program will meet any state's dual credit enrollment requirements. It is the responsibility of the High School Official to determine whether postsecondary credits earned through Rasmussen's Early Honors Program can be accepted and applied to secondary education requirements in the high school's state.
- Students in the Early Honors Program are not eligible to apply for Title IV benefits. No additional grants or scholarships will be applied to students in the Early Honors program.

Individual Progress

Students may enroll in one or more courses at a time, or in succeeding quarters, without enrolling in a program of study. Courses beginning with CJK, HIM, MEA, MLT, NUR, PHT, PRN, PTN, RTE, or STS, or with a course level of 5000 and above cannot be taken as individual progress courses. For courses with prerequisite requirements, the prerequisites do not apply. To be considered for admission, individual progress students must complete the application form and attestation of high school graduation. The Rasmussen University part of American Public University System (Rasmussen) entrance placement exam is not required for IP students. Individual progress coursework is assessed at the full cost per credit for each course. Individual progress students remain enrolled at Rasmussen as long as they continue to select coursework and meet all additional requirements. Upon earning a final grade in their courses, individual progress students will receive a letter grade and be awarded credits.

To enroll in a program at Rasmussen, students must complete all remaining programmatic application requirements (including the entrance placement exam). Eligible individual progress courses will be applied to their degree program, and count as credits attempted and earned for purposes of Satisfactory Academic Progress (SAP).

Students not in good academic standing in their most recently enrolled program are not eligible to enroll as an Individual Progress student for the purpose of taking course(s) that will apply to that program and bring them to good academic standing.

Tuition, Fees, and Financing

Tuition Rates & Fees

Tuition Rates

Tuition rates are effective as of:

- August 12, 2026, for new and reentering students with a start date of August 12, 2026 or later.
- October 5, 2026, for current students with a start date of July 6, 2026 or prior, or who transfer from any program to any new program Fall quarter 2026 or later.
- Radiologic Technology Associate's students – Effective July 6, 2026 for new and reentering students who started in this program Summer quarter 2026 or later. Effective October 5, 2026, for current students who started in this program May 13, 2026 or prior.
- Bachelor of Science in Nursing – RN to BSN students – Effective October 5, 2026 for new and reentering students. 2025-2026 tuition and fees apply to prior RN to BSN students who reenroll in the RN to BSN program and start on August 12, 2026.

Tuition	Part-Time[1]	Full-Time[1]
School of Business		
Standard Tuition Rate - All programs except as listed below	$376 per credit	$332 per credit
Master of Business Administration	$235 per credit	$235 per credit
Master of Human Resources Management	$235 per credit	$235 per credit
School of Technology		
Standard Tuition Rate (all programs)	$376 per credit	$332 per credit
School of Design		
Graphic Design Associate's	$360 per credit	$305 per credit
Graphic Design Bachelor's	$340 per credit	$267 per credit
School of Education		
Early Childhood Education Certificate, Diploma and Associate's	$220 per credit	$220 per credit
Early Childhood Education Bachelor's - Standard Tuition Rate	$376 per credit	$332 per credit
School of Human Services		
All programs	$274 per credit	$234 per credit
School of Justice Studies		
Standard Tuition Rate - All programs except as listed below	$376 per credit	$332 per credit
Law Enforcement Certificate and Associate's	$412 per credit	$357 per credit
School of Health Sciences		
Standard Tuition Rate - All programs except as listed below	$376 per credit	$332 per credit
Healthcare Certificate	$339 per credit	$339 per credit
Medical Assisting Diploma	$339 per credit	$339 per credit
Healthcare/Health Sciences Associate's - Medical Assisting specialization	$339 per credit	$339 per credit
Medical Laboratory Assistant Associate's	$382 per credit	$382 per credit
Radiologic Technology Associate's - For program start date of May 13, 2026 and earlier	$382 per credit	$382 per credit

Radiologic Technology Associate's - For program start date of July 6, 2026 and later	$425 per credit	$425 per credit
Surgical Technologist Associate's	$382 per credit	$382 per credit
Physical Therapy Assistant Associate's	$394 per credit	$394 per credit
Master of Healthcare Administration	$235 per credit	$235 per credit
Master of Public Health	$235 per credit	$235 per credit
School of Nursing		
Practical Nursing Diploma		
Florida campuses	$384 per credit	$384 per credit
Minnesota campuses	$420 per credit	$420 per credit
Professional Nursing Associate's - All campuses except Moorhead, MN campus	$464 per credit	$464 per credit
Moorhead, MN campus	$415 per credit	$415 per credit
Bachelor of Science in Nursing - Pre-licensure entrance options	$392 per credit	$392 per credit
Bachelor of Science in Nursing - RN to BSN entrance option	$300 per credit	$300 per credit
Master of Science in Nursing	$295 per credit	$295 per credit
Master of Science in Nursing - Nurse Practitioner specialization courses (41 credits) - Core course credits (28) are $295 per credit	$925 per credit	$925 per credit
Post-Graduate Certificate	$295 per credit	$295 per credit
Post-Graduate Certificate - Nurse Practitioner	$475 per credit	$475 per credit
Doctor of Nursing Practice	$750 per credit	$750 per credit

Notes to Tuition

- **Tuition for Master's Level Course Substitutions:** Master's degree level courses substituted into a bachelor's degree program will be billed at the full-time or part-time tuition rates of the bachelor's degree program. All other fees of the bachelor's degree program remain applicable.
- **Exception for Active Military:** Students who are active duty uniformed military receive reduced tuition pricing of $167 per credit hour, excluding doctoral degree programs. See the Military Tuition Rate and Grants Policy for details.

1. **Program Length**: See the Course Description Overview section for the definitions of Full-Time and Part-Time status.

Additional Tuition Information

- For tuition purposes only, full-time undergraduate students are defined as taking 12 or more credits per 11-week quarter. Students taking fewer than 12 credits per quarter are considered part-time students.
- For tuition purposes only, students in programs delivered in the 11-week quarter format taking 8 or more credits when enrolled in a single 5.5-week term of an 11-week quarter are considered full-time students.
- A change in the number of credits taken during a term or quarter may lead to tuition being assessed at a different rate if a student moves from part-time to full-time or vice versa.
- FAST TRACK: Students in undergraduate programs taking 16 or more credits in an 11-week quarter will only be charged tuition for 16 credits. Applicable course technology and resource fees still apply for all courses, including those above 16 credits. Students will still be responsible for purchasing their textbooks or e-books for all courses in which they are enrolled, including those above 16 credits, whether they purchase the textbooks or e-books through Rasmussen University part of American Public University System (Rasmussen) or through another source. Students enrolled in the Bachelor of Science in Nursing through any Entrance Option, the Law Enforcement Associate of Applied Science program, and students enrolled as Individual Progress do not qualify for Fast Track pricing.
- Individual Progress students will be charged at the School of Business part-time rate, plus the applicable Course Technology and Resource Fee. Individual Progress students are not eligible for self-directed assessments and credit by examination.
- Audit students who elect to take courses without earning university credit are charged $226 per credit hour plus the applicable Course Technology and Resource Fee and book fees for each course.
- Students with tuition rates at or lower than $267 per credit for full-time rates and $340 per credit for part-time rates are not eligible for any grants or scholarships offered by the University.
  - Students who start the Healthcare Certificate, Medical Assisting Diploma, or Healthcare/Health Sciences Associate degree program with Medical Assisting specialization on or after May 8, 2024 may be eligible for institutional grants regardless of program or course tuition rate, provided they meet all other applicable terms and conditions for the grants.
  - Students enrolling in the Master of Science in Nursing degree programs on or after January 3, 2023 may be eligible for institutional grants regardless of program or course tuition rate, provided they meet all other applicable terms and conditions for the grants.
  - Students enrolled in the Nursing Post-Graduate Certificates in Nursing Education, Nursing Leadership and Administration, or Healthcare Technology, Simulation, and Informatics specialization are not eligible for any grants or scholarships offered by the University.

Program Administrative Fee

Rasmussen University charges a non-refundable program administrative fee in the first term of enrollment for all new, reentering, and program transfer students enrolled in a program. This fee covers some of the costs of administering each program, including but not limited to administrative and operational costs associated with: application processing, enrollment agreements, graduation audits, program-specific requirements, and coordination and oversight of clinical, externship, practicum, or preceptorship placements.

- $125 administrative fee for all programs except as listed below
- $225 administrative fee for the following program:

  – Bachelor of Science in Nursing Degree, RN to BSN Option

- $350 administrative fee for each of the following programs:

  – Medical Assisting Diploma
  – Medical Laboratory Technician Associate’s Degree
  – Physical Therapist Assistant Associate’s Degree
  – Radiologic Technology Associate’s Degree
  – Surgical Technologist Associate’s Degree
  – Law Enforcement Academic Certificate
  – Law Enforcement Associate’s Degree

- $495 administrative fee for each of the following programs:

  – Practical Nursing Diploma
  – Professional Nursing Associate's Degree
  – Bachelor of Science in Nursing Degree, Second Degree Accelerated BSN (A-BSN) Option
  – Bachelor of Science in Nursing Degree, Standard Entrance Option
  – Master of Science in Nursing – Nurse Practitioner
  – Post-Graduate Certificate – Nurse Practitioner
  – Doctor of Nursing Practice

Returning students in a Complete Non-Graduate status who attempted all of the coursework in their program but did not meet graduation requirements are exempt from the fee. The exemption applies when they return to their most recently enrolled program and program catalog to retake previously failed courses to graduate; all other policies apply.

Course Technology and Resource Fee

There is a $200 Course Technology and Resource Fee for each faculty-led course. A $200 Course Technology and Resource Fee is assessed on each School of Nursing lab component, School of Nursing clinical component, School of Health Sciences lab component, and School of Health Sciences clinical component in addition to the $200 assessed on the course. Lab components are designated in catalog course descriptions and on the student's schedule with course numbers ending in "L". Clinical components are designated in catalog course descriptions and on the student's schedule with course numbers ending in "LL". The fee is nonrefundable for any course attended.

The items included in this fee vary by program of study and can include, but are not limited to:

- Access to technology tools and online course systems
- Access to electronic library resources (reference services, books, e-books, databases, guides, interlibrary loan, etc.)
- Access to licensed materials and videos
- Peer tutoring and an online Writing Lab
- The Student Portal
- Classroom IT Support
- Access to a variety of on-demand, self-service career resources
- Reimbursement for certain student exam certifications and certain exam review programs
- Tactical facilities and services required for the Criminal Justice program
- Some (not all) background checks and immunizations
- Supplies for medical and Criminal Justice programs used while in class

A Course Technology and Resource Fee does not apply to faculty-led courses for students enrolled in an Early Childhood Education Certificate, Diploma, or Associate's program, or the Bachelor of Science in Nursing – RN to BSN entrance option program.

Book Fee

Students must purchase textbooks, e-books, and/or other physical and digital learning materials required for their courses, commonly referred to collectively as "Required Course Materials."

- In courses that do not utilize a digital learning platform with integrated Required Course Materials ("Non-Integrated Courses"), students have the option to (1) purchase Required Course Materials through Rasmussen University part of American Public University System (Rasmussen) for a flat cost for each Required Course Material, as described below; or (2) opt-out of purchasing Required Course Materials through Rasmussen, as described in the Textbook Opt-Out Policy, and source their own vendor for such purpose.
- In courses that utilize a digital learning platform with integrated Required Course Materials ("Integrated Courses"), students must purchase Required Course Materials through Rasmussen, as described below, because the use of the integrated digital learning

platform does not make the Required Course Materials available in this format from sources other than the University. Additionally, because of the integrated nature of the digital learning platform, students will not be able to opt-out of purchasing Required Course Materials through Rasmussen University for Integrated Courses.

The flat cost for each Required Course Material when purchasing through Rasmussen University is $25.00, plus applicable taxes. For example: If a course has two Required Course Materials, then the student will be charged $50.00, plus applicable taxes, for the cost of Required Course Materials in addition to all other applicable tuition and fee charges.

Textbook Opt-Out Policy

If a student desires not to purchase Required Course Materials for Non-Integrated Courses through Rasmussen University part of American Public University System (Rasmussen), then the student may opt-out of automatic charging and billing for any or all Required Course Materials for Non-Integrated Courses at the flat cost, and then must purchase the Required Course Materials through another source such as Amazon. Students who opt-out of purchasing Required Course Materials for Non-Integrated Courses are advised that access to digital Required Course Materials via a link within a course will be removed. Students can opt-out by completing the textbook opt-out form available through the student portal on a quarterly basis by the end of the class drop/add period for each quarter, as defined in the Rasmussen University Course Catalog, to be effectuated during that Term. If a student opts-out after being automatically charged for the Required Course Materials, but before the end of the class drop/add period, then Rasmussen will credit the charged costs for Required Course Materials.

Students enrolled in Integrated Courses do not have the option to opt-out of purchasing Required Course Materials from the University because the use of the integrated digital learning platform does not make the Required Course Materials available in this format from sources other than the University. Any requests to opt-out of purchasing Required Course Materials for Integrated Courses through the University will be denied.

A list of Required Course Materials for each course and whether a student can opt-out of purchasing the Required Course Materials through the University based on the use of an integrated digital learning platform is available in the student portal. This list is published quarterly and is subject to change throughout a student's enrollment.

Credit by Examination Fee

Credit by Examination options, when available, may be attempted for a prepaid, nonrefundable/nontransferable fee of $149 per attempt. Prepayment is required prior to being granted access to any Credit by Examination. See the Credit by Examination Policy for complete details.

Self-Directed Assessment Fee

Self-directed assessments, when available, may be attempted for a prepaid, nonrefundable/nontransferable fee of $149 per attempt (except for the 12-credit Foundations of Early Childhood Education bundle, which is $447). Prepayment is required prior to being granted access to any self-directed assessment. See the Self-Directed Assessments Policy for complete details.

Financial Aid

Financial Aid Overview & Primary Sources of Financial Aid

The University has a professionally staffed Student Financial Aid Office designed to help you apply for federal, state, and private assistance. The primary purpose of financial aid is to help students who otherwise may not be able to attend a post-secondary institution to meet the cost of higher education. The basic responsibility for financing your education lies with you and your family. Aid is based upon

documented financial need - the difference between the cost of university and your ability to pay for it - and is subject to federal and state requirements and allowances. Potential costs include books, tuition, fees, supplies, living expenses, transportation, miscellaneous expenses, and childcare costs.

There are three basic types of aid available to Rasmussen students:

- Gift Aid, also known as grants, is assistance you do not have to pay back and is usually based upon financial need.
- Employment through work study programs may provide relevant work experience and decrease the necessity of borrowing student loans for living expenses.
- Loan funding through various state and federal student loan programs. These funds must be repaid.

Once a student has had their financial aid eligibility determined, a payment plan will be created for any balance still owed the University. If a student has not submitted all requested financial aid eligibility documentation by the beginning of the fifth week of the quarter, a payment plan will be created for the full balance owed. The student still has the opportunity to submit all requested financial aid eligibility documents to have their aid eligibility determined; however, the payment plan will remain active until such time as the balance is paid in full.

Primary Sources of Financial Aid

Type of Aid	Program	Type of Award & Eligibility	Amount Per Year	Application
Gift Aid[1]	Federal Pell Grant	Grant; based on financial need. Eligibility & Terms/Conditions: https://studentaid.gov/understand-aid/types/grants/pell	$740-$7,395	Free Application for Federal Student Aid (FAFSA)
	Federal Supplemental Educational Opportunity Grant (SEOG)	Grant; based on financial need, awarded by the University. Eligibility & Terms/ Conditions: https://studentaid.gov/understand-aid/types/grants/fseog	$100-$4,000 based on availability	Free Application for Federal Student Aid (FAFSA)
	Florida Student Assistant Grant[2]	Grant; based on financial need, FL residency, undergraduate, full-time. Eligibility & Terms/Conditions: https://www.floridastudentfinancialaidsg.org/PDF/factsheets/FSAG.pdf	Varies, based on availability	Free Application for Federal Student Aid (FAFSA)
	North Dakota State Grant[2]	Grant; based on financial need, ND residency, undergraduate.	Up to $2,800	Free Application for Federal Student Aid (FAFSA)
	Minnesota State Grant[2]	Grant; based on financial need, MN residency, undergraduate, full-time. Eligibility & Terms/Conditions: https://www.ohe.state.mn.us/mPg.cfm?pageID=888	Varies, based on State Grant award formula	Free Application for Federal Student Aid (FAFSA)
Employment[1]	Federal Work-Study	Part-time job; on or off-campus; based on financial need and skill level of position, awarded by the University. Eligibility & Terms/Conditions: https://studentaid.gov/understand-aid/types/work-study	Varies, based on availability	Free Application for Federal Student Aid (FAFSA)
	State Work-Study	Part-time job; on or off-campus; MN residency, based on financial need and skill level of position, awarded by the University. Eligibility & Terms/Conditions: https://www.ohe.state.mn.us/mPg.cfm?pageID=1300	Varies, based on availability	Free Application for Federal Student Aid (FAFSA)
Loan Programs	Federal Direct Subsidized Loan	Loan; based on financial need, undergraduate, payments deferred until six months after student is no longer enrolled or enrolled less than half-time. Eligibility & Terms/Conditions: https://studentaid.gov/understand-aid/types/loans/subsidized-unsubsidized	1st Yr - $3,500 2nd Yr - $4,500 3rd Yr & above - $5,500	FAFSA, Master Promissory Note and Loan Entrance Counseling; Student Loan Acknowledgement suggested.

			Graduate – Not Eligible	
	Federal Direct Unsubsidized Loan	Loan; principal and interest payments may be deferred until six months after student is no longer enrolled or enrolled less than half-time. Eligibility & Terms/Conditions: https://studentaid.gov/understand-aid/types/loans/subsidized-unsubsidized	Same as subsidized limits, plus: **Dependent Student:** 1st Yr & above - $2,000 **Independent Student:** 1st & 2nd Yr - $6,000 3rd Yr & above - $7,000 Graduate - $20,500	FAFSA, Master Promissory Note and Loan Entrance Counseling; Student Loan Acknowledgement suggested.
	Federal Direct PLUS Loan	Loan; for credit-worthy parents of dependent undergraduates. Eligibility & Terms/Conditions: https://studentaid.gov/plus-app/	Up to $20,000	Student: FAFSA, Master Promissory Note and Loan Entrance Counseling; Student Loan Acknowledgement suggested. Parent: PLUS loan application and Promissory Note
Veterans' Benefits	Veterans' Benefits	Benefits for veterans and dependents of veterans, including National Guard and Reserves..	Monthly benefit based on service contributions	Veterans Administration or Veterans Service Officer

1. Gift aid and work study are awarded annually based on the award year dates of July 1 through June 30. Students attending in more than one award year must reapply for financial aid by completing a new FAFSA.
2. These state programs are available only for residents of the identified state, based on the state's residency rules.

Financial Aid Disbursement

A student must be officially accepted to Rasmussen University part of American Public University System (Rasmussen) in an eligible degree, diploma or certificate program as one of the eligibility requirements to receive and have financial aid disbursed to their student account. Rasmussen begins disbursing financial aid no earlier than three weeks into the term. Funds are first applied to your tuition and fee charges. Any remaining funds (excess funds) are disbursed to you, the student. All financial aid excess funds and other school refunds are delivered to students through a partnership between Rasmussen and BankMobile. Your student account will show an unpaid balance until this disbursement occurs. If the aid you are eligible to receive does not cover your charges, a Student Payment Plan is created and can be viewed on the Student Account Center.

Institutional Scholarship and Grant Programs

Rasmussen University part of American Public University System (Rasmussen) offers the following institutional scholarship and grant programs. All scholarships are non-cash awards. Some campuses have additional scholarships available, contact your campus for details. Additional information on grants is available at www.rasmussen.edu/tuition . Rasmussen reserves the right to add, discontinue or amend

scholarship and grant programs at its discretion. Any student currently receiving scholarship or grant funds at the time of the amendment will be notified.

The following University grants and scholarships cannot be combined with other University grants and scholarships:

- Affiliation Grant
- Alumni Grant
- LPN Care Grant
- Medical Assisting Inspire Grant
- Professional Achievement Grant
- RN to BSN Alumni Grant
- Early Honors Program

The following University grants and scholarships may be combined with other University grants and scholarships as noted below:

- Corporate Alliance Grant [1]
- Military Grant [2]
- Pass the Torch Grant [3]
- RasMuse Scholarship [4]
- RU Ready Grant [5]
- Start Strong Tuition Savings

A. Institutional Grants

Students who inquire about grant availability and meet qualifications for military, corporate alliance, or articulation grants are eligible to receive a grant equal to a specified percentage of per-credit tuition costs billed each quarter.

1. Military Tuition Rate and Grants Policy

Rasmussen recognizes the service and sacrifices of the men and women who serve and have served and supported the United States Armed Forces through a special tuition rate for active-duty military personnel and a tuition grant for veterans and retired military personnel, Guard and Reserve members, and eligible spouses and dependents. In addition to this benefit, Rasmussen also accepts the GI Bill® and other VA education and training benefit programs, as well as military and veteran-related scholarships. For further details on all military education benefits, please contact the Military Specialist team at militaryquestions@rasmussen.edu or 866-245-9627.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government Web site at https://www.benefits.va.gov/gibill.

Students in the following categories may be eligible for an alternative tuition rate or grant. Verification of eligibility is required in order for an alternative tuition rate or grant to be applied:

- Active Duty Uniformed Military (Air Force, Army, Marines, Navy, U.S. Coast Guard)
- Veteran (honorably discharged)
- Retired Military
- U.S. National Guard Member or U.S. Reserve Member
- Authorized dependents (includes spouse, domestic partner, children, and step-children) of active duty uniformed military, retired military, and veterans

a. Active Duty Military Tuition Rate

Students who are active duty uniformed military receive per credit tuition pricing as indicated on the Tuition Table. Students enrolled in a doctoral degree program are not eligible for the Active Duty Military Tuition Rate. Taxes and fees, if any, are the sole responsibility of the recipient. Students who receive reduced tuition pricing are not eligible for other Rasmussen scholarships or grants. Students who are accepted into the Physical Therapist Assistant Program through the METC PTA Bridge Block Transfer are not eligible for the Active Duty

tuition rate; however, the Non-Active Military Tuition Grant may be applied for any active military student meeting these qualifications. Students must verify active duty military status by providing a copy of their verification letter or a copy of orders from their command reflecting current status and specific date of separation.

b. Non-Active Duty Military Tuition Grant

Students who are not classified as Active Duty Military (such as retired or honorably discharged veterans, U.S. National Guard or U.S. Reserve members, or authorized dependents of active duty uniformed military, retired military, and veterans) may be eligible for a grant equal to 10% of per-credit tuition costs billed each quarter. Taxes and fees, if any, are the sole responsibility of the recipient. This grant typically cannot be combined with other university grants or scholarship programs. Students must verify their grant eligibility status with one of the following documents:

- Form DD214 or other separation documentation that indicates the specific date of separation
- Leave and Earning Statement (LES)
- Military Authorization Form, which a Rasmussen official completes when a United States Uniformed Service (USUS) identification card (DD Form 1173-1) is presented in person
- Certificate of Eligibility
- Active Duty Orders (acceptable documentation for authorized dependents of active duty uniformed military only)

2. Corporate Alliance Grants

Corporate alliance employees receive a grant from Rasmussen equal to a specified percentage of per-credit tuition costs billed each quarter. The grant may be extended to an employee's immediate family members (includes spouse, domestic partner, children, and step-children). The percentage and family member eligibility are determined by the corporate alliance agreement between Rasmussen University and the other entity. Enrolling students must provide proof of eligibility by submitting proof of employment prior to the 7th day of the first quarter of enrollment (i.e.: recent paystub or employment verification letter). Rasmussen University will require proof of employment for corporate alliance employees, such as a pay stub, to initiate and maintain the grant. Rasmussen will require proof of relationship to corporate alliance employees for immediate family members.

3. Professional Achievement Grant

Some employers have a relationship with Rasmussen to offer employees a Professional Achievement Grant; this grant is only for employees and cannot be extended to immediate family members. Terms and conditions are unique for each Professional Achievement Grant alliance, and the employee should work with their employer to determine eligibility. The Professional Achievement Grant is not subject to the cost-per-credit tuition rate limitations imposed on other institutional grants.

4. Affiliation Grant

Some students who are members of or have credits from organizations with whom Rasmussen has a signed Affiliation Agreement may be eligible to receive a grant equal to a specific percentage of per-credit tuition costs billed each quarter. The percentage is determined by the agreement between Rasmussen and the organization. Rasmussen will require proof of the student relationship with the organization such as a transcript or membership card. Contact your campus for details.

5. Articulation Grant

Some students from institutions of higher learning with whom Rasmussen University has a signed articulation agreement receive a grant equal to a specified percentage of per-credit tuition costs billed each quarter. The percentage is determined by agreement between Rasmussen and the other institution of higher education. Contact your campus for details.

B. Employer Tuition Reimbursement

Many employers today offer tuition reimbursement to their employees earning a degree. Whether it's full reimbursement or partial, we want to make using your tuition reimbursement plan as seamless as possible, so you can reduce the cost of your education, as well as potentially reduce the amount of loans required to fund your degree. To take advantage of tuition reimbursement, check with your

employer about what tuition reimbursement options may be available to you. Then contact an Admissions Representative to discuss your tuition reimbursement options.

C. Early Honors Program

Rasmussen is proud to offer select high school juniors and seniors who have reached the minimum age of 16, the opportunity to begin their professional career training early. The Early Honors Program is designed to reward those who have a strong academic background and a desire to succeed.

D. High School Professional Program

Rasmussen waives tuition for High School teachers and counselors who meet the required criteria. This program is only available to teachers and counselors who are employed at a high school (grades 9–12) in Florida, Illinois, Kansas, Minnesota, and North Dakota. Current status as a high school professional will be verified by Rasmussen prior to the initial start of any course. Attendance is required at an orientation, which must be completed prior to the start date of the professional's first course.

Offer is limited to one course, per quarter, per high school professional. A maximum of 50 seats in online courses will be made available to high school teachers and counselors each quarter. There is no maximum on cumulative number of classes that may be taken. Courses for high school professionals are offered on a space-available basis, with priority given to other enrolled Rasmussen students who must complete the course as part of their degree program at Rasmussen.

High School Professional Program participants are responsible for the course technology and resources fee for each course taken. Most technology courses require access to specialized hardware and software, which are available to students at all Rasmussen campuses. High School Professional Program participants electing to complete courses online will need to secure access to required hardware and software. The University will provide specific technology requirements information for each course. Transcripts denote a grade of "AUDIT" upon completion of the course, with the student classified as an Audit student.

Rasmussen Academic Policies apply to participants in the High School Professional Program.

---

1. Corporate Alliance Grant may not be combined with other University grants or scholarships except the Pass the Torch Grant and Start Strong Tuition Savings.
2. Military Grant may not be combined with other University grants or scholarships except the Pass the Torch Grant for students starting February 7, 2024 and later.
3. Pass the Torch Grant may be combined with other University grants and scholarships except the Alumni Grant, LPN Care Grant, and Medical Assisting Inspire Grant.
4. RasMuse Scholarships may be combined with other University grants and scholarships except the Professional Achievement Grant.
5. RU Ready Grant may be combined with other Rasmussen University grants and scholarships except the Professional Achievement Grant.

Financial Aid Cost of Attendance

Your financial aid cost of attendance (COA) is the estimated average and reasonable cost of completing an academic year at Rasmussen University part of American Public University System ("Rasmussen"). An academic year usually consists of nine months (three quarters). Your COA serves as the foundation for determining your financial need as well as the amount of financial aid, including grants, scholarships, loans, and work-study that can be offered to you. The COA can only include costs for the individual student. The Student Financial Aid Office may adjust the COA for students on a case-by-case basis to address individual, unique circumstances.

Your actual charges for tuition and fees, also known as Direct Costs, will be different than what is reflected in your financial aid COA. That is because the COA is based on estimated averages. To view your actual tuition and fee charges, go to the Student Account Center.

Indirect Costs are external expenses that you may incur during the academic year as part of your educational experience. These costs are not billed to your student account, but they are part of the Financial Aid COA.

All COA components shown below are for nine months and full-time (12+ credits is full time for undergraduate programs and 8+ credits is full-time for graduate programs). Students attending less than full-time are eligible for financial aid; however, the COA and maximum awards may be adjusted for attending less than full-time and/or less than an Academic Year. All programs have a one-time program administrative fee that may be added to the COA.

EXAMPLES of 2026-2027 Undergraduate Financial Aid Cost of Attendance (COA)

Business, Technology, Design, Early Childhood Education Bachelor's, Human Services, Justice Studies except Law Enforcement, and Health Sciences except residential program

Cost Items	Living With Parent	Not Living With Parent
Average Direct Costs

1. For detailed information on the Program Administrative Fee, visit the Program Administrative Fee page.
2. Actual tuition, fee, and book charges vary by student, credit load, and program of study. To view your actual charges, go to the Student Account Center.
3. Military students receiving Basic Allowance for Housing (BAH) will have a reduced living expense due to it only including the food allowance within this component.
4. Actual costs vary by student, based on student choice, and travel habits.

5. Program Administrative Fee varies for the School of Nursing Bachelor of Science based on the entrance option. For detailed information on the program administrative fee, visit the Program Administrative Fee page.

Standards of Satisfactory Academic Progress (SAP)

Satisfactory Academic Progress, or SAP, is defined as the successful progression through an academic program within a prescribed time frame. Cumulative grade point averages and successful completion of credits attempted are monitored at the end of each quarter/term, which is equivalent to the payment period. Students in 11-week quarter-based programs have SAP assessed up to four times annually. Students who are not meeting the standards are notified of their status in writing. Each such review includes the Qualitative (GPA), Quantitative (Pace of Completion), and Maximum Time Frame (150%) standards that are defined below. All attempted course credits that apply to a student's program are considered when calculating SAP. This includes incomplete, withdrawn, repeated, failed, pass/fail, transferred, and developmental course credits. It also includes credits taken while attending the institution part-time and credits for which a student did not receive financial aid unless noted otherwise below.

SAP Standards: All students must meet all three of the standards that are used to measure a student's Satisfactory Academic Progress (SAP) towards the completion of an academic program. These standards are the same for both financial aid recipients as well as non-recipients and align to the academic standards of Rasmussen University part of American Public University System ("Rasmussen"). The three standards are as follows:

1. **GPA**: GPA is a qualitative measurement. Rasmussen students are required to achieve and maintain a minimum Cumulative Grade Point Average (CGPA) of 2.00. Graduate students are required to maintain a Cumulative Grade Point Average (CGPA) of 3.00.
2. **Pace/Cumulative Completion Rate (CCR)**: CCR is a quantitative measurement. This is the pace at which a student progresses through a program. CCR is calculated by dividing cumulative credits earned by cumulative credits attempted within a program (e.g., 6 credits earned ÷ 12 credits attempted = 50%). Minimum standards are listed in the chart below.

Percentage of Credits Attempted Toward Maximum Time Frame	Minimum Successful Completion of Cumulative Credits Attempted
Up to 25%	25%
Greater than 25%, up to 50%	50%
Greater than 50%	67%

3. **Maximum Time Frame**: Maximum Time Frame is a quantitative measurement. This is the maximum time frame for program completion and is equal to 150% of the number of total credits required for the program (e.g., maximum time frame for a 90-credit program = 90 X 150%, or 135 credits).

Total credits are indicated for each program listing in the catalog. A student who exceeds 150% of the maximum time frame is no longer eligible for financial aid unless a successful appeal is granted.

Credits and grades considered in determining Satisfactory Academic Progress

All credits earned and attempted remain on the student's transcript and will be applied to the program if the credits are considered part of the program. At the time of a SAP assessment, all credits attempted that are applicable to the student's program are considered when determining all three SAP standards. Every time a student is enrolled in a course past the Course Drop Policy deadlines, the credits will count as attempted. For definition of grades see the Grade Scales. In instances where course expiration policies apply, the credits are no longer applicable to that program and they will not be utilized in determining the student's SAP standing. See Course Expiration policies for core courses in the School of Design, School of Health Sciences, School of Justice Studies, School of Nursing and School of Technology.

Note the Following:

- Incomplete grade credits (I) will count toward total credits attempted for the Cumulative Completion Rate, will not be considered earned credits, and will be included as a Failed grade in the GPA calculation until a final grade is posted. See Incomplete Grade Policy.
- Withdrawals (W/WD/WX/UXD) will count toward total credits attempted for the Cumulative Completion Rate, will not be considered earned credits, and will not be included in the GPA calculation. See Course Withdrawal Policy and Leave Policies.

- Withdrawals (WL) will not count toward total credits attempted for the Cumulative Completion Rate, will not be considered earned credits, and will not be included in the GPA calculation. See Leave Policies.
- Cancel (CL) will not count toward total credits attempted for the Cumulative Completion Rate, will not be considered earned credits, will not be included in the GPA calculation, and will not appear on the student's transcript.
- Failing (F/FD) grades will count toward total credits attempted for the Cumulative Completion Rate, will not be considered earned credits, and will be included in the GPA calculation.
- Repeated and unexpired course credits from prior attempts will count toward total credits attempted for the Cumulative Completion Rate. The highest grade earned from unexpired repeated courses will be used to calculate the student's cumulative GPA. If more than one attempt results in the same letter grade, only the most recent one will be used to calculate GPA. See Repeating Courses Policies.
- Pass/Fail (S/SX/U/UX/UD) credits will count toward both total credits attempted and earned (if passed) for the Cumulative Completion Rate, but will not count in the GPA calculation.
-
- Transfer credits (TR/PT/CW/TO) accepted by the University will count towards both credits attempted and earned in the Cumulative Completion Rate, and will not count in the GPA calculation. In the case of a course-to-course credit transfer, an "F/FA/FD" grade will be replaced by a "TR" and the student's GPA will be recalculated to reflect the transfer of credit grade. See Transfer Credit Policies.
- Program Transfer. Only credits counting toward a student's program of enrollment will be used for the calculation of all SAP standards. See Program Transfer Policy and Course Expiration policies.
- Developmental Course credits (SX/UX) will count toward both total credits attempted and earned (if passed) for the Cumulative Completion Rate and Maximum Time Frame but will not be included in the GPA calculation. See Developmental Education Policy.
- Audit grades (Audit) will not be utilized in any SAP calculation. See Auditing a Course Policy.
- Withdrawal (PD), a grade used to identify a course withdrawal due to the 2020 Pandemic, will not count toward total credits attempted for the Cumulative Completion Rate, will not be considered earned credits , and will not be included in the GPA calculation.

Financial Aid Warning: If a student's CGPA falls below 2.00 or 3.0 for graduate students, or if Pace/CCR standards are not met, the student will be placed on Financial Aid Warning for the subsequent quarter/term. A student is eligible for financial aid during the Financial Aid Warning period. A student who fails to meet any one of the standards of SAP at the end of the Financial Aid Warning period is not eligible for financial aid, but is allowed to attend one subsequent quarter/term.

Financial Aid Probation: If a student fails to make Satisfactory Academic Progress at the end of their Warning period, but submits a Financial Aid Appeal that is approved and has their eligibility for aid reinstated, they will be placed on Financial Aid Probation for the subsequent quarter/term. A student is eligible for financial aid during the Financial Aid Probation period. At the end of the Financial Aid Probation period, the student must meet the conditions specified in their academic plan or the minimum SAP requirements to be eligible for further financial aid funding. A student who fails to meet the minimum SAP requirements or the conditions specified in their academic plan at the end of the Financial Aid Probation period is not eligible for financial aid.

Students must regain Satisfactory Academic Progress within two quarter/term or they will be terminated from the University and a "SAP Dismissed" status will be applied. The decision to terminate may be appealed through the Academic Review Committee process.

Financial Aid Appeal: A student may submit an appeal to have their access to financial aid reinstated based on mitigating circumstances that prevented the student from making satisfactory academic progress. Mitigating circumstances may include death of a relative, an injury or illness of the student, or other special circumstances. The appeal must be in writing and describe the mitigating circumstances that prevented the student from making SAP as well as what has changed in the student's situation that will allow them to demonstrate satisfactory academic progress at the next evaluation.

Each student with an approved appeal will be placed on Financial Aid Probation. Each student placed on Financial Aid Probation must have an academic plan in place that, if followed, ensures they will be able to meet satisfactory academic progress by a specific point in time, typically the next evaluation period. The academic plan should include GPA and/or Pace/CCR requirements, depending upon the deficiency. It may also include additional requirements, such as a limit on the number of credits enrolled, consultation with an Advisor, or other items to help define and assist in the student's progress.

Appeals will not be approved for students who cannot meet all SAP standards by the end of the Financial Aid Probation period unless the academic plan that is developed specifically accounts for the variance. The ruling of the Compliance Director and General Counsel is final

and cannot be appealed. A student who chooses not to appeal or has an appeal denied will be allowed to attend for one quarter/term following the one quarter/term of Financial Aid Warning, but will not have access to Financial Aid.

Appeal Process: The appeal is sent via the student's Advisor, Dean or Dean of Nursing/ Nurse Administrator to the Campus Academic Review Committee, who will determine whether mitigating circumstances exist and make a recommendation regarding the appeal. The Campus Academic Review Committee will forward the appeal request and a recommendation to the Compliance Director and General Counsel who will make the final determination. Appeals will be reviewed and have a determination made within 10 business days of receipt by the Compliance Director and General Counsel. Students will be notified in writing regarding the outcome of the appeal.

Reentering Students: Students who withdraw from the University and later reenter are treated as continuing students for the purpose of determining Satisfactory Academic Progress and must meet progress requirements. Reentry does not negate previous academic status or satisfactory progress requirements. Satisfactory Academic Progress calculations for a reentering student who changes programs will include only the grades and credits attempted and earned for credits that are part of the student's new program; standard CCR requirements will be followed from the reentry point and for each quarter/term thereafter. If other credits have been taken at another institution and can be transferred in, the credits will be included in SAP calculations as described elsewhere in this section. A student terminated due to SAP may not reenter the University unless they have completed coursework elsewhere that is acceptable for transfer into the University and will bring the student back into good standing. See Reenter Policy for more information.

Refunds & Recovery

Cancellation, Termination, and Refund Policies

If a student is cancelled or terminated, for whatever reason, the following apply:

- Each student will be notified of acceptance/rejection in writing. In the event a student is rejected, all tuition, fees and other charges will be refunded. A student in any term who withdraws from the University must give written notice to the University. Date of withdrawal is the last day of recorded attendance.
- The University will acknowledge in writing any notice of cancellation within 10 business days after the receipt of the request and will refund the amount due within 30 business days. Written notice of cancellation shall take place on the date the letter of cancellation is postmarked, if the notice is received via electronic mail (email) the date the email is received by the University, or if the notice is hand carried it shall occur on the date the notice is delivered to the University. The University may use the last day of recorded attendance to determine the date of withdrawal for refund purposes.
- Notwithstanding anything to the contrary, if a student gives written notice of cancellation following written acceptance by the University and prior to the start of the period of instruction for which they have been charged ("Period of Instruction"), all tuition and fees paid will be refunded. All prepaid tuition is refundable.
- If a student has been accepted by the University and gives written notice of cancellation or termination after the start of the Period of Instruction for which they have been charged but before completion of 60% of the Period of Instruction, the amount charged for tuition and awarded for institutional scholarships/grants for the completed portion of the Period of Instruction shall be prorated based on total tuition charges and institutional scholarships/grants awarded and the portion of the Period of Instruction completed. After the completion of 60% of the Period of Instruction, no refund of tuition or of institutional scholarships and grants will be made.
- Eligible refunds are made within 30 days of the date of determination of withdrawal for students in Florida, Wisconsin or Missouri.
- Eligible refunds are made within 30 business days of the date of determination of withdrawal for students in Minnesota.
- Eligible refunds are made within 45 days of the date of determination of withdrawal for students in Illinois, North Dakota, Kansas, or California.
- The refund policy is not linked to compliance with the University's regulations or rules of conduct.

Federal Return of Title IV Funds Policy

A student may initiate the withdrawal process by phone; via email, in person, or in writing; or by rejecting their schedule and indicating in notes their desire to withdraw. Once the withdrawal has been processed, a written notification will be sent.

Rasmussen University part of American Public University System ("Rasmussen") uses the state mandated refund policy to determine the number of institutional charges it can retain. The federal formula dictates the Federal Title IV aid that must be returned to the federal government by the school and the student. The federal formula requires a Return of Title IV aid if the student received federal financial assistance in the form of a Federal Pell Grant, Federal SEOG, Federal Direct Student Loan, or Federal PLUS Loan and completed all coursework and/or withdrew from all courses before completing 60% of the payment period or period of enrollment.

The percentage of Title IV aid to be returned is determined by dividing the number of calendar days attended (based on last day of attendance) by the number of total calendar days in the payment period or period of enrollment. Scheduled breaks of five or more consecutive days are excluded. If funds are released to a student because of a credit balance on the student's account, the student may be required to repay some of the federal grants if they withdrew.

The federal return of Title IV funds formula calls for a second calculation, similar to the one outlined above, where the school determines the percentage and amount of tuition which was unearned. The school compares the unearned tuition with the unearned Title IV aid, and returns the lesser of these two amounts.

The amount of assistance that you have earned is determined on a pro rata basis. For example, if you completed 30% of your payment period or period of enrollment, you earn 30% of the assistance that you were originally scheduled to receive. Once you have completed more than 60% of the payment period or period of enrollment, you earn all the assistance that you were scheduled to receive for that period.

Return of Title IV withdrawal exemption for programs with modules: In a program offered in modules (referred to as terms at Rasmussen), a student is not considered to have withdrawn for Return of Title IV purposes if the student successfully completes (earns a passing grade) coursework equal to or greater than the University's definition of a half-time student for the payment period.

Return of Title IV withdrawal exemption for all programs (with or without modules): A student who completes all the requirements for graduation from their program before completing the days in the period that they were scheduled to complete is not considered to have withdrawn for Return of Title IV purposes.

Return of Title IV withdrawal exemption for enrollments where all of the following conditions are met: An enrollment is treated as never having begun attendance; all disbursed Title IV aid and all institutional charges for the applicable enrollment are refunded, and any balance from the applicable enrollment due to the Title IV aid refund is canceled by the University.

A student withdrawing from school may be eligible for post-withdrawal disbursements according to federal regulations. A post-withdrawal disbursement occurs when a student who withdraws earned more aid than had been disbursed prior to the withdrawal. A post-withdrawal disbursement notification is made to the withdrawn student in writing via electronic mail sent to the personal email address on file with the University within 30 days of the school's determination that the student withdrew. The notification explains the type and amount of fund(s) available and explains to the student the option to accept or decline all or part of the monies.

Post withdrawal disbursements are made first from available funds and must be done within 45 days of the school's determination that the student withdrew. Rasmussen University credits the student's account for any outstanding current period charges with grant funds.

Loan post-withdrawal disbursements must be done within 180 days of the school's determination that the student withdrew. A post-withdrawal disbursement offer is made to the withdrawn student in writing via electronic mail sent to the personal email address on file with the University within 30 days of the school's determination that the student withdrew. The notification explains the type and amount of loan fund(s) available and explains to the student the option to accept or decline all or part of the monies. A 14-day response time is given to the student for their decision. For any post-withdrawal disbursement of loan funds, the University must get the student's permission before crediting the post-withdrawal loan funds to their student account. It may be in the student's best interest to allow the school to keep the funds to reduce debt with the University. If no response is received within 14 days, the remaining post withdrawal disbursement is cancelled.

Rasmussen uses its Student Information System to calculate the federal return of Title IV and Institutional refund calculations based on the U.S. Department of Education regulatory requirements.

The requirements for the return of Title IV program funds are different from the tuition refund policy and students who withdraw may owe unpaid institutional charges.

Federal Distribution of Funds Policy

Once the refund liability for a particular student has been determined, the federal portion of the refund shall be distributed back to the various programs in the following manner:

- All refund monies shall first be applied to reduce the student's Federal Direct Unsubsidized Stafford, Federal Direct Subsidized Stafford, and Federal Direct PLUS loans received on behalf of the student.
- Any remaining refund monies will then be applied to reduce the student's Federal Pell Grant award.
- Any remaining refund monies will then be applied to reduce the student's Federal SEOG award.
- Other Federal Financial Aid Programs authorized by Title IV Higher Education Act.

Non-Federal Refund Distribution Policy

A. For Florida Campuses
If the disbursement is made of the Florida State Assistance Grant (FSAG) while the student is enrolled, no refund will be due. If the disbursement is made while the student is no longer in attendance, a full refund to the FSAG program is due. A student must be attempting a minimum of six credits per quarter to be eligible to receive Bright Futures scholarship funding. If a student receiving Bright Futures scholarship funds withdraws from course(s) after the drop/add period, the student will be required to repay the institution for the amount of the scholarship for those course(s) withdrawn from.

B. For Minnesota Campuses
Refunds for state aid programs are calculated on a proportional basis. To calculate the minimum refund due to the Minnesota State Grant program, the SELF Loan program, and other Minnesota State Aid Programs (except for the State Work Study program), the following formula is used:

> Amount of funds (financial aid and cash) applied to institutional charges (including post-withdrawal disbursements of Title IV aid applied to institutional charges) less:
>
> Amount of institutional charges that the school can retain per our state mandated refund policy less:
>
> > Amount of Institutional Share of the Title IV Refund = Remaining refund due to the State Aid programs

Ratios are then determined for each of the State Financial Aid programs as part of the total non-Title IV financial aid disbursed to the student (for the period during which the student withdrew).

These ratios are then multiplied against the remaining refund due to the State Aid programs to determine the proportional minimum refund due to both the State Grant and SELF programs. If the student received funds from other State Aid programs, those refunds would be calculated in the same manner.

Note that for purposes of calculating institutional charges in the State Refund Calculation, the definition for Title IV programs is used.

- Any remaining refund monies will then be applied to reduce the student's Minnesota State Grant award and/or Minnesota SELF Loan.
- Any remaining refund monies will then be applied to any other source

C. For North Dakota Campuses
If the disbursement is made of the North Dakota State Grant while the student is enrolled full time, no refund is due. If the disbursement is made while the student is no longer in attendance, a full refund to the North Dakota State Grant program is due.

D. For Illinois and Kansas Campuses
Please note that Illinois and Kansas do not have state grant programs, so the Non-Federal Refund Distribution Policy does not apply to

students attending campuses in Illinois and Kansas.

Stop-Out & Leave Policies

Bereavement Policy

- Bereavement may be applicable in the event of the death of an immediate or extended family member (spouse/domestic partner, children, siblings, grandparents, grandchildren, parents/guardians).
- Bereavement leave should not exceed 3 days total.
- Documentation is required (e.g. newspaper notice, funeral notice, obituary, or church handout).
- Students must communicate with their faculty. Students in a residential nursing or health science program must also communicate with the Dean or Program Coordinator about the need for time off.
- Nursing and Health Science programs have additional attendance and make-up requirements that must be met. A make-up opportunity or alternative learning experience is not always possible to meet the learning objectives of the course.
- The student should submit no more than one lab and/or clinical make-up request per course, per quarter.
- Students must submit a makeup request as early as possible, but no later than 24 hours upon return to classes.

Extended Quarter Break Stop-Out Policy

Rasmussen University part of American Public University System ("Rasmussen") encourages students to remain continuously enrolled in their program through graduation. Rasmussen recognizes that, on occasion, an accepted student may experience an extraordinary personal situation for which the student may need an extended break between quarters. A student with an extenuating circumstance may apply for the Extended Quarter Break Stop-Out. See the Extenuating Circumstances Policy for details.Students who are enrolled and meeting the standards of Satisfactory Academic Progress at the end of one quarter may apply for an extended break for either Term 1 or 2 of the following quarter. The student must complete Term 2 immediately prior to the Stop-Out quarter. Under no circumstances will a Stop-Out be approved for a student to take two consecutive Term Stop-Outs (i.e., Term 2 of Fall Quarter and Term 1 of Winter Quarter or Term 1 & 2 of the same quarter). The student must commit to returning in the immediate next Term following the approved Extended Quarter Break Stop-Out or the student will be withdrawn from Rasmussen University. Students who are receiving Title IV funding must be scheduled to take at least six instructor-led credits in the Term immediately following the Extended Quarter Break Stop-Out period. The student must meet with his or her Academic Advisor in order to obtain a Stop Out Request form. The Academic Advisor will provide the student with the necessary information to make an informed decision. The Stop-Out Request form must be signed on or before the last business day to drop courses in the quarter for which the Extended Quarter Break Stop-Out is being requested. Stop-Out Request forms received after the last day to drop courses will not be honored. Students will remain continuously enrolled and will not be eligible to receive financial aid at any other institution during this break. Students who are approved to take an Extended Quarter Break Stop-Out are eligible to receive aid only for the Term courses of the quarter in which the student returns. Students in some programs, such as the Physical Therapist Assistant program, are not eligible for the Extended Quarter Break Stop-Out.

Medical Leave of Absence and Medical Withdrawal Policy

A. Medical Leave

Medical Leave is intended for accepted students who need to take time away from Rasmussen University part of American Public University System (Rasmussen) for health reasons and who, for medical reasons, are unable to complete the quarter in which they are currently enrolled. Medical Leave is also available for students who are primary caregivers for someone who is experiencing a health or medical issue, which has resulted in their inability to complete the term in which they are currently enrolled. Each Medical Leave can be up to one quarter and may be extended through the following quarter/term. No approved medical leave may extend for more than two consecutive quarters or up to a maximum of six months in total length excluding break weeks. At the end of the approved leave, the

student must return on the next start date based on their term cycle and program of enrollment. During a student's enrollment, there is no limit to the total number of non-consecutive quarters/terms that a student may apply for and accumulate medical leave.

Qualified students with a disability under the Americans with Disabilities Act (ADA) who are seeking academic adjustments, auxiliary aids, or other support services should refer to the Disability Services and Accommodations Policy (ADA/Section 504 Compliance). Temporary medical conditions are not considered a disability under the ADA unless they are severe enough to result in a substantial limitation of one or more major life activities. Such a determination is made on a case-by-case basis, taking into consideration the duration or expected duration of the impairment, and the extent to which it actually limits a major life activity of the individual. If you believe that your medical condition may qualify as a disability under the ADA and require support services or other accommodations, please contact an Accommodations Officer.

Students who are placed on a Medical Leave of Absence are treated as a drop/ withdrawal for Financial Aid purposes because students who take a leave of absence are generally unable to resume coursework at the same point in their academic studies upon their return as certain scheduling adjustments may be required. If the student received federal financial aid funding for the term in which the student withdrew, a calculation of the amount of aid earned for that term will be performed along with a calculation of the student's tuition obligation for the same period. As a result of these calculations, the student may have a tuition balance, may have unearned federal aid funds that must be returned by the University or student, or may have a tuition refund due. These calculations will be performed according to federal guidelines and institutional policy, and the student will be notified of the outcome. If a tuition refund is due to the student, it will be returned to the student. Refunds will be paid to the appropriate funding agency within 45 days, and the student will be billed for any remaining unpaid balance. See the University Refund Policy.

Students with federal financial aid, federal loan obligations, or military tuition assistance must contact their lenders and the military financial aid specialist to ascertain their loan repayment status or repayment of tuition assistance during the Medical Leave. Students who received federal student loans at any point during their enrollment at the University will receive further information regarding their loan obligations and repayment in an exit interview provided by the University within 30 days of the student's withdrawal date. Students who return from a Medical Leave of Absence will have their federal financial aid reinstated, but the funding package may be different from the term in which the student withdrew due to changes in student eligibility.

B. Medical Withdrawal

Students who do not return to Rasmussen following their Medical Leave will be withdrawn with a status of Medical Leave Withdrawal.

C. Applying for Medical Leave of Absence

To apply for a Medical Leave, the student must obtain the Medical Leave Request Form from their Academic Advisor. The student will be required to present and upload a signed note from a professional therapist/physician on letterhead where the professional practices. The note must include a timeframe, specifically the expected start date of the leave and the anticipated conclusion of the leave. The student cannot remain enrolled in the quarter/term in which the leave begins.

Important note: If the student is currently enrolled for the quarter/term in which their requested leave is to begin, it is their responsibility to drop/withdraw from their classes.

D. Returning After Medical Leave of Absence

To return from Medical Leave, the student must complete and submit the Medical Leave Return Request Form prior to the first day of the quarter/term in which the student wants to return to complete the reentry process. Additionally, the student must submit a signed note from the student's professional therapist and/or physician stating the student's medical situation and that the professional therapist/physician believes the student is able to return to Rasmussen. A student returning after a Medical Leave of Absence will be returned to their previous program and catalog; students who desire to transfer programs are subject to the Program Transfer Policy.

E. Policy Regarding Grades in the Event of a Medical Leave of Absence

- If the student takes Medical Leave on or before the close of the drop period, the course(s) will be dropped without being recorded on the student's transcript and tuition will not be charged.
- A grade of "WX" will be recorded for each course for which a student was registered if the student takes Medical Leave from the University at any time following the course drop period of the quarter/term. The student will need to repeat any course required in their

program for which the WX grade was awarded.

- When a student completes any course(s) and then takes a Medical Leave, the letter grades earned for the completed courses will remain on their transcript.
- Academic probations, warnings, and dismissals related to Satisfactory Academic Progress remain applicable to students who take a Medical Leave. If a student is already on probation or is placed on probation while on leave, the conditions of his or her probation are continued to the quarter/term in which they return to the University.
- Rasmussen transfer policies will be used to evaluate credits earned at other schools and will apply to any academic work completed by the student while on Medical Leave or while on Medical Withdrawal from the University.

F. Returning After Medical Leave Withdrawal

Re-enrollment will require a student to reapply to the University and the terms of the Rasmussen Reenter Policy will apply.

Military Leave Policy

Rasmussen University part of American Public University System (Rasmussen) supports our students who are service members and veterans, their spouses, and other family members.

A. Eligibility

- Students or admitted students who cannot attend the University due to Military Service, or have Military Service requirements that make it difficult or impossible for them to be successful in their academic programs, are eligible for a Military Leave.
- Military Service is defined as voluntary or involuntary service in the U.S. Army, Navy, Air Force, Marine Corps, Space Force, and Coast Guard (the “Armed Forces”), including service by a member of the National Guard or Reserve on Active Duty, Active Duty for training, or full-time National Guard duty under federal authority, for a period of more than 30 consecutive days under a call or order to Active Duty of more than 30 consecutive days.
- Active Duty means full-time duty in the active military service of the United States, including full-time training duty, annual training duty, and attendance, while in the active military service, at a school designated as a service school by law or by the Secretary of the military department concerned. Active Duty does not include full time National Guard duty.

B. Military Leave Procedures

- Students must contact their Academic Advisor to request Military Leave in advance of the student’s military service. Rasmussen reserves the right to request supporting documentation provided at the student’s earliest convenience, such as a copy of military orders, or, for students who have yet to receive orders, a memo from their commanding officer supporting the request for the Military Leave.
- Students are not required to request Military Leave if making such a request is precluded by military necessity, such as a mission, operation, exercise, or requirement that is classified; or a pending or ongoing mission, operation, exercise, or requirement that may be compromised or otherwise adversely affected by public knowledge.
- In addition, a student may be deemed to have requested Military Leave if, at the time the student requests readmission to the University, the student submits an attestation that the student performed Military Service that necessitated the student’s leave from the institution.
- The student cannot remain enrolled in the quarter/term that the leave begins.
- If the student is currently enrolled for the quarter/term in which their requested leave is to begin, it is the responsibility of the student to request military leave and drop/withdraw from their classes.
- Students receiving benefits under any of the GI Bill® education benefits will have their enrollment certifications terminated for duration of the Military Leave.

C. Financial Aid and Tuition/Books/Fees Impact of a Military Leave

- Students are treated as a withdrawal from the University for financial aid purposes.
- If the student received federal financial aid funding for the term of withdrawal, a calculation of the amount of aid earned for the term of withdrawal will be performed, along with a calculation of the student’s tuition obligation for the same period. As a result of these

calculations, the student may have a tuition balance, have unearned federal aid funds that must be returned by the University or the student, or have a tuition refund due. These calculations and any applicable refund to the student or funding agency will be performed according to federal guidelines and institutional policy, and the student will be notified of the outcome. See the University Refund Policy

- Students who return from a Military Leave will have their federal financial aid reinstated according to the student's eligibility at the time of re-enrollment.
- Students with federal financial aid and federal loan obligations must contact their lenders; in addition, if receiving military tuition assistance must also contact the military financial aid specialist to ascertain their loan repayment status or repayment of tuition assistance during the Military Leave.
- Students who received federal student loans at any point during their enrollment at the University will receive further information regarding their loan obligations and repayment in an exit interview provided by the University within 30 days of the student's withdrawal date.
- In the event the student discontinues their program, any supplies or textbooks issued to and paid for by the student become the property of the student. Electronic resources, access to which the student paid for as part of the Course Technology and Resource Fee, shall remain accessible to the student as long as the license provided by the publisher/content owner allows. Licenses for electronic resources, which are utilized in most courses at Rasmussen, are typically active for a length of 180 days to two years, dependent upon the publisher. The remaining amount of the prepaid tuition will be refunded on a prorated basis computed to the date of discontinuance.

D. Academic Impact of a Military Leave

- If the student takes Military Leave on or before the close of the drop period the course(s) will be dropped without being recorded on the student's transcript and tuition will not be charged.
- A grade of "WL" will be recorded for each course for which a student was registered if the student takes Military Leave from the University at any time following the course drop period of the quarter. The student will need to repeat any course for which the WL grade was awarded.
- If a student completes any Term 1: 5.5-week course(s) but then has to take a Military Leave in Term 2, the letter grades they earned for the Term 1 courses will remain on their transcript.
- All academic probations, warnings, and dismissals remain applicable to students who take a Military Leave. If a student is already on probation or is placed on probation while on leave, the conditions of their probation are continued to the quarter in which they return to the University.
- The standard Rasmussen transfer of credit policies apply for courses taken elsewhere while on leave to any academic work done by the student while on Military Leave from the University.

E. Long Term Military Leave for More Than Two Quarters In Length

Students on a Military Leave that extends more than two academic quarters and their spouses may withdraw without penalty from any or all classes in which they are enrolled, even if the established deadline for withdrawal has passed. These students are entitled to a full refund of tuition and mandatory fees for the term, subject to applicable laws governing federal or state financial aid programs and allocation or refund as required under those programs.

F. Short Term Military Leave for Up to Two Quarters In Length

Military service members on Military Leave that is two or less academic quarters in length may withdraw without penalty from any or all classes in which they are enrolled, even if the established deadline for withdrawal has passed. Each leave may be for up to two consecutive quarters.

G. Time Limits on Military Leave

There is no limit to the total number of Military Leaves that a student may accumulate during their enrollment with the University. However, the student is not guaranteed readmission into their program under this policy if the cumulative length of all Military Leave exceeds five years. For the purpose of determining the cumulative length of Military Leave, the University does include Military Service:

- That is required, beyond five years, to complete an initial period of obligated service;
- During which the student was unable to obtain orders releasing the student from a period of service in the uniformed services before the expiration of the five-year period and such inability was through no fault of the student; or

- Performed by a member of the Armed Forces (including the National Guard and Reserves) who is ordered to or retained on Active Duty under:
  - 10 U.S.C. 688 (involuntary active duty by a military retiree);
  - 10 U.S.C. 12301(a) (involuntary active duty in wartime);
  - 10 U.S.C. 12301(g) (retention on active duty while in captive status);
  - 10 U.S.C. 12302 (involuntary active duty during a national emergency for up to 24 months);
  - 10 U.S.C. 12304 (involuntary active duty for an operational mission for up to 270 days);
  - 10 U.S.C. 12305 (involuntary retention on active duty of a critical person during time of crisis or other specific conditions);
  - 14 U.S.C. 331 (involuntary active duty by retired Coast Guard officer);
  - 14 U.S.C. 332 (voluntary active duty by retired Coast Guard officer);
  - 14 U.S.C. 359 (involuntary active duty by retired Coast Guard enlisted member);
  - 14 U.S.C. 360 (voluntary active duty by retired Coast Guard enlisted member);
  - 14 U.S.C. 367 (involuntary retention of Coast Guard enlisted member on active duty);
  - 14 U.S.C. 712 (involuntary active duty by Coast Guard Reserve member for natural or man-made disasters);
  - Any provision of law because of a war or national emergency declared by the President or Congress, as determined by the Secretary concerned;
  - A determination by the Secretary concerned in support of an operational mission for which personnel have been ordered to active duty under section 12304 of title 10, United States Code;
  - A determination by the Secretary concerned in support of a critical mission or requirement of the Armed Forces (including the National Guard or Reserve);
  - Chapter 15 of title 10, United States Code, or section 12406 of title 10, United States Code (i.e., called to respond to an invasion, danger of invasion, rebellion, danger of rebellion, insurrection, or the inability of the President with regular forces to execute the laws of the United States).

H. Readmission Procedures

- Students on Military Leave must notify the University of their intent to return no later than three years after the completion of their Military Service. A student who is hospitalized or convalescing due to an illness or injury incurred or aggravated during the performance of their Military Service must notify the school of their intent to return within two years after the end of the period needed for recovery from the illness or injury.
- The student must contact their Academic Advisor at least one week prior to the first day of the quarter/term in which the student wants to return to complete the reentry process.
- Students who give notice of intent to reenroll will begin at the start of the next term/quarter, unless the student chooses to delay their reenrollment to a later term or unusual circumstances require the University to admit the student at a later date.
- The student will be allowed to return to the same program under the catalog that the student was enrolled in prior to the military leave, unless such program is no longer offered by the University. If the program is no longer offered, the student will be allowed to return to the program that is most similar to the program in which they were enrolled at the time of their Military Leave.
- A student may request to enroll in a different program; however, credits earned by the student in their prior program may not transfer to the new program.
- For the first academic year after a student reenrolls in the same or similar program, the student will be charged the same tuition rate as their original program at the time the student was last enrolled or the new tuition rate, whichever is lower. However, the student may be charged the current tuition if veteran’s education benefits or other servicemember benefits will pay the total amount of tuition and fees.
- For subsequent academic years for a student admitted to the same program, or for the current academic year if the student is admitted to a different program, the University will assess tuition and fee charges consistent with the tuition and fees other students in the program are assessed for the current academic year.
- Rasmussen reserves the right to request documentation from the student demonstrating that the student has not exceeded the time limits on Military Leave described in Section G and that the student’s eligibility for readmission has not been terminated as described in Section I.

I. Termination of Eligibility for Readmission

A student's eligibility for readmission to the University under this policy terminates upon the occurrence of any of the following events:

- A separation of such person from the Armed Forces (including the National Guard and Reserves) with a dishonorable or bad conduct discharge.
- A dismissal of a commissioned officer permitted under section 1161(a) of title 10, United States Code by sentence of a general court-martial; in commutation of a sentence of a general court-martial; or, in time of war, by order of the President.
- A dropping of a commissioned officer from the rolls pursuant to section 1161(b) of title 10, United States Code, due to absence without authority for at least three months; separation by reason of a sentence to confinement adjudged by a court-martial; or a sentence to confinement in a Federal or State penitentiary or correctional institution.

Short Term Leave Policy

A Short Term Leave status is a form of administrative withdrawal that may be initiated by Rasmussen University part of American Public University System (Rasmussen) under the following circumstances when the student has expressly indicated an intent to return in the next scheduled quarter/term:

- A student who has completed all of their registered courses in the quarter/term prior to the end of the quarter/term.
- A student who has no viable options to maintain at least a part-time student status through the end of a quarter/term due to a Rasmussen-initiated policy or decision to cancel a course, temporarily suspend a student's participation in a course or program, temporarily suspend a program's operation, or temporarily close a campus location.
- A student enrolled in a competency-based education (CBE) program who completes all competency-based courses prior to the end of the quarter/term and has no other courses registered for that quarter/term.
- A student residing within an area declared a disaster by a state or federal agency may initiate a request. The address on file in the student's record is the address that will be used to determine eligibility.
- A student who experiences the death of an immediate family member (spouse/domestic partner, children, siblings, grandparents, grandchildren, parents/guardians) and is unable to complete the quarter in which they are currently enrolled. Documentation will be required.

A student in a Short Term Leave status is reported as withdrawn to the U.S. Department of Education, and any outstanding student loans will enter the applicable grace period/repayment period. A student who is placed on Short Term Leave may have their federal financial aid recalculated per the Return of Title IV Funds Policy. This recalculation may result in the return of federal financial aid funds to the U.S. Department of Education and result in a balance owed to the University. A student placed on Short Term Leave may return to the University on the next scheduled quarter/term start date and continue their studies. A student on Short Term Leave who does not resume their studies by the sixth business day of the subsequent term will be withdrawn from Rasmussen.

Empowered Learning Competency-Based Education (CBE) Programs
A student receiving Title IV funds (federal financial aid) who ceases to be enrolled through the end of a quarter/term, including students who complete all competency-based courses prior to the end of the quarter/term and have no other courses registered for that quarter/term may be administratively withdrawn and placed in a Short Term Leave status if it is known that the student intends to return at the start of the subsequent term/quarter.

Exit Interviews

Students contemplating the termination of their education at Rasmussen University part of American Public University System (Rasmussen) should contact the Dean of Nursing/Nurse Administrator, Campus Executive Director, or Academic Advisor.

All students receiving Title IV federal financial aid who are graduating or withdrawing are required to complete a mandatory online exit counseling session. The University provides students with the information needed to complete this online mandatory exit counseling session within 30 days of the student's withdrawal date. If a student is graduating, the information is provided prior to graduation. During this exit counseling session, students receive information regarding their loan(s), including address and telephone numbers of lenders, deferment requests, a list of qualifications, a sample repayment guide, loan consolidation information, and a review of loan terms.

Rasmussen has partnered with ECMC Solutions to provide guidance and assistance throughout the student's loan. Visit https://www.ecmcsolutions.org/ to schedule a one-on-one appointment.

Rasmussen reserves the right to withhold the release of academic information and other records pending the settlement of any amount due to the University.
